THE MONETARY TIMES

Trade Review and Insurance Chronicle

OF CANADA

ESTABLISHED 1867

A Weekly newspaper devoted to the interests of Finance, Commerce, Manufacturers, Insurance, Banks, Railways, Navigation, Mines, Investment, Public Companies, and Joint Stock Enterprises.

Index to Volume 47

JULY — DECEMBER — 1911

HF
1
M66
v.47

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal, and The Toronto Journal of Commerce.

"As Old as Confederation"

INVESTMENT AND LOAN COMPANIES

SEASONED SECURITIES

This Corporation was established in 1855, and for more than fifty-six years has been steadily growing in strength and in the confidence of the depositing and investing public. In that long period there have been "hard times" as well as seasons of prosperity, but the moneys entrusted to our keeping have always been ready when called for.

The Corporation's Bonds are, therefore, a "seasoned security." They are issued in accordance with the restrictive provisions of the Corporation's Charter, and also those with which the Legislature circumscribes the investment of Trust Funds. Nine and One-Hall Million Dollars of Shareholders' money are a further pledge of their security.

These Bonds may be had in sums of One Hundred Dollars and upwards.

ROYAL COMMISSION ON EMPIRE TRADE.

Whatever may be said against the attitude of Sir Wilfrid Laurier at the Imperial Conference, one is bound to give him credit for the excellent proposal that a Royal Commission should be appointed to visit the overseas dominions and report on trade and resources and the best methods for their development. Fortunately the Conference agreed to this suggestion with the addition of an amendment proposed by Honorable Mr. Harcourt, adding the words, "and by what methods consistent with the existing fiscal policy of each, the trade of each part with others may be improved and extended."

Sir Wilfrid also suggested that the Dominions should be given the right to withdraw from British treaties adopted. His resolution, which was carried, was as follows:—"That the Home Government be requested to open negotiations with the several foreign Governments having treaties which apply to the oversea Dominions with a view to securing the liberty for any of those Dominions which may so desire to withdraw from the operation of the treaty without impairing the treaty in respect of the rest of the Empire."

According to the Canadian Associated Press cable, which sent an excellent summary of the discussion on this matter, Sir Wilfrid said the proposals had been before the public for some time, and had given rise to various comments, some on one side and some on the other. The necessity for what he proposed might be shown by the experience of Australia, who, when they wished to give preferential treatment to British products carried in British ships, were prevented from so doing by the most favored nation clause in certain treaties. A similar difficulty arose when Canada wished to give preference to the Motherland. There were twelve treaties in existence containing that clause. It had been suggested that the proposal would destroy the principle of commercial unity, but that principle did not at present exist. The United Kingdom had a free trade system and all the Dominions had fiscal policies based on the principles of raising a revenue by customs duties, but no two of their tariffs agreed.

Instead of commercial unity there was commercial diversity, consequently it was not difficult to understand that when the United Kingdom made a treaty which suited its own requirements that treaty might not suit the requirements of the Dominions. For very many years, at least fifteen, since he had been in office, the Home Government when negotiating commercial treaties had followed the policy of not including any of the Dominions without their consent. What he suggested was that the old treaties should now be brought into line. It was not an argument for separation, but would make for closer union. The proposal should be coupled with three principles:

(1) It should be the first effort of the self-governing Dominions to develop their trade as far as possible with the Mother Country.

(2) They should not confine their efforts to the British markets, but should be allowed, as their second object, to increase their trade with other nations.

(3) Any benefits given by the Dominions to other nations should be given also not only to the Mother Country, but to other Dominions of the Empire.

The right of withdrawal on the part of the Dominions is naturally a serious factor in British Empire building, but it is probably an inevitable development. What new questions it may raise in the future, is difficult to foretell. Any ill effects that might prove the result of this change would probably be counterbalanced by the achievements which should follow the appointment and report of a Royal Commission to visit the overseas Dominions, knitting together the commercial ties of the Empire.

British Empire trade is a powerful factor. Three hundred million people are buying and selling in a territory of eleven million square miles. By means of co-operation, there should be extraordinary commercial possibilities. A few statistics will serve as illustration. The total imports of the British self-governing dominions, crown colonies, possessions and protectorates in 1909 amounted to 366 millions sterling, which was only exceeded in 1907, when the record figure of 378 millions was reached. As compared with 1908, there was an increase of about 28 millions, and the expansion in the figures since 1899 amounts to no less than 140 millions. Taking the comparison with 1908, the biggest advance is shown in the case of Canada, whose imports increased from £63,700,000 to £80,500,000, and, looking back over the decade, Canada may also be said to have made the greatest progress, since in 1899 her imports only amounted to £33,400,000. The Dominion was then a less important consumer than the Commonwealth of Australia, whose imports amounted to £34,300,000, but the tables have now been turned, as, though the latter did fairly well, the last record is for only £51,200,000, an increase during the ten years of £16,800,000. South Africa's progress was, of course, checked by the Boer war, but the substantial gain of £3,600,000 was shown in 1909 over the preceding year, and its imports are now close upon thirty millions. Of smaller account, but still representing an important branch of trade, are the West African colonies, and the increase here has been very steady. The total imports of these dependencies have more than doubled during the decade, and now reach £8,700,000. The West Indies import practically the same amount, but their progress has been much less rapid, and, relatively to the other colonies, they may be said to have lost ground. The great importance to British merchants and manufacturers of the expansion in colonial purchasing power shown by the above figures lies in the fact that a very large share of the trade is done with Great Britain, but there is opportunity for greater things.

Out of the 366 millions of imports of the combined colonies, no less than 163 millions are purchased from Great Britain. A further 58 millions represent interchange traffic between different British possessions, and only 145 millions are taken from foreign countries. An advance of 23 millions in the shipments from British India, combined with smaller increases from Ceylon and our other possessions in the Middle East, was the outstanding feature. In proportion to its total trade Canada came next with an advance of £8,200,000, while South Africa, which had an increase of £5,300,000, came third. The West Indies only exhibited a moderate gain of £800,000, but from West Africa the exports increased from £7,000,000 to £8,300,000, an expansion which is relatively greater than in the case of any other country except India. The latter, as is well known, has made more progress toward prosperity during the last few years than any of our possessions. To some extent this represents a recovery from a period of abnormal depression. The best record for sustained advance in commercial importance is proudly shown by Canada.

The area of the British Empire is 11,199,000 square miles, and its population 343,748,000. In 1909 the revenue of India amounted to £74,374,500 and the expenditure to £74,084,700; the revenue of the Australian Commonwealth was £40,881,274 and the expenditure £40,404,240; of Canada and Newfoundland £21,470,603 and £16,929,477. The amount of public debt in India is £290,156,260, Australia £240,628,641, Canada and Newfoundland £101,486,811, and the West Indies £6,019,992. The value of the imports in 1909 was as follows: India £106,781,239, South Africa £29,842,056, Canada and Newfoundland £82,891,312; total, £366,286,000. From the United Kingdom goods to the value of £66,628,565 were sent to India, £16,853,996 to South Africa, £6,462,000 to West Africa, £20,180,118 to North America, and £3,084,906 to the West Indies. The colonial exports amounted to £403,785,000, India leading with £129,472,024.

The quantity of wheat produced in British India increased from 200,866,101 bushels in 1895 to 357,940,800 in 1909. In Australia the increase was from 18,270,348 to 90,413,597 bushels. From the colonies the exports to the United Kingdom included the following: From Ceylon 189,368,905 pounds of tea to the value of £5,889,505, 1,796,734 cwt. of sugar (398,830 cwt. from Mauritius, 646,988 cwt. from the West Indies, and 664,440 cwt. from British Guiana), 60,350,752 pounds of raw cotton from India, 110,210 pounds from Ceylon, and 856,639 pounds from the Nyasaland Protectorate, 244,521,904 pounds of wool from Australia, 180,908,005 pounds from New Zealand, 62,800,179 pounds from the Cape of Good Hope, and 57,454,061 pounds from India.

The Empire's mineral products included the following: India 574,816 ounces of gold, 83,456 tons of iron ore, 83 tons of tin, 11,870,064 tons of coal; Australia 2,967,354 ounces of gold, 1,718,005 ounces of silver, and 8,203,221 tons of coal; Transvaal 7,295,108 ounces of gold; and Canada 27,878,590 ounces of silver. In 1895 the amount of silver produced in Canada was 1,578,275 ounces.

Having secured assent to the appointment of a Royal Commission to study the many problems of trade within the Empire, the next important phase is the personnel of the Commission. The Monetary Times is inclined to believe that a representative commission of somewhat goodly numbers should be appointed. The labor will be heavy and the scope of the investigation extensive. Among the members there must be men who know the commercial triumphs, failings, advantages, of the Motherland and of the Dominions. There are few men who can speak with intimate knowledge of all parts of the Empire. This would suggest the appointment of representatives from each Dominion. Taking Canada as an example, it might prove advisable to appoint a member of the Commission from each province, as well as representatives of the Dominion Government.

There are prominent statesmen in England who naturally qualify for appointment on the Royal Commission. In addition, we should like to see also as members the three British Trade Commissioners now working in the interests of British trade in Canada, Australia and South Africa respectively. Another gentleman whose services would be of great value is Mr. H. W. Just, of the Colonial Office, who has intimate knowledge of conditions in Great Britain, South Africa and Canada. Other names could be mentioned, but these suggestions are made in the hope that the number of gentlemen constituting the Commission will not be unduly limited.

Sir Wilfrid Laurier's suggestion is one of the most important ever made in connection with British Empire trade and commerce. We want a good Commission, an extensive and detailed report and, more than that, early action by the Empire constituents upon the report.

Trade within the Empire is worth cultivating. Great Britain may well give serious consideration to the problem of commerce on the North American continent. If there is not created a substantial check, the trade between two countries on the North American continent will grow enormously to the detriment of Empire trade.

CAPITAL INVESTMENTS IN CANADA

—VIII.—

MUNICIPAL BORROWINGS IN LONDON

By Fred. W. Field.

The Canadian municipalities have been heavy borrowers, as the following summary of flotations in London, from January, 1905, to April, 1911, shows:—

City.	Amount.
Winnipeg, Man.	£2,827,642
Montreal, Que.	2,523,800
Vancouver, B.C.	1,968,900
Edmonton, Alta.	802,100
Calgary, Alta.	583,200
Maisonneuve, Que.	879,000
Westmount, Que.	500,000
Toronto, Ont.	394,100
Victoria, B.C.	277,300
Hamilton Ont.	204,100
Saskatoon, Sask.	188,600
Regina, Sask.	318,300
Quebec, P.Q.	407,621
Fort William, Ont.	165,100
Ottawa, Ont.	156,900
St. John, N.B.	115,000
Port Arthur, Ont.	110,700
Sherbrooke, Que.	102,700
Moose Jaw, Sask.	101,300
	£12,626,363

Eighteen cities and towns have obtained £12,626,363. This is more than £4,000,000 in excess of the provincial government's total loans in the six years' period. Winnipeg and Montreal have been the most frequent visitors to the overseas market, and have obtained the largest aggregate sums. Vancouver loans were not far short of £2,000,000, while Edmonton and Maisonneuve obtained a little less than £1,000,000 each. The loans of Maisonneuve and Westmount together amounting to £1,379,000 should be added to those of Montreal, as they are now suburbs of that city. This gives Montreal total borrowings of £3,902,800, placing that city at the head of the list. It is interesting to examine these borrowings by provinces as in the following table:—

Province.	Amount.
Quebec	£ 4,413,121
Manitoba	2,827,642
British Columbia	2,246,200
Alberta	1,385,300
Ontario	1,030,900
Saskatchewan	608,200
New Brunswick	115,000
Total	£12,626,363

Quebec's Heavy Borrowing.

This is a somewhat surprising result, it being generally thought that municipal borrowings in the prairie provinces were heavier than elsewhere. Quebec province is more than £1,000,000 ahead of Manitoba, which has the next largest total. Montreal contributes the best part of the Quebec provincial record Ontario's loans are half those of British Columbia, and Saskatchewan's borrowings amount to half those of Alberta. New Brunswick is the only Maritime representative with a small loan of £115,000 obtained by St. John city. It would seem that Montreal, Winnipeg and Vancouver especially should examine their borrowing position with great care, while Edmonton's figures are also sufficiently large for caution. The entire municipal situation in relation to borrowing should be carefully analyzed by the contributing cities.

The following are the details of municipal flotations in London, by years:—

1905 (City).	Amount.
Quebec	£ 78,000
1907.	
Winnipeg	£327,642
Regina	111,000
Edmonton	139,400
Vancouver	244,900
	£822,942
1908.	
Regina	£113,700
Edmonton	187,400
Montreal	1,000,000
Winnipeg	1,500,000
Quebec	113,921
Saskatoon	100,000
Calgary	133,000
Vancouver	405,000
Victoria	159,800
Sherbrooke	102,700
St. John	115,000
	£3,930,521
1909.	
Montreal	£ 400,000
Winnipeg	500,000
Calgary	124,800
Ottawa	156,900
Toronto	394,100
Vancouver	286,400
Edmonton	187,300
Fort William	60,000
	£2,109,500
1910.	
Calgary	£ 325,400
Montreal (town of St. Louis)	123,800
Winnipeg	500,000
Edmonton	288,000
Vancouver	453,600
Fort William	105,100
Montreal	1,000,000
Moose Jaw	101,300
Saskatoon	88,600
Regina	93,600
	£3,079,400
1911 (to April).	
Westmount	£ 500,000
Hamilton	204,100
Maisonneuve	879,000
Victoria	117,500
Port Arthur	110,700
Vancouver	579,000
Quebec	215,700
	£2,606,000

Conditions in municipal finance have been similar in recent years, the demand for funds having continued with but slight variation. Municipalities generally are financing current requirements only, the majority having, during 1908, liquidated accumulated bank loans by issuance of term debentures.

Question of Sinking Funds.

Certain cities and towns have been somewhat lax in the past regarding the proper provision of sinking funds and the preparation of money by-laws that they may be absolutely indisputable one year or thirty years hence. Great Britain is apparently able, with its unique investment judgment, to make due allowance for those shortcomings which heretofore have not reacted considerably upon Canadian municipal credit. This may not always be so. On the other hand, it is only fair to note that the chartered banks and bond houses, usually the sponsors of these particular flotations, have invariably acted as a valuable influence to the maintenance of good credit. The municipalities also have shown much more disposition to regard their credit as a delicate and important factor. Room for this criticism, therefore, shortly should not exist.

Municipal Bonds Sold Privately.

Sixteen Canadian bond houses have interested twelve millions of dollars of British capital in Canadian municipal bonds. Of these, four dealers have supplied me with figures for five years. Some have only recently interested the English investor. Allowing for that fact, the average annual investment is perhaps three million dollars. The Old Country buyer apparently prefers straight term or sinking fund bonds. In that way the principal is not disturbed. Occasionally instalment school bonds have been sold, but not to any great extent. The method of repayment apparently does not suit the market well. The demand for municipal bonds would probably have been larger but for the fact that the return of the higher class securities is apparently not considered large enough.

Par or at a Premium.

Some selling agencies think that the English market desires municipal bonds that can be placed at par or at a slight premium rather than at a discount. The experience of certain firms is that municipal bonds selling at a discount which would give decidedly good yields are not acceptable, no matter how excellent they may be. The credit of Canadian municipals in London is fairly high and the outlook for an increased demand is good. The investor has a fair appreciation of the rapid municipal expansion, recognizing that considerable sums are needed for the financing of this development. An improvement in the British call for Canada's municipals will perhaps to some extent depend upon the united action of Canadian municipalities with regard to their borrowing policy.

Mr. E. R. Wood recently drew attention to the fact that Canadian municipalities are realizing the importance of placing their finances on a sound business basis, and adopting a conservative policy in regard to all expenditures. For some years past the rapid growth of Western Canada placed the progressive cities and towns under the necessity of making heavy capital expenditures, in order to provide those utilities demanded by modern standards of health and comfort.

Credit of Municipalities.

To the conservative investor these frequent loans were not always acceptable, but to-day the credit of our Western municipalities stands high. There is a growing public sentiment in Western Canada against extravagance in municipal finances. Nothing is more indicative of the high standing of Western municipal securities than the growing favor with which they are being regarded by the British investing public. A few years ago only the obligations of the largest centres in Western Canada could be placed in the London market, while, during the present year, the British investor has taken in quantity the debentures of those smaller cities and towns whose location and natural advantages give promise of rapid and permanent expansion.

Eastern municipalities have, as a rule, pursued their usual conservative policy in making new expenditures, and, as a result, their debentures have been readily absorbed both at home and abroad.

Loans in Great Britain.

Canada depends largely upon Great Britain for municipal loans. The following table, showing Canadian municipal issues in 1910, will be sufficient evidence:—

Canadian Municipal Issues, 1910.

Eastern municipalities issued	$19,120,660
Western municipalities issued	15,826,580
School districts issued	801,450
Total	$35,748,690
Sold in Great Britain	$23,355,128
Sold in Canada	12,043,562
Sold in the United States	350,000
	$35,748,690

Of the total, $35,748,690 municipal issues, therefore, emitted by 141 Western municipalities and 160 Eastern municipalities last year, 65.30 per cent. was absorbed in Great Britain, 33.70 per cent. in Canada and 1 per cent. in the United States.

Sales Unlikely in France.

In some quarters hopes have been raised that Canadian municipal bonds may be introduced on the Bourse in the near future. It seems improbable that the French people will ever become active bidders for the bond issues of Canadian cities. The market for Canadian bonds is mainly in Great Britain. The people there are familiar with this type of issue, and appreciate conditions governing the value of such issues. Then again there are a number of people in England, large banking firms and private investors, who make a specialty of such issues and will bid prices which the French investor would regard as earning too low an interest rate for him to place his money there. Further, the French investors have most of their resources for this type of security taken up with the European national and municipal issues. Especially is this true in regard to the Russian loans which have been floated during the past two years. All of those have almost entirely been underwritten by French firms. They are familiar with these stocks, and hence they like to deal with them.

In connection with the buying by Great Britain of municipal securities it must be remembered that the home demand is large. Banks, insurance companies and numerous other financial institutions are heavy investors in the Dominion's municipals. The strength of the market is well proved by the fact that despite the recent tendency to see a higher yield on capital, municipals offering a comparatively small return and good security have attracted more attention during the latter part of the six years' period than during the former part.

OTTAWA'S FINANCIAL POSITION.

Ottawa's liabilities are a little more than a quarter of a million dollars over its assets as based on figures prepared by City Treasurer Ellis in connection with the sale of city bonds. The assets are put down at assessed value but as a matter of fact if the city was to sell its lands and buildings at market value the assets would realize considerably more than the liabilities.

The statement is for June, 1911, and shows:

Assessed taxable value for year 1910	$62,287,155.00
Population, June, 1911	90,000
Liabilities:	
Corporation debentures	$4,186,438.81
Waterworks debentures	981,836.70
Local improvement debentures	1,604,563.47
Public school debentures	761,288.79
Collegiate institute debentures	325,000.00
Electric light debentures	430,000.00
Mortgages	143,625.00
Bank of Ottawa	337,568.75
Total liabilities	$8,770,321.52
Assets:	
Sinking fund investments	$1,297,227.94
Sinking fund, cash in bank	1,054,056.96
Total sinking fund	$2,351,284.90
Waterworks system	2,600,000.00
Electric light system	350,000.00
Land, buildings, furniture, etc.	1,287,000.00
Public schools and collegiate institute property.	1,300,000.00
Advances on local improvements	564,626.01
Taxes and water rates in arrears—estimated	50,000.00
Total assets	$8,502,910.91

The value of bridges, sewers, permanent pavements, sidewalks, and other local improvements is not included in this statement of assets.

The taxation rates are: General rate, 14 mills per dollar; hospital rate, 1 1-20 mills; collegiate institute rate, 1 1-10 mills; public school rate, 5 9-10 mills; separate school rate, 10 mills per dollar; or, the rates are; public school supporters, $21.55 on each $1,000 of assessment; separate school supporters, $25.65 on each $1,000 of assessment.

Mr. Henry J. Powell, president of the National Association of Life Underwriters, will address the Canadian Association at Winnipeg during the convention there. Mr. Powell was the guest of honor at the recent annual banquet of the Colorado Association of Life Underwriters. He has also visited the Utah and the Los Angeles Associations. On Thursday, the life insurance men of San Francisco met him and on Monday he is due at Portland; Wednesday at Spokane, and Friday at Seattle. The Canadian life underwriters will welcome him at Winnipeg on July 14th, and he will be at Minneapolis on July 17th.

MAY BANK STATEMENT

Preparations are Being Made for Crop Movement — Loans are Curtailed — Deposits Continue to Increase.

	May, 1910.	April, 1911.	May, 1911.	Year's Inc. or Dec.	Month's Inc. or Dec.
Deposits on demand	$256,651,635	$281,964,369	$298,784,206	+ 16.4	+ 5.9
Deposits after notice	524,680,979	555,822,930	562,209,148	+ 7.1	+ 1.1
Current loans in Canada	643,246,518	712,032,758	708,093,677	+ 10.0	— 0.5
Current loans elsewhere	38,014,462	33,783,963	33,918,314	— 10.7	+ 0.3
Call loans in Canada	58,159,050	57,832,690	57,709,853	— 0.7	— 0.2
Call loans elsewhere	125,480,266	84,535,653	88,745,080	— 29.2	+ 4.9
Circulation	77,194,344	83,647,088	81,862,218	+ 6.0	— 2.1

The above are the principal items and changes in the May statement of the chartered banks. It has been suggested in some quarters that our financial institutions might experience some difficulty in financing the crop movement this fall. The increased acreage and the unanimous predictions by many authorities that the Western crop this year may total 200,000,000 bushels, indicate that a large amount of money will be required in the autumn. There appears to be little cause for apprehension that the banks will not be able to do their part in the crop movement, as they have done successfully for many years. Preparations for the movement are being made early. They were reflected in the April bank statement and are more strongly defined in the May statement. Both current and call loans in Canada show a contraction.

The following table shows the course of domestic credit during the past few months:—

Loans.	Current in Canada.	Call in Canada.
1910—May	$643,246,518	$58,159,050
June	649,145,920	61,598,958
July	653,008,336	60,081,256
August	657,813,770	60,427,996
September	668,976,522	62,428,576
October	679,820,039	64,561,641
November	677,617,478	62,866,513
December	677,064,829	63,983,912
1911—January	682,506,695	60,200,781
February	689,234,781	59,132,692
March	710,604,072	58,369,712
April	712,032,758	57,832,690
May	708,093,677	57,709,853

Only three times in the twelve months have current loans in Canada declined, in November and December last year and during the past month, when they dropped $4,000,000 or 0.5 per cent. Compared with the figures of May, 1910, commercial credit at home was greater last month by $69,000,000 or 10 per cent. Call loans in the Dominion, chiefly to brokers, showed a decline during May of 0.2 per cent., or about $100,000. The following figures give an idea of the expansion of bank loans in Canada during the past five years:—

	May, 1907.	May, 1908.	May, 1909.	May, 1910.	May, 1911.
Current loans in Canada	$584,707,830	$ 537,773,042	$528,313,141	$643,246,518	$708,093,677
Current elsewhere	25,412,267	22,521,334	34,487,649	38,014,462	33,918,314
Call in Canada	49,886,386	41,143,446	49,771,929	58,159,050	57,709,853
Call elsewhere	52,281,678	48,662,327	124,877,955	125,480,266	88,745,080

Domestic current loans, amounting to $584,000,000 were higher in May, 1907, than in 1908 when they totalled $537,000,000, or in 1909 when the sum was $528,000,000. Last year, the amount was $643,000,000, and last month $708,000,000. Call loans in Canada five years ago aggregated nearly $50,000,000. They showed a heavy drop in May, 1908, to $41,000,000, but last month stood at over $57,000,000. Call loans abroad also showed a decline in May, 1908, of about $4,000,000 from the figures of the previous year, when they amounted to $52,000,000. Last month's call loans abroad showed a large decrease from the figures of May, 1910. In that month they amounted to $125,000,000, while last month they had declined to $88,000,000, a decrease of 29.2 per cent.

Deposits continue to expand, as shown in the following table:—

	On demand.	After notice.
1910—May	$256,651,635	$524,680,979
June	263,417,539	534,432,054
July	251,638,522	538,384,371
August	256,613,172	545,357,452
September	273,529,461	545,630,667
October	280,838,612	549,016,725
November	289,759,025	551,113,835
December	280,910,695	544,220,710
1911—January	270,178,480	549,774,479
February	268,360,503	551,424,373
March	278,171,792	553,032,466
April	281,964,369	555,822,930
May	298,784,206	562,209,148

Last month's deposits on demand exhibit a gain over the previous year's figures of 16.4 per cent., and deposits after notice of 7.1 per cent. During the month of May just passed the demand deposits gained 5.9 per cent., and those after notice 1.1 per cent. The following figures illustrate the course of the deposits' account during the past five years:—

	On Demand.	After Notice.	Total.
1907	$172,065,976	$415,476,948	$587,542,924
1908	153,901,379	398,177,820	552,079,199
1909	216,916,294	453,599,117	670,515,411
1910	256,651,635	524,680,979	781,332,614
1911	298,784,206	562,209,148	860,993,354

Since May, 1907, the deposits on demand have increased from $172,000,000 to $299,000,000, a gain of 73 per cent. Those after notice have risen from $413,000,000 to $562,000,000, a gain of 35 per cent. In the same period total deposits changed from $587,000,000 to $861,000,000, an increase of $274,000,000, or 46 per cent.

◆

FRUIT CROPS.

A fruit crop bulletin issued by the Department of Agriculture says:

The whole of the month of May and the first week of June, in Eastern Canada, was much too dry and hot for ideal conditions for fruit. Nevertheless, the growth was fair, and rain came soon enough in June to prevent any serious check.

The fruit trees this season remained in bloom only a few days. The average period, from the first appearance of bloom until the last petals drop, is about ten days, varying, of course, with the season and varieties. This season it would not average more than three days. Many of the correspondents have accounted for this by the extreme heat without moisture.

Beekeepers have felt the want of fruit bloom in the neighborhood of large orchards, and, no doubt, pollination was comparatively imperfect, at least as to the number of blossoms pollinated. Nevertheless, the set is fairly good in the fruit crop generally; but correspondents in many cases are reporting or predicting a heavy drop. It is significant that in the states to the south, where vegetation is more advanced, this has actualy taken place, and a report from Virginia says: "Conditions in this state have altered considerably since our last report. There has been a very heavy drop, and the prospects now are not nearly so good as at the same time last year."

Rain has fallen in generous quantities during the last ten days in Eastern Canada, and the growth has been phenomenal. The weather conditions in British Columbia are good.

T. C. BOVILLE,

Deputy Minister of Finance.

TRADE WITH SOUTH AMERICA

By Sir George Ross

By the establishment of the Department of Trade and Commerce a responsible minister is now charged with the supervision of the commerce of Canada and the opening of new fields for its surplus products. Substantially, Canada never had but two markets for her products, viz., Great Britain and the United States. Out of a total export trade in 1911 of $297,196,365, Great Britain received $137,158,711 and the United States $119,203,201, or together over 80 per cent. of all Canadian exports.

Outside the United Kingdom Canada's best customer within the Empire was the British West Indies, which received $4,590,736 of our exports, and next was Australia, which received $3,925,592. Of foreign countries, our best customer outside the United States was the Argentine Republic, which received $3,021,728 of our exports. A curious circumstance of our trade within the Empire is that, omitting the United Kingdom, our exports and imports nearly balance each other, our exports being $17,177,163 and our imports $19,548,170. Our trade with foreign countries, however, exhibits very different results, the exports being $142,860,491 and the imports $332,466,676, or, omitting the United States, our exports were $23,657,290 and our imports $47,521,937. Now, this condition of trade should not be allowed to continue, as it involves the payment of this excess of imports in gold instead of in natural or manufactured products.

Development of Export Trade a Gratifying Feature.

That a vigorous effort is being made to develop our export trade all over the world is one of the most gratifying features of modern commercial conditions. And what the British Board of Trade has been actively engaged in doing since the days of the Commonwealth, Canada is now endeavoring to accomplish through the Department of Trade and Commerce. The example of the United States in a similar direction is also worthy of notice.

Ever since the formation of the Republic her consuls and consular agents have been charged with the duty of supplying information regarding trade opportunities in the different countries in which they were stationed. It is true their duties were not exclusively commercial, but their reports to Washington show how largely the commercial side engages their attention. For instance, there are in Canada no fewer than 112 American consuls and vice-consuls ready to report upon any fresh opening for the sale of American goods. Does not this account—apart from the effect of the high tariff against imports into the United States—for the great disproportion between the imports from and the exports to the United States?

With 112 consuls to inform American manufacturers of the wants of Canada, the Americans sell in our markets goods to the value of $284,934,739; and without any Canadian agent to advertise our goods in the American market, we sell only $119,203,201, although the population of the United States is twelve times that of Canada.

Trade Commissioners for South America.

And this brings me to consider the appointment of two trade commissioners for South America, one to be settled at Buenos Ayres, in Argentina, and the other at Rio de Janeiro, in Brazil. With the rapid development of the Argentine Republic we are not entering any too soon into this new field of competition. Argentina contains a population of nearly seven millions, and is fast becoming a strong competitor with Canada and the United States in the British market, particularly in wheat and cattle. Out of a total trade last year of $722,000,000, Canada's share was only $5,870,000. So soon as we receive the reports of the new Trade Commissioner, now on his way to the capital of the Republic, we will be in a better position to judge what commodities are most in demand, and it will be for Canadian enterprise to meet that demand promptly and efficiently.

With the steady growth of our industries, a foreign market must be found for the surplus of our factories if the Canadian artisan is to find steady and remunerative employment. Argentina and Brazil should take part of this surplus. The United States has seven consuls or vice-consuls in Argentina and twelve in Brazil. And it is worthy of consideration whether a single trade commissioner in each of these countries will be able to meet satisfactorily the necessities of Canadian commerce. We are making a beginning, and that is something to our credit.

◆

WESTERN BOARDS OF TRADE.

The Western Associated Boards of Trade have held a successful convention at Lethbridge, Alberta. A resolution respecting assisted immigration was held over for further discussion. The proposed legislation now pending in the federal parliament giving the authorities power to expropriate such portions of Indian reservations as are contiguous to towns should, in the view of the Western Boards of Trade, be modified so as to make the provisions applicable to all towns of 1,500 or over.

The provincial governments were requested to provide that no townsite or sub-divisions should be registered until the location and general plan had been approved by the Lieutenant-Governor-in-Council, and until a proper plan had been submitted and approved, such plan complying with a general plan adopted in connection with the laying out of townsites and sub-divisions.

The Associated Boards also urged upon the Board of Railway Commissioners the necessity of conducting a thorough investigation into the freight rates on coal in effect in Manitoba, Saskatchewan and Alberta, with the object of ascertaining the reasonableness of such rates.

An important step was taken by recommending the governments of Saskatchewan and Alberta to appoint a commissioner who shall investigate the cause of fires in each of the provinces with a view of placing the responsibility. It was also suggested that the commissioner should be available for the purpose of advising the public regarding the protection afforded by the different fire insurance policies. The Associated Boards also resolved to ask the governments of Ontario, Manitoba, Saskatchewan and Alberta to construct and maintain a direct public highway between the Pacific ocean and the head of lake navigation at Fort William. The following resolution was passed respecting the wild speculation in real estate distant from towns being encouraged by those who have no interest in local development.

"Whereas great injury is being done in Western Canada by the offering for sale of city and town sub-divisions so far removed from areas now developed or likely to be developed for many years, that they possess little or no value as suburban property, thus taking advantage of the confidence in the West, and tending to ultimately discredit legitimate real estate business and values.

"Therefore be it resolved that in the opinion of the convention the practice of placing upon the market outside subdivisions of western cities and selling them under false pretences to people who have no chance to see what they are buying, is most detrimental to the best interests of those cities and that this Association strongly condemns such practice and asks the Boards of Trade throughout Western Canada to discourage it."

Several other resolutions were passed and an interesting address was given by Mr. J. S. Dennis, of Calgary, on the development of Western Canada. The following officers were chosen for the coming year:—President, William Georgeson, Calgary; first vice-president, M. Isbister, Saskatoon; second vice-president, E. D. Martin, Winnipeg; third vice-president, Richard Loney, Moose Jaw; fourth vice-president, A. A. Wilson, Fort William; auditor, H. J. H. Skeith, Lethbridge. J. T. Hall continues as secretary-treasurer. Mr. Hall has just moved to Lethbridge to take up the position of publicity commissioner for that city.

The Imperial Bank of Canada has opened another branch in Vancouver on Cordova street, in the building lately vacated by the Bank of Montreal.

BRITISH COLUMBIA.

Mining Operations Are Active—Lumbermen Say They Have a Grievance—Credit Foncier Franco-Canadien.

(Staff Correspondence.)

Vancouver, June 27th.

People in the coast cities are taking a greater interest in mines than formerly. One of the reasons may be that real estate, with it high prices, demands a larger sum of money to secure returns, and consequently the small investor cannot participate to the same extent that he could when it was half the present price. There is much money in the city available for investment, and, with good mining propositions close at hand, people begin to realize that money can be made in them. All the best mining propositions have been secured by Americans. They did not have real estate to lure them away, and good profits are being made. On the local stock exchanges considerable trading is being done. It is interesting to note the new strike of high-grade ore on the Britannia mine on Howe Sound, not far from Vancouver. Operations have been going on there for some time, and now a large deposit of ore has been reached. It is reported that Japanese are being employed at this mine to keep down costs.

It is regrettable that the strike of the Crow's Nest coal miners is so prolonged. It is seriously interfering with the operation of the Kootenay and Boundary mines, and will also have a serious effect on the fuel supply of next winter. At the last regular meeting of the board of trade of Nelson the subject was introduced by Mr. F. A. Starkey, who said that, as president of the Associated Boards of Trade of Eastern British Columbia, he had wired Hon. Mackenzie King, minister of labor, asking if the government could not guarantee the wages of the men, providing they return to work pending a final settlement. This action had been taken because of the serious aspects of the situation. The minister's reply was that he had insisted on early resumption of sittings of the board. Mr. Starkey said he strongly favored taking action to let the government and the conciliation board know of what serious import the question was to the Kootenay. The suggestion was made by another member to memorialize the government, and that the government should operate the mines while waiting for a settlement. The opinion was also expressed that something was wrong either with the Act or the conciliation board, as both sides played with it, and objected to the admission of evidence which might affect the case in the eyes of the public. It was decided to hold a special meeting to discuss the whole question.

Lumber Owners Think They Have Grievance.

Lumber owners in British Columbia declare they have a good cause for grievance against the Grand Trunk Pacific Railway. The money that is being used to construct this line in Canadian territory is supplied to a very large extent by the people of Canada, yet every bit of lumber used in construction in the West is being bought in the United States. In April through one port of entry 22 carloads, averaging 20,000 feet each, came in from Washington. For the week ending June 7th five passed through Sumas, and for the week ending June 14th three carloads, all for the Grand Trunk Pacific Railway. During May, the figures for which were not secured, more went through. Since then a contract for 8,000,000 feet has been let by the Grand Trunk Pacific to American mills. While business is fair in the lumber industry in British Columbia it is none too good that it cannot handle business of this kind. The owners feel they are entitled to some consideration in the matter, though it is along the same lines that the Dominion government has treated the lumbermen of the West for seventeen years.

British Columbians are looking for more railways. On Vancouver, with the extensions in prospect and the construction of the Canadian Northern, sufficient lines for present needs will be soon in operation. In Vancouver the agitation is afoot for a direct line to the new Peace River country, and data will be gathered and submitted to Premier McBride on his return with the hope that his government will see fit to assist the project in some material way, the suggestion being by guaranteeing the interest on the bonds. The northern empire is a vast tract, and it is felt by business men here that an independent line of railway would do much toward bringing trade this way. In the Kootenay, a campaign for railway extension has been publicly suggested, which indicates the need for more lines. The Kootenay evidently has had enough of existing lines, for the eyes of those interested are on the newer lines, such as the Canadian Northern and the Idaho, Washington and Northern. American lines are not slow to take advantage of any trade opportunities that may offer, and already Spokane capitalists have the survey ready for the construction of a big loop line into the Similkameen district to divert more British Columbia trade to that eastern Washington city.

Credit Foncier Franco-Canadien.

The Credit Foncier Franco-Canadien, which has been in operation in Vancouver since 1907, has now a local board to facilitate the acceptance of securities. It consists of Mr. H. T. Ceperley, of the firm of Ceperley, Rounsefell & Company; Mr. William Murray, manager of the Canadian Bank of Commerce; Mr. T. McCaffry, manager of the Union Bank of Canada, and Mr. A. C. Stirrett, the branch manager of the company. Mr. Stirrett has also under his management the General Administration Society of Montreal, which also has French capital for investment in legitimate enterprises outside of mortgage loans.

The sockeye fishing season opened on June 20th, but with the backward season fish are scarce. Preparations have been made for a pack about the same as that of last year, between 700,000 and 800,000 cases. The total pack, including Alaska, is expected to be about 4,000,000 cases. On the Fraser River the pack is estimated to be 60,000 cases.

◆

NAVIGATION MERGER.

The proposed navigation merger has almost been completed, the arrangements for the consolidation having been ratified at a special meeting of the shareholders of the Richelieu & Ontario Navigation Company, held lately, with the president, Mr. Rodolphe Forget, M.P., in the chair. The basis of consolidation was approved, as well as the increase of the capital and the appointment of the additional directors.

The capital of the company is raised to $10,000,000, the directors having power to exchange shares of the Northern & Inland Company for those of Richelieu. The exchange is to be effected on the following basis:—Northern Navigation stock is to be bought at $125 per share, paid for by Richelieu at par. The Inland is to be bought at an assessed valuation and to be bought by Richelieu stock at $120. Competent assessors have been chosen by the Inland Company and the Richelieu, the Canadian Appraisal Company being chosen arbitrator.

The five new directors named are:—Messrs. John R. Binning, W. Grant Morden, and C. A. Barnard, K.C., of Montreal; Edmund Bristol, K.C., M.P., of Toronto, and James Playfair, of Midland, Ont.

The board as now constituted is as follows:—Lord Furness, of Grantley, hon. president; Rodolphe Forget, M.P., president; Wm. Wainwright, vice-president; Geo. Caverhill, Sir H. M. Pellatt, Wm. Hanson, C. O. Paradis, Hon. E. B. Garneau, H. M. Molson, Hon. J. P. B. Casgrain, A. Haig Sims, Edmund Bristol, M.P., R. J. Binning, James Playfair, C. A. Barnard, K.C., W. G. Morden.

The new issue of $6,500,000 stock of the Richelieu & Ontario merger will be issued very shortly. The issue will be made at par.

◆

BRITISH INVESTORS DEMAND BETTER RATES OF INTEREST.

"Trade conditions in Great Britain never were better, and we are now anxiously waiting to see the realization of the large harvest in Canada, because it means much to the British investor," so said Mr. Henry Brown, general manager of the Century Insurance Company, of Edinburgh, Scotland. Mr. Brown is also a director of the National Finance Company, Limited, of Vancouver, B.C., and is on a business trip to Canada.

The recent failure of several Canadian municipal issues on the London market Mr. Brown attributed to the low rate of interest. If the rate on the issues had been a half to one per cent. more, there would probably have been little difficulty. There are so many countries now borrowing in the London market that the investor is in a much better position to demand a higher rate of interest than he was several years ago. Public utilities bonds are what the British investor favors most. Several industrial issues have proved disappointing, but the investor has generally found that the public utilities are sound.

The Century Insurance Company has much money invested in Canada, and Mr. Brown believes that unbounded prosperity will be experienced throughout the Dominion in the near future.

◆

Mr. J. H. Ewart, of Wellington Street, has been appointed agent in Toronto and district for L'Union Fire Insurance Company, Limited, of Paris, France. This company, whose reputatio is so well assured all over the world, has begun business in Canada, having made deposit at Ottawa. Mr. Maurice Ferrand is Caadian manager, with office at 94 Notre Dame Street West, Montreal.

ORDER OF UNITED WORKMEN IN NEW YORK.

Not Much is Left of It—Examination and Report by the State Superintendent of Insurance.

On complaint from many widows claiming that the $2,000 due to them through the death of their husbands, from the Ancient Order of United Workmen, of the State of New York, a thorough investigation was made by an appointee of Superintendent of Insurance Mr. Wm. H. Hotchkiss as of August 31, 1909, and again as of February 6, 1911.

The state head office of the society has always been at Buffalo, N.Y., until February, 1910, when it was removed to New York, where it is now to be found at No. 306 Areco Building, in 149th street. Louis Drypolcher is the president and F. A. Burnham is the secretary. The following table will serve to show the dissolving condition of the membership during the past five years, though in this respect it does not differ very much from the unfortunate experience of some other fraternal life insurance societies, in that and other states, as well as in Canada. They all eventually travel the same road to extinction with the advent of old age.

RECORD OF THE NEW YORK A. O. U. W. FOR FIVE YEARS.

Year to Dec. 31.	Total Assets.	Total Liabilities.	New Insurance.	Amount in Force.
1906.....	$21,533	$658,068	$118,000	$7,034,359
1907.....	12,101	587,739	22,000	5,620,207
1908.....	10,831	499,584	24,500	4,495,286
1909.....	7,344	442,969	3,000	3,844,357
1910.....	60,615	433,373	None	3,344,000

The liabilities are, nearly every dollar of them, due to widows and orphans, arising from the death of those who were in good standing at the time of their decease.

The Montreal Convention of 1906.

In the course of his official report the New York State Superintendent of Insurance shows that at a convention of the Supreme Lodge, which governs all the State lodges, which convention was held in Montreal in 1906, there was an amendment to the constitution adopted, requiring an additional assessment of fifteen cents per member throughout the entire order, to cover the accumulated and still accumulating excessive death losses. It was a part of the arrangement that each State lodge should pay one-quarter and the Supreme Lodge—headquarters in Meadville, Pa.—should pay three-quarters of those past due excessive losses. Those waiting death claims were found to be, for all the lodges the enormous sum of $1,637,166.89 on October 1, 1906, of which $1,227,875.17 was to be paid out of this specially raised fifteen-cent Fraternal Fund, and the balance by the separate States in which the heavy death losses had arisen.

Fraternal Fund Unpopular.

Quite a number of the States in which no excess of losses had occurred, refused to collect and pay over the fifteen cents per member, and suits were entered in the courts against some of them. Judgment was given in favor of the supreme authority in the case of Nebraska, and therefore there is some hope that the claims of the widows and orphans will, in most cases, be eventually paid in full. But in the meantime the arrangement in New York State is that upon overdue claims to January 1, 1911, only 10 per cent., or $200 of the $2,000 due, will be paid until 10 per cent. further can be afforded all around, to give time for the collection from the newer and more prosperous State jurisdictions. There is nothing the matter with the members in New York except that, as a whole, they are growing old, by means of nearly all the young members having quietly dropped out and through no new ones coming in.

Why Ontario and Massachusetts Seceded.

It was on account of the extra death calls upon the Ontario Grand Lodge to cover carelessness in Western and Southern Grand Lodges, that it broke away, or seceded from the supreme lodge's control in 1879. Since that date it has been called an ''Independent Jurisdiction,'' and contributes nothing, as is also the case of the Massachusetts brethren, to the help of the older Grand Lodges in the United States. Consequently, this old order is rapidly dying out everywhere, except in two or three cases.

The following is a list of the Grand Lodges which have already ''thrown up the sponge,'' leaving many thousands of old members without the insurance which they fondly hoped would endure throughout their lifetime, no matter what would happen afterward:

Alabama.
Arizona.
Colorado.
Georgia.
Wyoming.
Indiana.
Michigan.
Maryland.
Nevada.
New Mexico.
Nebraska.
New Jersey.
Idaho.
Kansas.
Oregon.
Tennessee.
Utah.

Rapidly Drifting on the Ragged Rocks.

In the other States in which the Order is still alive there are
of Trade trip to Northern Ontario.
many indications that it ''cannot be for long'' that they will be able to hold out, even with the aid which the Supreme Court is endeavoring to collect for them by the extra fifteen cents per member now exacted. The following tables will afford a glance at their progress downward during the past five years, in the case of some Ancient Order United Workmen Grand Lodges which were deemed among the most prosperous fraternal institutions a short ten years ago:

CONNECTICUT GRAND LODGE.

Year.	Assets.	Liabilities.	New Insurance.	In Force.
1906.....	$105,782	$ 11,000	$ 44,000	$8,943,242
1907.....	138,393	8,000	75,000	8,358,989
1908.....	165,546	5,288	95,000	7,911,715
1909.....	210,545	177,180	107,000	7,444,294

1910....	1,590,254	130,357	2,283,500	58,052,800

The Independent Jurisdictions.

The Ontario and the Massachusetts Grand Lodges are both what are called Independents. This means that both of them have broken away from the parental Supreme Court jurisdiction, and are neither helping the brethren in the weaker State jurisdictions when their losses are unusually heavy (as is done by the other State Grand Lodges) nor are they intending to ask any help from the parent body when they themselves become weak and helpless in the struggle with death. Both of these independent grand lodges are endeavoring, of late, to accumulate some sort of a reserve fund, though in both cases without any proper basis. Both of them have about the same amount in force, and are of about the same age, and yet the one has invested assets of $1,590,254, and the other only $390,733. Anybody can see, very plainly, either that one is piling up too much, or the other is lamentably below the mark for safety and permanence. In both cases the death losses are rapidly increasing. In Ontario, during the past four years, they have grown from $903,922 in 1906, to $1,111,821 in 1910—over 20 per cent. of excess. In Massachusetts from $714,371 to $961,869, or about 32 per cent. greater than in 1906.

Seven Years of Progress Downward.

The following is a summary of the operations of nine of the foregoing ten Grand Lodges, omitting Connecticut and South Dakota, but including Massachusetts and Ontario, also adding the important State of Illinois, which embraces Chicago. It gives the amount of certificates in force in 1903, the amount of new certificates they issued during the succeeding seven years, and the present amount in force. The footings show the combined results:

Grand Lodge.	In Force, in 1903.	New Certificates.	In Force, 1910.
Maine.	$13,437,000	$ 722,000	$ 5,926,517
Minnesota.	53,821,000	19,162,250	32,407,000
Missouri.	34,754,000	11,172,500	8,283,170
New Jersey.	13,038,000	1,038,000	8,386,000
North Dakota. . .	15,792,000	4,268,000	9,083,560
New York.	43,214,000	1,471,500	3,344,000
Illinois.	24,683,000	1,809,500	2,219,480
Massachusetts. . . .	62,567,000	12,423,000	57,105,000
Ontario.	72,388,500	11,314,000	58,052,800
	$333,694,500	$63,381,750	$184,807,527

Adding the footings of the two first columns we find the amount on the books and the new certificates added during the seven years come to............................$397,076,250
The deaths of the seven years account for........... 33,265,540

These deducted leave a possible....................$353,810,710
But with only the above "In Force" of........... 184,807,529

The withdrawals of the seven years were............$169,003,181
Which shows that considerably more than one-half their former strength has departed, never to be recovered. Not to speak of distant places, look at our neighbor, the State of New York, once having $43,214,000 on its books at Buffalo, and now dwindled to $3,344,000. Also the great State of Illinois with $24,683,000, and the remnant now only $2,219,480, held by 1,762 members, each paying during last year an assessment of nearly eighty dollars to defray the $135,453 which the year's death losses cost them. And the assets, once $263,150, now reduced to $97,381.

How Much Should They Have on Hand?

While our Ontario's Grand Lodge, with its $58,052,800 of fraternal insurance in force, has an accumulated invested fund of $1,590,254 (more in proportion than any of the other grand lodges) this sum is only a small amount compared with what would be meant by an adequate or legal reserve fund, such as is needed for safety. There is one fraternal society operating in Canada which provides a full legal reserve at the back of every certificate. This is shown from year to year by its reports to the Dominion Government, and published in the blue book. Its name is The Ancient Order of Foresters. With only $1,893,029 of certificates in force, it possessed well invested assets, on December 31st last, of $213,841. This sum is almost exactly one ninth of the amount of risk carried. Apply this rule to the $58,052,800 of certificates in the Ancient Order United Workmen of Ontario, and the assets of the Workmen should be $6,450,000
Instead of the little sum in hand of................... 1,590,254

Showing a clear shortage of no less than............$4,859,746

How Much Should the I.O.F. Have?

The Independent Order of Foresters, whose headquarters are in the Temple, of this city, boasts of having an accumulated fund, on December 31, 1910, of $15,668,827. That is certainly quite a large sum of money to be left lying, for three years at a time, in the control of only a few men. They have certificates of insurance in force, nearly all over the world, amounting to.$240,170,989
One-ninth of this sum would be.................... 26,685,995
From which deduct the sum on hand.............. 15,668,827

And the shortage is shown to be....................$11,017,168

That is, if the $213,841 held by the Ancient Foresters, as mentioned above, is the proper amount of present assets to make sure that their $1,893,029 of certificates will be surely paid, or what may be left of them, no matter to what age their members live.

Features of Weakness.

But there are very distinct features of weakness or danger of disaster in the case of both the Workmen and the Independent Order of Foresters not found in the contracts of the Ancient Order of Foresters. These consist of two things: First, much smaller assessments; and, secondly, providing for ceasing payment on reaching 70 years of age. The rates of the Ancient Foresters, per month, at ages 25, 35 and 45, are $1.45, $1.95 and $2.80, and the Workmen and Independent Order of Foresters is only $0.94 and $1.40 and $2.08. The difference is 40 per cent. While the one society is receiving $620 the others would each have collected only $442. And at age 70 payments cease in the two societies, even though they may have collected far less than sufficient to provide for the liability incurred. In the Independent Order of Foresters they may draw out one-tenth of the insurance yearly in cash until death or age 80 brings the final balance. In the Workmen they may take out, at once, one-half of what they have paid in or else the certificate to stand fully paid for one-half of its face. These and other provisions add heavily to the ordinary fraternal liability carried by any society which requires payment of assessments until death, even though that may not come until age 80 or 90, or afterward.

The Lessons From Experience.

It happens that the Ancient Order of United Workmen has been in existence long enough to render it very easy to derive some useful lessons from its unfortunate history, and that is what we shall now try to do, for the benefit of our readers, whether they are members of that or of any other fraternal association granting life insurance certificates upon the monthly assessment plan.

Firstly comes the striking result that in no less than seventeen States of the United States, where Grand Lodges of the Workmen Order were founded, since its origin in New Jersey in 1868, and where they flourished for a few years, not one now exists.

Secondly comes the circumstance that in the case of six other States in which Grand Lodges or the remnants of them still exist, the $144,918,000 of their certificates in force in 1903 has fallen to only $37,231,000 in 1910—a decrease of two-thirds.

Thirdly comes the further fact that the assessments have risen so greatly of late years, owing to the growing age of the members, that some of these six still living Grand Lodges can scarcely induce any person to join. The new certificates taken in them in 1903 were for $19,497,000 and during last year for only $1,694,500. In two States practically none.

Fourthly, and finally, comes the old adage that what is worth having is worth paying a fair price for. In the case of all those attempts to give something for almost nothing, by simply banding together with a cord of friendship so easily broken, instead of making a financial provision, as the life insurance companies do, for the complete fulfilment of their obligations, there was some good done, of course, in the payments made to widows and orphans, but a tremendous heap of loss and disappointment was caused. So much so, and so widespread has been the lesson, that very few new societies of whatever name, are now attempting to operate upon any such deceptive lines, it being pretty well understood by everybody, that all such enterprises are foredoomed to deplorable failure.

ERIE AND CANADIAN PACIFIC PRESIDENTS MEET.

The meeting of President Underwood, of the Erie Railroad and Sir Thomas Shaughnessy, of the Canadian Pacific at Montreal is thought to have been merely a friendly one, without any business significance. A New York man closely identified with the Canadian Pacific says, in an interview:—

"As for the Canadian Pacific purchasing the Erie it seems to me that the Canadian Pacific would not derive any very great benefit from such an acquisition, for the reason that it would not afford the road any increased traffic facilities nor much, if any, increase in tonnage. The relations between the Canadian Pacific and the New York Central are of the most amicable kind, and afford the former road practically all that it desires. There is then no reason for disturbing the relationship that exists between the two roads by Canadian Pacific's seeking the same outlet and source of some of its traffic over another route and at a large outlay.

"The amount of traffic that the Canadian Pacific Railway draws from the United States is probably less than 10% of all the traffic of the road and it would be hard to figure how this proportion of its traffic could be increased by acquisition of the Erie. I attribute the activity of Erie and its rise in price solely to the generally good position that Erie now is in.

"Three years ago Erie was facing a possible receivership. Last year the company earned 4% for both its first and second preferred stocks with a surplus left over equal to three per cent. on its large amount of outstanding common. For the current year so far Erie has shown an increase of over $1,250,000 in gross and over $285,000 in net, whereas its competitive roads, like Baltimore & Ohio and New York Central have shown material decreases in net, despite increase in gross."

MONTREAL PROTESTS IN INSURANCE CASE.

Argument was heard before the Superior Court, Montreal recently, on the motion presented by the Corporation of Montreal, in the case of the Queen Insurance Company against the Montreal Water and Power Company, and the City of Montreal respondent. The motion presented by the city attorneys was to the effect of declaring the Corporation as not mis en cause and to withdraw it entirely out of the case. The action consists of a claim of $50,000, paid by the plaintiff to the school commission of Mile End for the indemnity on the fire in the St. Joseph Boulevard school, destroyed in January last.

It is claimed by the insurance company that the destruction of the building was due to the lack of pressure in the water system owned by the Montreal Water and Power Company and that the city was jointly responsible as in supplying Laurier ward with water. the company was only assuming an obligation delegated to them by the corporation of St. Louis of Mile End, now a part of the city of Montreal, which did not relieve the city of any of its responsibilities. The opposition of the city was that the power of building a water works system conferred to a municipality by an Act of the Legislature, did not imply the obligation of building such works; in transferring that power, the municipality did transfer all the responsibilities attaching to it, and if there was some obligation, it was not on the part of the city. The case was taken en delibere.

PUBLIC UTILITIES COMMISSION AND THE MONTREAL STREET RAILWAY.

All Red Line Railway Company—Montreal Water and Power Company Extend Option—Officers of New French Bank.

Monetary Times Office,
Montreal, June 28th.

A point has arisen between the Public Utilities Commission and the Montreal Street Railway, which threatens to delay the conclusion of negotiations between the railway and the city for the new contract which has been under discussion for the last six months. In connection with the complaint which the residents of Point St. Charles made to the Public Utilities Commission against the service which the Montreal Street Railway was supplying, although the Commission decided that the proper place to take the complaint was to the city council. Chairman Hibbard seemed to hold the view that it would be right to go further in the matter. "I am of the opinion," he said, "that, taking the contract as a whole, in the light of the law as amended at the last session of the legislature, the general restrictions which the company's objection would seek to put upon the Commission is not well founded. Section 742 of the Public Utilities Commission Act, provides: 'The Commission shall have a general supervision over all public utilities subject to the legislative authority of the province and may make such orders regarding equipment, appliances, safety devices, extension of works or systems, reporting, and other matters as are necessary for the safety or convenience of the public or for the proper carrying out of any contract charter or franchise involving the use of public property or rights.'

"It is very clear to me—and I may say that the Commission is practically unanimous on this subject—that this section of the statutes as far as the safety and convenience of the public is concerned, this Commission may go beyond the limitations and applications of the contract which the company has with the city. For the moment I do not make any ruling to this effect. We may as well hear the complaints against the Point St. Charles service first, and decide the case upon its merits. It may be that no order will be necessary."

Mr. L. L. Perron, counsel for the company, urged the Commission to make a public ruling. "I ask for a definite ruling so that we can take it to appeal and have the question settled for all time. A ruling of this kind will attack the whole of the relations between the city and the company." Chairman Hibbard hesitated to make the ruling at the moment and the matter remains undecided.

Officers of Banque Nationale du Canada.

The organization of the Banque Nationale du Canada has been completed and the first annual general meeting of the shareholders held. The directors of the bank were elected at a subsequent meeting of the board and the officers appointed were:—President, Mr. Rodolphe Forget, M.P.; vice-president, Mr. Robert Bickerdike, M.P.; directors representing Canadian shareholders: Sir Geo. Garneau, Hon. L. O. Taillon, Mr. J. N. Greenshields, K.C.; directors representing French and European shareholders: Messrs. Chomereau, Lamothe, Governor Bank of France; Raoul Saulter, Commissioner Bank of Paris and Pabois; George Martin, Commissioner of Comptoir Nationale, D'Escompte de Paris; S. Badel, Bank of Paris.

The name of the general manager is not yet announced, but the name of the general manager of a Toronto bank was mentioned some time ago as a possibility. It was intimated to The Monetary Times a few weeks ago that the present capital stock of $10,000,000 was shortly to be doubled. Meantime it is announced that of the present capital the foreign group has subscribed $7,675,000, the Canadian shareholders subscribing the balance of $2,325,000, of which ten per cent. has already been paid in.

All Red Line Railway Company.

The Hon. Achille Bergeron, M.L.A., is very enthusiastic over the proposal of the All Red Line Railway Company to build a line from Montreal, or from Quebec, to a point at or near Cape St. Charles on the Labrador coast. This point is just east of the Straits of Belle Isle, in the open sea, at about 52 degrees of latitude, which is practically the same as London and Bristol. It is proposed to establish a port, but whether an all year round port or not, is not yet certain. Mr. Bergeron says that the surveys which have been made show that it can be used for at least ten months of the year. During May and June the port may have to be abandoned, but during these months the ports of Quebec and Montreal are open, and could be used by the ships usually plying to Cape St. Charles.

The distance from Cape St. Charles to Liverpool is only 1,600 miles, as compared with 2,625 miles from Quebec. Mr. Bergeron says that the duration of the sea voyage could be cut down enormously, possibly to two and a quarter days. Whether the road would be built from Montreal or Quebec would depend upon circumstances, but in the notice of application to Parliament, which has just been filed, Montreal is the point mentioned as the western terminus, while a point in the Atlantic coast, the Gulf of St. Lawrence, or the Straits of Belle Isle, is the eastern. The company asks the right to own, develop and operate water powers, telephone and telegraph lines, steam and other vessels, elevators and wharf warehouses.

Montreal Water and Power Company.

The Montreal Water & Power Company has written the city extending for six months the option to purchase 95 per cent. of the capital stock of the company on the following terms:—Preferred stock, $120 per share of $100 par; common stock $37.50 per share of $25 par.

The preferred stock issue amounts to $500,000 and the common stock issue to $280,000. As the price mentioned is an advance of 20 per cent. on par for the preferred stock and 50 per cent. on par for the common stock, the total purchase price, providing the city took over the entire capital, will be $1,020,000; but as only 95 per cent. is offered for sale, the total purchase price would be $969,000. The company asks for the shareholders holding the remaining five per cent. of the stock the right of selling out to the city in six months at the same price. The company is to forward shortly its financial report for the past year with a full statement of assets and liabilities and after this has been considered by a special committee the city council will take the matter up and come to some conclusion.

The nominal value of the shares of the City & District Savings Bank are to be changed from $400 per share to $100 per share, and the shareholders are to be requested to turn their scrip in for exchange on that basis, four shares to be issued them for each share now held. The date of the annual meeting has been changed to the second Monday in February for each year. These alterations were decided upon at a meeting of the shareholders of the bank held this week, the changes having been suggested by the directors.

◆

HOME BANK'S REPORT.

Another strong statement was presented by the Home Bank management to the shareholders this week. The net profits for the year, after deducting the usual charges, amounted to $121,941, a little over 10 per cent. on the average paid-up capital. Added to this sum was $28,203, being balance of profit and loss account from the previous year, which gave a total of $150,144. In addition an amount of $40,138 was received as premium on capital stock during the year. The total sum for distribution was, therefore, $190,283, of which dividends at the rate of 6 per cent. per annum accounted for $70,980. Fifty thousand dollars were transferred to rest account, and a balance of $69,303 carried forward. The reserve account now amounts to $425,000 compared to $175,000 five years ago. In the same period deposits have increased from $3,800,000 to $8,000,000; total assets from $4,800,000 to $11,000,000; circulation from $158,000 to $879,000; and paid-up capital from $699,000 to $1,264,000.

There has been a notable increase in the number of shareholders, the figures in 1909 being 390, while to-day 1,636 persons are holding shares of the Home Bank. The new holders are chiefly Western Canadian farmers, who now number 983.

Mr. Eugene O'Keefe, the president of the Bank, in presenting his statement referred to his long association with the institution. Fifty-five years ago he was a junior clerk at 78 Church Street, the present Church Street Branch of the Home Bank. "I am an old man now," said Mr. O'Keefe. "Although I am 84 years of age, I am never going to grow too old to outgrow the habit of cautiousness in banking."

The bank opened new offices during the year at four points. Mr. O'Keefe drew attention to the circular of the Northwest Grain Dealers' Association, dated June 7th, which shows an increase in acreage of wheat this year over last year, almost identical with the excess of last year over the previous year, viz., 1,335,000 acres, the total acreage in wheat alone being well up to ten millions. The grand acreage total of all grains, according to this circular, in the three Northwestern Provinces is over sixteen millions. The weather up to the present time has been considered favorable, and the circular quoted states as follows:—"Reports indicate the best conditions of the growing crops since 1895, but the wet weather has delayed in some localities the completion of seeding of oats, barley and flax. The prospects are for a large crop." The information received since the publication of this report regarding the weather conditions has been quite satisfactory. It is, therefore, only reasonable to look forward to a successful harvest.

DIFFERENCES IN MINING METHODS

The Porcupine gold region has afforded some striking contrasts in mining methods. Too many Canadians have entered the field with hazy notions as to what is their duty or with any well-defined idea as to the probable or final result of their operations. This has not been peculiar to Porcupine, but has been seen in almost every camp in Northern Ontario. In the new gold camp, the difference in methods is well illustrated. Our own countrymen are to a large extent wading in the mire of uncertainty and stock promotions, without qualified advisers or managers, while the British interests have formulated a definite programme, and have the assistance of the best geologists and mining engineers.

It is admitted that both parties start at the same point. Both purchase claims with slight knowledge of what is in store. Both sell mining stock to the largely ill-informed mining public. Both are able to raise money in that way. It is in the expenditure of that money that the first difference in methods is noted. In the majority of cases, the Canadian engages the ghosts of mining engineers and the shadows of mine managers. Money is squandered. Real mining is at a discount. Successful stock selling is often the end of the mine. The Gow Ganda region has given a sorry example of these methods. Hundreds of thousands of dollars have been wasted, with the result that those really interested in the mining industry are none the wiser from a mining point of view, while those who put up the money are much the poorer and have nothing to show for their money.

Compare these ways to those adopted by the Bewick-Moreing interests, as an example. They have hired the best engineers, including Mr. Maclaren, one of the best authorities, who is studying the character of the deposits, and Mr. Williams, another excellent authority, who is in charge of their property. Their areas will be given every possible chance to make good. If anything can be found and developed, it will be found and developed. In other words, the English stockholder will be given what the popular phrase terms a "run for his money." Thousands of Canadian stockholders are not likely to be given even a walk for their cash.

It is by no means desired to condemn all mines backed by Canadian interests. Many in Cobalt and a few in Porcupine, including the Hollinger, are doing well and following the British methods, which require active, practical, persistent mining and well qualified engineers and managers. So long as the Canadian company promoter, stock seller and alleged mining man utilizes the services of so-called mining engineers without qualification, so long will the legitimate mining industry be hampered and the stockholder fooled. To get the best results in mining, one must have the best practical and professional talent.

◆

PORCUPINE LINE OPENED TO-DAY.

Chairman J. L. Englehart and other members and officials of the Temiskaming and Northern Ontario Railway Commission, will open the new line from the Falls of the Iroquois to Golden City Porcupine to-day. A regular passenger schedule will be put into effect over the new road on Monday, consisting of at least one train each way per day, and perhaps more, should the traffic justify it. Express freight will probably be handled by the end of next week, and the commission hopes to be able to carry the heaviest classes of freight shortly afterwards.

On the Hollinger branch steel has now reached the Dome mine, and is being rushed to the terminus, while the siding at the Swastika will also be completed in a few days. The stringing of the telephone and telegraph wires to Golden City has been accomplished, but as the instruments are not yet installed, the line will not be ready to handle messages for a few **weeks.**

COBALT ORE STATEMENT.

The following are the shipments in pounds, from Cobalt for the week ended June 23rd:—LaRose, 203,900; Coniagas, 117,500; McKinley-Darragh, 180,700; Cobalt City, 64,200; Nipissing, 63,600; Cobalt Lake, 68,600; Hudson Bay, 63,300; Buffalo, 56,160; Crown Reserve, 67,200; total, 383,060 pounds or 191 tons. The total shipments since January 1st are now 23,577,840 pounds or 11,788 tons.

In 1904 the camp produced 158 tons valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

CHARING CROSS BANK.

Some interesting details of the investments in Canada of the defunct Charing Cross Bank, of London, were revealed by the cross examination of Mr. R. M. Pembridge, member of a firm of chartered accountants employed by A. W. Carpenter, the promoter of the bank, to investigate its account. The witness said that when he was in Canada about two-thirds of the Atlantic, Quebec, and Western Railway had been built, and the line was expected to be completed by the spring or summer of this year. When completed the railway would afford a through route from Gaspé Harbor to Quebec and Montreal. A contract had been entered into by the defendant under which he was to take possession of the Atlantic and Lake Superior Railway. Under that contract the defendant had to pay £50,000 to Messrs. Gelindez Brothers before the purchase was completed. The witness was not aware that £20,000 of that sum had already been paid and that the trustees in the defendant's bankruptcy had abandoned the contract. If that were so Messrs. Gelindez were left in the possession of the railway and £20,000. The Canadian Government had voted a large sum for the erection of a landing stage at Gaspé Harbor, and if it was the fact that they had also taken over the Atlantic and Lake Superior Railway they had invested money at both ends of the Atlantic, Quebec, and Western Railway. At one of their interviews, in August, 1910, the defendant told the witness that he was insolvent, but he did not add the words, "If you pull me down now." He added that if any bank was suddenly called upon to close its doors it would be insolvent, but the witness did not agree with him. The defendant had never told him that all the money required for the completion of the railway had been sent to Canada. Down to August 7 last, two days after he sent in his reports, the witness was of the opinion that the defendant was an honest but misguided man.

The defendant at one time said that the value of his properties in Canada was two millions, and at another time he expressed the opinion that they were worth five millions. On August 7th last the witness changed his opinion as to the defendant's honesty; he then formed the idea that the defendant had reason for evading the issues raised in his reports. Only in a few isolated instances had money been lent on security at the branch offices of the bank, and that was when the managers had exceeded their instructions. The witness did not know how much money was lent in this way, but the defendant once told him that he was desirous of doing away with the old money-lending part of the business.

Mr. Lawrence Robert Dicksee, a Fellow of the Institute of Chartered Accountants and member of the firm of Messrs. Sellars Dicksee, and Company, said that he called on the defendant after Mr. Pembridge had sent in his reports. In the course of the interview the defendant said that if he were to close his doors then he would lose a couple of millions which he was expecting to make by the sale of his Canadian railway when it was completed. He further mentioned that he had an income from other sources of which the witness knew nothing. The witness said he did not think he ought to continue to receive deposits, and that if he did his firm would cease to act for him. The defendant replied. "You are not business men; you do not care about taking the risks which business men would think nothing of."

◆

A MILLING MERGER.

The merger of Western Ontario flour mills will be tended to take in every mill of any importance, except having affiliations with some of the large Western panies. The companies now merged are The Can Mills, of Chatham and Blenheim; the Taylor Mil pany, of Chatham; Hessel Bros., of Milverton an Tavistock Milling Company; James Goldie Guelph; McLeod Milling Company, of St Milling Company, of St. Marys, and the Company, of St. Thomas, with two mills secure a larger share of the export lapping of orders.

NEW BRUNSWICK.

St. John Valley Railway — Iron and Steel Markets Dull.

(Staff Correspondence.)

Two matters of importance to the future of St. John and the province of New Brunswick have advanced during the last fortnight. One relates to the development of St. John Harbor East, and the other to the construction of a railway through the rich valley of the St. John River from St. John to Grand Falls.

The Public Works Department at Ottawa has called for tenders for work in St. John Harbor East which, it is estimated, will involve an expenditure of about $4,000,000. It includes a great breakwater, 3,800 feet long; a modern dry dock and ship-repair plant; two wharves that will provide three berths for ocean steamships to run in connection with the Grand Trunk Pacific and Canadian Northern Railways when these have completed their connections with the port, and the dredging of a channel and basin to enable the largest steamships to use this portion of the harbor, which lies on the east side of the city and is not now equipped for traffic purposes. There is a possibility that the site adjoining the proposed dry dock may be the site of a great shipbuilding plant, for one of the firms tendering for the construction of the Canadian naval craft has declared in favor of this port. Whatever may ensue in that connection, the other works will go on for the tenders close on August 10th, and several large British firms are submitting tenders. A new town will grow up at East St. John.

St. John Valley Railway.

The St. John Valley Railway is now in a fair way to be settled. The federal and provincial governments were not agreed as to the route and grades, but at a conference between the Minister of Public Works and acting Premier Flemming an agreement was reached which both Governments will confirm, and the new railway will be built, to be operated as part of the Intercolonial system, and to connect with the Grand Trunk Pacific at Grand Falls, giving the new transcontinental a shorter route to St. John than that by way of Moncton. The valley railway will give long-desired service to one of the richest agricultural and orchard sections of New Brunswick.

When these connections are completed and the Intercolonial branch lines taken over as part of that system, New Brunswick will be more completely intersected and better served by railways than any other province in Canada. This should influence prospective immigrants to choose New Brunswick as their home.

The general outlook for trade in the province is bright. Very dry weather in the first half of June retarded the crops, but rain has since brought vigorous growth. The outlook for fruits is much better than last year. Carleton county farmers have planted a less area in potatoes, but look for a full crop. Hay will be an average crop.

With regard to lumber, some of the log drives are hung up, and will not come out before fall or next spring; but the mills are assured of a fairly large supply, and are now very busy. The markets are not active, but shipments are going forward as is usual at this season.

Iron and Steel Markets Dull.

Owing to dullness in the iron and steel markets the Canada Iron Corporation have ceased shipping ore from their mines in Gloucester county for a short period, but are continuing their mining operations, and expect soon to resume the export of ore.

The Gordon Nail Works, operating on a small scale at West St. John, and being compelled by harbor developments to seek a new site, have accepted offers made by Calgary, Alta., and will remove to that city. Meanwhile the Messrs. James Pender Company, Limited, makers of nails and rods, are adding a new storey to one of their buildings and providing themselves with handsome new offices. The Maritime Nail Works may also enlarge their plant as a result of the formation of a new company.

Canadian and West Indies League.

Mr. H. C. McKenzie Cornish, representing the Canadian and West Indies League, visited St. John and held conference with merchants interested in West India trade, urging the formation of a branch of the league here. That in which the St. John men were most interested was a change in the proposed steamer service, which for the next year would give Halifax twice as many sailings as St. John, although St. John is much nearer the West. They have brought this matter before the Trade and Commerce Department.

Under the new law, to go into effect August 1st, all New Brunswick hotels must be provided with fire escapes and with a coil of rope in each sleeping-room. The factory inspector will enforce the law, and gives notice that he means business.—W. E. A.

AMERICAN CAPITALISTS IN THE WEST.

A party of United States capitalists from Moline and Minneapolis have been making a tour of the West. The party consisted of directors and members of the executive board of the Deere Plow Co. including William Butterworth, of Moline, president; Mr. W. L. Velie, of Moline, vice-president and chairman of the executive; Mr. G. N. Peeke, of Moline, sales manager; Mr. C. C. Wheeler, of Minneapolis, vice-president; Mr. F. L. Todd, of Moline, director; Mr. Joseph Bain, of Ottumwa, Ia., director; Mr. F. D. Blake, of Moline, advertising manager; Mr. David Drehmer, of Winnipeg, director and sales manager, and Mr. H. W. Hutchinson, managing director and vice-president of the Winnipeg branch of the company.

Until quite recently the company was represented by fourteen distinct and separate factories in which they turned out every description of farm implement. The whole of these going concerns have now been merged into one establishment which has a fully paid up capital of $50,000,000, with Mr. William Butterworth at the head of affairs.

At Calgary the directors have decided to erect an additional warehouse, which will be more commodious than their present premises there. To further emphasize their impression of the remarkable growth in and around Edmonton, where the company has a large track warehouse situated on railway property, land has been acquired where they will erect a building at a cost of about $100,000, and also one at Regina. Last year the company erected at Saskatoon a warehouse at a cost of $125,000 and a similar building at Lethbridge which cost $50,000.

LLOYD'S BANK AND CANADA.

Referring to the proposal of Lloyds Bank, London, to extend their operations, a proposal treated by Mr. H. M. P. Eckardt in last week's Monetary Times, a writer in the Financial News says:—

"It may be hoped that the programme of the bank will consist rather of 'auxiliary institutions' than of 'branches.' As Lloyds Bank is an English concern, any profits made at foreign or colonial branches would necessarily be subject to income-tax. That is to say, if the bank opened a branch in Montreal, and made £50,000 profit, the tax would be payable on the whole of it, although English officialism did not contribute one jot or tittle of convenience, protection, or facility to the earning of the money. On the other hand, if the new programme should consist mainly of auxiliary institutions independent, in the legal sense, of Lloyds Bank itself, the claim for income-tax could, to some extent at all events, be defeated.

"The time has certainly come when the Colonial Governments would do well to consider whether they could not offer such legal facilities to English enterprises as would enable them to omit the payment of British income-tax upon the profits of their colonial operations. The tax itself is so iniquitous, so excessive, and so arbitrary that there need be no compunction about embarking upon some such policy as this. It would encourage enterprise in the colonies, besides benefiting the investor at home."

It will be recalled that at their meeting in Birmingham recently, the shareholders of Lloyds Bank sanctioned the proposals of the directors to alter the constitution of the bank so as to admit of foreign and colonial business. The chairman stated that in this way they would be enabled to open branches and auxiliary institutions in various parts of the world—Canada, New York, Paris, and Hamburg—or acquire interests operating in those places. He added that the requirements of their manufacturing customers would continue to have their first attention, and that there was no desire to collect deposits in the country for use mainly in London or abroad. There would be plenty of money to satisfy their home demands and to make increased profit out of the foreign and colonial department.

MANITOBA INSURANCE ACT.

Particulars of the New Amendment—Licensed and Registered Insurance Companies Doing Business in Manitoba.

According to the report of the Inspector of Insurance for Manitoba, December 31st, 1910, there were 48 licensed insurance companies doing business under The Manitoba Insurance Act classified as follows: Fire, 37; Life, 4; Hail, 5; Plate Glass, 1; Accident, 1. Total, 48; while there were 118 registered insurance companies doing business as follows: Fire, 52; Fire and Life, 5; Life, 32; Guarantee and Accident, 20; Registered Mail, 2; Steam Boiler, 1; Plate Glass, 5; Live Stock, 1. Total, 118. New companies admitted by registration during 1910 were: Fire—Canada National Fire Insurance Company, Montmagny Mutual Fire Insurance Company, Royal Exchange Assurance. Boiler Insurance—Boiler Inspection and Insurance Company of Canada, while new companies admitted by license during 1910 were: Fire—Shawnee Fire Insurance Company, National Union Fire Insurance Company, Firemen's Insurance Company of Newark, Liverpool Victoria Assurance Corporation, Limited, British Crown Assurance Corporation, Limited, Jefferson Fire Insurance Company, Retail Merchants Fire Insurance Company. Hail Insurance—State Farmers' Mutual Hail Insurance Company, Des Moines Mutual Hail and Cyclone Insurance Association. Life—Policy Holders Mutual Life Insurance Company. Guarantee and Accident—Western Canada Guarantee & Accident Insurance Company. The following brokers were licensed during 1910: Messrs. Victor W. Odlum, Edwin C. Ryan, J. H. Moorhouse, A. H. C. Carson, W. R. Allan, J. Vincent Nutter, J. H. Hines, Alan M. Stewart. The Western Plate Glass Insurance Company ceased to do business in 1910.

An Act to Amend ''The Manitoba Insurance Act.''

His Majesty, by and with the advice and consent of the legislative asembly of Manitoba, enacts as follows:—

1. Section 44 of ''The Manitoba Insurance Act,'' being chapter 82 of the Revised Statutes of Manitoba, 1902, is hereby amended by adding thereto the following sub-section:

(a). Every company licensed under this Act transacting fire or inland marine insurance, or both, shall, in addition to the information required to be given in the statement in this section referred to, include therein a statement showing the total liabiliy of the company, if a Manitoba company, in respect of unearned premiums upon all its outstanding unmatured policies, and, if not a Manitoba company, in respect of unearned premiums upon all its outstanding unmatured policies of insurance upon property in Manitoba.

2. Sub-section 4 of section 64 of the said Act, as enacted by chapter 34 of 5 and 6 Edward VII., is hereby amended by adding to the end thereof the following: ''It shall also be the duty of the officers and agents of the company to furnish the inspector, on his request, with full information as to the total liability of the company, if a Manitoba company, in respect of unearned premiums upon all outstanding unmatured policies, and, if not a Manitoba company, in respect of unearned premiums upon all its outstanding unmatured policies of insurance upon property in Manitoba.''

3. The said Act, as amended by chapter 34 of 5 and 6 Edward VII. is hereby further amended by adding thereto the following sections:

Impairment of Capital and Payment of Dividends.

70. (1) Every company licensed to carry on the business of fire insurance or inland marine insurance, or both, shall at all times maintain assets in Manitoba at least equal in value to the total of the unearned premiums upon all outstanding unmatured policies upon property in Manitoba, calculated pro rata for the times unexpired, together with the amount of matured claims for losses in Manitoba, and all its other liabilities of every kind in Manitoba.

(2) No dividend shall be paid by any such company while its paid-up capital is impaired or while its assets are less than the amount required by the next preceding sub-section, nor shall any dividend be paid which would reduce its assets below the said amount or impair its capital.

(3) If it appears to the inspector of insurance at any time that the assets of any such company fall below the requirements of sub-section (1) of this section, he shall report the fact to the Minister, and state whether or not the company appears to him to have paid any dividend in contravention of the last preceding sub-section and the Minister, after a full consideration of the matter and after giving the company a reasonable oportunity to be heard, may either recommend the cancellation of the company's license by the Lieutenant-Governor-in-Council, who may upon such recommendation order the cancellation of the same, or the Minister may, upon such terms and conditions as he may deem proper, limit a time within which such company shall make good the deficiency, and, upon the company's failure to make good such deficiency, within the time so limited, such license shall be cancelled by the Lieutenant-Governor-in-Council upon the report of the Minister recommending the same.

(4) If at any time it be found that the assets of any such company are less than the amount required by subsection (1) of this section, by an amount equal to twenty per cent. or more of the total amount of the said unearned premiums, calculated as aforesaid, or that the company has paid any dividends in contravention of sub-section (2) of this section, it shall be the duty of the Minister to report the same to the Lieutenant-Governor-in-Council, whereupon the company's license shall be cancelled by order of the Lieutenant-Governor-in-Council.

72. If it should at any time appear, from the annual statement or from the inspector's examination of the affairs and conditions of any company carrying on the business of fire or inland marine insurance, or both, that the unearned premiums on all its outstanding policies of insurance upon property in Manitoba, together with its other liabilities in Manitoba, exceeds its asets in Manitoba, including the deposit in the hands of the Minister, the company shall be notified by the Minister to make good the deficiency, and on its failure to make the same good (up to the date of making good) within sixty days of being so notified, the Minister shall recommend the cancellation of the license of the company under this Act, and the same shall be cancelled accordingly by order of the Lieutenant-Governor-in-Council.

JULY DIVIDENDS.

About $4,500,000 will be paid in dividends on various stocks and bonds in July, chiefly to-day. The following is a list of the principal companies which pay dividends this month:—

Stocks. Dividend payable quarterly. Arcadia Fire Insurance Co. Can. Perm. Mortgage Corp. Can. Con. Rub. Co., C. & Pfd. Can. General Electric Co. Canadian Pacific Railway Co. Carter-Crume Co., Pfd. Cen. Can. Loan & Sav. Co. City Dairy Co., Pfd. Consumers Gas Co., Pfd. Demerara Elec. Co. Dominion Textile Co. Duluth Superior Trac. Co. East Can. Sav. & Loan Co. Eastern Trust Co. Halifax Electric Tram. Co. Illinois Traction Co., Pfd. Imperial Life Assurance Co., of Can. Laurent Paper Co., C. & Pfd. Mackay Cos., Com. & Pfd. National Trust Co. Nova Scotia Telephone Co. Ogilvie Flour Mills Co. Ottawa Electric Co. Ottawa Electric Ry. Co. Ottawa Gas Co. Ottawa L. H. & P Co. W. A. Rogers, Ltd., C. & Pfd. Sao Paulo Tram. L. & P. Co. Smart Bag Co., Pfd. Toronto Electric Light. Toronto Mortgage Co. Toronto Railway Co. Toronto Saving & Loan Co. Tri-City Railway & Light Co., Pfd. Twin-City Rap. T. Co., C. & Pfd. Union Trust Co. West India Electric Co. Winnipeg Electric Railway Co.

Banks. Bank of New Brunswick. Banque Provinciale du Canada. Bank of Nova Scotia. Dominion Bank. Eastern Townships Bank. Metropolitan Bank. Molsons Bank. Royal Bank of Canada. Traders Bank of Canada. United Empire Bank of Canada.

Stocks. Dividends payable semi-annual. British American Trust Co. Can. Landed & Nat. Inv. Co. Canada Paper Co., Pfd. Canada Trust Co. Carter-Crume Co. City Dairy Co. Dominion Park Co. Great-West Life Assurance Co. Huron & Erie L. & Sav. Co. Imperial Loan and Investment Co. of Canada. London & Can. L. & Agency Co. London Street Railway Co. Manufacturers' Life Insurance Co. Niagara Navigation Co. North American Life Assurance Co. North Life Assurance Co., of Canada. Ontario Loan & Debenture Co. Real Estate Loan Co. of Canada. Sun Life Assurance Co. Toronto General Trusts Corporation. Trusts & Guarantee Co. Western Assurance Co., C. & Pfd.

Bonds. Can. Cottons, Ltd., Cons. Can. Light & Power Co. Cape Breton Electric Co. Demerara Electric Co. Dominion Iron & Steel Co., first meeting. Dominion Park Co., "A." Halifax Electric Tramway Co. Laurentide Paper Co. Montreal Light, Heat & Power Co., 4½ p.c. National Breweries. North Atlantic Collieries. Nova Scotia Steel & Coal Co. Ottawa Gas Co., Consol. Rio de Janeiro T.L. & P. Co., first meeting. Robb Engineering Co., Cons. Robb-Mumford Boiler Co. Shawinigan Water & Power Co. Stanfield's, Limited. Steel Co., of Canada. Toronto Electric Light Co. Trinidad Consol. Telephones. Western Canada Power Co. West India Electric Co. Winnipeg Electric Railway Co.

Banks. Montreal City & District Savings Bank. Northern Crown Bank.

It is a slow process, this teaching the public to combat fire, says the Review in commending the fifteen-year-old work of the National Fire Protection Association in the United States. But do not let us cease to struggle. "The greatest lesson the teachers of our youth have to learn is the necessity of infinite patience, and of constant review and repetition. The clergymen also who sow the seeds of practical religion and begin at once to look for the harvest of increased piety are always doomed to serious disappointment." Most of the public may seem stupid and indifferent, but all are not stupid and indifferent. The good work done is having its effect, and people are really learning how to reduce our fire loss.

REDUCTION OF THE FIRE WASTE.

Its Relation to the Application in Fire Insurance—Mr. T. L. Morrisey Writes on the Subject.

Editor, Monetary Times:—

Sir:—For some time, in fact ever since reading the December issue of Industrial Canada, in which appears an article written by the Canadian Manufacturers' insurance expert, I have had in mind asking to be permitted to direct through your valuable medium public attention to the dangerous doctrine therein enunciated.

As is frequently found to be the case, those who prate most glibly about modern methods are the ones most in need of instruction. If the writer of that article had his ear close to the ground he would know that the trend of modern thought is towards the adoption of methods that will conduce to the reduction of the colossal fire waste of this continent.

A Laudable Object.

It is to that very laudable object the efforts of the commissions appointed by the great States of New York and Illinois, the reports of which have recently been published, have been directed. Other bodies, semi-public, such as the New York Credit Men's Association have likewise bent their energies in that direction; and it is a hopeful sign that the more the question is studied the less justification is found for the prejudice that undoubtedly exists against the fire underwriters and the greater the sympathy extended them in the endeavor to equitably adjust the tax to meet this fire waste, for that, after all, is the work in which they are engaged.

The Manufacturers' expert warns the public against signing applications for fire insurance! Does this make for reduced fire loss? I maintain that it does not. I go further, and assert most positively that it has a directly contrary effect. It has been well said that if fire insurance were discontinued half the fire waste of the world would be saved, as under such a state of affairs all the fraudulent and most of the losses resulting from carelessness would become a thing of the past. Every man possessing property liable to be destroyed by fire will agree that insurance against loss, which might mean ruination, is a necessity; and, since we cannot get along without fire insurance we should do the next best thing: harness it, so that it may be our servant and not become our master.

Desirability of the Risk.

If this expert—than whom from his training and experience no one is better qualified to speak—were engaged in the task of educating the public upon the best means of beating the insurance companies, one could understand his utterances. But his employers, at least, would be the last to admit that that forms any part of his duties. Starting, therefore, from this premise, it is fair to ask: Why should an applicant for insurance not sign an application? The expert himself gives an excellent reason why he should. He admits that the application is designed to convey to the company facts to enable it to judge of the desirability of the risk.

How else can certain most important facts, which every underwriter should know before he is competent to pronounce upon the eligibility of a risk, be communicated to the company? It is true the expert has a fling at the "postmaster, clerk of the court, tradesman, and those whose occupation is chiefly insurance," and implies that the remedy is to be found in "a better educated class of insurance agent." Perhaps it might not be amiss to state that all the intelligence of the country is not with the Manufacturers, and were it not for the "postmaster, clerk of the court, tradesman, and those whose occupation is chiefly insurance," and all that that contemptuous reference stands for, the protected manufacturer would be mighty "small potatoes." In fact, if the Manufacturers had but a slight modicum of that wisdom of which they seemingly claim a monopoly, they would recognize that fact and begin by muzzling their insurance expert.

Fair Insurance Law.

Last session they arrayed themselves against those "whose occupation is chiefly insurance" and defeated the attempt to get a fair insurance law, whereby the burden of the insurance tax would be equitably distributed over all classes in the community; this session they found arrayed against them the mighty forces of the agriculturists. Then, when some concession is proposed to be granted the tiller of the soil, they raise the patriotic cry of which they made light when it was invoked against them. If this be wisdom, I do not know what brand of wisdom it is.

But to return to the application. If it be admitted that the underwriter should know all about the risk he is asked to accept before committing his company, how can he know, unless the proposer tells him, such facts, for instance, as the amount of inventory at last stock-taking and the amount of other insurance. Surely these questions are all important—elemental, in fact. The proposer may tell the agent, and the agent may be satisfied. But suppose, after a loss, the assured says one thing and the agent another, which will be believed? If it is down in black and white, the fact speaks for itself, and it can be seen whether the company was induced to enter into the contract through misrepresentation. The honest man has nothing to fear; it is only the dishonest man deliberately trying to get what he is not entitled to who could object to stating the truth. It should be no hardship upon anyone to ask him to tell the truth.

Conditions Made Clear.

Is there any other form of contract whereby one man obligates himself to pay another even so modest a sum as a hundred dollars that the conditions are not made perfectly clear beforehand? No life insurance company, where the chances against it are not nearly so great as those against a fire insurance company, will place itself in that position without not only a signed application from the proposer, but a signed report from a medical examiner and from two friends as well, and it would be considered against public policy if it did. Is there any good reason why it should be different in the case of a fire insurance company? There is only one argument (?) can be used against it: it hampers business. But business may be facilitated at too great a cost. And who suffers? Why, even the Manufacturers can answer that question. The same issue of Industrial Canada (December, 1910, page 545) contains an editorial deploring the annual fire waste in which these words occur: "It is not the insurance companies who pay fire losses. It is the public," which prove that our good friends, the Manufacturers, can think sanely on this subject if left to themselves.

Annual Fire Waste.

It is estimated by The Monetary Times that Canadians are now burning up created wealth at the rate of $24,000,000 annually. Just think what this means! Only the other day the leader of His Majesty's Opposition impressed upon the grain-growers that the Georgian Bay Canal cannot be built without money. What would the people of Canada say if told that this great work could be undertaken and pushed through to completion without a cent of additional cost to them. Yet that is the absolute truth. Let us save a sixth of this fearful annual waste, and, presto! the thing is done. Let us save another sixth, and we can build and operate the Hudson's Bay Railway, and still the annual ash heap will be twice too big.

I rejoice to see that this wanton destruction of the nation's wealth has at last forced itself upon the notice of those in high places, since it has been announced that the Conservation Commission is to take the matter up, and I would humbly commend to the attention of that body and its particularly able chairman the important part played by the modest application for fire insurance.

Yours, etc.,
T. L. Morrisey.

Union Assurance Society of London,
Montreal, June 26th.

◆

NEW STOCK ISSUE BY DOMINION BANK.

Owing to the growth of the business of the Dominion Bank, and the general development of the country, it was decided by the directors yesterday to issue the $1,000,000 additional stock which was authorized by the shareholders on January 30th, 1907. The stock will be divided into 10,000 shares of $100 each, and will be allotted to shareholders in the ratio of one new share to each four shares now held. The allotment will probably be made upon the share list of July 15th.

The directors have decided to issue the new stock at 200, although it might, in conformity with the Bank Act, be issued at 225. The premium upon the new shares is limited by the Bank Act to the proportion of the reserve fund to the paid-up capital stock, which, in the case of the Dominion Bank, is 125 per cent., the paid-up stock being $4,000,000 and the reserve fund $5,000,000. The authorized capital is $10,000,000. After the new issue has been paid up the capital will be $5,000,000 and the reserve fund $6,000,000.

The new shares are to be paid for by subscribers in ten monthly payments. Any allotted stock which is not taken up by the shareholder to whom it is made within six months may be offered for subscription to the public on terms to be settled by the directors.

Interchange of traffic between the Toronto Street Railway Company and the proposed civic street railway lines has been ordered by the Ontario Railway and Municipal Board.

RECENT FIRES.

Monetary Times' Weekly Register of Canadian Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Richmond, Que.—Grand Trunk station destroyed; loss and origin unknown.

Lethbridge, Alta.—Galt No. 3 mine badly damaged; loss and origin unknown.

Cornwall, Ont.—King George Hotel badly damaged; loss unknown; origin, defective chimney.

Brantford, Ont.—Sarfe Varnish factory damaged; loss about $2,000; origin unknown.

Dartmouth, N.B.—Handley house badly damaged; loss about $4,000; origin unknown.

Colborne, Ont.—Hotel Bristol damaged; loss unknown; origin, supposed incendiarism.

Aylmer, Ont.—Two barns of Mr. D. Brunion destroyed; loss about $7,000; origin unknown.

Waterville, Que.—Congregational church destroyed; loss about $6,000; origin, careless with lamp.

Chatham, Ont.—Sawmill of Mr. Wm. Drader badly damaged; loss about $3,000; origin, hot box.

Cobourg, Ont.—Barn of Mr. E. Cox, near Colborne, destroyed; loss unknown; origin, lightning.

Bedford, N.S.—Factory of Moir's, Limited destroyed; loss estimated at $17,000; origin unknown.

Woodstock, N.B.—Machine shop of Messrs. Small & Fisher destroyed; loss and origin unknown.

Hull, Que.—Plant of Messrs. E. B. Eddy & Company damaged; loss about $2,000; origin unknown.

Winnipeg, Man.—Old fire hall, William avenue, badly damaged; loss about $3,000; origin unknown.

Francis, Sask.—Barn of Mr. Tickner, also eight horses destroyed; loss about $4,000; origin, lightning.

Hanley, Sask.—Barn and granary and ten horses of Mr. W. E. Hall; loss about $3,000; origin unknown.

New Westminster, B.C.—The Port Moody shingle mill destroyed; loss about $20,000; origin unknown.

Stony Mountain, Man.—Residence of Mr. Daniel McIntyre destroyed; loss unknown; origin, lightning.

Clandeboye, Ont.—Grain warehouse located near Grand Trunk Railway destroyed; loss and origin unknown.

Halifax, N.S.—Junk warehouse of Mr. Wm. McFatring destroyed; loss unknown; origin, spontaneous combustion.

Portage la Prairie, Man.—Store of Mr. A. K. Levine damaged; loss about $400; origin, supposed incendiarism.

Verdun, Que.—Dwelling at 1355 Wellington street destroyed; child burned to death; loss and origin unknown.

Oakville, Ont.—Barns and outbuildings of Mr. Fred Metcalfe destroyed; loss unknown; origin, burning straw stack.

St. Thomas, Ont.—Barn of Mr. George A. Boasford, Centre street, destroyed; loss about $1,600; origin, supposed incendiarism.

Bath, N.B.—Central hotel, home of Rev. G. A. Gilverson, and other two buildings destroyed; loss about $10,000; origin unknown.

Edgar's Mills, Ont.—Village post-office, general store, and residence of Mr. Reginald Weldon destroyed; loss and origin unknown.

Guelph, Ont.—Premises of Mr. John McNally, fish dealer, Gordon street, badly damaged; loss unknown; origin, spark from pipe.

Vancouver, B.C.—Garage of Mr. W. Bauer, 130 Georgia street, destroyed, also 36 automobiles; loss estimated at $100,000. One man burned to death. Origin unknown.

Rainy River, Ont.—Store building, corner of Fourth street and Mill avenue, destroyed. Mrs. Hume, school teacher, burned to death; loss about $3,000; origin unknown.

Shoal Lake, Man.—The post-office, the government telephone exchange, several business establishments, and the Miller Block, destroyed; loss about $18,000; origin, lightning.

Swift Current, Sask.—Great Northern Company, Limited's hardware store destroyed, also yard of International Lumber Company; loss estimated at $110,000; origin unknown.

Clarksburg, Ont.—Queen's hotel, general store of Messrs. Lougheed Brothers, and residence of Mr. James Mitchell destroyed; loss about $10,000; origin supposed incendiarism.

Ottawa, Ont.—Motor boat, owned by Mr. C. Guay, damaged; loss small; origin, careless with matches. Store on Somerset street badly damaged; one fireman injured; loss and origin unknown.

Hamilton, Ont.—Sheds at 158 and 160 Markland street destroyed; loss about $500; origin unknown. Residence of Mr. James Rowell, 480 Mary street, badly damaged; loss unknown; origin, lamp upset.

Toronto, Ont.—Nos. 35 and 37 Seaton street badly damaged; loss about $1,500; origin unknown. Stock of Victoria Clothing Manufacturing Company, 50 Colborne street, badly damaged; loss about $15,000; origin, supposed defective wiring. Awnings on seventh and eighth floors of Traders Bank building, Yonge street, destroyed; loss and origin unknown.

Montreal, Que.—Twelve families were rendered homeless by a fire which started in a shed behind a Chinese laundry on Ontario street, near St. Germain; loss estimated at $30,000; five horses were burned. Residence of Mr. John Mair destroyed; loss unknown; origin, lightning. Building owned by Mr. Joseph Turcot, Back River, destroyed; loss unknown; origin, lightning. Automobile owned by Mr. Arthur Lepere, 421 East Sherbrooke street destroyed; loss and origin unknown. Church of St. Jean Baptiste, Rachel street, destroyed; loss about $200,000; origin, lightning. Boarding house on St. James street destroyed; one fireman injured; loss about $2,000; origin unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Wolfville, N.S.—College men's residence of the Acadia University sustained loss of $382 on stock and $844 on building. On the presbytery.—Atlas, $10,000. On the organ.— Royal, $18,000. The above figures are subject to revision.

WESTERN CANADA.

Monetary Times Office,
Winnipeg, June 27th.

The wheat crop is three weeks ahead of last year in its advancement and from many sections is reported to be in the shoot blade. June has been remarkable for the moisture that has fallen and the growing grain has been brought along with a rush. General business is most encouraging and the progress of all the crops have inspired much enthusiasm. A 200,000,000 bushel wheat crop is generally looked for.

Interest is being taken in the amalgamation of an insurance and financial brokerage house of London, England, with Messrs. Carson & Williams, of this city, who have been conducting a general insurance business here. The new firm will in future be known as Messrs. Matthews, Wrightson & Company, (Canada), Limited, with head offices in the Canada Life Building, St. James Street, Montreal, and the Western agency will be conducted at 727-728 Union Bank Building, Winnipeg, previously occupied by Messrs. Carson & Williams. They have acquired the general agency for the Dominion of a British fire insurance company named the Midland and Textile Insurance Company, of London, England, and the Winnipeg office will also retain the general agencies of the Millers National Insurance Company and the Liverpool Victoria Insurance Corporation, Limited, for the Western provinces. By the new arrangements just completed Messrs. Carson & Williams retain large interests in the new concern, and the business will be carried on by the same men.

It is stated that Messrs. A. H. C. Carson, F. D. Williams, E. M. Sellon, and G. H. Williams will form the board of directors, as well as Messrs. H. Wrightson and F. Owen, two well-known gentlemen in British insurance and financial circles. Mr. W. J. Wilcox, assistant manager of the Central Canada Insurance Company, has been appointed to manage the Winnipeg office.

◆

Four parties of surveyors are now at work on the Port Mann townsite. A preliminary topographical survey is being made for the use of the landscape architect who will plan the subdivision and lay out the residential portion.

CANADA BREAD COMPANY INCORPORATED.

Several Large Concerns — Eighty-two New Companies.

Eighty-two companies with a total capitalization of $31,237,100 were incorporated during the week.

The Canada Bread Company, with head office in Toronto, and capital of $3,750,000, was the largest company to be chartered. This company is a merger of several bread companies, and the directors are Messrs. C. Mulock, M. Stobie, and M. Bredin.

Other large incorporations were: Canada Carbide Company, Montreal, $2,000,000; Saskatoon (Drinkle) Corporation, Saskatoon, $2,000,000; Lucky Cross Mines of Swastika, Toronto, $1,500,000; National Real Estate & Investment Company, Montreal, $2,000,000; Alberta Land Company, Ottawa, $1,500,000; Congress Mines, Toronto, $1,000,000; Iroquois Porcupine Mining Company, Toronto, $1,000,000; Eleanore Gold Mines Company, of Porcupine, Toronto, $1,000,000; Vancouver Milling & Grain Company, $1,500,000; Fellows' Transmission Manufacturing Company, $1,000,000; Teta River Mining Company, $1,000,000; Progress Mining Company, $1,000,000; all with head offices in Vancouver, B.C.

The following is a list of charters granted during the past week. The head office of each company is situated in the town, city or province mentioned at the beginning of each paragraph: The persons named are provisional directors.

Cariboo County, B.C.—Wah Lee & Company, $10,000.

Vermilion, Alta.—Vermilion Brick Company, $20,000.

Edmonton, Alta.—Manley Construction Company, $20,000.

Calgary, Alta.—Western Planing Mills Company, $200,000.

Athabasca Landing, Alta.—Athabasca Investments, $50,000.

Chilliwack, B.C.—Chilliwack Land & Development Company, $500,000.

Nelson, B.C.—Western Provinces Co-Operative Realty Company, $100,000.

Watrous, Sask.—Watrous Electric Light, Power & Traction Company, $25,000.

Moose Jaw, Sask.—Palfrey Townend Company. Imperial Realty Company, $100,000.

Brandon, Man.—Fraternal Hall, $5,000. E. Bolton, H. H. Swalwell, W. V. Oglesby.

Brampton, Ont.—Brampton Hotels, $40,000. B. F. Justin, S. Deeves, C. M. McCollum.

Sackville, N.B.—Sackville Concrete, $6,200. J. H. Secord, E. R. Hart, H. M. Wood.

Beeton, Ont.—Beeton Telephone Company, $75,000. D. S. Morrow, J. N. Lannin, A. G. Gaul.

Brockville, Ont.—Brockville Toffee Works, $25,000. H. T. Bresee, R. H. Smart, E. Smart.

Trenton, Ont.—Lloyd & Sons, $100,000. G. E. Matthews, H. F. Whittier, S. Hooey.

Winnipeg.—Gabrielle Gold Mines, $100,000. E. A. Pelletier, W. A. Munro, F. L. Cartwright.

Orillia, Ont.—Orillia Furniture Company, $100,000. T. H. World, H. M. Christie, J. B. Tudhope.

West Lorne, Ont.—Mac Lumber Company, $50,000. A. McKillop, J. A. McKillop, Mrs. I. Fuller.

St. John, N.B.—Canada Nail & Wire Company, $800,000. E. C. Elkin, S. E. Elkin, C. P. Nixon.

Hamilton, Ont.—Dominion Soap Company, $100,000. E. R. Clarkson, C. W. Scott, W. M. McClemont.

Sussex, N.B.—Thompson Coal & Brick Company, $24,000. G. W. Fowler, W. B. Jonah, W. D. Turner.

Regina, Sask.—Regina Agencies, $20,000. Saskatchewan General Investment & Agency Company, $500,000.

Latchford, Ont.—Latchford Assay & Refining Company, $40,000. H. H. Roberts, Detroit; H. R. Shehan, W. H. Eiss, Buffalo.

Kenora, Ont.—Lake of the Woods Printing Company, $40,000. J. Weldman, J. Robinson, Kenora; D. Fowler, Brantford.

Niagara Falls, Ont.—Electric City Athletic Association, $40,000. A. R. Boyd, H. V. Poot, Philadelphia; W. J. Mackin, Atlantic City.

North Bay, Ont.—North Bay Real Estate & Development Company, $150,000. G. H. Ferguson, Mrs. E. Ferguson, Miss M. Eligh Kemptville.

Beauce Junction, Que.—La Buanderie des Families, $19,900. I. Fournier, Beauce Junction; N. Michaud, Levis; J. A. Nadeau, Beauce Junction.

Walkerville, Ont.—American Auto Trimming Company, $40,000. B. Gotfredson, Detroit; F. H. Joyce, Sandwich East; N. A. Bartlet, Windsor.

Victoria, B.C.—Lucas Patent Granitic Pipe & Cement Construction Company, $100,000. Victoria Arena Company, $100,000. Chemainus Valley Mining Company, $1,000,000.

Victoriaville, Que.—Prince of Wales Hotel, $48,000. P. Tourigny, P. Lavigne, G. Perreault. Canadian Rattan Chair Company, $49,000. P. Tourigny, L. H. Couillard, P. Lavigne.

Port Arthur, Ont.—Whitehead, $50,000. C. B. Whitehead, W. F. Langworthy, A. J. McComber. Minitaki Gold Fields, $250,000. J. H. Spence, J. R. L. Starr, M. C. Cameron.

Chatham, Ont.—Chatham Driving Park Company, $40,000. J. N. Massey, W. Gordon, E. Massey. O'Keefe & Drew Abattoir Company, $200,000. J. T. O'Keefe, T. A. Drew, W. Stanworth.

Saskatoon, Sask.—Canadian Cordage Company, $40,000. Macdonald, Koyl & Mathews, $20,000. Saskatoon (Drinkle) Corporation, $2,000,000. J. S. Lovell, W. Bain, R. Gowans.

Ottawa.—Alberta Land Company, $1,500,000. W. Johnston, A. Smith, R. M. Stalker. Capital Mica Company, $75,000. J. F. Smellie, T. A. Burgess. Oliver Silver Mining, $3,000,000. P. O. Coulombe, J. H. Proulx, J. F. Menard, Montreal.

Montreal.—Matthews, Wrightson & Company, $100,000. H. Wrightson, E. M. Sellon, London, Eng.; G. H. Williams, Montreal. Canada Carbide Company, $2,000,000. H. Murray, W. S. Hart, G. W. MacDougall. Montreal Fire Brick Works Company, $40,000. H. Clayton, J. E. Clayton, W. Clayton. National Real Estate & Investment Company, of Canada, $2,000,000. R. T. Heneker, A. H. Duff, W. S. Johnson. Pioneer Egg Farm, $20,000. L. A. David, W. H. Lunney, C. J. E. Charbonneau. Majestic Hotel Company, $35,000. G. Sorgius, A. Bonneville, F. Fleurie.

Vancouver, B.C.—Bright, McDonald & Company, $20,000. Vancouver Milling & Grain Company, $1,500,000. Vancouver Towel Service Company, $10,000. Fellows Transmission Manufacturing Company, $1,000,000. Cramer Investment Company, $500,000. Munro Manufacturing Company, $25,000. Canadian Van Emon Elevator Company, $100,000. Cassady Engine Company, $60,000. Teta River Mining Company, $1,000,000. Jenkins, $25,000. Steamboat Pollard Gold Mines, $500,000. Mercantile Investment Company, $50,000. Progress Mining Company, $1,000,000. Roddick Gold Mines, $50,000. Elder Murray Company, $100,000. Eureka Water Heater Company, $100,000. Great-West Sand and Gravel Company, $20,000.

Toronto.—Northern Securities Company, $100,000. J. S. Lovell, W. Bain, R. Gowans. Lucky Cross Mines of Swastika, $1,500,000. J. E. Day, J. M. Ferguson, E. V. O'Sullivan. Baker Advertising Agency, $40,000. R. A. Baker, D. Henderson, W. H. McGuire. Congress Mines, $1,000,000. S. W. Jacobs, A. R. Hall, G. C. Papineau-Couture, Montreal. Iroquois Porcupine Mining Company, $1,000,000. R. R. Black, Haileybury; F. C. Doran, G. A. Archibald, Toronto. Eleanore Gold Mines Company, of Porcupine, $1,000,000. E. Lafontaine, G. Ozburn, A. B. Currey. Toronto Metal Company, $40,000. H. Jennings, G. McWilliam, J. McWilliam. Death & Watson, $40,000. N. P. F. Death, L. Watson, G. G. Wishart. Wilcox Lake Brick Company, $100,000. J. F. Lennox, C. W. Plaxton. C. M. Ellis Printing Company, $20,000. W. G. Glinn, W. Wood, H. Carter. Toronto Suburbs, $500,000. C. Kappele, C. M. Johnston. Andrews-Bowman Company, $40,000. E. S. Andrews, J. E. Chamberlin, J. W. Bowman. Anglo-American Development Company, $100,000. J. E. Day, J. M. Ferguson, E. V. O'Sullivan. Canada Bread Company, $3,750,000. C. Mulock, M. Stobie, M. Bredin.

◆

NOTES OF BIDDING.

Nine Toronto bond firms bid for the 4½ and 5 per cent. 10 and 30-year debentures of Barrie, Ont., which were awarded to Messrs. Wood, Gundy & Company.

For the $64,600 school bonds of Halifax, N.S., eight offers were received, four from Toronto, two from Montreal, one from Halifax and one from St. John. The bid of the Royal Securities Corporation, Montreal, was accepted.

For the $175,000 4½ per cent. 40-year debentures of Edmonton S.D., Alta., seven bids were received, six from Toronto bond houses and one from the Imperial Bank. As previously noted, the award was made to the Imperial Bank.

Eight bids were made for the Chatham, Ont., $19,491 5 per cent. 15-year local improvement debentures, which were awarded to Messrs. Wood, Gundy & Company, Toronto.

Seven Toronto bond firms tendered for the $52,000 4½ and 5 per cent. 20 and 30-year debentures of Penetanguishene, Ont. The offer of Messrs. Brent, Noxon & Company, was accepted.

MANY NEW ISSUES.

A cable says the Bank of Montreal has issued £310,239 4 per cent. consolidated stock of the municipality of South Vancouver at 96½, redeemable in 1961.

The issue of 5 per cent. first convertible debentures of the Belding, Paul & Corticelli Silk Company, Limited, is being made through the Dominion Bond Company, Limited, and C. Meredith & Company, Limited, in Canada, and the London & Southwestern Bank, Limited, and the Royal Bank of Scotland, in London, England. The debentures are being offered in Canada at 89. These debentures are convertible into 7 per cent. preferred stock of the company between May 1st, 1913, and May 1st, 1915, at the option of the holder, on the basis of $100 of debentures for $105 of preferred stock.

The sinking fund provision provides for a 2 per cent sinking fund, commencing on May 1st, 1912, which sinking fund will be devoted to the purchase of the debentures in the open market at a price not exceeding 105 and accrued interest.

The trust deed also provides that no further debentures can be issued for a greater amount than 50 per cent. of the appraised value of new fixed assets acquired by the company, the said assets to be approved by the trustees.

A block of $1,250,000 six per cent. first mortgage, fifteen year sinking fund gold bonds of the William Davies Company, Limited, packers and provisioners, Toronto, is being issued by the Dominion Securities Corporation, Limited. The prospectus notes the following points:—

(1) Packing houses at Toronto, Montreal and Harriston (including sites and equipment) conservatively valued by independent experts at $1,077,919; real estate and buildings owned by the company at $535,375, and total assets at $3,357,919.

(2) Net current quick assets in excess of current liabilities $1,320,471.

(3) Average annual net earnings for past five years $268,387, or 3½ times the interest on the present bonds.

(4) An annual sinking fund beginning July 1st, 1912, sufficient to retire the present issue prior to maturity at a maximum price of 105 and interest.

The William Davies Company, Limited, whose business was established in 1853, is at present the largest packing house in the British Dominions, with gross sales during 1910 of $11,680,786. It owns large and modernly equipped packing plants in Toronto, Montreal and Harriston, and sixty-two retail markets strategically located in the cities of Toronto and Montreal, and the following points throughout Ontario:—Oshawa, London East, Kingston, St. Catharines, Brantford, Collingwood, Belleville, Galt, Brockville, Woodstock, London, St. Thomas—through which distribution of its products is made. The company is actively represented in every province of Canada, and its products are found in wholesale and retail houses from the Atlantic to the Pacific. It also maintains agencies in Great Britain. The home and foreign markets for the company's products are being constantly improved and broadened.

BOND NOTES.

The district council of North Vancouver, B.C., have refused to accept responsibility for the interest on the bonds of either Messrs. McDougall, Jenkins & Coy., North Vancouver, or the Imperial Car, Shipbuilding & Drydock Coy. In the case of the former company, a request was made that the council guarantee the payment of the interest on an issue of $350,000, and in the other that the municipality accept responsibility for the interest on bonds to the value of $1,000,000.

The Provincial Government has provided a sinking fund of one-half per cent. per annum in respect of this stock. In addition to the present loan £2,872,603 has been borrowed for the Government's railway. and £3,407,877 has been expended. The revenue for 1910 was £1,826,918 and the expenditure for 1910 £1,826,096. The total funded debt including bond subsidies to other railways and institutions was £4,597,603 and the Dominion Government subsidy payable annually is £425,600. The population of Ontario at last census in 1901 was 2,182,947. The revenues of Ontario alone are liable in respect of this stock and the dividends thereon, and the consolidated fund of the United Kingdom and the Commissioners of His Majesty's Treasury are not directly or indirectly liable or responsible for the payment of the stock or of the dividends thereon or for any matters relating thereto.

◆

Mr. Alfred Higginbotham, of Milton, Ont., has bought a ranch near Nelson, B.C., and will reside there.

A new one dollar note of the Dominion has just been issued. In place of engravings of Lord and Lady Aberdeen it contains those of Lord and Lady Grey. In the old notes the portraits were in the upper corners, but in the new ones they are in the centre side by side.

ROULEAU, SASK.

Steady Progress Made by This Ten-Year-Old Western Town—Debentures to be Issued.

The town of Rouleau, situated on the Soo line branch of the Canadian Pacific, southeast of Moose Jaw, has been experiencing an era of prosperity for the past few years, culminating in the decision of the ratepayers last fall to install a modern system of waterworks and electric light during the coming summer. The town is now about ten years old and has a population of nearly 1,000. Steady crop yields in the district for years past have tended to make business steady and to insure a steady growth in all fields of business activity. The district is known all over the West to contain the highest farm values, which are steadily increasing. This naturally tends to attract the best class of farmers and to hold them in the district when once they are firmly established. Settlement of the district has been made by the best class of Canadian, American, and English farmers. A friendly rivalry between them has naturally conduced to good farming.

A Schoolhouse at Rouleau.

For some years past the ratepayers have been aware of the necessity of modern improvements in order to keep abreast of the times. In order to finance these more easily when the time came, the liabilities of the town have been kept as low as possible and all minor improvements paid for out of current revenue. Owing to this course being followed, the present debenture debt is under $3,000, while the present year's assessment totals $500,000. There are at present about five miles of sidewalks and the streets are all well graded.

The proposed improvements this year will total $60,000, contracts being now let covering that amount. The council are preparing to issue debentures immediately to cover this, the issue being sanctioned by vote of the ratepayers last fall. A first-class supply of water has already been located in the town limits and a system conforming with the requirements of the fire underwriters will be built, so as to insure at all times proper fire protection as well as an adequate domestic supply. The electric light plant, which is being installed for the town by the Canada Foundry Company, is also modern in every way, providing for street as well as house lighting. For the past two years the business district has been covered by a fire by-law and this has been the cause of all new buildings inside this limit being of permanent construction.

One of Rouleau's Business Blocks.

Business has never been overdone in Rouleau, and while there has been at all times sufficient competition, yet there has never been too much. All lines, both business and professional, are well represented. The cash system has been in vogue in most of the stores for some time now and is working well.

6/24/11—2t.

THE HOME BANK OF CANADA

The annual meeting of the Home Bank of Canada was held in Toronto, June 27th. There are over 1,600 shareholders of the Home Bank, so it was a small, but representative gathering that assembled at the head office, 8 West King Street.

Following the general meeting the directors met and reelected the former board: Mr. Eugene O'Keefe, president; Mr. Thomas Flynn, vice-president. Directors—Messrs. E. G. Gooderham, W. Parkyn Murray, John Kennedy, John Persse, Thomas A. Crerar, Col. James Mason.

The President's Remarks.

Mr. Eugene O'Keefe prefaced his business statement with a few remarks, reviewing his connection with the Home Bank. Fifty-five years ago he had joined the staff of the old Toronto Savings Bank—an institution which had developed into the Home Bank of to-day. All his life he had been actively identified with the Home Bank. He was an old man to sit at the head of such an institution, but cautiousness was what had made the Home Bank a success, and he had lost none of his cautiousness in business affairs with his years. Referring to the report Mr. O'Keefe said:—

President's Address.

"When we had the pleasure of meeting you a year ago, I stated in my remarks that a circular, issued by the Northwest Grain Dealers' Association, dated June 7th, 1910, showed the estimated crop acreage of the three provinces to be in excess of that of the previous year, in wheat alone, by 1,350,000 acres—that reports then in indicated an excellent condition of the growing crops, and that everything looked favorable for a big yield. I also added that more recent reports, however, were not so encouraging, as the want of rain and the excessive heat of the previous few days had apparently done considerable injury. The wheat crop, I regret to say, though large, was disappointing, the yield being very considerably below that at first anticipated.

"The circular of the Northwest Grain Dealers' Association of date June 7th of the present year, shows an increase in acreage of wheat this year over last year, almost identical with the excess of last year over the previous year, viz., 1,355,000 acres, the total acreage in wheat alone being well up to ten millions. The grand acreage total of all grains, according to this circular, in the three northwestern provinces, is over sixteen millions. The weather up to the present time has been considered favorable, and the circular which I am now quoting, states as follows:—'Reports indicate the best conditions of the growing crops since 1895, but the wet weather has delayed in some localities the completion of seeding of oats, barley and flax. The prospects are for a bumper crop.' The information received since the publication of this report regarding the weather conditions has been quite satisfactory. It is, therefore, only reasonable to look forward to a successful harvest.

"Our paid-up capital is now $1,264,000, besides something over an additional $100,000 subscribed for. The total number of shareholders has increased from 1,346 to 1,636, these new shareholders being chiefly North-west farmers, who now number some 983, thus keeping pace with the bank's operations in that promising field for its business.

"Our deposits have increased about $1,000,000. Circulation also shows a satisfactory increase. Our net profits are a little over 10 per cent. on the average paid-up capital. We have added to the rest $50,000, being the amount required to keep up its proportion on the paid-up capital, viz., 33 1-3 per cent., and a balance of $69,303.47 has been carried to profit and loss account.

"New offices have been opened at four points. The total assets of the bank have reached the sum of $11,054,869, an increase of $1,350,000 for the year. Appended to the report which you now have in your hands is a comparative statement, which I think will be gratifying to you. It covers the operations of the bank during the last five years, and shows a continuous and satisfactory increase in every department."

A Comparative Statement.

The annual statement of the Bank featured the following comparison, showing the growth of the Bank during the past six years:—

	Paid-up Capital.	Rest.	No. Shareholders.	Circulation.	Deposits.	Total Assets.
May, 1906	$699,240	$175,000	390	$158,790	$3,816,286	$4,895,150

SALE OF FIFTY MILLIONS OF THREE PER CENTS.

The sale of $50,000,000 3 per cents. by the United States Government has occasioned great interest. The purpose of the loan is to reimburse the Treasury for its previous expenditures from its ordinary cash balance, in payment for work on the Panama Canal. Up to the present date there has been expended for that purpose $239,000,000, of which something over $87,000,000 has been provided through sale of bonds, leaving nearly $152,000,000, which has been drawn from the general Treasury fund and is by law repayable to the Treasury as a result of bond sales. There are authorized and not yet issued for the purpose of Panama Canal construction, including re-imbursement of the Treasury, bonds to the amount of $290,500,000, and of this amount the $50,000,000 issue was a part.

The New York Chronicle gives some interesting details of this important loan. "So far as concerns the Treasury itself," says our contemporary, "its total deficit in revenue below expenditure for the fiscal year to date—with about one week remaining to the year—is $17,000,000. This deficit was wholly caused by a $35,000,000 net expenditure on the Panama Canal during the period. Hence the present plan to reimburse the Treasury through proceeds of these bonds.

But this is only part of the story. When the present secretary of the Treasury assumed office in 1909, the double problem of the public credit and of the national bank circulation confronted him. In his first report he advocated the immediate adoption of the plan of paying for the Canal through bonds, urging that "the expressed policy of the government to pay the cost of the Canal from the proceeds of bonds, in order that the next generation or two shall share with this the cost of the great enterprise, should be secured and established." But the secretary went further than this in his subsequent report. Recognizing that the basis of government bond security for national bank notes was an uneconomic plan which of recent years has worked very badly, and recognizing also that the further indefinite increase of bank note issues on such a basis would complicate future plans for reform of the currency system, he advocated the issuing of bonds without what has been known as the "circulation privilege."

The secretary recognized, as did all other people, that a certain artificial value was imparted to government bonds through this privilege of use as collateral for bank notes, and he frankly declared that two per cent. bonds could probably not be sold at par or better without that privilege. Therefore he proposed a three per cent. issue, and supported that recommendation by the undoubtedly correct statement that neither the United States Government nor any other government possessed a legitimate borrowing power on a two per cent. basis and that the sooner the government's proper position in the market was recognized the better. In his report of last December, the secretary stated that if a $50,000,000 three per cent. loan were to be issued without the circulation privilege, "we should be able to gauge experimentally the rate at which the government could borrow on an investment basis, and we should then be better able to formulate a financial policy for the future."

This is the reason why the recent sale—the first government bond sale in forty-eight years which has been made without the circulation privilege—is in its way a landmark in United States national finance. The issue was oversubscribed three times.

CLEARING HOUSE RETURNS.

NATIONAL TRUST COMPANY, Limited, Toronto,

The Legal opinion of Messrs. Blake, Lash, Anglin & Cassels, Toronto, will be furnished

---

We emphasize the following salient points of this Issue:

(1) Packing houses at Toronto, Montreal and Harriston (including Sites and Equipment) conservatively valued by independent experts at $1,077,919. Real Estate and buildings owned by the Company at $535,375, and total assets at $3,357,919.
(2) Net current quick assets in excess of current liabilities $1,320,471.
(3) Average annual net earnings for past five years $268,387, or 3½ times the interest on the present bonds.
(4) An annual sinking fund beginning July 1st, 1912, sufficient to retire the present issue prior to maturity at a maximum price of 105 and interest.

The William Davies Company, Limited, whose business was established in 1853, is at present the largest packing house in the British Dominions, with gross sales during 1910 of $11,680,786. It owns large and modernly equipped packing plants in Toronto, Montreal and Harriston, and sixty-two retail markets strategically located in the cities of Toronto and Montreal, and the following points throughout Ontario: Oshawa, London East, Kingston, St. Catharines, Brantford, Collingwood, Belleville, Galt, Brockville, Woodstock, London, St. Thomas—through which distribution of its products is made. The Company is actively represented in every Province of Canada, and its products are found in wholesale and retail houses from the Atlantic to the Pacific. It also maintains agencies in Great Britain. The home and foreign markets for the Company's products are being constantly improved and broadened.

Copies of the Trust Deed and of the Certificates of the Canadian Appraisal Company, Limited, and of National Trust Company, Limited, Toronto, covering the appraisal of the Company's plants, and the valuation of real estate may be seen at our offices

Interim Certificates will be issued pending the delivery of definitive bonds.

DEBENTURES FOR SALE

WOLSELEY, SASK.

School Debentures for Sale.

For sale $7,500.00, Five Per cent. 20-year School Debentures, Wolseley Public School District, Wolseley, Sask.

J. M. DYCK,
Sec.-Treasurer.
June 6th, 1911.

DEBENTURES FOR SALE.

Sealed tenders will be received by the undersigned up to 12 o'clock noon, Saturday, July 15, 1911, for the purchase of debentures of the Town of North Bay; $45,000.00 for Storm Sewer purposes, and $100,000.00 for Water Works Extension purposes, both bearing interest at the rate of five per cent. per annum, payable in thirty equal annual instalments.

Delivery to be made at the Traders Bank of Canada, North Bay.

T. N. COLGAN,
Commissioner of Works.
North Bay, Ont.,
June 23rd, 1911.

$589,000.00.

City of Ottawa, Ontario.

Debentures for Sale.

Tenders by registered letter only, addressed to "The Chairman Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa, until 3 p.m. on Thursday, 14th September, 1911, for the purchase of $85,000.00 forty-year debentures, $343,500.00 thirty-years and $160,500.00 twenty years.

They are all a liability of the City at large, and bear four per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $73,500.00 thirty year debentures, and the other for the remainder of the debentures, $515,500.00.

All tenders must be on the official form.

The tender for the $73,500.00 must be accompanied with a marked cheque for $1,000.00, and the tender for the $515,500.00 with a marked cheque for $5,000.00.

Accrued interest from 1st July, 1911, must be paid in addition to the price tendered.

The $73,500.00 debentures are in $1,000.00 denominations, principal and interest payable in Ottawa.

The remainder of the debentures will be made in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $73,500.00 can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,
Mayor.
Ottawa, 1st July, 1911.

TENDERS FOR DEBENTURES.

Rural Municipality of Wood Creek, No. 281.

Windsor, Ont.

DIVIDEND NOTICE.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED.

Notice is hereby given that a dividend has been declared of One per cent. on the Ordinary shares in the Capital stock of The Mexican Light & Power Company, Limited, payable on the 15th day of July, 1911, to shareholders of record, at the close of business on the 8th day of July, 1911. That the transfer books of the Company for the Ordinary shares be closed from the 10th day of July to the 15th day of July, 1911, both days inclusive.

By order of the Board.

W. E. DAVIDSON,
Secretary.
Toronto, Canada, June 28th, 1911.

A Toronto syndicate, with a colonization scheme in hand, have bought 616 acres of Kootenay fruit lands. Mr. John D. Robinson is one of the principals.

BOND DEALERS

We recommend for investment the
6% First Mortgage Sinking Fund Bonds of

The Spanish River Pulp and Paper Mills, Limited

Price 98 and Interest Yielding Over 6%

This company has the right to cut all the pulpwood on an area of 6,000 square miles, watered by the Spanish River and its tributaries.

Exclusive of pulpwood, the company's assets, consisting of plant, waterpower, buildings, etc., are appraised at $2,480,000.

The net earnings last year were sufficient to meet the bond interest two and one-half times.

The pulp and paper industry in Ontario is less likely to suffer from depression than any other. All the product of this company is sold in the United States, and the growing scarcity of pulpwood there is indicated by a steadily-rising market for Ontario pulp.

These bonds, in our opinion, offer exceptional security, and we shall be pleased to explain the security more fully on request.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time for his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Corporation, Limited
TEMPLE BLDG., - TORONTO

DAVIS HANDBOOK OF THE PORCUPINE GOLD DISTRICT.

An excellent history and reference of the Porcupine mining camp, Northern Ontario, has just been completed by Mr. H. P. Davis, who will be remembered as the author of a hand book of the Cobalt silver district. There is a good key map of the camp and a historical sketch of Porcupine. The geology of the Porcupine area is dealt with in outline by Mr. E. M. Flynn. General information is given respecting transportation, power, the Porcupine mining division, gold production in Canada, new mining districts in Ontario's Northland. In his preface, Mr. Davis says that the development of the Porcupine gold district is still in the preliminary stage. Sufficient data are not yet available to allow for even an approximate estimate of the potential value of this new gold field. There is, however, no question as to the tremendous possibilities. The author reminds us that Porcupine has attracted the attention of experts from all parts of the world and some of the most eminent authorities on gold mining have predicted a great future for the camp. Valuable reference features are the directories of incorporated companies and of operating syndicates. There are also reviews of the Cobalt, South Lorraine, Montreal River and Gow Ganda districts, together with general information for prospectors and mine owners. This handy little volume has a complete index. The Davis Handbook of the Porcupine District, by H. P. Davis, 25 Broad Street, New York. Price $1.50.

◆

DIAMOND VALE COLLIERIES HAVE TROUBLE.

A stormy meeting of the shareholders and directors of the Diamond Vale Collieries and Diamond Vale Coal and Iron Mines was held at Vancouver last week, says the Vancouver News-Advertiser. The meeting was in connection with the proposal to institute an investigation into the affairs of the companies. Two directors were present holding proxies from Mr. T. J. Smith, who controls $607,000 of the stock, and shareholders from all over the country, some having come from as far as Salt Lake City, representing stock to the value of $240,000. One of the directors was in the chair, and when the shareholders declared in favor of an investigation he refused to consider the motion, forcing the meeting to adjourn.

This action on the part of the director roused protests from the shareholders present, who were practically unanimous in favor of closing up both the companies. The directors had the control of the situation, holding with their proxies the majority of the votes.

Immediately upon the adjournment the shareholders held an indignation meeting. At this meeting two resolutions were passed, the first demanding that both the companies should be wound up, and the second to bring action against the directors of the company for conspiracy and fraud. The shareholders intend to proceed against the directors immediately on the last charges and the necessary legal steps are already being taken.

MONTREAL MAY BE A WINTER PORT.

Major G. W. Stephens has returned from a trip to Great Britain more than ever persuaded of the possibility that Montreal may yet be made a winter port.

Quebec, he points out, is geographically situated much the same as St. Petersburg as respects water approaches to the city although it is a great deal further south than the Russian city. The St. Petersburg port authorities have found little difficulty in keeping St. Petersburg open for navigation the year round. In the winter, powerful ice breakers, followed immediately by the ships entering or leaving port, smash their way through the ice. Although twenty years ago Norwegian ports were all closed during the winter time, to-day every leading port in Norway is open for navigation the year round, and these ports are situated further North than Montreal. Major Stephens says that the difficulty in keeping navigation open to Montreal has been the piling up of the frazil ice at the beginning of the season. If the channel were kept open at the commencement of the season by the constant moving of steamships between Montreal and Quebec, an open channel could be maintained throughout the winter. The government would gain much knowledge of winter conditions below Quebec by keeping boats of the type of the Montcalm and the Lady Grey in commission between Quebec and St. Johns. He was quite aware that a great undertaking was involved and that success would only follow upon strenuous efforts and many failures.

Although the actual contract for the floating dry dock for Montreal had not as yet been signed by the Public Works Department the order had been confirmed and work has already begun upon the construction of the dock. It is expected that delivery will take place towards the close of next season.

Major Stephens would make no definite announcement concerning an insurance scheme which would reduce the present high insurance rate on the vessels using the St. Lawrence route. This has been a standing grievance in shipping circles in Montreal and has been regarded as one of the great drawbacks of the ports. In fact there is a sense in which the entire efforts in widening the channel and insuring its safety for ships have been directed towards the end of cutting down the rates of insurance.

◆

Increases are large in the assessable values in British Columbia municipalities. In Victoria, the total is $59,952,620, being land, $46,489,550, and improvements, $13,462,080. This is a big gain over last year when the total was $37,890,232, made up of land, $26,299,102, and improvements, $11,602,130. The city council of Victoria will probably adopt the single tax system in accordance with the opinion expressed by the people in the vote taken at the last civic elections. Assessment increases are also very large in Point Grey and in Burnaby. In the former municipality, they advanced from $20,000,000 to $33,000,000, and in Burnaby from $12,000,000 to $18,000,000.

The Ontario provincial loan of £500,000 4 per cent. registered stock, was the latest to suffer from the congestion in the London market, as noticed in these columns last week. Seventy-four per cent. of the issue, which was raised for public works, including the Temiskaming and Northern Ontario Railway and branches, was left with the underwriters.

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years!

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

THE
WATEROUS
ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

THE

TRUSTS and GUARANTEE COMPANY, Limited

43-45 King St. West, Toronto

JAMES J. WARREN, Managing Director.

ROYAL INSURANCE CO.

An increase of twelve per cent. in fire premiums between 1906 and 1910 is shown by the Royal Insurance Company, which held its sixty-sixth annual general meeting on June 13th in Liverpool. The figures are $17,155,000 in 1906; $18,350,000 in 1907; $18,465,000 in 1908; $18,940,000 in 1909 and $19,475,000 in 1910. The losses amount to 49.4 per cent. of the premiums, as compared with 48.9 per cent. in the previous year, while expenses were 35.6 per cent. The result in this department is the carrying of $2,903,000 to profit and loss. Fire assets apart from capital now amount to $26,945,000, made up as follows: fire fund $14,000,000; reserve fund $8,000,000 and profit balance $4,945,000.

The company's life business was also a successful one last year, increases of both gross and net being shown in their policies. Marine, too, shows a favorable experience, the absorption of the British and Foreign Marine Company having helped to swell the Marine premiums; and the result of the year was a credit balance of some $221,000. Its other departments have also added to their reserves, and the Royal maintains its position in the front rank of British underwriting companies.

conducted under the most favorable conditions is capable of affording.

At the BONUS DIVISION for the five years ending 31st DECEMBER, 1910,

(1) A UNIFORM ADDITION of $85 per $1,000 was declared on all classes of Full-Bonus Policies.

(2) A GUARANTEED BONUS was also declared of $12.50 per $1,000 per annum on Full-Bonus Policies becoming claims by death, and $17 per $1,000 per annum on Endowment Assurances maturing before 31st December, 1915. These bonuses apply to new as well as existing policies.

H. B. F. BINGHAM, Life Superintendent.
R. MacD. PATERSON, J. B. PATERSON, } Joint Managers.

AGENTS WANTED

The Best Paid Hard Work in the World

Life Underwriting has been described as
"The Best Paid Hard Work in the World"
and consequently, one of the most remunerative vocations in which anyone without capital can engage.

THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES

has several openings for men who possess organizing ability and who can work up a business from territory at present inadequately developed. Plenty of hard work and commensurate remuneration to those who possess the necessary qualifications.

Address:
GEORGE T. WILSON,
2nd Vice-President
120 Broadway - New York

The Dominion is celebrating its forty-fourth birthday to-day, as is also The Monetary Times. Both are in the best of health.

The terms in which the insurance journals of the United Kingdom refer to the death of Mr. J. J. Deuchar, of the Norfolk Union Life, show in what high estimation he was held. One of them, the London Review, says:—"For a considerable time ill-health forced Mr. Deuchar to spend the greater part of his time abroad, and he had only just returned when death occurred. He was a man who, apart from his great business ability, had personal characteristics by which he was endeared to all. * * * Mr. Deuchar was a great leader in the realm of business to which his life was devoted; his loss is mourned by all who had the happiness and honor of his acquaintance."

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to Intending Investors, large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

A Mortgage
is the best known and most popular kind of security in which to invest money. Selected under proper conditions, it affords the safest kind of investment.

Saskatchewan Mortgages
are the most popular mortgage security in Canada to-day. We sell these mortgages to yield a very attractive rate of interest. We guarantee payments, and make collections and remittances without cost to the investor.

LOCOMOTIVE COMPANIES BUSY.

Locomotive companies in Canada and the United States are working full time. One example is found in the reorganization of the Canadian Locomotive Co., of Kingston, a stock offering of which was made last week. The unsold balances of the $20,000,000 7% cumulative preferred stock of the Baldwin Locomotive Works at $104 per share, payable July 1, subject to allotment, has been offered in New York.

Mr. A. Johnson, president of the Baldwin Locomotive Works, states that officers and managers of the former company take for investment $5,900,000 of the preferred stock of the new company. They hold also a majority of the common stock in the new company, and are to continue to manage the business. As audited, combined profits of Baldwin Locomotive Works, the old company after expenses, charges, taxes, depreciation, and sinking fund were $2,706,280 for 1910, and the average annual combined net profits for the last ten years were $2,528,633. Stock of the new company is not subject to local taxation in Pennsylvania under present laws.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

THE UNIQUE RECORD
of Canada's Oldest Life Assurance Company

ESTABLISHED
in 1847—64 years ago.

THE COMPANY'S AIM
Security and Profit to Policyholders and Beneficiaries. Prompt Settlement of all Claims.

ITS POLICIES
Extremely simple, safe and profitable. Practically free from restrictions. Liberal Guarantees.

ITS SIZE
Over $130,000,000 of Assurances in force resulting from a steady increase of well-selected risks. The Income for 1910 was over $6,945,000.

ITS STRENGTH
Assets over $41,000,000, carefully distributed over a wide variety of high-class securities. Policy Reserves are valued on a 3% and 3½% basis, a higher and stronger valuation than required by Government.

ITS SURPLUS EARNINGS
Each year is showing an increase in Surplus earned, that for 1910 amounting to over $1,233,000, the largest in the Company's history. This is due to a favorable mortality, a low expense ratio and high interest earnings; in other words, good management.

THE RESULT
Since the inception of the Company its Policyholders have been paid or credited with $11,500,000 more than they have paid in premiums. The Profits declared in 1910 were, on a cash basis, 40% greater than at the previous division. The Assets have more than doubled within the past twelve years. The year 1911 shows continued and increasing prosperity.

THIS RECORD BELONGS TO THE

CANADA LIFE ASSURANCE CO.

T. G. McConkey, Superintendent of Agencies. Head Office—Toronto

The Best Paid Hard Work in the World

INVESTMENT AND LOAN COMPANIES

SEASONED SECURITIES

This Corporation was established in 1855, and for more than fifty-six years has been steadily growing in strength and in the confidence of the depositing and investing public. In that long period there have been "hard times" as well as seasons of prosperity, but the moneys entrusted to our keeping have always been ready when called for.

The Corporation's Bonds are, therefore, a "seasoned security." They are issued in accordance with the restrictive provisions of the Corporation's Charter, and also those with which the Legislature circumscribes the investment of Trust Funds. Nine and One-Half Million Dollars of Shareholders' money are a further pledge of their security.

These Bonds may be had in sums of One Hundred Dollars and upwards.

ANNOUNCEMENT

In the issue of the 22nd inst., The Monetary Times will present a complete report of the convention of Life Underwriters to be held at Winnipeg, July 12th, 13th, 14th.

A separate pamphlet, bound with heavy paper cover, will be issued simultaneously. In this pamphlet will be reprinted all the insurance contents of *this* issue, and also the convention report, etc., from our issue of the *22nd inst.*

This pamphlet will be free from all extraneous matter, and should be read and filed for reference by every life insurance agent and manager.

Orders for copies are now being noted as received, and as many of these as possible will be filled. The rate is $15 per 100 or 25 cents each for quantities less than 100.

LIFE UNDERWRITERS OF CANADA

THE life insurance men of Canada are meeting in Winnipeg. Their convention is held for the first time west of the Great Lakes. THE MONETARY TIMES devotes considerable space to the subject of life insurance this week, a matter in which the field man, the general manager, the superintendent and the actuary as underwriters, together with every man, woman and child as policyholders, prospective and otherwise, are interested.

Less than forty years ago, only 50,830 policyholders were in the Dominion. Last year there were 1,172,125. Thirty-five million dollars worth of life insurance was held in Canada two years after Confederation. On the last day of 1910 the amount had increased to $856,000,000. Of that sum, Canadian Companies were responsible for $565,000,000.

The Life insurance man to-day has every reason for optimism respecting the present and the future. The Dominion is one of the best canvassing grounds in the world and Western Canada, perhaps, is the most fertile field in the Dominion. New population comes to this country, through the medium of immigration, at the rate of hundreds of thousands every year. The majority of them, it is safe to hazard, are not carrying life insurance, although able to do so. And if not financially fit to receive the insurance agent at the time of arrival in this land of opportunities, it is not long before the new citizen, the agent and a life insurance policy are in a position to consummate a mutually profitable deal.

There is every wish for a successful convention. Those in Winnipeg who are responsible for the arrangements have done all in their power to make the gathering the most successful in the history of the Life Underwriters' Association movement.

CAPITAL INVESTMENTS IN CANADA

—IX.—

BRITISH CAPITAL AND CANADIAN RAILROADS

By Fred. W. Field.

Canada owes much to the British investor, if only because he has almost entirely financed its extensive railroad system. Before analyzing loans raised for this purpose, a few statistics respecting the growth of Canadian railroads will be of interest. In 1836, there were only 16 miles in operation. In 1867, the year of confederation, 2,278 miles were being operated. In 1884, for the first time the mileage exceeded 10,000; to be exact, 10,273. In 1910, the mileage had increased to 24,731, and during the present year railroad construction is very active. The following table shows the distribution of railroad mileage by provinces:—

	Miles.
Ontario	8,230.25
Quebec	3,794.94
Manitoba	3,220.62
Saskatchewan	2,931.90
Alberta	1,488.42
British Columbia	1,832.28
New Brunswick	1,521.65
Nova Scotia	1,350.56
Prince Edward Island	269.33
Yukon	90.91
Total	24,730.86

The mileage during the next few years will probably show large increases in Northern Ontario, Saskatchewan, Alberta and British Columbia particularly. The total of outstanding railroad obligations in 1910 was $1,410,297,687. Mr. A. W. Campbell, the Deputy Minister of the Department of Railways and Canals, Ottawa, has made an earnest effort to ascertain what deduction should be made from the total capital liability of Canadian railways. He has allowed for many special conditions, such as government subsidies, extinct stock and bond obligations, absorption of small railroads, railroads in stages of construction, etc. He has fixed the amount at $226,298,988. When this is subtracted from the $1,410,297,687 given above, the aggregate capital liability is reduced to $1,183,998,699.

Capital Liability Per Mile.

There are in the Dominion 2,043.84 miles of government owned and operated railway, against which neither stocks nor bonds are outstanding. There are also 75.36 additional miles of line to which no capital liability is attached. These two items make a total of 2,119.20 miles, which should be deducted, for the purpose of the present calculation, from the 24,731 given as the total railway mileage. Dividing 22,612 miles of railway into a total capitalization of $1,183,998,699 we have $52,361 as the quotient. That is the actual outstanding capital liability per mile against railways in Canada.

Only 7 per cent. of Canadian railroads are owned by the Government. Canada has the largest railway mileage in the world in proportion to its population, and its railroad mileage has increased in forty years from 2,617 to 24,731 miles, or 845 per cent.

Compared with European countries, Canada is third in the list in the matter of railway mileage increase during the past fifty years, with a percentage gain of 1,132.

Six Years' Heavy Borrowing.

The following is a summarized statement of Canadian railroad borrowing for the past six years and four months, ended April, 1911:—

Railway.	Amount.
Grand Trunk Pacific	£17,900,000
Grand Trunk Pacific Branch Lines Co.	1,270,500
Canadian Northern	12,742,784
Canadian Northern Ontario	1,593,569
Canadian Pacific	10,857,200
British Columbia Electric	3,615,000
Grand Trunk	3,348,400
Alberta and Great Waterways	1,520,550
Canada Atlantic	1,025,000
Duluth, Winnipeg and Pacific	950,000
Nova Scotia Eastern	940,000
Atlantic, Quebec and Western	925,000
Algoma Central and Hudson Bay	770,000
Wisconsin	514,403
Winnipeg Electric	300,000
Montreal Street	460,000
Central Ontario	200,000
Dawson, Grand Forks and Stewart	125,000
Central Counties	97,500
Temiscouata	50,000
	£59,204,906

Grand Trunk Pacific and Canadian Northern.

In railroad borrowing, one of Canada's new Transcontinentals, the Grand Trunk Pacific, is the heaviest debtor with £17,900,000. Adding to this the £1,270,500 obtained for its branch lines, there is a total for that road of £19,170,500, or almost one-third of the aggregate railroad borrowing of Canada in the past six years.

The Canadian Northern, which will also have a transcontinental road in a few years, is not far behind its rival, for it has obtained in London £12,742,784. To this should be added its Ontario lines, which have borrowed £1,593,569, giving the Canadian Northern a total of £14,336,353, about one-quarter of the aggregate railroad loans. These two roads together have obtained overseas £33,506,853 of a total of £59,204,906. Three electric railways, the Winnipeg, the Montreal and the British Columbia, borrowed in the six years £4,375,000, the British Columbia electric having had £3,615,000 of that amount, The Canadian Pacific's loans are chiefly represented by new stock issues.

The following are the details of the railroad flotations in London, by years:—

1905.

Canadian Northern Ry.	£ 600,000
Grand Trunk Pacific Ry.	3,004,000
Canadian Northern Ry.	1,923,287
Grand Trunk Pacific Ry.	3,200,000
Canada Atlantic Railway Co.	1,025,000
Nova Scotia Eastern Ry.	940,000
Canadian Northern Ry.	1,240,000
British Columbia Electric Ry.	185,000
	£12,117,287

1906.

Dawson, Grand Forks and Stewart Ry.	£ 125,000

	£3,948,097

France Has Helped.

While France has helped to finance the Algoma Central Railway extensions in connection with the operations of the Lake Superior Corporation, London capitalists are advancing most of the cash. The line will be extended 150 miles to connect with the Canadian Pacific, which will cost about $4,000,000. The road will then be continued to make connections with the National Transcontinental Railway. The Lake Superior Corporation last year secured at least £1,200,000 privately in London. A London and Canadian syndicate is also interested in the proposed construction of the Eastern Railway from a point on the Intercolonial at or near Dartmouth, N.S., to Guysborough, with certain branch lines. A contract has been signed between the Nova Scotia Government and the railway company, which will probably complete the road within three years. It has subsidies from the Dominion and provincial governments of $12,800 a mile. The same people have purchased the Dickie and other timber areas in Nova Scotia amounting to 440,000 acres

Stock is Widely Held.

The stock of the Canadian Pacific Railroad Company is probably the most widely held of any American road, with the exception of the Pennsylvania, which recently reported 64,869 shareholders. There is considerable difficulty in learning the number of shareholders of the Canadian railroads and in what countries the stock is held. Sir Thomas Shaughnessy informs me that the total number of Canadian Pacific shareholders is about 24,000, the number of Canadian holders being 2,500. Nearly all the four per cent. perpetual debenture stock and the four per cent. preference stock is held in Great Britain. Of the common stock, holders in Great Britain have approximately 65 per cent., 15 per cent. being held on the Continent, while the remaining 20 per cent. is divided evenly between Canada and the United States.

Grand Trunk shares are held by 54,200 persons, against 52,900 a year ago. This puts the Grand Trunk second only to the Pennsylvania Railroad, which has 64,869 shareholders. The Grand Trunk has £22,474,992 common and £23,173,632 preferred, and, as is well known, the shares are almost exclusively held in England.

Mr. Charles M. Hays, president of the Grand Trunk, tells me that from seventy-five to ninety per cent. of that road's shareholders are residents in Great Britain. Ninety-eight per cent. of the securities of the Canadian Northern Railway are held in the United Kingdom.

Mr. Brunner, of the Brunner banking house, Brussels, twenty-five years ago first interested Belgian capital in Canada in the shape of investments in Canadian Pacific Railroad stock. At that time, he tells me, he experienced great difficulty in convincing his countrymen that the Dominion was more than a wild stretch of ice and snow and the Canadian Pacific something more than a fantasy. In those days Canadian Pacific Railroad was selling at 58. Belgian investors, therefore, have no reason to regret their confidence in this Canadian enterprise. Mr. Brunner's clients have invested several millions of dollars in other Canadian-owned securities, more especially Sao Paulo, Rio, and Mexican railroads.

German capital has become interested to a small extent in the Canadian Northern enterprise, and is likely to become further interested in the near future.

Suffered Some Losses.

The British investor has suffered some losses in his liberal financing of Canada's railroads. The collapse of the Charing Cross Bank in 1910, which was heavily interested in the Atlantic, Quebec and Western Railway, is one instance. This road had borrowed at least £925,000 in Great Britain. Grand Trunk shareholders have not enjoyed an enviable dividend record. The third preference stock received a dividend of ½ of 1 per cent. for the half year ended December, 1910. This was the first disbursement on that stock since 1907. It is only fair to note, however, that in the capable hands of Mr. Charles M. Hays, the president, the road is making gradual and progressive strides. Mr. A. W. Smithers, its chairman, recently described its position as a poor company without a land grant doing an immense work with limited means.

Alberta Railroad Flotation.

The most curious railroad flotation of recent years was that of the Alberta and Great Waterways Railway, which was to open up the great Peace River country north of Edmonton. In December, 1909, $7,400,000 5 per cent. 50-year first mortgage bonds of the road were sold in England. The securities were guaranteed as to principal and interest by the Provincial Government of Alberta. The issue was made by the London branch of Messrs. J. S. Morgan & Company. Mr. W. R. Clarke, a banker of Kansas City, was understood to be chiefly interested. It was proposed to build the road from Edmonton, north-east of the Athabaska River, to Fort McMurray, a distance of about 350 miles. Of the total issue $400,000 covered Edmonton terminals, but the bulk of the loan was based on a guarantee of $20,000 per mile on the main line and branches. The bonds, issued at 110, were rapidly subscribed. Criticism was heard in London to the effect that the Alberta Government were ill-advised in their guarantee, which worked out at about 4½ per cent., when it might just as well and as satisfactorily have been done upon a 4⅛th basis.

A crisis in the Alberta Legislature occurred as a result of the provincial government's efforts to force the railroad agreement. The cabinet was dissolved and a royal commission appointed to investigate the deal. The commission's report was non-committal and the commission failed to take the evidence of most important witnesses, including Mr. Clarke, of Kansas City, the chief promoter. The provincial government then decided to cancel the railroad agreement, alleging that the company had defaulted in its bond interest. The money raised by the sale of railroad bonds in London was on deposit in three banks in Edmonton, the bulk being with the Royal Bank. The government now seeks this money, proposing to utilize it for general public improvements within the province.

In the meantime, the British bondholder must feel himself in a somewhat peculiar position, even if not as a political shuttlecock. His chief consolation is that the Alberta government have guaranteed the bonds which he holds. This guarantee will be respected by the provincial government whatever happens.

REVIEW OF THE MONTH

JUNE FIRE LOSSES.

Decrease in Number of Fatalities and Big Fires—Chatham is Anxious for a Motor Fire Engine.

The Monetary Times estimates of Canada's fire losses during June amounts to $1,151,150, compared with $2,564,500 for May and $1,500,000 for the corresponding period last year.

The following is an estimate of the June losses:—

Fires exceeding $10,000	$921,000
Small fires	80,000
Fifteen per cent. for unreported fires	150,150
	$1,151,150

The following are the monthly totals compared with 1909 and 1910:—

	1909.	1910.	1911.
January	$1,500,000	$1,275,246	$2,250,550
February	1,263,005	750,625	941,045
March	851,690	1,076,253	852,380
April	720,650	1,717,237	1,317,900
May	3,358,276	2,735,536	2,564,500
June	1,300,275	1,500,000	1,151,150
July	1,075,600	6,386,674	....
August	2,582,915	1,667,270	....
September	1,615,405	894,125	....
October	2,208,718	2,195,781	....
November	935,191	1,943,708	....
December	1,433,813	1,444,860	....
Total	$18,905,538	$23,593,315	$9,077,525

Twenty Big Fires During Month.

There were twenty fires at which the loss amounted to $10,000 and over. The largest fire occurred at Montreal, when the St. Jean Baptiste Church was destroyed, and the loss estimated at $200,000. The origin was lightning, and it was only the untiring work on the part of the firemen, aided by the torrential rain, which kept the flames from spreading to the neighboring buildings. The church, which was one of the finest on the continent, was erected about ten years ago. A new organ had recently been installed and the insurance on the same was only taken out the afternoon of the fire.

An automobile garage at Vancouver, B.C., was destroyed, also thirty-six automobiles, while at Swift Current, Sask., a business section was wiped out, also a storeroom at Ottawa, Ont. In each of the above fires the loss was $100,000 and over.

The fires at which damage to the extent of $10,000 and over occurred, were as follows:—

Fort William, Ont.	Foundry	$25,000
Calumet, Que.	Town section	40,000
Revelstoke, B.C.	Lumber mill	60,000
Little River, Que.	Pottery plant	20,000
Ottawa, Ont.	Storerooms	100,000
Cornwall, Ont.	Steamer	25,000
Regina, Sask.	Warehouse, etc.	30,000
Orangeville, Ont.	Factory	60,000
Toronto, Ont.	Brewery plant	15,000
Cobalt, Ont.	Mine	16,000
Bedford, N.S.	Factory	17,000
New Westminster, B.C.	Shingle mill	20,000
Bath, N.B.	Hotel	10,000
Vancouver, B.C.	Garage	100,000
Shoal Lake, Man.	Business section	18,000
Swift Current, Sask.	do.	110,000
Clarksburg, Ont.	Hotel, etc.	10,000
Toronto, Ont.	Factory	15,000
Montreal, Que.	Several residences	30,000
do.	Church	200,000
		$921,000

What Were Destroyed and Presumed Causes.

Of the presumed causes of fire lightning was responsible for 23, incendiarism 7, spontaneous combustion 3, cross wiring 3, defective oil stoves 2, and one each of the following: Playing with matches, explosion, defective chimney, careless with lamp, hot box, burning straw stack, lamp upset. A considerable number of the fires during June were reported as of unknown origin.

The following structures were burned or destroyed: 59 residences, 27 barns, 12 stores, 5 hotels, 4 factories, 4 business blocks, 3 mills, 2 mines, 2 churches, and one each of the following: University, laundry, foundry, brewery, station, sawmill, machine shop, fire hall, grain warehouse, post office, garage, motor boat. Thirty-three animals were destroyed by fire as follows: horses 30, calves 2, pigs 1. There were also 37 automobiles destroyed, a quantity of hay, harness, gasoline and farm machinery.

Decrease in Fire Fatalities.

A gratifying feature of the fire losses last month was the decrease in the fatalities, when only thirteen deaths by fire were reported, compared with 28 for May and 52 for the corresponding period last year. If more care were exercised The Monetary Times believes this number could be still further reduced, as four of the deaths were caused by clothes catching fire and three were the result of playing with matches.

The particulars of the June fatalities were as follows:

Ottawa, Ont	Clothes caught fire	1
St. Martin's, Que.	Burning building	3
Winnipeg, Man.	Playing with matches	1
Rainy River, Ont.	Burning building	1
Gretna, Man.	Playing with matches	1
Oakville, Ont.	Clothes caught fire	1
Vancouver, B.C.	Burning building	1
Cobalt, Ont.	Clothes caught fire	1
Morden, Man.	Playing with matches	1
Andrew, Alta.	Clothes caught fire	1
Montreal, Que.	Burning building	1
		13

The following are the monthly totals compared with the two previous years:—

	1909.	1910.	1911.
January	16	27	27
February	8	15	12
March	16	20	18
April	18	37	20
May	21	15	28
June	16	52	13
July	4	15	..
August	17	11	..
September	10	10	..
October	26	16	..
November	34	19	..
December	33	19	..
Total	219	256	118

Chatham is Anxious for Motor Fire Engine.

Lightning was responsible for a large number of fires during June. Farmers were the principal losers.

Chatham, Ont., is anxious to install a motor driven apparatus at its fire hall. Windsor has already installed automobile wagons in its department. Motor driven trucks are not only more efficient, but mean a great saving to the city.

Three of the five boys who were arrested on a charge of arson in connection with the fires discovered in the lumber yard of Messrs. Shearer, Brown & Wills, at Point St. Charles, were remanded for voluntary statement. Their names are Raymond Bamford, John Collins and James Milloy. Thomas Mitchell and John Currie pleaded guilty to the charge and it was expected that the evidence produced by these two youths would set the responsibility on the five, who are all companions. From the statement of one of the boys, the others were all implicated. The boys state that they lighted the fires to see which of two fire stations could get its men on the spot first.

◆

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during June:—

Canadian Locomotive Company, Limited.—$1,500,000 7 per cent. cumulative preference stock at $100 per share, with a bonus of 25 per cent. in common stock.

National Coal and Coke Company of British Columbia, Limited.—26,000 shares at 20 cents. Par value, $1.

Hygienic Fresh Milk Company, Limited.—4,000 shares of 7 per cent. cumulative preferred stock at par, $10, with a bonus of 50 per cent. of common stock.

Prince Rupert Hydro-Electric Company, Limited.—$2,500,000 first mortgage 5 per cent. bond at 92½ with a 40 per cent. bonus of common stock.

Coronation Oil Company, Limited.—150,000 shares at 25 cents per share. Par value, $1; capital stock, $850,000.

McLean Gold Mines, Limited, Porcupine.—50,000 shares at 35 cents per share. Authorized capital, $1,500,000; par value, $1.

Independent Tire Company, Limited.—$35,000 7 per cent. cumulative participating stock. Authorized capital, $350,000.

Sherwin-Williams Company of Canada, Limited.—$300,000 7 per cent. cumulative preferred stock with 20 per cent. bonus of common stock.

Dominion Sewing Machine & Motor Company, Limited.—$15,000 7 per cent. cumulative preferred stock with 50 per cent. bonus of common stock.

William Davies Company, Limited.—$1,250,000 6 per cent. first mortgage 15-year sinking fund gold bonds at 100.

Belding, Paul and Corticelli Silk Company, Limited.—$750,000 5 per cent. first convertible debentures.

Ontario Porcupine Goldfields Development Company, Limited.—Offering of shares.

◆

CANADIAN FLOTATIONS IN LONDON (JUNE).

The following flotations of interest to Canadians were made in London during June:—

Belding, Paul & Corticelli Silk Company, Limited.—£154,100 5 per cent. first convertible debentures at 90 (stamped).

Steel Company of Canada, Limited.—$1,000,000 7 per cent. cumulative preferred stock at 94 per cent.

National Land Fruit & Packing Company, Limited.—150,000 7 per cent. cumulative participating preference shares of £1 each, at par.

E. H. Heaps & Company, Limited.—£300,000 5 per cent. first mortgage bonds at 95 per cent.

Toronto Suburban Railway Company.—£540,000 4½ per cent. first mortgage debenture stock at 93½ per cent.

Province of Ontario.—£500,000 4 per cent. registered stock at £101 per cent.

Prince Rupert Hydro-Electric Company.—$2,500,000 5 per cent. first mortgage bonds at 92½, with a 40 per cent. bonus of common stock.

Canadian Pacific Railway.—$6,161,000 4 per cent. consolidated debentures. Sold privately in London some time ago at a very high price. The purchasers made the listing application themselves.

The following flotation was omitted from the May list:

Pryce-Jones (Canada), Limited.—£100,000 6 per cent. first mortgage debenture stock at par.

◆

BANK BRANCHES OPENED AND CLOSED DURING JUNE.

Twenty-five branches of Canadian chartered banks were opened during June and three closed. During May, 29 were opened and 3 closed; during April, 17 were opened and 3 closed; during March, 18 were opened and 3 closed; during February, 17 were opened and 10 closed; during January, 37 were opened and 3 closed. Houston's Bank Directory gives the following particulars for June:—

Branches Opened.

Athalmer, B.C.	Bank of Montreal.
Cedar Cottage, B.C.	Bank of Vancouver.
Duncan's, B.C.	Canadian Bank of Commerce.
Golden, B.C.	Canadian Bank of Commerce.
Gravelbourg, Sask.	Union Bank of Canada.
Guantanamo, Cuba.	Royal Bank of Canada.
Hazelton, B.C.	Bank of Vancouver.
Jonquieres, Que.	Union Bank of Canada.
Lacombe, Alta.	Royal Bank of Canada.
London, Eng.	Dominion Bank.
Magrath, Alta.	Royal Bank of Canada.
Merritton, Ont.	Imperial Bank of Canada.
Mundare, Alta.	Standard Bank of Canada.
Petrolea, Ont.	Molsons Bank.
Radville, Sask.	Canadian Bank of Commerce.
Riceton, Sask.	Standard Bank of Canada.
Rosedale, B.C.	Royal Bank of Canada.
St. Germain de Grantham, Que.	La Banque Nationale.
St. Marc des Carrieres, Que.	La Banque Nationale.
Sancti Spiritus, Cuba.	Royal Bank of Canada.
Suffield, Alta.	Bank of Montreal.
Toronto, Ont., Keele & Dundas Sts. Branch.	Bank of Toronto.
Vancouver, B.C., Granville Street Branch.	Dominion Bank.
Vancouver, B.C., Granville Street Branch.	Bank of Vancouver.
Vermilion, Alta.	Royal Bank of Canada.

Branches Closed.

Clarke's Harbor, N.S.	Royal Bank of Canada.
Kelso Mines, Ont.	Traders Bank of Canada.
Salvador, Sask.	Merchants Bank of Canada.

NEW STOCK LISTINGS.

The Canadian Bank of Commerce's new issue of 40,000 shares has been listed on the Montreal Exchange.

The following securities of the Dominion Canners, Limited, has been listed on the Montreal Exchange:—21,486 common and 21,700 preferred shares, and $997,500 6 per cent. bonds, due April 1st, 1940.

Five Hundred thousand dollars Canada Consolidated Felt Company, Limited, 6 per cent. 30 year first mortgage gold bonds have been listed on the Montreal Exchange.

Kaministiquia Power Company $228,000 additional first mortgage 5 per cent. bonds have been listed at Montreal. This makes $2,000,000 bonds listed.

Five thousand additional common shares of the Shawinigan Water & Power Company have been listed on the Montreal Exchange. This makes the total listing now $9,000,000 paid-up capital stock.

◆

JUNE DIVIDEND CHANGES.

The first dividend on the common shares of Pacific-Burt will be payable July 3rd. The rate is 1 per cent. for the half year.

The Cuba Railroad has increased its dividend from 2 to 2½ per cent. half-yearly.

◆

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks ended June 30th, 1910; June 21st and June 29th, 1911, with percentage change:—

	June 30, '10.	*June 21, '11.	June 29, '11.	
Montreal	$38,870,502	$37,124,207	$47,001,751	+20.9
Toronto	27,174,113	30,046,840	35,815,591	+31.7

WINNIPEG, THE WESTERN METROPOLIS

The Corner Posts of the Convention City.

Eight hours nearer Eastern Canada was a recent gift of the Canadian Pacific Railroad to Winnipeg and the West. The Canadian Northern is forging other steel links, and the Grand Trunk Pacific is throwing down a transcontinental. The pilgrimage of the prairie to Eastern finance is frequent. For two reasons—partly on Eastern money the West is being and has been developed. Winnipeg was the beginning of the modern West. These jaunts for capital to the country of sunrise have attained lately a deeper significance. In the Western metropolis have arisen loaning and other financial institutions with local headquarters. This is one of the signs of changing geography. Years ago, maps blotched with the word "Unsurveyed" have been rescued from waste paper long since. Where once was topographical ignorance now are big cities.

This evolution means that men cannot wait for money long. The value of opportunity is in further opportunity. To purchase bare real estate, which you know by commercial instinct will become city lots, the cash right away is sometimes necessary. By rapid transactions fortunes are often made. After wheat, real estate perhaps has made most rich men in the West. Entire dependence on Eastern loans is no longer. Partial dependence is now and may ever be. The East and the West as two distinct countries cannot exist. Sever, and weakness will come,

The financial interdependence between the two is sometimes a sore point of discussion. If the Western farmer does not pay his debts, the Eastern manufacturer may condemn farmers as a class. If the wholesale distributor curtails credit, his ilk may be farmer-branded as tyrants. In all of which are found reasons why a working day has been saved by one railroad company in the course of a journey Westward, and why others are building.

Winnipeg, just as Seattle, Chicago, San Francisco, has grown big upon its possessions. In some cases the development has been due to a large harbor; in others, to manufacturing resources and distributing possibilities. Men spoke in the early days of this Western centre, as some speak now of Prince Rupert's future. They were then willing almost to give away lands. The buyer had more intuition than the salesman. The value of real estate rose according to the thermometer of foresight and progress. Many propellant forces existed, chief of which were transportation facilities. They are supreme yet. Population once sought the railroad. That has changed. The railroad leads; population follows. This has had vital effect upon Winnipeg's growth and existence. Steel rails have brought the tributary country to Winnipeg's pulsating sides. The locomotive has shunted and coupled province to province, city to city, town to town. The Western train of progress is the result. Heading East, Winnipeg is the first car behind the engine.

Capital has come to the city from the United States. Enough of the Yankee is in the Winnipeg man to quicken British caution. The combination makes an ideal hustler. Winnipeg loves the Union Jack. It is partial to rag-time music. Its knowledge of the dollar's value is unique. Fate, and perhaps official wisdom, have sent well-qualified American consuls to Winnipeg. The wisdom is in the fact that recent appointees to the Western metropolis have acted as missionaries of men and capital. The progressive syrup of the West has been boiled in consular cauldrons. The boiling might have meant a sorry looking mixture, but in this case it has signified attraction. The syrup has been tasted; it was recognized as sweet. Pioneers and homeseekers from across the border have come to learn where it is made.

From overseas, too, population has drifted quickly and capital satisfactorily. There was a time when far distant Manitoba was practically the only Western province and Winnipeg its only city. Vastness and resourcefulness are being recognized. The Western metropolis loses nothing by it. This recognition is born of the remarkable development of the city and of Western Canada.

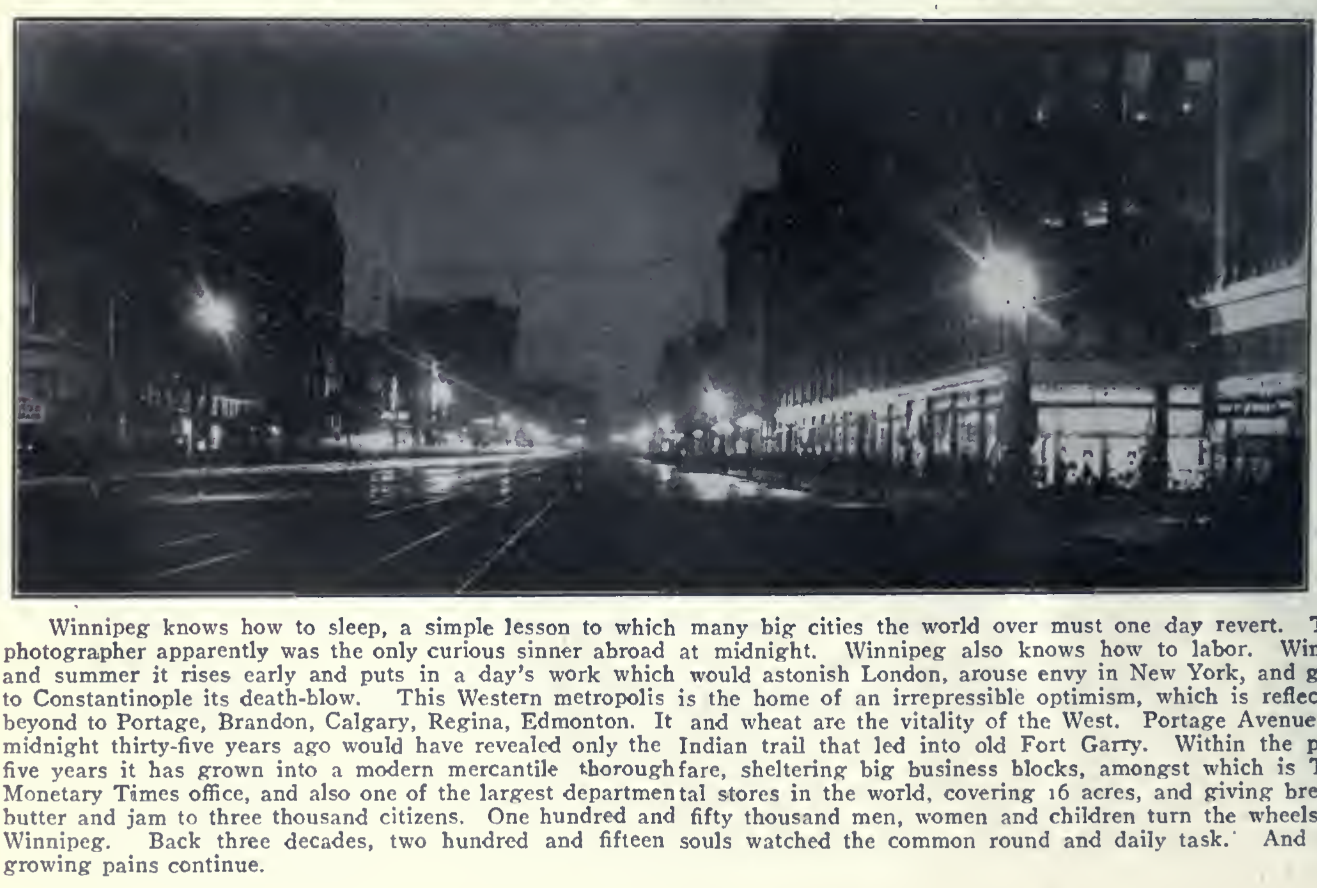
When Canada was a colony, not as now an overseas Empire, climate was an obstacle. In reality the climate has helped to fashion prosperity. To obtain tingling veins, sharp movement is needed. When the hot sun gives warmth in summer, thought there is made for winter. The mock terrors of Canadian climate are saintly compared to London's fog, New York's blizzards, India's rainy season, Egypt's sand storms. Extremes of heat and cold are known in our West. But they are extremes overcome by a straw hat or a thick overcoat. Optimism and briskness in business are the keynotes of Winnipeg's character. The alertness is appreciated far and wide, but not always the optimism. The Easterner sees Western opportunity two or three days later than does Winnipeg. The Britisher requires a couple of sea voyages for thought. In the end comes universal recognition.

At the corner of Portage Avenue and Main Street, Winnipeg, only thirty years ago.

City Hall, Winnipeg.

Winnipeg has played all the professional tricks in real estate. The back-breaking boom has come, and so has the inevitable slump. Suburb raising around the city has been successful. The residential quarters, with their handsome dwellings, picturesque gardens and tree foliage, are a valuable asset. Their value may not be fully realized until the smoke of factories makes a bold attempt to blot the sun. As comes manufacturing growth, so will be sought eagerly these municipal lungs. There are a few evidences of over-reaching. Some real estate agents and their purchasers have well discounted the future. As time flies, this unwisdom will narrow to

MIDNIGHT IN CANADA'S WESTERN METROPOLIS.



Winnipeg knows how to sleep, a simple lesson to which many big cities the world over must one day revert. The photographer apparently was the only curious sinner abroad at midnight. Winnipeg also knows how to labor. Winter and summer it rises early and puts in a day's work which would astonish London, arouse envy in New York, and give to Constantinople its death-blow. This Western metropolis is the home of an irrepressible optimism, which is reflected beyond to Portage, Brandon, Calgary, Regina, Edmonton. It and wheat are the vitality of the West. Portage Avenue at midnight thirty-five years ago would have revealed only the Indian trail that led into old Fort Garry. Within the past five years it has grown into a modern mercantile thoroughfare, sheltering big business blocks, amongst which is The Monetary Times office, and also one of the largest departmental stores in the world, covering 16 acres, and giving bread, butter and jam to three thousand citizens. One hundred and fifty thousand men, women and children turn the wheels of Winnipeg. Back three decades, two hundred and fifteen souls watched the common round and daily task. And the growing pains continue.

nothingness. Years ago, land was sold miles distant from the city. This was to be cut up for residential lots. The houses have not appeared. The bricks and dwellers will come. But it is a matter for time and the man who can or cannot afford thus to sink his money.

Some honor there was for a Winnipeg prophet thirty years ago. Then there were few prophets. Little of the wonderful is in the Winnipeg prophet of to-day. His predictions as to what part the city must play in Canadian history will be realized as a matter of course.

The more the West is developed, the swifter will turn the wheel of Winnipeg's economic machinery. When the wheels are whizzing to make the eyes blink, folks will hark back to these days, and smile. Rapid development brings unique happiness.

◆

CANADA'S INSURANCE ACT

Discussed by British Actuaries—English Act Said to Give Greater Liberty of Action.

At a recent meeting of the Institute of Actuaries of Great Britain, the paper of Mr. Thomas Bradshaw, formerly managing director of the Imperial Life Assurance Co. of Canada, on the Dominion's Insurance Act was discussed.

Mr. A. T. Winter, of the Phoenix Assurance Company, expressed the opinion that those who had only an academic interest in Canadian insurance law would, in comparing the respective laws, set a still higher value upon the liberty of action which the British Act accorded. They would also be thankful, he thought, that they had not to work under the restricted conditions which held in Canada.

The author had anticipated that the provisions of the Canadian Act would not altogether meet with the approval of the British actuaries, and he thought in that surmise Mr. Bradshaw was justified. He had asked his English brethren to remember that the conditions in Canada were very different from those at home; but, even making every allowance for the different conditions, one could not help thinking that policyholders' interests in Canada might have been protected without restricting the liberty of action of the companies to the extent involved by the Canadian Act.

In fact, some of the provisions of the Act seemed to tend in the direction of weakening rather than strengthening the policyholders' security. Take, for instance, the provision as to reserves. In the new Act, as in the old one, a minimum standard of reserve was required, but a feature of the new Act was that a maximum standard was also set up. . . . He could not see that there was any particular advantage in that provision, while it certainly had demerits. . . . There was a rather peculiar qualification of the maximum standard of valuation, providing that if an office calculated its office premiums at a rate of interest lower than 3½ per cent., then the valuation standard might be based on a rate of interest which was ½ per cent. lower than that on which the office premiums were based. The principle underlying this seemed to be that the higher the office premiums the more stringent the valuation might be. All other circumstances being equal, it appeared to him that the lower the office premiums were the greater would be the need for strong reserves.

Another qualification of the standard of valuation was that if the office premiums were lower than the net premiums under the standard basis, then in the reserve calculation the office premiums had to be substituted. He thought that was the first time office premiums had been mentioned in connection with standard reserves in Canada. Under the old Act it would have been possible for a company to take credit in the valuation of a premium actually higher than that which it was receiving. This was rather a material point. . . .

Another point in connection with valuations was that separate particulars were not required in regard to business in force at tropical and sub-tropical rates, which information was, of course, called for under the British Act. That was also a matter of some importance, because, looking at the new business of three of the leading Canadian companies, he noticed that approximately half was transacted outside the Dominion. It was well known that two of those companies were doing a considerable business in tropical countries. With regard to one of the offices, there was information available as to its tropical and sub-tropical business at the last valuation, and such policies then amounted approximately to one-quarter of the total business in force. No special reserves, however, were made on account of that business.

Life assurance companies were allowed under the Act to give the benefit of cessation of premiums in the event of physical incapacity; and they were also allowed to pay the sum assured in the event of total incapacity. He believed offices in Canada were now adopting those benefits to a considerable extent, and the Life Officers' Association there recently tried to standardize the terms upon which that business should be done. No special reserve, however, was called for on account of those benefits, although on looking at the statements at the end of the paper it would be found that the offices were asked to say what, if any, special reserves were made on that account. The author did not mention the standard basis for the valuation of annuity contracts. That was fixed on the British Offices' Select Table of Mortality, with the same rates of interest as were adopted for the valuation of assurances.

From the statements at the end of the paper with regard to valuation reserves, it would be observed that the particulars are very meagre compared with those that were required under Schedules 4 and 5 of the British Act. The sums assured and the net premiums need not be valued separately, and the value of the office premiums was not called for, nor was any statement required of the percentage of office premiums reserved for expenses and future profits. Particulars were not given in such form as would readily admit of an approximate check valuation or of an investigation into the profit-earning power of a company. He thought in those respects the Act was very much less satisfactory than the British Act. An attempt was made to deal in the Act with an evil which had assumed considerable proportions in Canada, namely, the cutting of rates. Very heavy penalties were imposed on all parties to such a transaction, but, as Mr. Bradshaw pointed out, the proposer, by making application for agency before effecting his policy, apparently could still evade the spirit of the Act by obtaining the rebate in the form of commission.

It was impossible to deal in detail with the many clauses of the Act, but he should like to mention a few of those provisions, the beneficial object or the equity of which was not quite evident. First of all, there was the question of security as representing the reserves. The foreign companies transacting business in Canada, as well as the local Canadian offices, had to hold in the Dominion securities representing the minimum standard reserves. In the case of foreign companies, which of course included British companies, the amount had to be deposited partly with the Receiver-General and partly with an approved trust company appointed for the purposes of the Act. There was this distinction, however: Local companies were allowed to take credit for the full market value of the securities, whereas foreign companies were only able to take credit for 90 per cent. of the market value. That seemed a somewhat unfair distinction; it was a form of colonial preference which certainly gave no advantage to the Mother Country.

An examination of the powers of investment under the Act would, he thought, reveal inconsistencies. Companies were allowed to invest in securities of municipal or school corporations of any country in which they were transacting business. They were, however, allowed without restriction as to transacting business, to invest in debentures, bonds, guaranteed stock, preference stock, and ordinary stock of commercial companies, subject to certain stipulations as to those companies having paid dividends over a certain term of years at a minimum rate. It seemed, therefore, that a Canadian company which was not transacting business, for instance, in England, would be precluded from investing in British municipal securities, while at the same time it could, under the Act, invest in the ordinary stock of certain breweries or even mining corporations, operating in any part of the world.

F. H. HEATH,

Former Treasurer, Life Underwriters' Association of Canada, 1909-10.

There were other provisions of the Act which, while not apparently essential to the security of the policyholders, restricted the freedom of action of the companies. Take, for instance, the regulation as to bonuses. Companies had to give three options as to the manner in which bonus was to be taken, viz., cash, reduction of premium, or addition to the sum assured. Nearly all gave those options irrespective of the Act, but he did not see why an office could not be allowed to make a special feature of reduction of premiums. The business of some British companies had been built up on those lines, and they had evidently met the requirements of a section of the insuring public. He could not see why companies in Canada should be restricted from proceeding upon the same lines. . . .

Under the Act very large powers were invested in the Superintendent of Insurance. He had power to make valuations. He had the functions of auditor with powers to write down the securities of companies, and to examine the officers under oath. The forms of policies had to be submitted to him before they could be regularly issued. As a sense of responsibility was one of the best incentives to good work, it seemed to him somewhat unfortunate that it was thought necessary in Canada to transfer so much responsibility which would ordinarily be borne by directors and officers to the shoulders of a Government official.

Canadian Insurance Companies and the Banks

By H. M. P. ECKARDT.

When the Armstrong Committee, appointed by the New York State Legislature in 1905, had begun to probe into the affairs of the three big life insurance companies having headquarters in New York city, much that was objectionable was discovered in the relations between the companies and certain of the banks. The companies held, on 1st June, 1906, bank and trust company stocks, the market value of which was placed at $71,655.04. In the investigation it was shown that in some cases the ownership of bank stocks had been used as a means of diverting profits to the private pockets of men in control of the insurance companies and of their friends and associates. At any rate, the legislature, at the conclusion of the investigation, enacted a measure which required, among other things, that the insurance companies should dispose of their holdings of bank, railroad, and other stocks.

They were given till the end of 1911 to comply with this law. However, up to April 10th this year a large amount of the stocks remained unsold. The holding of bank stocks at that date is set at a market valuation of $47,130,581. It has been explained that a considerable part of the time since 1905 has been unfavorable for marketing in mass such stocks as the companies hold, and it is asked that a further period of three years be added to the time during which they may hold the stocks.

Abuses Were Corrected.

It is well known that such abuses as were in existence at the time of the investigation have been corrected, and it is believed that the relations now existing between the great American life insurance companies and the banks are as they should be. It will be interesting to discuss briefly some of the features of the relations between the banks and insurance companies in the Dominion. It should be observed that the Insurance Commission appointed by the Dominion Government found that there had been some questionable dealings with the banks by Canadian companies also; and the Commissioners recommended a number of changes in our law. Among other things they urged that further restrictions be placed upon the investments of the companies. But the recommendations of the Canadian Commissioners were not enacted into law with the expedition or facility that characterized the enactment of remedial legislation in New York State.

There are some striking differences in the relations of banks and life insurance companies with each other in Canada and the United States. One of the principal reasons is found in the difference in the relative positions of the two classes of institutions in the two countries. In the United States the principal life insurance companies are mammoth concerns, far exceeding even the largest banks in wealth and importance. Even without their stock ownership of banks they might exercise a large measure of influence or control upon the financial markets. The banks, on the other hand, excepting a number in the principal centres, are small and isolated. The insurance companies are represented everywhere; their agencies are in every county and township. But each bank has merely a single office.

Do Not Overshadow Banks.

In the Dominion conditions are different. The Canadian insurance companies are large and their agencies reach into all parts of Canada, but they do not overshadow the banks. The latter institutions dominate Canadian finance. Their ramifications, too, extend in every direction; they are found in every city and town and in nearly every village. So, under these circumstances, domination of banks by insurance companies is not so likely to occur. Some people thought that a number of years ago the Canada Life dominated the Canadian Bank of Commerce because Senator Cox, the head of the life company, was also president of the bank. It is quite probable that the Senator's influence upon the bank was large, but this influence should be ascribed to his personal qualities and position rather than to the life insurance company. It just happened that the one man was the official head of both institutions.

So when there is no domination of the banks by the insurance companies, and when the companies do not overshadow the banks in the financial markets, the relations between the insurance companies and the banks are much the same as the relations between the banks and other corporations of importance. Needless to say, the life insurance companies are among the very best of the customers of the banks. They carry heavy balances in current account, and they are not unreasonable in negotiating the terms on which such accounts are to be carried.

They deposit every day long lists of cheques and items on every part of the Dominion, and buy and sell exchange on London, New York and other outside centres. On this business the bank may make some satisfactory commissions, though it must be confessed that the companies handle their exchange business skilfully and economically. Another advantage connected with the account of a life insurance company is the fact that when cheques are issued to the beneficiaries of policies, drawn upon a certain bank and payable at any of its branches, the bank will often secure good deposits for account of the payees.

The insurance companies also figure at times in the list of borrowers. It is their custom to keep their funds closely invested, and occasionally it may happen that an opportunity to make a good investment calling for a large amount finds the company with insufficient funds on hand for the purpose. The transaction may be carried through by means of an overdraft at the bank. Collection of premiums and income from investments will probably suffice to cover the overdraft in a few weeks. Such transactions do not seem objectionable, and they inure to the benefit of the company, its policyholders, and the bank as well.

Usually the account of a big life insurance company will be divided among two or more banks. One bank may have special facilities for the transaction of business in a certain province or section, while other banks offer exceptional facilities in other sections.

◆

F. T. STANFORD,

Treasurer in 1909, secretary in 1908, and elected treasurer again in 1910 of the Dominion Association.

◆

NATIONAL LIFE UNDERWRITERS' ASSOCIATION.

The annual convention of the National Association of Life Underwriters, in which the Dominion Association has some interest, will be held at Chicago in October. This was decided at a meeting recently held in New York, at which President McBride, of the Canadian Association, was present. From the reports of the various officers it was shown that five new associations have been admitted to membership since the last meeting, these being the South Carolina, Mississippi, Delaware, Nashville and North Carolina associations. President Henry J. Powell reported that by the time of the national convention he will have visited every local association affiliated with the national body. The finances of the National Association of Life Underwriters were found to be in excellent condition, and it is believed that the Life Association News will pay a dividend before the time for the annual convention. The creation of the office of corresponding secretary and its combination with the office of the editor of the News has saved the association over $1,000 this year. The corresponding secretary will hereafter have possession of the trophies belonging to the association. The topics for the five minute discussions to be had at Chicago were adopted as follows:—"When Should Competition Cease? At What Point in the Soliciting of a Risk Should the Competing Agent Withdraw?"; "What Method of Training Develops the Highest Efficiency Among Soliciting Agents?"; "How and Why Membership in Local Associations Should Be Extended"; "The Renaissance of Life Insurance—(a) Life Income Insurance vs. Insurance Payable in One Sum; (b) Business and Corporation Insurance; (c) Corporation Insurance; (d) Closing at First Interview." The topic for the prize essay will be "Constructive Life Insurance."

SPHERES OF THE ACTUARY.

His Activities Are Reflected in Almost Every Field of Human Endeavor—The Theory of Probability.

Specially written for The Monetary Times,

By L. K. File, B.A., F.I.A., F.A.S.

Slowly, but surely, the civilized nations of the world are being brought to a realization of the great truths underlying actuarial science. This is easily seen in the efforts that are being put forth in Great Britain and in America to induce the friendly societies and fraternal associations to strengthen their positions so that they may at some future time attain complete solvency. But it is not simply in the department of insurance that the influence of the actuary and his work is felt.

In many other fields also has progress been to a great extent dependent upon the continued developments that have been taking place during the last sixty years in actuarial science. Life assurance being in itself simply the result of a practical application of actuarial principles, can scarcely be separated from those principles in any discussion of the subject, and hence, in estimating the influence of the actuary on various departments of mundane activity, we must needs include as a part, probably the greater part, of that study the tremendous sociological benefits that follow in the wake of life assurance.

L. K. FILE,
Contributes "Spheres of the Actuary," to this Issue.

In the Past Hundred Years.

The development and popularization of life assurance has taken place almost wholly within the last hundred years, and this growth was made possible largely through the developments in actuarial science. We may well ask where and how this institution was born, and in answering this question a clear idea may be obtained of the underlying principles. In the year 1654 a certain gambler propounded to Pascal, the famous French mathematician, some questions dealing with certain chances of the gaming table. In thus directing this master mind to the study of those problems this incident led to the development of the mathematical theory of probability, wherein lies the germ of all actuarial science. We may also see here quite clearly the close relations that exist between this branch of knowledge and the departments of economics and sociology. Springing from the speculations of a gambler, its larger possibilities were readily discerned, and to the economists and sociologists of the day it became a study of absorbing interest.

As one writer has aptly expressed it, the publicist, interested in the laws which govern human society and the operations of finance, felt at once the fascination of the discovery. The idea that so-called "chance" had laws, which could be analyzed, tabulated and made to furnish material for deductive reasoning, opened a new world of thought. In less than twenty years, after Pascal solved the gambler's problems, the Prime Minister of Holland, John de Wit, introduced a scheme of national finance based on these principles, and involving the exact valuation of annuities dependent upon human life.

The rapid development of these new ideas was such that in about another twenty years, Halley, the Royal astronomer, applied the theory of probability to mortality statistics in conducting an investigation into the mortality of the town of Breslau. His results laid once for all the foundation of actuarial science, for he dealt with the two cardinal factors that make the science possible, namely, compound interest and probabilities of life. Since his day, and down to the present time, the growth of knowledge has greatly assisted in the further development of the subject, which has proceeded along the lines originally laid down. Meanwhile, the great material developments that had taken place, the growth of the democracy, the extension of commerce, the formation of large cities, the tremendous increase in wealth, had produced a social revolution, and the crystallization of actuarial principles into commercial enterprise in the shape of life assurance opened up a new form of thrift and self-help that met with an eager and willing demand on the part of society in general. This demand has only gained force with the passage of time, and to-day we find that its appeal to the great masses is the strongest in its history.

Rise of the Life Insurance Idea.

Possibly, comparatively few people have a distinct idea of the social revolution brought about by the rise of the life assurance idea. That thrift is good has long been recognized, and organized thrift, with sound security for its savings, is what life insurance means. From the viewpoint of the economist, therefore, the system can receive nothing but commendation. Looking at the question with the sociologist, a rather novel situation presents itself. The outstanding feature, in the growth of this idea, is undoubtedly that of co-operation for a common end, producing what might be called co-operative finance. And it would probably be the unconscious character of this co-operation that would most impress the social investigator, for he would find men entirely unknown to each other, perhaps even personal enemies, who were, without being aware of it, contributing to a common fund to help each other in need and to support each other's families against possible disaster. Viewed from this direction alone, the system must be recognized as a great unifying force, which is gradually reaching out and including all society in its operations, resulting in the creation of stability, mutual trust and social well-being.

In considering the two fundamental factors underlying actuarial science, namely, compound interest and probabilities of life, we obtain a still clearer indication of its respective relations to economics and sociology. When it has to do with problems involving compound interest alone, the liquidation of debts by sinking funds, the yield of securities, the accumulation of capital for fixed periods, and kindred questions, it becomes a tool for the economist, whose energies are devoted to the study of the production and distribution of wealth. On the other hand, when life contingencies are in question, there is presented the infinitely complex, changing material that forms the object of study for the sociologist, who is interested in the greater subject of the growth and development of human society. This is still further shown by the results produced, for actuarial science has raised the business of life assurance to a higher level and has prevented the economic disturbance which a loss of confidence would have produced, while, on the other hand, by cleansing and purging of error what had become a great social institution, it has maintained and established for society a co-operative instrument of unique value.

Statistics and Probability.

The early investigators and pioneers in the work recognized that the scientific application of the theory of probability to statistics was an essential characteristic of the new science. The ultimate possibilities of this method of working has not, however, always been apparent except to those possessed with a deeper insight than the majority of their fellows. As the whole process has a statistical basis, it becomes necessary to pay increasing attention to the province of statistics and the recently developed methods for their scientific study must, therefore, be of great interest and value in the development of actuarial science. These few suggestive remarks will serve to indicate the nature of the processes that must be employed in the future in the application and adaptation of the laws of probability for the practical benefit of mankind. The doctrine of co-operation, which is inculcated by the adoption of the law of average in dealing with masses of facts, must in the continued development of modern society similarly change and grow, and will undoubtedly prove an all-important factor in the further progress made by society in the future.

We are frequently disposed to speculate as to the future developments along these lines. It seems clear at the present day that the bounds of life assurance will not long be able to monopolize the attention of the actuary. His province must in the near future be greatly extended, and already we find men asking themselves whether the science is not as yet only in its infancy. It is a well-known fact that the British Government obtained actuarial advice before

INVESTMENTS FOR JULY DIVIDENDS

CANADIAN GOVERNMENT AND MUNICIPAL BONDS

We have just issued a new debenture list containing full particulars of the following offerings, as well as a number of others, all of which combine the requisites of safety and good interest return. Among them are a number of securities especially suitable for the

INVESTMENT OF TRUST FUNDS

in the Province of Ontario, and also the other Provinces. Our offerings are purchased by us only after careful investigation, and will meet the requirements of the most conservative investor. We shall be glad to mail a copy of our list on request.

SUMMARY

Province of Ontario **City of Toronto** **City of Montreal Prot. Schools**	**Yielding from 3.90 to 4%**
City of London **" Guelph** **" Brantford** **" Stratford** **Town of Owen Sound** **" Maisonneuve** **" Pembroke** **Calgary School District**	**Yielding from 4⅛% to 4.40%**
City of St. Boniface **" Fort William** **" Port Arthur** **Town of Renfrew** **City of Nth. Vancouver** **St. Jean de la Croix Schools** **Municipality of Coquitlam** **District of North Vancouver** **City of Nanaimo**	**Yielding from 4½% to 5%**

THE ART OF CANVASSING.

My Most Successful Personal Canvass and How I Did It.

By W. Hamilton.

It is difficult for me to recall which was my most successful canvass. I took up my record of business, written during the past thirty years, and found there the names of many people whom I cannot now recall at all. They, as well as all details of their cases, have quite gone from my memory. Then I do not know exactly what significance those who set this subject attached to the word "successful," in asking for an account of "my most successful canvass," I would not take it as necessarily meaning my largest risk. If it means one in which effort was most abundantly successful, perhaps mine would be one in which the application was written, and the applicant examined for $5,000, and when I reached home I received a telegram from him requesting to have the amount changed to $10,000.

Made Him Think Hard.

But the case that I recall with perhaps the most satisfaction, derives its value as to success from the extent to which it made demand on my resources and developed them.

I had been canvassing a lawyer, now a judge, a bachelor about 43 or 44 years of age, for a 20 years endowment. According to the estimates then in use, the returns on a deferred dividend policy of that kind at the end of 20 years stood to yield him all his premiums back and about six per cent. interest, but the face of the policy alone would be just about the premiums returned. I tried to show him the reasonableness of the estimate, but that only paved the way for him to say, as he did say, "Well, if it is reasonable for one to expect six per cent., why don't you guarantee some interest? Why can't you guarantee say four per cent?"

W. HAMILTON,

Honorary President, Toronto Life Underwriters' Association, who contributes some Canvassing Stories to this issue.

Eventually I said to him, "There is only one way I can meet your requirement, as to a guarantee: that is if you will buy the policy out by one payment." He said, "That is just what I should like." I said, "How much would you be prepared to invest?" He replied, as nearly as I now recall, "About $25,000 or $30,000;" so I got to figuring. On our regular 20 years endowment, the guarantee was equal to all the premiums back and about 3½ per cent. compound interest.

Evolve a New Plan.

My problem was to educe a new plan, involving such a combination of investment and protection that the investment element of it would yield four per cent. Eventually I reached it, and though I did not succeed in writing my lawyer friend, I very shortly afterwards met a gentlemen who was retiring from a business in which he appeared to have been quite successful, and was going into the ministry. He wanted to invest his money, so that he would not be tempted to lend it to needy parishioners whose security might be less than it should be, and I wrote up himself and wife for policies involving a total premium of $10,000. A couple of weeks later, I got another with a premium of $2,500 on the same plan.

I value the experience because of the extent to which it developed my own capacity, and use it to illustrate how the men in the field may, in meeting actual conditions, bring to the management, suggestions which will be of great value to the business.

It will be recognized from the figures used, that this incident was one of many years ago, when rates of interest were high, and reserves on a 4½ per cent. basis.

J. B. HALL,

Secretary, Toronto Life Underwriters' Association.

◆

CARRIES FOUR AND A HALF MILLIONS OF INSURANCE.

Mr. Rodman Wanamaker, 43 years old, healthy, hard working and industrious, has added another $1,000,000 to his life insurance. He was said before to be the most heavily insured man in the world, and now he carries a total of $4,500,000, most of it in the large companies. Rodman Wanamaker is a son of John Wanamaker, and vice-president of the great mercantile concern. He devotes from ten to sixteen hours daily to business, and his chief recreation is travelling over the big Philadelphia store, which trip he covers several times a day.

◆

Chief Justice Meredith, at Toronto, has awarded the Messrs. Rudd Paper Box Company $1,223.67 damages against Mr. R. B. Rice, of the firm of Messrs. Kidney, Rice & Company. Mr. Rice undertook to place insurance with Lloyds Underwriters for $5,000 in 1909. The policy bore a condition that other insurance must be maintained. The Rudd Company say that Mr. Rice must have known that the other insurance mentioned was not in force on their premises, and that as a result they had no legal claim against Lloyds as a result of a fire which destroyed their premises. Lloyds consented to pay a portion of the claim, and suit was brought against Mr. Rice for the balance of the loss, which he must now make good.

A LIFE INSURANCE RAMBLE.

Life Insurance Manager of Forty-five Years' Standing Tells How Life Insurance Begun in Canada—Some Interesting Reminiscences.

By Wm. H. Orr.

It is not generally known by the life insurance people of to-day that the real beginning of life insurance in Canada, in earnest, was due to a gentleman in Hamilton, Ont., named Hugh C. Baker, who was manager for the Bank of Montreal in that city prior to 1847. He was something of a mathematician, and conceived the idea that a Canadian company should be able to operate safely upon a lower scale of premiums than those used in England and Scotland. Their rates were based upon the management being able to earn 3 per cent. upon money, for all time, whereas in Canada, there was no difficulty in earning six per cent. and over.

Mr. Baker interested a few other Hamilton people in the idea, and in 1847 the Canada Life Assurance Company was launched, with a subscribed capital of £50,000. Pretty soon Mr. Baker resigned from the bank, took the presidency, and devoted his whole time to making a success of the new venture, until his death in 1859. The first Canadian policy was issued for a small amount in 1847, and at the second annual meeting there were 303 policies in force for $625,000.

W. H. ORR.

Mr. Orr contributes an interesting article to this issue.

The well-known connection of A. G. Ramsay with the company dates from 1850, when he was induced by Mr. Baker to come from Glasgow, after some years' experience in the Scottish Amicable, to act as manager. In 1875 he became president, and continued to manage the company most acceptably to stockholders and policyholders, until about the end of last century, and until it was decided to remove the head office to Toronto. Mr. Ramsay then retired with an allowance, and the position has ever since been held by Hon. George A. Cox, who also has two sons in the company, as manager and as general agent for Eastern Ontario, and all three have a say, as stockholders, in the management of the Imperial Life of this city. The late R. Hills was secretary of the parent company from 1875 until his recent death in 1907.

Early Days in Upper and Lower Canada.

Besides the Canada Life, the business was carried on in a somewhat feeble way, in those early times, by a number of British and American agencies which were opened up in the two chief cities of Montreal and Toronto. Among the British companies of that early period may be noted the Royal, the London and Lancashire, the Liverpool, London & Globe, the North British & Mercantile, the Commercial Union, the Life Association of Scotland, the Queen, the Colonial, the International, the Edinboro, the London Assurance, the Scottish Amicable and the Scottish Provident.

There were also a few American agencies—the New York Life and the Mutual, of New York; the Ætna, the Travelers, the Phoenix Mutual, and the Connecticut Mutual of Hartford; the National, of Washington; the Northwestern, of Milwaukee; and the Union Mutual, of Portland, Maine.

These thirteen British and nine American companies had a difficult task in the education of our people, at that early time, as to the importance of life insurance. But some of the companies were not of the enduring sort. The Colonial was absorbed by the Standard. The International attempted to do business in Massachusetts, and was exposed as a fraud by Hon. Elizur Wright, the father of state supervision of insurance, and disappeared. Two other London concerns named the Reliance Mutual and the Positive Government Security, opened up, but withdrew.

What Happened in 1877 and 1878.

When the Macdonald-Cartier government was ousted, after confederation of the provinces, owing to suspicious entanglements with Sir Hugh Allan and the Canadian Pacific Railway, and when Hon. Alexander Mackenzie became Premier, Hon. Edward Blake felt it his duty to consider the operations of life companies from abroad with the purpose of protecting our people from such as should operate here for a while and then collapse or simply withdraw, leaving their Canadian policyholders short of good money paid for supposed protection. A previous Act had required that, to have the run of the whole Dominion, both fire and life companies should make a large deposit at Ottawa and be licensed by the Dominion government. If a Canadian company, $50,000, and from a British or American company $100,000 was required as a guarantee of good faith. But the new Act, while permitting these sums to stand for the business done up to March, 1878, required that each outside company doing life insurance in Canada should, at the close of each year, deposit an additional sum equal to its increased liability arising from the new business thereafter transacted in any of the provinces. The foreign companies were given the option of depositing with trustees approved by the Government, but only four companies have made use of this method. The solvency standard was also raised, the Canada Life being given ten years in which to accumulate enough funds to change its rates and its legal reserve to a 4 per cent. basis.

A Critical Time in the Business.

The changes in the law made by this stringent Act, under the drafting pen of Hon. Edward Blake, affected the life insurance companies from Great Britain and the United States very seriously, and especially those conducted on the purely mutual principle. The directors of the Edinboro, the Life Association of Scotland, the Scottish Amicable, Scottish Provident, London Assurance, Connecticut Mutual, Phœnix Mutual, New York Life, Mutual Life and Northwestern Mutual, protested most vigorously against the measure while it was under consideration in the committee stage, on the ground that it was wholly without precedent in any country, and that it would compel them to withdraw from Canada after having spent much money in opening up a prosperous business.

They could not, under their mutual charters, create a Canadian class of preferred creditors by depositing the high class of securities at Ottawa which the proposed new Act called for. In case of insolvency the wheat would be in Canada, and the other policyholders would have the chaff, so to speak. Nevertheless the measure became law, and those nine excellent mutual companies—about the largest, strongest and best in the whole world—decided to discontinue issuing any more new policies in Canada. They have continued, however, to afford excellent protection to their old members, through the $100,000 held by the Government, and through keeping agencies open to collect premiums and pay death and endowment claims ever since. Two of the strongest, the Mutual Life and the New York Life, after remaining out for several years saw new light and returned, and have since built up a very large business, outstripping the Ætna, the Equitable, and the Travelers, which three companies had at once complied with the new statute, and deposited the full legal reserve at Ottawa.

Effect of No New Business.

It is worth while stopping here to note how the disbursements for death losses exceed the premiums, through the members growing older, in the case of companies which get no advantage in premiums from new and younger entrants. From the latest blue-book we give a view of transactions in Canada during 1910 by the nine companies which have not written a new policy here during the long period of 32 years past:—

THE FEDERAL
Life Assurance Company

Home Office - - HAMILTON, Canada
DAVID DEXTER, *President and Managing Director*

Capital and Assets Exceed - - $ 4,866,443.08
Insurance in Force Exceeds - - 22,500,000.00

The Company is desirous of adding a few men of ability who can produce results to their agency force in the Provinces of Manitoba, Saskatchewan and Alberta.

T. W. F. Norton, " " Alberta, Calgary

We Believe it pays in dollars to do right, whether in the treatment of our patrons, our representatives, or competitors.

We Want more good, clean business and more good, clean men.

Three Managers' positions are open in the West. Call and see us when in Winnipeg, or write.

We Believe we merit our slogan, viz.:

"THE MONARCH LIFE IS A GOOD COMPANY"

PRESIDENT—J. T. GORDON, President Gordon, Ironsides & Fares, Winnipeg.
1ST VICE-PRESIDENT—NICHOLAS BAWLF, President N. Bawlf Grain Company, Winnipeg.
2ND VICE-PRESIDENT—E. L. TAYLOR, Director Great West Permanent Loan and Savings Company, Winnipeg.
MANAGING DIRECTOR—J. W. W. STEWART.
SECRETARY AND ACTUARY—J. A. MACFARLANE, A.I.A.
SUPERINTENDENT OF WESTERN AGENCIES—R. S. FLETCHER.

Head Office: Commercial Travellers' Building, Winnipeg, Canada

Name of Company.	Amount in Force.	Premiums Received.	Death Losses Paid.
Edinboro	$77,846	$1,196	None.
Life Association, Scotland.	805,045	12,018	$80,828
London Assurance	7,787	200	12,406
Scottish Amicable	116,003	1,578	2,348
Scottish Provident	78,532	598	None.
Connecticut Mutual	936,576	23,600	35,669
National, U.S.	48,155	491	3,597
Northwest Mutual	173,681	3,350	9,439
Phœnix Mutual	398,436	15,549	21,159
Totals	$2,642,061	$58,580	$165,446

This shows a mortality rate of $62.62 per $1,000, the outgo being nearly three times the income. But all of these nine old companies are sound and strong, with ample reserve funds on hand to carry out their contracts to the end.

It will be seen that upon $2,642,061 of insurance in force, the deaths during 1910 were $165,446. Contrast this with a similar amount on the books of a Toronto company seven years in business. With $2,765,000 in force, its death losses in 1910 were only $7,625, compared with the foregoing $165,446.

Just a Few More Figures.

The following is a convenient record of the years in which 22 Canadian companies commenced business, arranged in the order of their birth. Also stating their ages at the present time, from elder to junior:—

Company.	Origin.	Age.
Canada Life	1847	64
Ontario Mutual	1870	41
Confederation	1871	40
Sun Life	1871	40
London	1874	37
North American	1881	30
Federal	1882	29
Temperance and General	1884	27
Manufacturers	1887	24
Excelsior	1890	21
Home Life	1892	19
Great West	1892	19
Northern	1896	15
Imperial	1897	14
Royal Victoria	1897	14
Dominion	1899	12
Continental	1899	12
Crown	1901	10
Canadian Guardian	1901	10
Union	1902	9
Sovereign	1903	8
Monarch	1906	5
Canadian Travellers	1909	2

The Ontario Mutual is now known as the "Mutual Life Assurance Company of Canada." The Temperance and General, and the Manufacturers were amalgamated in 1901, the name of the former thereafter disappearing. Also, the Royal Victoria of Montreal, gave up a losing competition a year ago, and was taken over by the Sun Life of that city. The Canadian Guardian of Toronto, formerly the Central Life, of Guelph, whose few years have yielded much inside trouble, and premiums of only $11,720 in 1909 against expenses of $22,894, has folded its tent, its license having recently been cancelled.

Some Others Had Short Lives.

The newest life company to begin business is called the "Travellers Life of Canada," with head office at Montreal, and spelling its name with two ells. The original Travelers of Hartford leaves out the useless letter, thus setting a good example in the direction of reformed spelling. That company thought its good name worth defending, and promptly asked the courts to compel the youngster to choose a distinctive name of its own, instead of confusing the public, and attempting to build upon the good foundation it had laid, in the United States and Canada, during nearly half a century. But the judge took the new-comer's part. There was a short-lived mutual life company called the "Acadia Provident," at Halifax, long ago. Also, another called the "Mutual Life" of Toronto, whose name was changed to the Life Association of Canada, and its location to Hamilton, where it petered out somewhere about 1895. Also, there was the old "Citizens" of Montreal, which was absorbed by the Sun, and the "Peoples" of Toronto, absorbed by the Home Life in 1900, and the "Toronto Tontine," and later the "Toronto Life" of the York Loan disaster. And the old city of Quebec had two short-lived companies, long ago, named the "Stadacona," one doing life and the other fire business.

Four companies, two local and two from across the border, now transact a large volume of this small-policy, penny-a-week style of life insurance in the Dominion. The London Life does about an equal amount of that, and of the larger sort. The Union Life is chiefly known in the industrial field, doing ten times as much, in volume of risk, as it transacts of the usual kind. These two Canadian companies together, now carry $23,447,465 of industrial insurance. The two American companies, the Metropolitan of New York, and Prudential, of Newark, N.J., are immense concerns. The one has been operating here for many years, and has $46,199,059 of the little-policy sort in force. The other is new to Canada, but has run up a business already of $11,288,120. Both issue the large policies, as well, and have nearly half of the foregoing amounts, of that sort, in force. The two companies have no less than $6,581,472 deposited at Ottawa. Of the many millions deposited for security with the Finance Minister, by many foreign companies, five American companies have $35,311,313 to their credit, and five British companies $13,341,080.

In Lighter Vein.

Now a truce to statistics while I bring this Ramble to an early close with a few sketches of somewhat personal incidents, showing some of the difficulties experienced in the early days of the business in Canada. Three of us were partners in undertaking the management for British North America, in 1865, of the Ætna Life Insurance Company, of Hartford, starting work early in that year, at Montreal. Among our first general agents were several very successful canvassers, who, however, sometimes made mistakes while learning the business. One of them visited a French-speaking town, and wrote $10,000 on the life of a bailiff for the benefit of the county sheriff to whom the bailiff owed a good deal of money.

Before the second yearly premium fell due, the insured party had attempted to commit suicide by cutting a great gash in his throat with his razor, while crazy drunk. This coming to the ears of the company, a quiet investigation took place, and the sheriff was notified that he must not expect the company to carry that sort of risk. But he was on hand with the premium on the day due, and tendered it, and then brought suit to compel acceptance. In its defense the company summoned the insured himself, the doctor, and several neighbors, from whom abundant evidence was obtained as to the agent having been very badly deceived, partly through his not being any too familiar with the language spoken in that section of the Ottawa country. It was shown that not long before the party was insured, three men had to remain on guard with him all of one night, to prevent his throwing himself out the window, to get rid of the snakes. The judge very promptly decided against the sheriff.

In another somewhat similar case, when another newly appointed agent was writing up an application on a prominent manufacturer, the answer to the enquiry about his habits being "strictly sober and temperate," was "Why, yes; I'm Worthy Chief of the Templars here." This was thought a quite sufficient guarantee, and with a favorable medical report, a $3,000 policy was issued and paid for. It was but a few months afterward, during one of the coldest nights of winter, that this person's friends in a neighboring town telegraphed his family to meet him at the station, his old enemy having once more got the upper hand. His brethren were on hand as the train arrived, but he craftily dismounted in the dark on the other side, staggered to the house of the factory's engineer, and sent out the man's wife for more liquor with which to straighten up. All three drank liberally, and the man and his wife went to bed, leaving the policyholder lying beside the big stove. It was the coldest night of a very cold winter; all hands were too drunk to put in more coal; the fire went out, and by morning the insured was frozen to death. The company refused payment on account of the fraud, but suit was entered and the lawyers arranged a satisfactory compromise.

Of the Quebec Habitant.

On another occasion a habitant in Quebec named Pierre Duclos was examined by the doctor, application having been made by a carriage-maker for a policy on his life, but he was found well on in consumption, and declined. Two years later, a policy having been issued to the carriage-maker by an English company on that same consumptive life, demand was made for payment, his death having occurred. Investigation showed the measurements in the two doctors' reports, to our company, and to the other company, to differ very much. The explanation proved to be that there were two persons of the same name in the ancient city, and the healthy one had obligingly allowed himself to undergo examination, seeing that his namesake was too ill to stand it. Strange to say, the carriage-maker brought suit, and a skilful lawyer got judgment against the company in the first court, owing to the whole facts not coming out, and some sort of settlement was effected.

Resulting from the foregoing case, and another death from an all-night spree, there arose a strong suspicion that far too many policies had been issued in that eastern city in favor of, not the wife and children, but of outside parties to whom, perhaps, there was some small indebtedness. An investigation was made of the records of all life companies doing business there, and the holders of many policies were interviewed. It was discovered that certain saloons along the docks had instructions to let certain men have drinks at other men's expense, and the men against whom the drinks were chalked up were found to be holders of policies on those laboring men's lives. The inspectors reasoned with those people of "righteousness and judgment to come," and the result was that about fifty thousand dollars of such policies were cancelled peremptorily, by the leading companies, with but small return consideration. Thereafter, the business in that city took on as healthy a complexion as elsewhere, some of the agents being advised to find other fields of usefulness. They knew what was going on around them, but failed in their duty of making it known to their companies. And they were continuing to write up more business for speculators in other people's lives, instead of inducing them to insure their own lives as heavily as possible for the benefit of their own wives and children, or by endowments for the protection of their own old age.

Three Most Active Enemies.

The three most active enemies of healthy life insurance in Canada are Tobacco, Alcoholic Liquors and Tuberculosis. The evil begins with the occasional secret smoke of a pipe or cigaret by the young man. This paves the way for heavier indulgence, which, though it may not, as it too often does, lead to drink, still sets the pulse running at consuming speed. Many smokers are turned down by the companies, if the physician reports the heart-beats faithfully, instead of averaging them, or "making allowance." But when several drinks of strong liquor per day are added, and the indulgence becomes a fixed habit, the agent frequently loses his labor, even though there may be an appearance of vigorous health, because the conscientious physician is obliged to report in a qualified tone. It is well known that the twin evils of tobacco and liquor, when indulged in to excess, lead strongly toward tuberculosis, that great white plague of all human-kind. Consumption was so persistently held to be hereditary by all the companies that many thousands of dollars were lost to the agents in the early days of the business, throughout the world. If an uncle or aunt, or a grandparent, was believed to have died of tuberculosis, that with some other little associate symptom, excluded the applicant. And when declined by one company of any grade, that fact was usually deemed a sufficient reason for the older companies to follow suit. And if there were two cases of consumption in no matter how large a family, no agent was permitted to write an application on any one of the whole remaining list, from alpha to omega.

A Sweeping Change for the Better.

But now. Well, all that has been turned topsy-turvy. An infinitesimal germ has done it. Hoary notions had to give way when he came marching along, small as he was found to be. Thousands of healthy people, formerly regarded alas uninsurable, are now getting policies, if they can truthfully answer in the negative, the question "has the applicant lived, during the past five years, in the same house with a person afflicted with consumption?" In the old country, where the "uncle and aunt" idea came from, the one old house was the home of succeeding generations. But on this continent the old home is pulled down before many years and a healthier one takes its place. With the spread of scientific research, and increased knowledge of the laws of life, and the rapid disappearance of the wayside tavern, and increase of habits of sobriety, the field for healthy life insurance in Canada is ever widening and broadening, east, west, north, and sometimes south.

◆

Hon. A. K. MacLean, Attorney-General of Nova Scotia; Mr. Paul J. Miller, president and managing director of the Westinghouse Company, of Hamilton; Mr. H. H. Kildersleeve, general manager of the Northern Navigation Company, of Hamilton; Mr. J. S. Cairns, of Saskatoon, and Mr. C. G. Pennock, manager of the Bank of Ottawa, Vancouver, have been added to the directorate of the Travellers' Life Assurance Company of Canada, of which company Hon. G. P. Graham is president; Mr. J. W. Pyke, first vice-president, and Mr. H. W. Richardson, of Kingston, second vice-president.

LIFE INSURANCE IN CANADA.

There is Not so Much Being Written as There Should Be—The Reason and the Remedy.

Specially Written for The Monetary Times by J. K. McMaster, Canada Life Assurance Company.

The question of life insurance in Canada, particularly with reference to the outlook for new business, is a subject which naturally is interesting to all connected with life underwriting. Those whose experience in the business may not be great are apt to conclude from the figures, running into many millions, which are published yearly that pretty nearly every man in a position to take life insurance has all of it he requires, and that, therefore, the outlook is far from encouraging. On the surface the figures would seem to indicate that every man, woman and child in Canada is carrying at least $10,000, but a little analysis of the figures gives quite a different view.

The report of the Superintendent of Insurance shows that, including industrial business, but excluding assessment certificates, the net amount in force in Canada at 31st December, 1910, was as follows:

In Canadian Companies	$565,669,110
In British Companies	47,801,798
In American Companies	242,629,174
Total	$856,100,082

These figures are imposing in size, but that there is still a little new business to be done is shown by the records of the companies in that regard for the same year. The new policies issued and taken up in Canada in 1910 were for the following amounts:

J. K. McMASTER,

Contributes, "Life Insurance in Canada," to this issue.

In Canadian Companies	$90,777,566
In British Companies	4,170,562
In American Companies	58,229,280
Total	$153,177,408

An estimate, based on the average increase in population since the last census in 1901, makes the population of Canada in 1911 eight millions of people. There are in force in Canada 1,172,125 policies, but in a number of cases several policies are carried on one life. Assuming that 75 per cent. of the policies are on different lives, then we have about 880,000 lives or eleven per cent. of the population insured. Recent American statistics show that twelve per cent. of the population of the United States are insured in legal reserve companies, so our estimate is doubtless pretty accurate.

The question now arises, what proportion of our population may be considered insurable male lives? Those of immature or extreme age and those of unsound body are to be rejected, as well as a few rendered ineligible through racial origin. An assumption that 50 per cent. of the population are males is within the mark, and a further assumption that 50 per cent. of the males are insurable, gives us an insurable male population of 2,000,000. If only 880,000 lives are insured that represents but 44 per cent. of the insurable population—considerably less than half—and the average amount carried on a life is only $973.00.

Less Than Half the Insurable Lives are Protected.

Two questions are here raised: First, as to the number of insurable males who carry no life insurance, and second, as to the inadequacy of the average amount carried. A consideration of the fact that less than one-half of the insurable men in this country have any protection whatever should encourage the fieldman to be up and doing. All about him is the harvest, ready for the reaping.

In connection with the second point, it may be of interest to consider whether the idea of protection is sufficiently kept to the fore by the fieldmen of Canada. We have seen that the average amount carried on a life is about $973, but the present value of a life aged 35, producing $1,000 a year, is on a six per cent. basis, $12,870. The discrepancy here is startling.

The Outcome of the Investment Idea.

It would seem that some of the agents in this country are pushing the investment idea in the sale of life insurance rather than that of protection. The outcome of such a policy is bound to be the sale, on high-priced plans, of too little insurance. The Blue Book shows that in 1910 the life companies issued in Canada $36,367,000 on endowment policies and $110,470,000 on life plans. On the average a policyholder can carry $3,000 on the 20-payment life plan for the same cost as $2,000 on the 20-year endowment plan. There are, of course, some cases where the endowment plan fits admirably, but it is very doubtful if it was in the best interest of the insuring public of Canada to buy in 1910 over $36,000,000 of endowment insurance.

The true function of life insurance is to create an estate to replace the earning power of the breadwinner, and it would seem that a family man of thirty-five would be well advised to choose a whole life policy for $10,000, rather than a 20-year endowment for half that amount. In either case the yearly cost would be about the same. Objection might be made that the premiums were for life. This might be overcome by applying the profits earned towards extinguishing future premiums, or at a later period the extended insurance privilege might be invoked to carry the protection without further cost over the period when the policyholder's family was young and dependent.

Necessity for Insurance Protection.

How necessary is the creation of an estate through life insurance is shown by an investigation made in New York State—where conditions are doubtless very similar to those in this country—by a professor of Columbia University. He found that:

1st. Out of 10,000 persons over 25 years of age dying, only 3,351 left any estates whatever. Of those who were heads of families only one-half left any estate; the other half left nothing, not even a savings bank account.

2nd. Of the 3,351 who left estates, only 884 were worth over $5,000.

3rd. Sixty-six per cent. of those dying left no estates whatever, twenty-five per cent. left estates of less than $5,000, the average estate being $1,292, and less than nine per cent. of the total number left estates valued at $5,000 or over.

This lamentable condition would probably be duplicated in Canada if the facts were brought out, and no stronger argument could be used as to the importance of providing for one's dependants through the moderate cost plans of the life companies.

There has been a strong trend in recent years towards adding privileges to and removing restrictions from life policies. Those features which have the effect of prolonging the life of a policy are to be commended, but a number of the so-called privileges tend to undermine the insurance, while at the same time they add to its cost.

Costly Features.

The large cash surrender and loan guarantees attached to the modern policy are examples of this. It might be thought that as the company has ample security against loss there can be no harm in advancing a substantial part of the reserve as a cash loan at a fair rate of interest. The trouble is that in many cases the balance of the value in the policy is eaten up by arrears of interest; the policy has to be cancelled, and a good life is lost to the company. To replace that life means a very considerable outlay which has to be borne by the policyholders at large. The loan of a premium to keep the policy in force is sometimes necessary and desirable, but the view that the reserve under a life policy is simply a savings bank account, is a perverted one.

The making of policies world-wide and free from restrictions as to occupation, is another way of increasing the cost without really benefiting the average policyholder, who has no intention of taking up his abode in the heart of darkest Africa, nor yet of engaging in the business of tending bar.

The insuring public are not to blame for demanding all the modern frills in connection with their policies, for they have been educated to it. If the life companies would now undertake to remove many of the features of their policies which mean little to the average policyholder, life insurance could be sold a good deal cheaper than it is to-day. At the same time the man who in unconscious selfishness carries $2,000 or $3,000 of endowment insurance would, with his enlightened view, carry adequate protection of $10,000 or $20,000 on a more moderately priced plan

What Is Needed.

What is needed to stimulate the sale of life insurance in Canada to-day is a proper conception on the part of the insuring public of its true function and importance. The movement can only start through concerted action at the head offices of our companies, and when that has taken place the fieldmen can doubtless be counted on to do their share towards the desired end. The result will undoubtedly be the placing of a greatly increased amount of life insurance in Canada.

◆

WORLD'S WHEAT CROP.

Canada Was Seventh on List.

The following are details of the world's wheat crop in 1909 and 1910:—

Country.	1909, Bushels.	1910, Bushels.
Germany	138,000,000	141,885,000
Austria	58,468,000	57,589,000
Bulgaria	32,072,000	49,126,000
Denmark	3,771,000	4,550,000
Spain	144,105,000	137,449,000
Belgium	14,603,000	12,449,000
France	359,178,000	254,363,000
Great Britain and Ireland	63,197,000	58,235,000
Hungary	125,907,000	198,482,000
Italy	189,961,000	153,339,000
Luxemhurg	617,000	624,000
Norway	312,000	314,000
Netherlands	4,113,000	4,324,000
Roumania	58,873,000	110,828,000
Russian Empire	790,245,000	776,619,000
Sweden	6,910,000	7,522,000
Switzerland	3,568,000	2,756,000
Canada	166,744,000	149,990,000
United States	737,189,000	695,443,000
British India	283,495,000	357,109,000
Japan	22,296,000	23,728,000
Algeria	34,769,000	39,375,000
Tunis	6,430,000	4,042,000
Total	3,244,823,000	3,240,141,000
Argentine, Chili, Australia and New Zealand (1908-09 and 1909-10 crops)	247,528,000	249,632,000
Total for countries not reported by Institute, taken from "Dornbuch's Floating Cargoes Evening List," including Portugal, East Roumelia, Servia, Herzegovina and Bosnia, Greece, Mexico, Uruguay, Persia, Egypt, The Cape, Cyprus and Malta	88,656,000	84,800,000
World's total	3,581,007,000	3,574,573,000

Figures of Ottoman Empire.

To the figures for 1910 must be added the wheat crop of the Ottoman Empire for 1910 which amounts to 164,778,000 bushels. As the International Agricultural Institute received no report of the 1909 crop of Turkey, these figures cannot be used for purposes of comparison.

Canada took seventh place last year as a wheat producing country. The world's wheat production totalled 3,651,866,000 bushels and Russia produced 776,000,000. The United States ranked second and British India third. Canada produced 522,459,421 bushels of grain of all kinds, of which 259,369,036 were raised in the east and 262,980,385 in the west. Vessels carried 63,827,614 bushels to Canadian ports and 25,017,527 to United States ports, and the Great Northern Railway carried 4,658,920 bushels to Duluth.

Notes of Flaxseed Crop.

Critical stages of spring wheat in the Northwest where the main flaxseed areas are located attaches more than ordinary interest to the latter crop of which the United States is still one of the first four producers of the world's supply.

GUARDIAN
ASSURANCE COMPANY, LIMITED
HEAD OFFICE: 11 Lombard Street, London, E.C.

Established by deed of Settlement in 1821, and Registered under the Joint Stock Companies Acts in 1893.

The Annual Meeting of this Company was held Friday, 26th May, 1911, when the Directors' Report for the year ending December 31st was presented.

FIRE DEPARTMENT

The Fire Premiums, after deducting re-insurances, amounted to **$2,894,575,** as against $2,774,248 in 1909, showing an increase of $120,377, and the Losses, after making the same deduction, to **$1,392,740,** as against $1,460,156 in 1909, being 48.11 per cent. of the premiums. The Premium Reserve Fund now amounts to $1,284,500 and the General Reserve Fund to $2,700,000, making the total Fund in this Department $3,984,500.

LIFE DEPARTMENT

The total **Number of Policies** in force on 31st December last was 14,267, assuring, with Bonuses, **$46,130,520.** Of this sum $3,841,985 was re-assured with other Offices, thus reducing the ultimate liability of the Company to $42,288,535.

Capital Subscribed - - - $10,000,000
Capital Paid-Up - - - - 5,000,000

Note—In the above $5.00 is taken as the equivalent of £1 Sterling.

Head Office for Canada: Guardian Bldg., Montreal

Trustees for Canada:
W. M. RAMSAY, Esq. J. O. GRAVEL, Esq.
R. WILSON SMITH, Esq. HON. ALPH. DESJARDINS.

H. M. LAMBERT, - - - - - Manager
BERTRAM E. HARDS, - - Assistant Manager

Last year's yield, owing to the North Dakota drought, was the smallest in thirteen years, resulting in an advance in price, which made the value almost prohibitive and caused a world-wide search for substitutes in the oil and soap-producing industries.

The five countries whose flaxseed supplies are exported to meet industrial needs in the world's trade are given below with their yields for the three latest years:—

	1910-Tons.	1909-Tons.	1908-Tons.
India	427,600	288,800	163,200
Argentina	600,000	716,500	1,058,000
United States	352,900	646,400	645,100
Canada	95,050	55,300	35,100
Russia	650,000	695,400	556,300
Total	2,125,550	2,412,400	2,447,700

World's yields in 1910 were the smallest in 9 years. Not only was the United States' own crop the smallest in some years, but that of Argentina dropped from 1,048,000 tons in 1908 to 600,000 tons in 1910.

Thus far this season, no really bad prospect is to be found in the flax outlook. Dakota prospects in flax are said to be good. India expects to have an especially large export. Argentina's exports since January 1st, have been only 10,728,000 bushels compared with 21,550,000 a year ago, and 28,334,000 two years ago.

Saskatchewan produces nine-tenths of the flax crop of Canada.

◆

COBALT ORE SHIPMENTS.

The following are the shipments, in pounds, from Cobalt station for the week ended June 30th:—Nipissing, 306,247; McKinley-Darragh, 174,575; La Rose, 130,344; Cobalt Lake, 145,760; Right-of-Way, 63,388; Coniagas, 58,030; Chambers-Ferland, 64,000; Kerr Lake, 60,050; Beaver, 62,500; total, 1,064,894 pounds, or 532 tons. The total shipments since January 1st are now 24,642,734 pounds, or 12,321 tons.

In 1904 the camp produced 158 tons valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

GERMAN INSURANCE SYSTEM.

Old Age, Sickness and Accident Are all Compulsory —Funds and Administration—Some of the Benefits.

The workmen's insurance consolidation and amendment bill recently passed a third reading in the German Reichstag. The new law has been passed for the purpose of consolidating and harmonizing the many acts regulating industrial insurance which have previously been put into effect. The present measure has been before the Reichstag for a period of more than two years, having been introduced in April, 1909, and referred to a committee, which made an exhaustive report last month.

D. E. SPENCER,

President, Regina Life Underwriters' Association.

The German system of State insurance is threefold: it embraces (1) sickness, (2) accident, (3) invalidity and old age. The word "invalidity," by the way, is transferred from the German language; it is not used in this sense in English, but is acquiring a technical significance to which there is no objection, provided that it is understood. It means disability or incapacity to earn a living; an "invalid" is a person wholly or largely incapacitated for work, either permanently or for a prolonged period, whatever may be the cause. Old age is a special form of invalidity which is assumed to supervene at the completion of a person's 70th year, whether it actually does or does not.

The principal Act providing for national compulsory insurance against sickness was passed in 1883 and came into operation in 1884. The Act superimposed general insurance upon a large pre-existing body of voluntary insurance already regulated by law and re-enforced by a considerable element of local compulsion, but of a very varied character. This antecedent condition is an important point. It determined the method of administration under the new law, which was designed to utilize existing organizations and to supplement rather than displace them.

The persons who come under the law are, broadly, those employed, whether for wages or salary, in mines and quarries, factories, smelting works, shipbuilding, transport by land and inland waterways, building, handicrafts, commercial and professional offices, the post-office, and army and navy departments. The mercantile marine, agriculture and forestry are not included. The insurance extends to officials as well as workmen, but the former are excluded if they are in receipt of more than $1.50 a day or $500 a year. The total number insured in 1909, the latest year for which figures are available, was somewhat under 13,500,000, of whom 3,500,000 were women. In the first year after the Act came into operation—namely 1885— the total number was 4,500,000. That is to say, in the course of 25 years the number of persons insured has trebled, and the proportion to the whole population has gradually risen from 10 to 20 per cent.

Funds and Administration.

The sick insurance funds are jointly provided by employers and employed in the proportion of one-third and two-thirds respectively. Neither the State nor the local authority contributes, but they provide the service and administrative officers to certain of the funds. The basis on which the rates of contribution are calculated may vary from 1 per cent. to 4½ per cent. of the current wages; the usual rate is between 2 and 3 per cent. The amount due from the employed is deducted from their wages or salary on pay-day and paid in to the fund by the employer, together with half as much again on his own account. There are several classes of funds, because it was the intention of the legislature to utilize the voluntary agencies existing before the Act. They have been retained and supplemented, where insufficient, by the establishment of public insurance offices. Exclusive of the miners, who have a special organization of their own, the total number of funds in 909 was 23,279, divided into seven classes. The most important are the local public offices, which are of two kinds (orts-kassen and gemeinde-kassen); they together account for 65 per cent. of the insured. The next most important class embraces the private funds attached to individual factories and business establishments. A great many of these were in existence before the Act; its effect was to make them general and to impose a common standard. They account for 25 per cent. of the insured. Then there are the old registered aid societies (7.1 per cent.), the guilds (2.3 per cent.), the building and civil engineering industries (0.1 per cent.). The coal miners form a class of their own, as already stated. In 1908 this branch numbered 865,505 insured persons or 6.4 per cent. of the whole.

Benefits Paid For Sickness.

Insurance in a sick fund entitles the insured person to (1) medical attendance, drugs and treatment, whether kept from work or not; (2) if kept from work, sick pay from the third day of illness; (3) sick pay for women for six weeks after confinement; (4) funeral benefit. The sick pay is not less than half the average rate of wages, but must not exceed $1 a day; it is payable for twenty-six weeks, which may be extended by the insurance office to one year, and may be made to begin on the first instead of the third day of illness. If the insured requires treatment in a hospital the benefit is reduced to half and paid to the family. Treatment includes care during convalescence, if necessary. Funeral benefit is usually a sum amounting to twenty times the average rate of daily wages; but there are several modifications affecting different insurance offices. The registered societies only pay half that amount, while others may increase it up to double or substitute a fixed sum of not less than $12.50. It appears that the rate of sick pay granted has a tendency to rise. In the year 1909 11.6 per cent. of the insurance offices paid at the rate of more than half the average wages and 2.1 per cent. paid from two-thirds to three fourths (the legal maximum) of the average wages.

In 1909, excluding the miners, the total expenditure on sickness was, in round figures, $75,000,000, towards which the insured workmen contributed $50,000,000. The rate of contribution was a little under $4.50 a head, the benefit a little over $6.

W. E. BROLEY,

President, Guelph Life Underwriters' Association.

The Act establishing insurance against accidents was passed in 1884, the year following the Sick Insurance Act. The subject gave considerably more trouble in the Reichstag, and it was only after three years' consideration and two abortive attempts that a bill was eventually passed. It came into operation towards the end of 1885. The scope of the measure then passed was extended by three other Acts passed in the following years, and these laws were subsequently consolidated and revised in 1900. Accident insurance covers very much the same classes as the sick insurance, but since it also includes agriculture and forestry and seamen, it extends to a far larger number of persons. The occupations covered fall into four classes—(1) industry and transport; (2) agriculture and forestry; (3) building and construction (civil engineering); (4)

DON'T GAMBLE

with death, for you will surely lose in the end. Taking chances by neglecting life assurance is a great gamble. Your wife and children will be the sufferers.

A policy with the Sun Life of Canada, costing only a few cents a day, will build a wall of protection around your home.

Better sign an application TO-DAY.

"By the street of to-day, man goes to the House of to-morrow."

Write to Head Office, Montreal, for literature on the policy you want.

the marine. Under each of these heads are included a certain number of persons employed in Government establishments. The total number of persons insured in 1909 was a little short of 23,400,000, when allowance has been made for between three and four millions who are insured twice over under agriculture and industry. Persons employed in shops and offices and domestic servants are not included. The funds are provided entirely by the employers, who pay an assessment arrived at by a somewhat complicated calculation. It is based on the salaries and wages paid, modified by the risk rate proper to the class of occupation or establishment, and fixed by the insurance corporations.

Compensation for Accidents.

Compensation payable from the accident insurance fund does not begin until after the lapse of thirteen weeks from the time of an accident. During that period a person injured by an occupational accident is provided for by the sick insurance, if insured under the law in any sick fund; if not, the individual employer or the commune takes the place of the sick insurance. It results from this arrangement that whereas the employed contribute nothing toward accident insurance, they pay a proportion of the accident benefit through the sick insurance to which they do contribuate, as explained above.

When benefit becomes payable at the end of thirteen weeks it includes (1) medical treatment, drugs, and appliances; (2) an allowance in case of complete incapacity at the rate of two-thirds the previous wages earned, and for partial incapacity in proportion to the impairment of wage-earning power; if the injured is not only incapacitated for the work, but rendered totally helpless, the amount is raised to full wages; (3) in case of death, funeral money of not less than $12.50, or one-fifteenth of the annual earnings and an allowance to the family reckoned according to circumstances on a fixed scale.

F. MACDONALD,
President, Alberta Life Underwriters' Association.

In 1909 the total number of claims was 664,247, of which 139,070 were fresh ones; and the total compensation paid was $40,000,000.

Old Age and Invalidity.

The insurance against sickness and accident was supplemented in the year 1889 by a law providing for invalidity and old age. Its object was to make provision for cases of inability to earn a living not covered by the other forms of insurance. Such cases arise from protracted or chronic sickness, from accidents causing lasting injury, but not sustained in the course of employment, and from natural decay of the physical powers.

The new principle introduced was the complete contributory system, in which the State enters into partnership with employers and employed. As we have seen, the sickness insurance is provided jointly by employers (one-third) and employed (two-thirds), and the accident insurance by employers alone. The invalidity insurance is provided by the employers and employed in equal parts, but the State adds a fixed sum for each allowance paid and defrays a considerable part of the cost of administration.

The insurance covers all persons over sixteen years of age who work for wages or salaries not exceeding $500 a year in gainful occupations in Government or municipal services, in charitable institutions, and some branches of teaching. It has been extended by the Bundesrat to certain home industries, but does not include domestic servants. The insurance funds are provided by weekly contributions on a fixed scale for each person insured, equally divided between employer and employed. The amount depends on the class in which the insured person is placed. There are five classes of wage-earners, arranged according to estimated annual earnings, with a corresponding scale of contributions and of pensions. The rates of weekly contributions for the several classes are approximately: (1) 3 cents; (2) 5 cents; (3) 6 cents; (4) 7 cents; (5) 8 cents. Payment is made weekly, monthly, or quarterly, according to the time when wages or salaries are paid, by means of stamps, which are affixed to a card carried by the insured person. The required stamps are provided by the employer, who deducts half the value from the wages of the insured. Insurance stamps are on sale at post-offices.

Benefits in This Class.

The chief, but not the sole, benefits are pecuniary. They consist of invalidity allowances and old age pensions. Certain conditions must be fulfilled before an insured person is entitled to receive either form of benefit. Contributions must have been paid for an antecedent period called the "waiting time." For invalidity allowance this period is 200 weeks, provided that at least 100 contributions have been paid.

The amount of invalidity benefit is calculated from a fixed basis, which is for each of five classes of insured persons as follows: (1) $15, (2) $17.50, (3) $20, (4) $22.50, (5) $25 per annum. To these basic sums are added supplementary amounts according to the number of contributions that have been paid by the insured person. To the amount so calculated is further added the State subsidy of $12.50. The old age pensions likewise vary according to the insurance class; including the State subsidy they are for each class: (1) $27.50, (2) $35, (3) $42.50, (4) $50, (5) $57.50.

In addition to these main pecuniary benefits the invalidity insurance has other beneficial features. In certain cases one-half the contributions paid in by an insured person are returnable—namely, to girls and women on marriage; to widows on the death of the husband or, failing a widow, to the legitimate children under fifteen; similarly on the death of a woman to the widower, if disabled, or to children under fifteen, if there is no father.

If the whole of the insurance funds are put together it appears that in 1909 there was expended for the benefit of the insured about $165,000,000, of which they contributed about $75,000,000, the rest being provided by the employers and the State.

DEBENTURES AWARDED.

Stoughton, Sask.—$7,000 6 per cent. 15 years, to Messrs. National Finance Company, Regina.

New Hope, S.D., Sask.—$4,500 5⅜ per cent. 20 years, to Messrs. National Finance Company, Regina.

Alberta and Saskatchewan S.D.—$7,000, to Messrs. National Finance Company, Regina.

Dundas, Ont.—$12,000 5 per cent. 30 years, to Messrs. Dominion Securities Corporation, Toronto.

Village of Delisle, Sask.—$2,200 6 per cent. 15 years to Messrs. Dominion Securities Corporation, Toronto.

Kamloops, B.C.—$85,000 5 per cent. 10, 20 and 25 years, to Messrs. Dominion Securities Corporation, Toronto.

St. Boniface, Man.—$421,669.04 5 per cent., 7, 20 and 30 years, to Messrs. Dominion Securities Corporation, Toronto.

Estevan, Sask.—$33,000 5 per cent. 20 and 30 years, for sidewalks, sewers, and waterworks, to Messrs. National Finance Company, Regina.

Rural Municipality of Strathcona, Man.—$5,000 4 per cent. 20 years, guaranteed by the Province of Manitoba, to Messrs. Alloway & Champion, Winnipeg.

Rural Municipality of Huron, Sask.—$15,000 6 per cent. 20 instalments, to Messrs. Wood, Gundy & Company, Toronto. The area is about 200,000 acres in a good farming community, and nearly 40 miles from Moose Jaw.

North Toronto.—$33,325.12 4½ per cent.; $1,941 in 10 instalments, $23,638.45 in 20 instalments, $7,745.67 in 30 instalments, to Messrs. Ontario Securities Company, Limited, Toronto.

Berlin, Ont.—$29,000 4½ per cent., $15,000 in 20 years, and $14,000 in 30 years, to Messrs. Wood, Gundy & Company, Toronto. These debentures were issued for Public school purposes, for granting aid to the Berlin and Waterloo Hospital, and for an addition to the sewerage farm.

Galt, Ont.—$25,000 4½ per cent., maturing June 5th, 1931, to Messrs. Ontario Securities Company, Limited, Toronto. This issue is for the purpose of providing an electric power plant. The assessed valuation of this municipality is $4,762,729, with a net debenture debt of about 7 per cent.

The Bank of New Brunswick, with head office at St. John, N.B., will open a branch in Montreal.

Dame Rumor has nominated the following gentlemen for the Canadian High Commissioner's office:—Sir Frederick Borden, Sir William Whyte, Sir Edward Clouston, Hon. Clifford Sifton, and S. U. M. others.

History of Some of Canada's Life Underwriters' Associations

The Montreal association has the honor of being the first life underwriters' association organized in Canada. True there were one or two small local societies of general agents under other names existing previously but no regular life underwriters' association corresponding to the National Association. It was organized on Dec 5th, 1905, with Mr. A. Homer Vipond as president and Mr. T. J. Parkes as secretary.

The association immediately began to do missionary work in other cities throughout Canada, and a few months after its birth it sent a noble band of thirteen to Toronto, at which time the local association in that city and the Life Underwriters' Association of Canada were formed.

This first association is also unique among underwriters' associations in that, when organized, its membership consisted solely of the field men with the rate book, not even city or district managers being admitted.

From the first the association set high ideals before it, and its existence has resulted in a considerable purification of the evils formerly existing. This has been done mainly by the association of the members with each other in a social way, and by definite instruction on the ethics of the business rather than by rules or regulations.

The most important step taken by the association was the incorporation of the Life Underwriters' Association of Quebec, in conjunction with the local associations at Quebec and Sherbrooke. The act of incorporation was passed by the legislature in March last, and among other things gives members of the association the exclusive right to the title of "Chartered Life Underwriter." By a system of probation and examination as to qualifications, the association expects that in a short time the title will have decided value.

During the past year the Montreal association has grown rapidly and is now second in size, if not first, of the associations on the continent.

Toronto Association in Flourishing Condition.

The Life Underwriters' Association of Toronto was first organized on June 4th, 1906. The formation of the local association resulted from a visit of a delegation from the Montreal association, which had come into existence earlier in the year. By the date of the first convention of the Life Underwriters' Association of Canada in August of 1907 the membership numbered 33. This number has gradually increased from year to year until at the present time the paid for membership exceeds 150 while the names on the roll exceed 200.

The first president of the association was Mr. E. H. Bissett, and associated with him were Messrs. J. O. McCarthy, vice-president; W. B. Campbell, secretary; Robt. Lovell, treasurer, and the board of management composed of Messrs. J. S. Mills, W. Hamilton, Geo. H. Junkin, Ira B. Thayer and J. A. McFadden. The officers for 1907 were as follows:—President, Mr. J. O. McCarthy; vice-president, Mr. W. Hamilton; treasurer, Mr. Robt. Lovell; secretary, Mr. N. H. Bastedo; committee, Messrs. R. W. E. Burnaby, H. A. Laurence, J. H. McCabe, Alex. M. Sinclair, G. G. Mills.

1908:—Honorary president, Mr. J. O. McCarthy; president, Mr. Wm. Hamilton; vice-president, Mr. J. A. Tory; secretary, Mr. N. H. Bastedo; treasurer, Mr. S. T. Standford; committee, Messrs. Geo. W. Meyer, H. A. Laurence, G. G. Mills, Weston and A. E. Donovan.

1909-1910:—Honorary president, Mr. Wm. Hamilton; president, Mr. J. A. Tory; secretary-treasurer, Mr. W. E. Nugent; executive committee, Messrs. Meyer, Junkin, Pettes, Lewis, J. S. Mills and Bastedo.

1911:—President, Mr. H. C. Cox; first vice-president, Mr. J. W. Garvin; second vice-president, Mr. Mabee; third vice-president, Mr. Meyer; secretary-treasurer, Mr. J. B. Hall; executive committee, Messrs. Pettes, Standford, Moore, Gifford, Hagarty, Taylor and Robinson.

The meetings of the association have, as a rule, taken the form of a luncheon or supper, followed by one or more addresses from prominent men upon topics of interest to the field man. These meetings have been exceedingly successful, and the attendance has been gradually increasing in number until at present the average attendance is 75 to 100. The association has always aimed at bettering the conditions in field work, and has tried through these meetings to elevate the status of the life insurance solicitor, and to educate him to cleaner methods of doing business. The association has always been strongly opposed to rebating, switching and twisting and other kindred evils, and has actively supported the Life Underwriters' Association of Canada in its efforts to mould the insurance legislation that had this object in view. The association is now in an exceptionally flourishing condition, and its meetings are interesting and well attended.

Quebec Life Assurance Agents' Association.

This association was organized nine years ago. The principal promoters were Messrs. J. B. Morissette, J. T. Lachance, M. Monaghan, J. G. Bruneau, J. F. Belleau, who are still foremost in the ranks of the association.

A. J. MEIKLEJOHN,

President, Ottawa Life Underwriters' Association.

The constitution and by-laws were prepared and read to the first meeting held in the Quebec City Hall by Mr. J. T. Lachance. The first officers were:—President, Mr. J. B. Morissette, North American Life; first vice-president, Mr. Frank Glass, Canada Life; second vice-president, Mr. Jas. F. Belleau, Equitable Life; treasurer, Mr. J. T. Lachance, Manufacturers Life; secretary, Mr. M. Monaghan, Mutual Life of Canada; members of council, Messrs. C. H. Carpenter, New York Life, and J. G. Bruneau, Confederation Life.

The annual meeting for 1911 was held at the Chateau Frontenac, Quebec, on May 15th last, with unusually large attendance. The election of officers for the ensuing year gave the following result:—President, Mr. J. T. Lachance, Manufacturers Life Insurance Company, re-elected; first vice-president, Mr. Jas. F. Belleau, Great West; second vice-president, Mr. M. Monaghan, Mutual Life of Canada; secretary-treasurer, Mr. J. T. Chenard, Confederation Life; assistant secretary-treasurer, Mr. Arthur Lachance, Manufacturers Life; members of council, Messrs. H. R. de St. Victor, Sun Life; P. A. Boutin, Equitable Life; Oscar Morin, Aetna Life; M. Monast, Metropolitan Life, and J. P. Michaud, Union Mutual Life of Portland. The membership has more than doubled during last year and this promises to be the banner year of the Quebec association.

The objects of the association are the reading of papers and delivery of lectures upon life insurance subjects, the discussion of questions relating thereto, the protection of Quebec district agents from outsiders, the collection and preservation of papers read before the association, together with other documents, maps and the formation of social intercourse amongst the members of the profession and generally such matters as may tend to the advantage of the association.

First Banquet a Success.

On June 7th, 1910, the Grey and Bruce Life Underwriters' Association was formed. Mr. E. R. Meachum, honorary president, and Mr. G. F. Weston, superintendent of Manufacturers Life, were present. The following officers were elected:—President Mr. E. E. Miller; secretary, Mr. J. McTavish; treasurer, G. F. Zapp. The next meeting was on June 17th. Mr. Erastus Miller, president of the Manitoba association, an old Owen Sound boy, son of Mr. R. B. Miller, deputy reeve of Owen Sound, was present and addressed the meeting. The constitution and by-laws of the Life Underwriters' Association of Canada were revised to suit this association; the first Friday in each month was set for regular meetings and a board of management appointed. Mr. A. H. Miller, M.P., Huron, another Owen Sound boy and another son of Mr. R. B. Miller aforesaid, was elected honorary president.

Meetings were held regularly on date appointed. These were fairly well attended, many interesting discussions took place and all who attended derived undoubted benefit. The very best of feeling always existed among those present.

At the regular meeting on March 3rd, Mr. R. A. McGregor was elected president for balance of year owing to retirement of Mr. E. E. Miller. Mr. S. J. N. Glazier was appointed vice-president. Full arrangements were made for reception of and complimentary banquet to Mr. Wm. McBride, president of the Life Underwriters' Association of Canada. His first official visit was on March 14th. A business meeting of agents was held at Masonic Hall in the afternoon and banquet at night. After dinner, addresses were given by Messrs. Elias Lemm, mayor; Jno. McQuaker, reeve; R. B. Miller, deputy reeve; Dr. Dow, Joseph Lawson, Guelph association; Rev. J. C. T. Morris, J. Parker, druggist; R. A. McGregor, local president, and others. The local association was favored with presence also of Mr. R. Junkin, assistant manager Manufacturers Life, Toronto, who gave a splendid address of great interest to all present. The banquet was certainly a success considering that it was the first of the kind ever held in this district. A goodly number of both sexes were present and everything went along most pleasantly.

At the annual meeting held June 2nd the following were elected to office for year 1911-12:—President, Mr. R. A. McGregor, North American Life; vice-president, W. T. Schlemn, Prudential Life; secretary, Mr. S. J. N. Glazier, Manufacturers Life; treasurer, Mr. Jno. McTavish, Sun Life.

The retiring secretary was presented with solid gold cuff links, inscribed, as a token of appreciation of his services. Mr. McTavish replied very feelingly.

Develops Better Type of Insurance Man.

It was in 1907 the life underwriters' association movement was introduced into Canada. Central Ontario had a good start, for the autumn of that year saw the inception of a local association. A few far-sighted and self-sacrificing agents realized the necessity of such a union. Mr. W. H. Hill was first president and Mr. John Rothwell first secretary-treasurer. Meetings were held in Peterboro and Lindsay, a constitution drafted and a membership of twelve enrolled.

The year 1908 opened with a rousing banquet addressed by the local members of parliament and representatives from the Dominion association. Mr. H. P. Lindsay occupied the chair and Mr. W. F. Nelson weilded the pen and carried the bag—which was not very heavy. During the year much missionary work was done among the local agents of the different companies doing business in the district. Several matters were cleared up and many difficulties overcome. The year closed with eleven new members.

Under the able management of President W. R. Widdis and scribe C. E. Barnett the year 1909 saw the good work continued, the movement grow, the association assume shape and dimensions which make for permanence. Meetings were held, papers read and topics discussed. Several members attended the Dominion convention in Toronto and returned bubbling over with enthusiasm because of the great success of the movement in general. Three new members were added.

A prosperous year for central Ontario was 1910. The annual meeting and banquet was a high success. Able addresses were delivered by Mr. E. R. Machum, then president of the Dominion association, and by Mr. T. B. Parkinson, the secretary of the same. Most of the companies were represented and many agents showed their interest by coming long distances at some expense and inconvenience to themselves.

J. T. CHENARD,

Secretary, Quebec Life Underwriters' Association. Author of "Useful Information on Life Insurance," an interesting volume especially suitable for canvassers.

President D. H. Moore and Secretary-Treasurer T. Mark, with the able assistance of the executive committee, succeeded in bringing the membership up to fifty-two, and incidentally carrying off the cup given by the Dominion association for the largest percentage of increase in the Dominion of Canada.

The present year will see no decline in association work.

Are you satisfied with the outlook?
Are you making the most of your ability?

Is there a future before you?
Do you want to be a leader of men?

THE UNION LIFE

Head Office, Toronto **Assurance Company**

(The Company with the greatest Development in the past five years)

Offers to men of ability the best field for their talents, has the most opportunities of promotion for workers and rewards its field force commensurate with its success.

Twenty Millions of Insurance in force at July 1st, 1911.

H. POLLMAN EVANS, President.

While we cannot hope to win a similar cup we do hope to increase the efficiency of our society. The association has been fortunate to secure the services of Mr. J. I. Allin for president and Mr. George Southwell for secretary-treasurer.

Like all other great reforms the Life Underwriters' Association of Central Ontario has had difficulties to overcome and opponents of silence. Before association days the agent of one company looked upon the agent of another company as his natural enemy. The meetings have brought them together, and, as they become better acquainted they find out that their opposition is not such a bad fellow after all. It is a common sight now to see two rival agents going together to the different offices of their competitors, chatting in a friendly way about topics common to all insurance men and endeavoring to bring into the association all who are outside the fold.

A better type of insurance man is being developed. One who believes in his business and does not apologize for it, who is willing to live and let live, who can see good in other agents and in other companies, who believes that honesty is the best policy, that all our activities in life are for other people, and who believes that he is a part of the whole and the necessary part, that he will succeed only as he works for the good of all.

Insurance Status Greatly Improved.

The Life Underwriters' Association of Alberta was organized on July 3rd, 1906, at a meeting held in Calgary and called by Mr. T. G. McConkey for that purpose. Mr. C. P. McQueen was elected president and Mr. R. A. Darker, secretary. The constitution and by-laws were adopted at a meeting held on July 23rd.

In March, 1907, the association was incorporated by special act of the Alberta legislature, this being the first association in Canada securing such legal status. During the same year legislation was secured preventing the taxing of license fees against agents by municipalities in the province.

During this, the first year of its existence, the association led in Canada from point of membership (having over fifty members) and won the cup donated by the Dominion association. In 1908 Northern Alberta members withdrew, forming a separate association at Edmonton.

A large amount of business has been transacted by this association since its inception and the status of the life insurance business in the province has undoubtedly been greatly improved by its efforts.

The parent organization has now a membership of over thirty and the president for the year is Mr. Frank Macdonald, provincial manager London and Lancashire Life; the secretary being Mr. E. W. Owen, provincial manager Sun Life.

The Life Underwriters' Association of Saskatchewan was organized in the Sun Life office in Regina in April, 1907. Mr. C. C. Knight, then manager of the Sun, called a meeting for the purpose of organizing on the occasion of a visit of inspection of Mr. T. G. McConkey, who was honorary president of the Life Underwriters' Association of Canada. After hearing an address from Mr. McConkey on the aims and objects of the association movement an association for Saskatchewan was immediately formed, and about fifteen members were enrolled. Mr. C. C. Knight was elected the first president and Mr. J. H. H. Young, of the Canada Life, vice-president. The first annual dinner held in the King's Hotel was attended by life insurance men from all over the province. Representatives were elected on the executive committee from Saskatoon and Moose Jaw and other cities and towns in the provinces. Mr. J. H. H. Young, of the Canada Life, was president in 1908; Mr. W. D. McBride, of the North American Life, in 1909, and Mr. J. A. Westman, of the Dominion Life, in 1910.

The Saskatchewan association grew steadily and prospered during these years. The president for 1911, Mr. D. E. Spencer, manager of the Manufacturers Life, promises to make this year a record one and to take down to the Winnipeg convention a delegation consisting of practically the whole membership.

Owing to the growth of the life insurance interests in Saskatoon and Moose Jaw associations were formed in these cities in March, 1911. Mr. T. B. Parkinson, the honorary secretary of the Life Underwriters' Association of Canada, visited these cities and succeeded in organizing live associations. At the recent annual meeting the secretary reported over twenty-five members and fourteen of the members present obliged themselves to bring in a new member before the next meeting on penalty of forfeiting the amount of the membership fee of the association.

Early in its history the Regina association adopted three rules which were binding on all its members and which may be briefly summarized:—(1) No rebating, (2) no twisting, and (3) no competition after the signing of an application. The association succeeded in having these rules enforced even before these matters were dealt with by the Insurance Act. This has resulted in satisfactory conditions for the insurance agents, and has made their relations throughout the province friendly and harmonious. The ideal of the association is that all its members shall co-operate to advance the best interests of life insurance and in every way protect the interests of policy holders. The gratifying result is that the standing of life insurance men in Saskatchewan has been appreciably raised in the estimation of the general public. The Saskatchewan association is at present engaged in collecting information which may be useful to the Saskatchewan government in modelling an insurance act for the province to be introduced at the forthcoming session of the legislature. The law in this province respecting beneficiaries under life insurance policies requires to be rewritten, and it is also essential that some standard of solvency should be set up for foreign associations and insurance companies entering the province to do business. As the matter stands at present many so-called friendly societies which have been denied registration in several states of the Union are allowed to enter Saskatchewan and Alberta.

The officers of the association for the present year are as follows:—President, Mr. D. E. Spencer, Manufacturers Life; vice-president, Mr. Newton T. Truell, Sun Life; secretary-treasurer, Mr. W. J. Walton, Confederation Life.

JOHN McTAVISH,

Treasurer, Grey & Bruce Life Underwriters' Association, Owen Sound.

Old Limestone City Agents Live in Peace and Harmony.

The Life Underwriters' Association of Kingston and District was organized on January 16th, 1907, when the following gentlemen from Toronto were present:—Messrs. T. G. McConkey, H. C. Cox and W. S. Milne. The names of the life underwriters of Kingston who were present were:—Messrs. J. B. Cooke, Imperial Life; G. H. Gillespie, Standard Life; G. A. Bateman, Sun Life; S. Roughton, Mutual Life; J. O. Hutton, Canada Life; J. R. Urquart, Canada Life; J. Thompson, Canada Life; Jos. F. Swift, Dominion Life; W. J. B. White, Royal Insurance Company of England; T. J. Boon, North American Life; H. G. Chamberlain, Northern Life.

The following officers were elected:—President, Mr. G. A. Bateman; vice-president, Mr. J. B. Cooke; treasurer, Mr. S. Roughton; secretary, Mr. J. O. Hutton. With few exceptions all charter members of the association are taking great interest in the work.

To show the feeling that exists among the members the following quotation from a letter that was received from Past President S. Roughton, who was absent in California on the occasion of the banquet held this year when the Dominion president, Mr. Wm. McBride, M.A., of Winnipeg, was present may be of interest: "I would have liked very much to have been present. I hope the banquet will stimulate a deeper interest in the association work and a generally better feeling among agents (if that is possible). I am pleased for one to say that the association movement has been the means of greatly improving my relations with fellow competitors and I believe every agent can say the same. Under such conditions an agent's work is more pleasant and therefore more profitable."

The membership is the largest in the history of the association and looks forward to making a still further increase in the near future. A great many evils of the business have been eliminated and the life insurance agents of the "Old Limestone City" meet each other in peace and harmony where before they were at loggerheads.

Promotes Greater Fraternity.

The Ottawa Life Underwriters' Association was organized on June 18th, 1906, with the following officers:—President, Mr. R. H. Haycock; vice-president, Mr. John R. Reid; treasurer, Mr. J. B. Robertson, and secretary, Mr. J. W. Mooney. Since that time it has filled a useful place in the business life of the capital by promoting a greater fraternity among the representatives of the various companies. In addition thereto it has placed the life assurance calling on a higher plane by emphasizing the necessity for a continual process of education on the part of each member as a means of keeping up to date and by reducing to a minimum those practices which at one time were a serious detriment to the best interests of the business.

The presidents in succession to Mr. Haycock have been Messrs. R. D. Edey, W. M. Stevens and A. J. Meiklejohn, each of whom in fulfilling the duties of his office has lived up to the high standard set by the first-named gentleman who, because of his long experience, has earned the title of "Dean." Mr. Mooney, the first secretary, with whom the association was loath to part because of his fitness for the position, was succeeded two years ago by Mr. W. Lyle Reid, who still holds the office. The vice-president for the present year is Mr. W. G. Keddie, who in the ordinary course of events will move up to the president's chair. The other members of this year's executive are:—Messrs. R. H. Haycock, I. A. Mill, W. M. Stevens, E. R. Edey and O. B. Shortly. The Ottawa association has taken a prominent place in the larger aspect of the business in its relation to the country as a whole, and had the honor of giving the Dominion association its president, in the person of Mr. John R. Reid, during that rather strenuous period when the Insurance Act was being whipped into shape. Much credit is due to him and his associates on the legislation committee for some of the modifications that were made in the interests of the men who carry the rate book.

All Solicitors Must be Members.

Life Insurance Agents' Association of Prince Edward Island. —On February 9th, 1905, a meeting was held of the life insurance agents doing business in Charlottetown, for the purpose of forming an association, at which meeting a form of constitution and by-laws were agreed upon. The objects of the association were to be for the purpose of promoting good will, harmony and co-operation generally between agents, and to devise and give effect to measures for the protection of their common interests, especially in the matter of rebating. At a subsequent meeting it was resolved to apply for incorporation, and in April of the same year (1905) the association was incorporated. The association meets quarterly and has special meetings as are necessary.

At the annual meeting held last January it was on motion resolved that no provincial manager should appoint a solicitor who would not become a member of the association, and further that all solicitors now appointed must become members. Mr. McBride while visiting this city in April last mentioned that while the island association was the first to be incorporated in Canada, they were also the first in which the provincial manager decided that all field men employed must be members of the association. The membership at present is twenty-eight and the present officers are:—President, Mr. W. K. Rogers, Canada Life; vice-president, Mr. J. O. Arsenault, Mutual Life of Canada; secretary, Mr. T. E. MacNutt, Great West Life.

Good Feeling Pervades London Association.

The Life Underwriters' Association of London was organized May 12th, 1906, with Mr. A. S. Macgregor as president, Mr. H. E. Gates vice-president and Mr. V. Reeve secretary-treasurer, and with fourteen members.

R. A. McGREGOR,

President, Grey & Bruce Life Underwriters' Association, Owen Sound.

The promotion of good-will, harmony and co-operation among the local life agents and the protection of their common interests was then, and still is, its aim. The fees originally were $2.00 per member per annum but have recently been changed to $4.00 for managers, $2.00 for resident and $1.00 for non-resident agents.

The meetings, which are held on the first Saturday of each month, consist of a luncheon and business and educational meeting. Addresses by prominent life insurance men, papers, essays, debates

HON. J. R. STRATTON, M.P., President. J. K. McCUTCHEON, Managing Director. ALBERT J. WALKER, Secretary-Treasurer.

1910	210,686 99	67,854 04	1,047,584 39	2,027,739 29

The Home Life issues all popular forms of policies, free from restrictions, and with liberal guarantees.

A few good districts are open for Agents of energy and ability.

and discussions on life insurance topics and the business of the association enliven the meetings.

An annual banquet is held, at which the president of the Life Underwriters' Association of Canada and others actively interested in the association movement give addresses. President McBride of the Life Underwriters' Association of Canada put some western enthusiasm into the association on his official visit and assisted by the local officers succeeded in almost doubling the membership of the association during his three days' visit and largely as a result of this the total number now on the roll of the association is eighty.

The best of good feeling and the utmost enthusiasm pervade the association. Mr. Vivian Reeve is now honorary president; Mr. George McBroom is president; Mr. Geo. H. Davis is vice-president; Mr. Angus Elliott, who has been secretary-treasurer for the past two years and has asked to be relieved, is acting secretary-treasurer.

The Brantford Life Underwriters' Association was organized in September, 1906, with Mr. J. Burbank, Manufacturers Life, as president, and Mr. W. W. Ross, North American Life, as secretary-treasurer. Regular meetings are held on the first Monday in each month to discuss life insurance matters, the reading and discussing of papers, etc. The meetings are usually well attended and the association has always been represented at the Dominion life underwriters' convention.

Mr. J. G. Liddel, Excelsior Life, was president for 1907; Mr. W. H. Hammond, of the Mutual Life of Canada, for 1908, and Mr. Thos. Hendry, of the Sun Life, for 1909, and re-elected for 1910. Mr. W. W. Ross continued as secretary until 1909, when Mr. Donald Thorburn, of the Canada Life, was elected to that position.

Commencing with a membership of nine the association now has fifteen on its roll. The association has been annually visited by the president of the Dominion association, who has always been well received, entertained and sent away rejoicing over the good work that it has accomplished among the life underwriters of Brantford. Mr. J. Burbank, of the Manufacturers Life, who is a member of the executive committee of the Life Underwriters' Association of Canada, will represent Brantford association at the Winnipeg convention in July.

Organized in January of this year with a membership of six the Saskatoon District Life Underwriters' Association has gradually increased until at the present time there are eighteen paid members and several applications pending signatures and the passing of the board.

Mr. A. C. McEowen is president and Mr. R. A. Treleaven secretary, who says that the movement is a good one and the insurance men of Saskatoon although competitors are cultivating that friendly feeling toward one another which is felt all over the Dominion where an association has been organized. Regular meetings are held every two weeks, with usually an attendance of twelve or fifteen.

The first meeting of the Brandon Life Underwriters' Association was held June 14th, 1910, when twenty members enrolled. The president of the Dominion Life Underwriters' Association for 1910, Mr. Machum, was present and several of the provincial managers of the different companies. Since that date regular meetings have been held on the first Saturday evening of each month. At each meeting an address or reading on different subjects, also instructive papers are read and greatly enjoyed by the members.

The association's motto is to make friendly feeling between agents of the different companies and help life insurance on a whole—not to boost any particular company. There is practically no switching or twisting up to the present and not one complaint has been laid to the secretary, so with the first year with such a clear record only goes to show what a few years will do toward making life insurance a different profession to what it was a year ago. The membership has been increased to thirty, which practically takes in every insurance agent in Brandon and who works there.

An enthusiastic meeting on May 29th welcomed Mr. McBride, president of the Dominion underwriters. Several speeches were delivered and the meeting was recorded as one of the best ever held.

Organized in April, 1905, with a membership of ten, the Nova Scotia Life Underwriters' Association now boasts of a membership of thirty-seven. The annual meeting was held June 5th, when the following officers were elected:—President, Capt. S. M. Beardsley; vice-president, Mr. W. C. Somers; secretary-treasurer, Mr. S. V. Freeman.

New Glasgow, N. S., has a branch association with regular meetings and attendance.

The maritime province associations will hold their convention at Halifax in August.

The Windsor District Life Underwriters formed February, 1910, with a membership of seven now has fourteen active members on the roll. Its regular meetings, held the last Friday in each month, are well attended and the secretary states that if the home and head offices were to urge their agents to join local associations it would have more weight than personal solicitations from present members. Mr. J. O. Peck is president and Mr. A. G. Roberts, secretary-treasurer.

The Niagara District Life Underwriters' Association, organized in December, 1910, has a membership of fifteen. Mr. J. K. Kernahan is president and Mr. H. E. Rose, of the Imperial Life, secretary-treasurer.

TRAINING LIFE AGENTS.

Suggestions by a Manager—Must Secure Right Kind of Agents—Must be Posted in Policy-Contracts.

"If you expect to have a successful agency," he said, "you must secure the right kind of agents. The right kind of agents are not always easy to find, yet the material out of which to make them is more plentiful than we sometimes think. The point is, how to find and secure this material, and that is the problem we have to solve. Experienced managers have secured good agents in many ways, and probably there is no end to the number of plans that might be adapted for this purpose, any one of which might be successful and yet all of them at times may prove unsuccessful."

D. THORBURN.
Secretary-Treasurer, Brantford Life Underwriters' Association.

These are the opinions of Mr. H. Farmer, Michigan State manager of the Phoenix Mutual Life of Hartford.

There is Luck in Finding.

"Sometimes we seek agents everywhere and fail to find any; again we find them when we are not seeking them. Sometimes, it seems to me, there is a good deal of luck in the matter. An unusually successful general agent of another company informed me recently that the securing of his best agents was altogether a matter of luck. Of one thing I am certain, we will never accomplish much in the way of agency organization by trying to make life insurance men of the wastrels of other lines of business, an idea which has been current in the past to some extent.

"We want, not the men who have failed in other kinds of business, but the men who have succeeded. We want the best, and, of course, the best are hard to get. Perhaps the surest way to get good men is by the elimination process. Try out many and gradually eliminate the kind you do not want.

Encouragement and a Square Deal

"Having secured a good man, educate him and train him and give him some of your time in teaching and helping him to write applications; keep in touch with him as much as possible and encourage him and help him until he is able to stand alone. Above all things give him a square deal; rather give him a little advantage than take it. If luck is against him for a time, give him a chance. Many successful men have had periods of hard luck and have come through them better and stronger men.

"On the other hand, if the agent is not on the square and is not trying to do right, the sooner you part company with him the better, as it will enable you to give your assistance to more deserving men. Dishonesty and laziness are incurable. You cannot make a hustler of a lazy man, and the dishonest man will take advantage of you at every turn.

Agent Must Know Business.

"See that your agent knows his business, and especially is posted on his company and its policy contracts. Teach him these things and see that he learns them. In this matter we are fortunate in having the assistance of the educational department of our company, which is doing a great work for us and our agents; but the educational department cannot do it all, and the manager must get his agents in shape to properly handle their business.

"The business man of to-day is a busy man, and has no time to waste on tyros. The agent must be able to present his proposition promptly and lucidly, and to answer all pertinent questions off-hand, without waiting to go back to the office or write the manager for information. The business man admires a clever salesman, but has no use for the man who takes up his time and is unable to turn the privilege to account.

"By 'training' an agent I mean personal training, teaching him to secure applications by letting him see you do so. If he is a local agent, visit him as often as you can, as every time you visit him he learns something from you. But if, after a few visits, you find he has not profited by your training, it would be probably a waste of time to try to make anything of him.

"Furthermore, there are some agents who are spoiled by too much assistance, and who will not try to close up deals, but will wait for the manager or someone else to come and do it for them. Such men may be good 'helpers,' but they will not be life insurance salesmen.

Interests are Identical.

"Speaking in a general way, personal contact of the manager with his agents as often as may be necessary is of great advantage. Do not get out of touch with your agent for long periods of time. You should get familiar with his field and know the state of his mind as much as possible. Make him feel that your interests are identical, and that you are ready to help in every emergency.

"At the same time, let it be distinctly understood that if he wishes your help and co-operation he must first demonstrate that he is doing his level best to help himself. A manager's time should be valuable, and he should endeavor to discriminate as between the industrious and the lazy men, between the promising and the hopeless ones, that his efforts may be put forth only where they will bear fruit."

CONSOLIDATION OF STATE INSURANCE IN GERMANY.

Since compulsory insurance was introduced into Germany the various branches—sickness, accident, invalidity, and pensions—have undergone considerable modification, and it has long been intended to blend these branches into a whole. A Consolidation Bill recently came before the German Reichstag for second reading, and a Berlin correspondent states that it contains 1,754 paragraphs, every one of which party representatives have decided to debate. All parties desire to see the Bill passed before Whitsuntide. Herr Bebel, the Socialist leader, has declared on behalf of his party that they will not obstruct, and in order to expedite the passage of the Bill, the House will, contrary to custom, sit on Saturdays.

C. McBROOM,

President, London Life Underwriters' Association.

The Bill providing for State monopoly of life insurance came up in the Italian Chamber of Deputies last week. Signor Mitti, the Minister of Agriculture, defended the Bill and replied to the arguments of its opponents. He explained that its object was to encourage thrift among the people, and that the Government would utilize the profits of the life insurance monopoly to pay old age pensions. He contended that the State was not bound to indemnify or compensate foreign companies doing business in Italy, and the monopoly will not violate any vested interests. Besides, these companies made no profit in Italy, and hence they could not be damaged by the new legislation. He instanced the cases of several companies which have already stopped doing business here.

LARGE LIFE INSURANCE PAYMENTS

Made in Canada and the United States Last Year—Five Hundred and Sixty-three Million Dollars Paid.

Life insurance organizations of the United States and Canada distributed $563,440,000 in 1910, according to computations by The Insurance Press. The payments in the two countries to beneficiaries for death claims, matured endowments and other benefits under the policies of level-premium companies and the certificates of various life insurance organizations—assessment and the like—amounted to $381,440,000. The estimated total of the amounts paid by regular companies in dividends to policyholders, for surrender values, to annuitants, and on claims in foreign countries was $182,000,000.

ANGUS ELLIOTT,

Secretary-Treasurer, London Life Underwriters' Association.

The following is a summation of life insurance payments of all kinds in 1910:

Claims paid in the United States and Canada	$381,440,000
Payments for dividends and for surrender values and to annuitants and foreign policyholders (estimated)	182,000,000
Grand total	$563,440,000

Along all lines of benefits under policies—death claims, endowments and dividends—the transactions of the regular life insurance companies continued to increase last year, under the normal conditions that prevailed. New insurance for more than $2,600,000,000 of protection was written, and, after the policy-account deductions, the insurance in force showed an increase of nearly $1,000,000,000.

Normal Business Conditions.

An indication of normal business conditions in 1910, according to life insurance records in the New York Insurance Department, where 90 per cent. of the insurance in force throughout the country must be accounted for, was the decrease of disbursements for surrendered, lapsed and purchased policies. The amount of the decrease was about $187,000, compared with $3,059,000 for increase in 1909 and $14,543,000 for increase in 1908.

For policyholders who were able to hold their protection throughout the year, dividend payments were increased largely. The record of dividends paid by the companies that reported in New York showed an increase to the amount of $10,839,572, compared with $9,195,734 for increase in 1909 and $7,730,107 for increase in 1908. Several millions of dollars of dividends were applied for the purchase of annuities and paid-up additions to insurance carried.

A Notable Feature.

According to that record, a notable feature of the transactions was that the amount of the dividend distributions ($72,874,538) was $17,470 in excess of the amount of disbursements for surrendered, lapsed and purchased policies ($72,857,068).

Besides showing increase of the amount paid, the record accounted for dividends due and unpaid, including amounts left on deposit, showing an increase of $1,641,829, compared with $1,361,864 for increase in 1909. Dividends declared on or apportioned to annual and deferred dividend policies in 1910, payable in 1911, amounted to $72,648,141, an increase of $6,015,647 over declared dividends for 1910. The amounts set apart, calculated or provisionally ascertained upon deferred dividend policies had a total of $272,939,437, an increase of $5,580,103 for the year.

The increase of loans on policies was normal. According to the returns of companies to the New York Department, the amount of the increase of the loan account was about $44,400,000. Increases in previous years were: 1909, $34,964,000; 1908, $55,450,000; 1907, $72,587,000; 1906, $27,279,000.

Business disturbances caused the increases in 1907 and 1908. Commercial credit had to be sustained and temporary embarrassments of individuals in minor affairs had to be relieved in the closing months of 1907 and the early months of 1908, and the applications for loans on life insurance were granted readily under the obligations assumed when the policies were written. Never before had general business disturbances caused so great appreciation of the value of investment of a part of the premiums as an available asset.

Toward the close of 1910 the indications were that hard times had not been acute enough to cause calls for loans on policies beyond a normal amount. Life insurance returns for the year have proved that the situation was sized up correctly.

Policy Reserve is Loan Basis.

A mistaken idea is that a loan is based on the face value of a policy. The fact is that the reserve of the policy is the basis of a loan, the reserve increasing in amount each year, if premiums be paid. Of course, the loan is a lien on the policy, reducing the amount payable to a beneficiary. Loan liens at the close of 1910 amounted to $441,396,466 for the companies that reported in New York. The figures prompt this warning: Don't borrow on life insurance and leave loans for widows and orphans to pay!

The promotion of new companies was continued to a small extent last year. Insurance commissioners' denunciation of reprehensible stock-selling schemes had effect on would-be promoters.

Amount of New Insurance.

Business insurance boomed, the amounts of new insurance ranging from $100,000 to $1,000,000. The appreciation of life insurance for the protection of business interests has increased notably in the past three years. Chief executives and managers of departments of corporations, on whose energy and experience successful transactions depend, have taken insurance against the contingencies of financial loss and interruption of operations in the event of death.

Life insurance for the individual capitalizes unearned income; for the corporation or partnership it capitalizes productive value in affairs less sentimental than those of the home.

N. T. TRUELL,

A well-known Western Underwriter.

For the sustainment and extension of credit, bankers and business firms have demanded the taking of life insurance, temporarily or permanently, according to needs. For protection in case of a bond issue and the creation of a sinking fund to meet the issue at the time of maturity, the endowment form of insurance is ideal.

Of the distributions of life insurance money in 1910, according to special reports from the companies, several were on account of commercial insurance. Of the insurance carried by the president of two corporations, who fell from a train and was killed in December, $75,000 was payable to each of the corporations.

The payments of fraternal orders and similar assessment organizations increased also in 1910. The year was eventful for fraternal insurance. After several conferences, a committee of the

EG'S BUSINESS SECTION.

National Convention of Insurance Commissioners and representatives of the National Fraternal Congress and the Associated Fraternities of America agreed upon a uniform bill for the regulation and control of the organizations by the insurance departments of the States, with the purpose of establishing adequate rates and attaining solvency. The bill was submitted at the sessions of the legislatures of many of the States this year. As to adoption, the record to date is not complete.

From reports sent have been tabulated the policies of $10,000 and upward to the number of 2,538. The largest insurance on an individual was for $475,250; the next largest, $320,000.

Well-known Men Insured.

Names of well-known men in the list of payments: Chief Justice Melville W. Fuller, Justice David J. Brewer and Thomas F. Walsh, Washington, D.C.; Thomas C. Platt, George Crocker, Seth B. French, Judge Charles H. Truax, Louis Klopsch, proprietor of the Christian Herald; John H. Washburn, former president of the Home Insurance Company; Dumont Clarke, president of the American Exchange National Bank; Charles H. Treat, former United States Treasurer, and John H. Huyler, New York; Leslie D. Ward, vice-president of the Prudential Insurance Company; James B. Dill, East Orange, N.J.; John Farson, banker, Oak Park, Ill.; Napoleon B. Broward, former governor of Florida; Hugh T. Inman, Atlanta; Benjamin F. Crouse, insurance commissioner of Maryland; Neil Burgess, Ezra F. Kendall and H. V. Donnelly, actors.

J. W. CORBETT,

President, Kingston Life Underwriters' Association.

The number of women who had policies was noticeable. Mary B. Dun, of R. G. Dun & Co., had insurance to the amount of $200,000.

The largest of the amounts of claims paid is credited to the city of New York, three boroughs ($36,446,750), with Philadelphia ($14,072,000) second in the list, and Chicago ($13,243,500) third.

The following summary, by States, shows the amounts of claims paid by life insurance organizations in the United States and in Canada during 1910:

Alabama	$4,150,000
Arizona	600,000
Arkansas	2,700,000
California	10,500,000
Colorado	4,000,000
Connecticut	8,000,000
Delaware	1,000,000
District of Columbia	1,915,000
Florida	2,000,000
Georgia	6,700,000
Idaho	500,000
Illinois	22,300,000
Indiana	8,400,000
Iowa	7,000,000
Kansas	3,600,000
Kentucky	7,500,000
Louisiana	4,500,000
Maine	3,500,000
Maryland	7,500,000
Massachusetts	26,250,000
Michigan	9,750,000
Minnesota	5,000,000
Mississippi	2,900,000
Missouri	11,500,000
Montana	1,250,000
Nebraska	3,000,000
Nevada	325,000
New Hampshire	2,000,000
New Jersey	16,250,000
New Mexico	650,000
New York	69,500,000
North Carolina	3,500,000
North Dakota	900,000
Ohio	19,650,000
Oklahoma	1,600,000
Oregon	1,450,000
Pennsylvania	40,000,000
Rhode Island	3,500,000
South Carolina	3,300,000
South Dakota	1,000,000
Tennessee	4,100,000
Texas	6,850,000
Utah	650,000
Vermont	1,900,000
Virginia	5,250,000
Washington	2,600,000
West Virginia	2,500,000
Wisconsin	7,100,000
Wyoming	350,000
Canada	20,500,000
Total	$381,440,000

The following are details of the $20,500,000 paid in Canada:

Montreal	$2,097,000
Toronto	1,077,500
Quebec	618,500
St. John	613,000
Winnipeg	326,000
Ottawa	225,000
London	223,000
Vancouver	194,000
Victoria	164,000
Hamilton	161,000
Halifax	150,000
Belleville	137,500
Fredericton	125,500
Kingston	122,000

Waterloo	11,500
Yarmouth	10,500

BRITISH GOVERNMENT INSURANCE SCHEME.

Summary of Its Provisions—Big Scheme Will Cost Many Millions—How It Will Affect the Middle Classes

The Government scheme of insurance, recently introduced in Great Britain, can be divided briefly in two parts: (1) Sickness and Invalidity Insurance. (2) Insurance against Unemployment The sickness insurance is to be compulsory on all who earn wages or salaries under the income tax-level of £3 a week. The exceptions referred to are: (1) Army and Navy, for which special provision is to be made. (2) Teachers, whose case is also to be separately dealt with. (3) Civil servants and municipal employees, who already have their own schemes. (4) Commission agents employed by more than one firm. Casual labor is, as far as possible, included.

W. K. ROGERS,

President, Prince Edward Island Life Underwriters' Association.

The funds will be provided by 4d. a week contribution from the employee, and 3d. from the employer, while the State, i.e., the ordinary taxpayer, will furnish 2d. weekly per head. Payment will be made on the German plan, by stamps affixed to cards dealt with by the post offices. Married women not employed outside their homes are excluded, but it is estimated that 700,000 women will come under the compulsory provisions of this far-reaching measure. For those persons who are their own employers, a voluntary branch is arranged, men paying 7d. weekly and women 6d. Summed up, the scheme includes:—By compulsion: Men 9,200,000, women 3,900,000, boys 500,000, girls 300,000, total (compulsion) 13,900,000. Voluntary: Men 600,000, women 200,000, total (voluntary) 800,000; grand total 14,700,000. Here are the benefits under this measure:

List of the Benefits.

I. Medical Relief—i.e., adequate and indeed more generous payment for the Friendly Society doctor, and separate payment for drugs, to be made up at the chemist's. The doctor will in future prescribe without dispensing, and the poor will for the first time be sure of the costlier among necessary medicines.

II. A maternity allowance of £1 10s., on condition that the mother does not return to work for four weeks after childbirth.

III. A loan of 1½ millions a year for the building of sanatoria for tuberculosis, and a grant of £1,000,000 a year for maintenance. This last grant is to be made at the rate of

1s. per member per annum, to be paid out of the insurance fund, with

4d. per member per annum added by the State.

There are to-day 500,000 persons in these islands suffering from consumption, and only 2,000 beds in suitable sanatoria.

IV. Sick allowances at the following rates:

For men—10s. a week for first three months; 5s. for next three months.

For women—7s. 6d. a week for first three months; 5s. for next three months.

The lower rate for women is due to their lower scale of payment—3d., instead of 4d., a week.

V. Disablement pension, for permanent inability to work, 5s. a week—the same figure, that is, as the old-age pension.

Sickness benefit will not commence until the member has paid in for six months. Disablement pension will not be payable until two years of membership.

Benefits are made subject to the patient obeying doctor's orders, and a man who is ill through his own misconduct will be entitled to medical treatment, but to no monetary allowance.

Certain exceptions to benefit should be mentioned.

Persons over 50 years will receive: Men 7s. 6d. for the first three months' illness instead of 10s., and woman 6s. instead of 7s. 6d.

Persons between 16 years and 21 years will receive: Boys, 5s. for three months, girls 4s. for three months; this instead of the normal 10s. for three months.

Children under 16 years who, being employed for a wage, must join the fund, will be entitled to medical treatment only.

Nothing at Death.

Nothing is to be paid at death; that department is for the present left by the Government to the existing insurance offices and the various benefit societies.

The cost to the State is put at: This year, nil; 1912-13, £1,742,000; 1913-14, £3,359,000; 1915-16, £4,563,000. We feel great doubts about the totals here, because at starting the scheme includes all ages, and consequently the expenditure on benefits will be high. However, it appears that the Friendly Societies and the trade unions are to assist in the working of the scheme, and it remains to be seen what will ultimately be the cost of thus substituting collective compulsory thrift for that of the voluntary kind which, as it constantly grows, carries with it invaluable moral gains to the rank and file of the whole nation.

As to Unemployment.

Then in Part II. of this Bill we have the section relative to unemployment. This section applies to the engineering, the shipbuilding, and the building trades—that is, to 2,400,000 workers. The contributions are: From employer, 2½d. per week; from workmen, 2½d. per week; from State, 25 per cent. of the cost of the scheme.

Employers must make the remittance, which amounts to 21s. 8d. a year. A reduction to 15s. a year will be made in the case of all employers who pay a year at a time. This is an inducement to such employers to keep in hand a regular instead of a fluctuating staff.

The benefit under the scheme is, subject to revision, 7s. a week for 15 weeks. On the average, workers must not receive more than one week's benefit for every five weeks' contribution, a stipulation which will eliminate the loafer.

No benefit will follow dismissal for misconduct, and a man must be prepared to accept at fair wages a job if it be offered him through the Labor Exchanges.

The cost of the scheme will be roughly: From workers, £1,100,000; from employers, £900,000; from State, £750,000; total, £2,750,000.

R. A. TRELEAVEN,

Secretary, Saskatoon Life Underwriters' Association.

The well-known sociologist, Mr. Arnold White, commenting upon the British Government insurance scheme, recently introduced, says that the tradesman who earns his living by strenuous toil cannot join in the pæans of appreciation of the Bill. The scheme, he says, is magnificent, but it is not business. Society has decreed and agreed, and has rightly decreed, that in this England of ours no man shall starve. Society justly accepts the duty of providing for the weaker brethren. But the old Biblical law that if a man will not work neither shall he eat is repealed by Mr. George, and the repeal is enormously popular. The House of Commons is unanimous. But as Mr. Bright said, the House of Commons is never unanimous except when it is wrong.

"We have all our own children to support," continues Mr. Arnold White, "and also the children of those by whom reckless fecundity is regarded as one of the rights of man. The burden is well-nigh insupportable. Taxes, rates, and charities, which are even more insistent than taxes and rates, already absorb the margin which remains after rent, food, education and unavoidable charges are defrayed. I know 11 middle-class, brain-working families, who are the strength of England, who could not afford to take a holiday last year because their available margin of cash was reduced below the point where the possibility of a week at Margate or in Norway or Switzerland was practical. The middle class, to which I belong, are unrepresented in Parliament. When a Bill like the Old-Age Pensions Act is discussed, it is invariably discussed from the standpoint of the rich or the very poor. That does not exhaust the situation.

J. T. LACHANCE,

President, Quebec Life Underwriters' Association.

"The middle classes are the backbone not of our nation alone, but of every nation. Mr. George's new Bill will not hurt the rich, and will greatly benefit the prolific poor, but the pinch comes to those—on whose behalf I plead—who cannot support improvident marriage by others without stinting their own children. I receive letters by the hundred asking me how middle-class men can get out of England. To these letters I have no reply to give. Rome fell by the ruin of her middle classes, and England will break up if the case of the honest strenuous brain laborer is saddled with the intolerable burden of insuring against the consequences of ungovernable fecundity in the proletariat. Politicians may be forgiven for blessing a scheme which is a bid for popular support—which to them is salaries, titles and place. But for myself and my class I protest."

Report of Actuaries.

An actuarial report on the British national insurance scheme against sickness has been made to the Treasury by Messrs. George F. Hardy and Frank B. Wyatt. They estimate that the total contributions by the insured and employers and the State in the eight years following the initiation of the scheme will be as follows:—

	People's share.	State's share.
1912-13	£16,482,000	£1,944,000
1913-14	18,348,000	3,534,000
1914-15	18,711,000	4,084,000
1915-16	19,010,000	4,240,000
1916-17	19,431,000	4,366,000
1917-18	19,759,000	4,478,000
1918-19	21,208,000	5,061,000
1919-20	22,568,000	5,498,000

The actuaries estimate that on May 1, 1912, the total number of persons eligible as contributors to the scheme will be 16,479,000, divided as follows:

	Compulsory.	Voluntary.
Males	10,241,000	1,578,000
Females	4,118,000	542,000
Total	14,359,000	2,120,000

◆

Most monarchs, princes and millionaires are strong advocates of insurance, which they regard as the safest form of investment.

The Czar of Russia carries policies aggregating £1,800,000, the Kaiser £1,000,000, and King George nearly £1,000,000.

One American millionaire is insured for $4,000,000, while the majority of wealthy American financiers hold policies ranging from $100,000 to $1,000,000.

MORE THAN TWELVE THOUSAND PER CENT.

Has Been the Gain in Premiums Received by Canadian Life Insurance Companies in Forty-one Years—Some Remarkable Statistics.

The total amount of life insurance in force in Canada last year was valued at $856,100,082. Forty-one years ago the amount was $35,680,082. The increase in that period was more than 2,200 per cent. An analysis of the figures reveals the gratifying fact that Canadian life insurance companies have not only kept pace with their British and American competitors, but have surpassed them in the matter of the obtention of business. The following table gives the wonderful record of life insurance, amount in force, in Canada during the past four decades:—

Year.	Totals.	With Canadian Companies.	With British Companies.	With American Companies.
1868 ...	....	....	....	....
1869 ...	$ 35,680,082	$ 5,476,358	$16,318,475	$13,885,249
1870 ...	42,696,712	6,404,437	17,393,922	18,898,353
1871 ...	45,826,035	8,711,111	18,405,425	18,709,499
1872 ...	67,233,684	13,069,811	19,258,166	34,905,707
1873 ...	77,500,896	15,777,195	18,862,191	42,861,508
1874 ...	85,716,325	19,634,319	19,863,867	46,218,139
1875 ...	85,009,264	21,957,296	19,455,607	43,596,361
1876 ...	84,250,918	24,649,284	18,873,173	40,728,461
1877 ...	85,687,903	26,870,224	19,349,204	39,468,475

T. E. MacNUTT,

Secretary, Prince Edward Island Life Underwriters' Association.

The total amount of life insurance in force has increased from $35,680,082 in 1869 to $856,100,082 in 1910. This is a sum of more than $820,520,000 or 2,299 per cent. in that period. The gain even in the past ten years has been striking, amounting to $392,331,048 or 84 per cent. In the forty-one years' period Canadian companies show an increase in the amount in force of $560,192,752 or 10,230 per cent. This compares with an increase of 192 per cent. of the British companies and of the American companies 1,647 per cent. Canadian companies increased the amount of life insurance in force in the past ten years by $281,000,000 or 98 per cent. The American companies come second with a gain in the same period of $104,000,000 or 74 per cent. and the British third with only $7,000,000 or 19 per cent.

The following figures show the progress made in the matter of premiums received and how the Canadian, British and American companies have shared the totals:—

Year.	Totals.	By Canadian Companies.	By British Companies.	By American Companies.
1868 ...	....	....	....	....
1869 ...	$ 1,238,359	$ 164,910	$ 515,741	$ 557,708
1870 ...	1,464,347	203,922	531,250	729,175
1871 ...	1,852,974	291,897	570,449	990,628
1872 ...	2,265,522	417,628	596,982	1,250,912
1873 ...	2,597,658	511,235	594,108	1,492,315
1874 ...	2,844,410	638,854	629,808	1,575,748
1875 ...	2,882,387	707,256	623,296	1,551,835
1876 ...	2,803,310	768,543	597,155	1,437,612
1877 ...	2,647,407	770,319	577,364	1,299,724
1878 ...	2,610,677	827,098	586,044	1,197,535
1879 ...	2,606,757	919,345	565,875	1,121,537
1880 ...	2,721,128	1,039,341	579,729	1,102,058
1881 ...	3,094,689	1,291,026	613,595	1,190,068
1882 ...	3,544,605	1,562,085	674,362	1,308,158
1883 ...	3,774,749	1,652,543	707,468	1,414,738
1884 ...	4,132,318	1,869,100	744,227	1,518,991
1885 ...	4,619,978	2,092,986	803,980	1,723,012
1886 ...	5,195,720	2,379,238	827,848	1,988,634
1887 ...	6,001,405	2,825,119	890,332	2,285,954
1888 ...	6,561,848	3,166,883	928,667	2,466,298
1889 ...	8,224,845	4,459,595	979,847	2,785,403
1890 ...	8,004,151	3,921,137	1,022,362	3,060,652
1891 ...	8,417,702	4,258,926	1,030,479	3,128,297
1892 ...	9,070,354	4,729,940	1,088,816	3,251,598
1893 ...	9,632,779	5,156,008	1,073,541	3,403,230
1894 ...	9,909,275	5,435,031	1,079,330	3,394,914
1895 ...	10,292,354	5,702,783	1,137,366	3,452,205
1896 ...	10,602,666	6,075,454	1,137,607	3,389,605
1897 ...	11,215,818	6,598,012	1,174,732	3,443,074
1898 ...	11,994,164	7,107,073	1,210,601	3,676,490
1899 ...	13,038,707	7,805,174	1,276,229	3,957,304
1900 ...	15,006,941	9,373,405	1,372,355	4,261,181
1901 ...	15,189,854	9,133,890	1,346,666	4,709,298
1902 ...	17,077,560	10,048,204	1,415,273	5,614,083
1903 ...	18,240,265	10,882,650	1,435,318	5,922,297
1904 ...	19,969,324	11,959,100	1,473,514	6,536,710
1905 ...	22,080,717	13,947,827	1,500,232	6,632,658
1906 ...	22,364,456	14,093,056	1,583,861	6,687,539
1907 ...	23,143,872	14,963,714	1,567,951	6,612,207
1908 ...	24,697,939	16,081,504	1,546,941	7,069,494
1909 ...	26,507,750	17,440,900	1,589,991	7,476,859
1910 ...	29,791,707	19,971,666	1,580,555	8,239,486

Increase in Premiums Received.

The total premiums received in 1869 amounted only to $1,238,359. Last year those figures had changed to $29,791,707, a gain in the forty-one years of $28,553,348 or 2,300 per cent. The increase in the total premiums received in the past decade amounted to $14,601,853. From 1869 to 1910 the British companies' gain in total premiums was $1,064,814 or 206 per cent. The American companies' change was $7,681,778 or 1,377 per cent. The gain made by Canadian life companies in premiums received in the four decades was remarkable, being $19,806,756 or 12,010 per cent.

The number of policies in force in 1877 was 50,830, which increased last year to 1,172,125. The gain in the number of policies in force with Canadian companies was 538,357 or 3,112 per cent. British companies increased their policies in force in the same period by 13,785 or 144 per cent., while the American companies gained 569,153 policies or 2,372 per cent.

What percentage of the business is held by Canadian life insurance companies is a question frequently asked. The following tables give a lucid reply:—

Companies.	Percentage held of amount in force.				Percentage held of premiums received.			
	1869	1899	1909	1910	1869	1899	1909	1910
Canadian	15	62	66	66	13	59	65	66
British	45	9	6	6	41	9	6	5
American	38	28	27	28	45	30	28	29

Last year the Canadian life companies held 66 per cent. of the amount in force compared to 6 per cent. held by the British companies and 28 per cent. held by American companies. Canadian companies also received 66 per cent. of the premiums in 1910, British companies receiving 5 per cent. and American companies 29 per cent. As will be seen from the above, the Canadian life insurance companies' records are in keeping with the rapid development in other spheres of business.

ONE HUNDRED AND FIFTY DOLLARS

Per Capita Represents the Total Life Insurance in the United States—Some Interesting Figures.

Speaking to an audience of life insurance men at Washington, in 1910, President Taft said: "You represent possibly the greatest, certainly one of the most important, instrumentalities for the saving of capital in the world." The President was not exaggerating. The number of people in this country who make use of life insurance as a means of saving exceeds the total number who avail themselves of all the other recognized modes of thrift. Thus, if we add together the nine millions of savings banks depositors, the seven millions of persons who own their own homes, the two million building and loan society stockholders, and the million and three-quarters of corporation stockholders, we shall have, not reckoning duplications, not more than twenty millions of investors, whereas the number of persons who hold policies, ordinary and industrial, in life insurance companies, exceeds twenty-eight millions. These twenty-eight millions do not include the number of certificate-holders in fraternal and assessment associations. Old-line or legal reserve life insurance is the only kind of insurance that is worth the serious attention of business men.

Insurance Per Capita.

The total life insurance carried in the United States to-day is about $150 per head of the population, a sum considerably greater than that of any other country in the world. The companies reporting to the New York Insurance Department had, on December 31, 1910, $14,680,268,315 insurance in force. They had a total premium income of $533,060,996, and assets amounting to $3,665,630,535, which represents approximately as large a sum of money as the total savings in all the banks of the country.

E. W. OWEN,

Secretary, Alberta Life Underwriters' Association.

Yet, with all its magnificent proportions and its intimate relation to our social life, there is probably no business so little understood, or rather, so much misunderstood, by the public at large. Were life insurance better understood we should not have so many people asking what is the need of keeping these billions of assets lying idle, seeing they are not wanted for the mismanagement of the past.

Vigilance, The Price of Safety.

Neither would there be so much patronage of unsound insurance concerns, of which, notwithstanding increased departmental vigilance, there are still too many in the land. Neither would we see so much estrangement between policyholder and company, leading the latter to look upon the company's interests as antagonistic to his own, instead of realizing that he is himself part of the company. Indeed, it is not too much to say that the policyholders, by their stolid indifference, were partly to blame for the purpose of paying current claims. Eternal vigilance is the price of safety here as elsewhere. Life insurance executives are, as a rule, men of a high type of character, but all men are fallible, and there can be no more wholesome check upon a fallible executive than an intelligent and inquisitive body of policyholders. The supervision of the State departments, valuable as it is in many States, is no substitute for the exercise of the policyholder's own brains.

Life insurance, whether conducted by stock companies, mutual companies, or assessment or fraternal associations, is co-operative in its nature.—Moody's Magazine.

IN THE BOND MARKET.

Finances of the Dominion Revised—Railway Board and London Debentures—Haileybury's By-law Defeated.

Claims for damages amounting to $3,500,000 have been filed with the executive council by the Alberta and Great Waterways Railway project against the Alberta provincial government. One of the claims is for $2,500,000 made by the railway and construction companies. The Royal Bank of Canada has put in a claim for $398,000. The Empire Supply Company ask $121,796.65 for ties, timber, logs and loss of profit. Messrs. Campbell and Brown have an item of $3,340 for goods, building roads and breach of contract.

Some one wrote to the railway board regarding the issue of $90,000, London, Ont. debentures for Niagara power purposes, complaining that the money was not needed for capital expenditure, but that the commissioners were charging up the capital expenditure, materials and work that should come out of current revenue.

The railway board at once wrote to Mr. Meredith, the city solicitor of London, calling his attention to the complaints, and asked for the fullest information on the expenditure, for which the money is needed. That information is now being forwarded.

These debentures were issued by the city council at the request of the water commissioners, the money to be used for extending the system, installing meters, and many other things in connection with the development of the business.

Finances of Saltcoats.

Saltcoats, Sask., has a population of about 545. The assessed valuation for taxation is $283,040, while the estimated value of taxable property within the municipal limits amounts to $439,300, estimated value of property exempt from taxation $30,945, and floating debt $973. The electric light or gas debenture debt, net debenture debt is $15,500. Total value of assets owned by municipality is $7,145, and the present rate of taxation is, general 7, school 15.

The town has two chartered banks, hotel, three churches and a large school.

A by-law designed to relieve the town of Haileybury, Ont., of the responsibility of extending its permanent improvements was defeated yesterday by a large majority. The by-law proposed that the expense of all permanent improvements be borne entirely by the citizens in whose locality they were made and that no such works be constructed otherwise. The by-law was originated by Mayor Green, but roused enormous opposition from all public spirited citizens of the town. Haileybury has a magnificent site for a town and has been building up steadily and progressively, along solid and substantial lines and its citizens generally take a keen interest in its welfare.

Subscriptions to the British portion of the $30,000,000 Hukwang Railway loan to China were opened at London recently and immediately closed, having been largely over-subscribed. The issue was quoted at a premium of one per cent.

Camrose does not Favor Municipal Bonusing.

That the town of Camrose is opposed to the principle in vogue in many towns of granting numerous exemptions and in addition making a loan or grant to industrial concerns was shown at the council meeting when Mr. George Edwards, of Hamiota, Man., presented a proposition for moving his flour mill here. Mr. Edwards said he would require a loan of $10,000 at 6 per cent. interest, a free site and exemption from taxation for ten years. As security for the loan a plant costing $16,000 to $18,000 would be built, and later a 5,000 bushel elevator. The council expressed the opinion that a mill would greatly benefit the district for wheat growing, but did not endorse the proposal to loan $10,000, as it is felt that the industry that cannot bring outside capital to Camrose and pay a good interest on the investment has not much justification for its existence.

A private bond issue is being made by the T. Eaton Company, Limited, Toronto. The employees of the store may deposit their savings there and the present bond issue is in the shape of the debentures issued for limited periods by trust and loan companies. The bonds, in denominations grading from $100 to $5,000, will not be available for purchase by the public, and, for the present at least, no employee below the grade of department manager will be eligible to purchase. The securities bear an attractive interest rate which is payable quarterly, and they are not transferable without the consent of the company. On thirty days' notice by either the company or the holder, they can be redeemed.

MUNICIPAL BOND SALES FOR JUNE.

London Market is Congested—Six Provinces Make Sales.

The municipal bond sales for June as compiled by The Monetary Times amounted to $3,983,670 compared with $3,946,047 for May and $2,187,588 for the corresponding period last year.

Six provinces were on the market and the largest sales were made by the province of Alberta when bonds to the amount of $2,793,922 were sold. Edmonton, Alta., issued $1,905,100, of which $175,000 were for schools. Strathcona and Lethbridge also made fairly large sales.

The following are the monthly totals as compared with 1909 and 1910:—

	1909.	1910.	1911.
January	$ 2,540,862	$ 881,838	$ 420,337
February	4,074,125	1,272,977	1,037,287
March	1,615,368	1,169,730	6,271,925
April	4,033,988	6,805,078	3,910,288
May	5,185,530	5,964,896	3,946,047
June	2,243,569	2,187,588	3,983,670
July	1,989,442	1,536,424	....
August	3,011,242	1,312,953	....
September	1,503,108	2,841,486	....
October	1,510,132	2,211,461	....
November	2,725,166	2,292,781	....
December	1,100,428	566,113	....
Total	$31,532,960	$29,043,325	$19,569,554

The Ontario government loan of $2,500,000 was issued last month through the Bank of Montreal in London, England, at 101. This was part of the loan of $5,500,000 which was authorized by the legislature at its last session, and was in the form of provincial stock bearing four per cent. In view of the large number of loans being floated on the British market this year, it was thought advisable to issue only part of the total amount. Of this issue 74 per cent. of the total was left in the underwriters' hands. This is the second provincial loan floated this year. The first, for $290,000 for the Algonquin Park, was taken up in Toronto. The British loan was largely for the Temiskaming and Northern Ontario.

The summary of the sales for June is as follows:—

Alberta	$2,793,922
British Columbia	218,000
Manitoba	250,992
Nova Scotia	64,600
Ontario	542,906
Saskatchewan	113,250
	$3,983,670

Interest at the rate of Six per cent. will be allowed on all payments up to January 15th, 1912. After that date, the regular dividends of Seven per cent. will accrue.

Dividends will be payable quarterly.

PROPERTIES.

THE TORONTO MILL is well situated on a valuable site of about **three acres**, and has a capacity of 1,000 barrels of flour and 100 tons of feed per day. It is running day and night, but has been unable to supply the ever-increasing demand for its products.

THE PETERBOROUGH MILL was purchased (May 15th, 1911) from the Central Milling Company. It is well situated on the main line of the C.P.R., and has a capacity of 400 barrels of flour and 30 tons of feed per day. It is a most valuable addition to the Campbell Milling Co.'s plant, and it is necessary to run day and night in order to relieve the congestion of business of the Toronto mill.

THE MIDLAND MILL—A site for a new mill has been secured beside the Aberdeen elevator at Midland, Ont., comprising nine acres of land, including a water frontage of 500 feet, on which it is intended to erect the new mill, which will have a capacity of 1,500 barrels a day, with buildings arranged to increase the output to 3,000 barrels per day, without structural alterations or additions. The Aberdeen elevator has a capacity of 1,200,000 bushels, and is one of the most complete and up-to-date on the lakes.

The Tiffin elevator, with a capacity of two and a half million bushels, is within easy reach. The G.T.R. and C.P.R. have centralized in building huge elevators at Midland and Victoria Harbor.

The directors, after full consideration of the many possible locations, have decided there is no better situation in Canada for milling for both export and eastern trade than at Midland, where all the advantages of low freight rates, cheap electric power (hydro-electric), and a low fixed assessment for ten years have been secured.

ASSETS.

The Company has acquired the business of the Campbell Milling Company, which includes the mills and elevators at West Toronto and Peterborough. The mills, real estate, equipment, good-will, etc., have been conservatively valued at $525,024, not taking into consideration the valuable site and concessions at Midland, and from the shares now offered to the public, the Company will have about $300,000 in the treasury to carry on the business and build the new mill at Midland, making total assets of $825,024, there being no bonds or mortgages on the real estate or plants.

The Canadian Appraisal Company have appraised the plants.

On the investment of the two mills now running, the Campbell Flour Mills Company, Limited, are earning **eighteen per cent.**, after allowing for all expenses, depreciation, etc., and with the same experienced management and advantages enumerated in the prospectus, it is reasonable to suppose that when the new capital is invested it will bring equally good returns.

EARNINGS.

We hereby certify that the earnings of the Campbell Milling Co., West Toronto, after allowing for cost of management, depreciation, etc., have been as follows:

12 months ending July 31st, 1910	$41,974 93
9 months ending April 28th, 1911	46,394 65

(Signed) STIFF BROS.,
Chartered Accountants.

The interest required to pay 7 per cent. on Preference Stock is $45,500. From the above earnings it will be noticed that this amount is earned by the Toronto mill in **nine months**, and with the added capacity of the Peterborough plant now in operation, and the Midland Mill, which will soon be in operation, this will more than double the present capacity, so the earnings will be very materially increased.

ESTIMATED EARNINGS.

The mill at Midland will be completed early in 1912, and when the three mills are running, figuring very conservatively by past earnings, the net profits are estimated as follows:

Net earnings	$100,000
7 per cent. preferred dividend	45,500
	$54,500
Showing over 7 per cent. on the common	45,500
	$9,000

THE GROWTH OF BUSINESS.

The necessity for expansion is shown forcibly by the following figures, which represent the annual gross sales of the Toronto mill:

1907	$545,103 16	1909	$1,108,966 00
1908	836,630 17	1910	1,130,477 20

EIGHTEEN YEARS OF SATISFACTION.

The new Company receive the benefit of the good-will and business, which has given eighteen years of satisfaction to the purchasers of their brands of flour, such as **"Cream of the West," "Queen City"** and **"Monarch."** It is the only large flour mill situated in the City of Toronto, and in eighteen years they have built up a tremendous local trade, besides being well-established throughout the Dominion, West Indies, South Africa, Newfoundland and the United Kingdom.

MANAGEMENT.

The Management of the Company is in strong, practical hands. The President, the Honorable Archibald Campbell, has been in the milling business a life-time, and associated with him are his three sons, who have been managing the business for six years. The experience of James Playfair, of Midland, and Mr. James Richardson adds strength to the Board of Directors. The Directors have been looking ahead and have extended all their lines and formed connections, feeling confident that with their present organization and all the advantages enumerated above, they will be able to dispose of the entire products of the new mill, in addition to their present output, at profitable rates.

MARKET.

Flour is an every-day necessity, and flour ground from our Canadian North-West wheat is finding a ready market the world over, and, with increasing home markets, it is necessary for our established mills to greatly increase their output to take care of the ever-increasing production of wheat.

Subscription books are now open at our offices, and will close on or before Monday, July 17th, at 3 o'clock p.m.

The right is reserved to allot only such subscriptions and such amounts as may be approved, and to close subscription books without notice.

Prospectus and forms of application may be obtained from and applications forwarded to

Hammer Hill, No. 2361, $1,500. D. McBean, Gleichen.
Gough Lake, No. 2366, $2,000. I. D. Taylor, Leo.
Hilda, No. 2412, $1,200. H. Jeske, Hilda.

◆

The stock of the Toronto Electric Light Company is being transferred to the syndicate acting for the Electrical Development Company. This transfer was authorized by the Toronto Electric shareholders at their last annual meeting. About $5,000,000, the amount still to be paid to the shareholders is being supplied by London capitalists.

BOND DEALERS

We recommend for investment the
6% First Mortgage Sinking Fund Bonds of

The Spanish River Pulp and Paper Mills, Limited

Price 98 and Interest Yielding Over 6%

This company has the right to cut all the pulpwood on an area of 6,000 square miles, watered by the Spanish River and its tributaries.

Exclusive of pulpwood, the company's assets, consisting of plant, waterpower, buildings, etc., are appraised at $2,480,000.

The net earnings last year were sufficient to meet the bond interest two and one-half times.

The pulp and paper industry in Ontario is less likely to suffer from depression than any other. All the product of this company is sold in the United States, and the growing scarcity of pulpwood there is indicated by a steadily-rising market for Ontario pulp.

These bonds, in our opinion, offer exceptional security, and we shall be pleased to explain the security more fully on request.

FIDELITY GUARANTEE BONDS

Personal Accidents Policies, including 10 per cent. Bonus accumulations.

Sickness Policies—covering any and every sickness.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

ARE WE INSURANCE MAD?

Hearts, fingers, eyes and even the family cat are being insured now-a-days. "Yes, of course," say Lloyd's, the big insurance people, "we insure cats. A cat is a fine risk. Why, everyone knows a cat has nine lives." Insurance against death, fire and accident is common enough. Insurance against broken hearts, marriage, triplets and other so-called catastrophes is rather new. Very recently an important firm of theatrical managers insured themselves for £10,000 to be paid in case John Barrymore, the actor, married. Later, they chuckled at their foresight and lost not a wink of sleep when his engagement and his marriage to Miss Katherine Corri Harris, a New York society girl, were announced.

But insurance against broken hearts. "Impossible!" declare the incredulous. Well, read this:—A titled Englishman wishes his son and heir to marry. He goes to Lloyd's and gets insurance that his son will marry. Sometimes he wants insurance that it will not be a chorus girl. His son finally becomes engaged. If it is to a rich American girl the whole family often wakes to the terrible independence of that liberty-loving person, and several policies may be taken out to insure that the son and heir shall not be jilted. Such policies are issued to father, mother, brother or sister. The prospective bridegroom often has one himself. And on it he may have to raise money before the wedding day. If the rich girl marries him he pays his debts out of her millions. If she changes her mind and does not, then the insurance company pays up, and the tailors, jewellers and florists lose nothing.

And does this queer insurance stop when the title and the millions are finally married? Does it! It has only begun. His Lordship betakes himself once more to Lloyd's and gets insured that there will be issue of the marriage. Gets insured that it will be a son. Gets insured that the son will live. Gets insured that he will reach his majority. And so on. A father with several daughters on his hands gets insured that they will marry. A funny part of issuing such a policy—or tragic, as the case may be—consists in the careful summing up of the girl's chances in matrimony. This falls to the lot of an old man, long in the business, who says a knowledge of psychology and physiology is necessary for the work. He sees each girl twice, for a half-hour each time, talks with her, sounds here, reads her. He meets her at some social function, and the girl does not know who he is. That is, if the father keeps to his agreement she does not. But, if the father puts the girl "next," the wonderful old man, with an almost Sherlock Holmes ability to fathom deceit, reports to Lloyd's, and not for love or money will papa be able to get a policy written now.

Not all Englishmen approve of large families. Those who do not sometimes get insured against such a calamity. Some get insurance that they will not have a child. Some get insurance that they will not have twins. Some men, naturally pessimistic, want insurance against triplets. The two latter kinds of insurance are often taken out after the stork has announced that he is about to make a visit. Before such policies are issued Lloyd's get reliable data on the number of double or treble births on each side of the house. And the premium is large or small accordingly. In one year four wise English families who had reason to think the stork might deal bounteously with them took out policies against triplets. In each case there was a history of triplets on one side or the other of the house. Only one family had them. And the insurance was considerable enough to clothe, feed and educate three very fine boys.

King George has already been insured by every London tradesman of importance. It is the only way to avert financial panic in case of an English king's death. All the body servants of royalty insure themselves against the death of their employers, too. Travelers now get insured against being held up, in quarantine. Farmers insure their crop against drought. Churches and other organizations which contemplate a bazaar or fete go to Lloyd's and take out a policy insuring that the sun will shine upon a certain day or days. There is hardly anything that can be mentioned that is not insured for or against now-a-days.—The Insurance Record.

◆

GROWTH OF LIFE INSURANCE.

According to the returns in the English Blue Book recently issued on life insurance accounts the total sums assured in British offices under ordinary life policies were about 442½ millions sterling in 1890, 600½ millions in 1900, and over 782 millions in 1910. The funds accumulated against these liabilities were 166¾ millions in 1890, 249¾ millions in 1900, and 384 millions in 1910. Ordinary policies in force in 1890, 1900 and 1910, respectively, numbered 920,990, 1,667,010, 2,802,708. As the number of ordinary policies had increased more than three times in the twenty years, while the funds had increased only about 2 1-3 times, it follows that the average per policy has declined. In 1890 the average was £446, and in 1910 it was £279. The growth of insurance is strikingly seen in the increase of premiums from £18,288,440 in 1890 to £43,529,275 in 1910—an expansion from 10s. per head of the population to 19s. Life insurance is every year becoming more popular.

LIFE INSURANCE AND COMPENSATION.

The Census of Canada now being taken will gather for the first time information on life insurance and the nature of loss or injury caused by accident in the Census year, and of compensation by voluntary allowance or insurance.

Insurance held at date of the Census will be inquired for of all insured persons, for the amount carried upon life and the amount carried against accident or sickness, and the cost of insurance for the Census year; and under the heads of disability and compensation reports will be taken in cases of accidents, of the cause or nature of the accidents, the number of weeks of disability resulting from accidents, the loss of salary or other earnings in the year, the amount of voluntary allowance to employee by employer for lost time through sickness or accident in the year, the amount of compensation by employer under statute in the year for loss of life or for injury by accident, and the amount of compensation by insurance in the year. This information ought to be a valuable guide, especially in view of legislation that may be required in the public interest, as well as in the interest of insurance companies carrying on such a business, or of governments that may undertake the business under a national scheme.

As long ago as 1883 Germany began to provide for sickness insurance under which persons regularly employed in trade or commerce for wages or salary not exceeding £100 per annum must be insured; but persons who only work intermittently, or are in independent positions, or soldiers, sailors or domestic servants, etc., are exempt from the compulsory provision. In the classes to which insurance does apply all wage earners over sixteen years of age earning less than £100 a year must be insured, and the premiums are paid equally by employers and employed, and the government adds £2 10s. annually to every pension paid. Four years ago nearly seven millions of people received benefits out of a total of 12,500,000 in a wage-earning population of 15,500,000, besides 14,000,000 for invalidity and old age, and 19,000,000 for accident insurance, and the amount of benefits paid was £30,000,000, of which the Imperial Treasury contributed £2,000,000. The law in Germany compels employers to insure all workers whose earnings are less than £150 a year.

In Britain the risk of accident is thrown entirely on the employer who usually covers himself by insurance; but the subject of national insurance against unemployment, sickness and invalidity is receiving the consideration of the government, and it is not improbable that the Chancellor of the Exchequer may bring it before Parliament in his Budget speech.

The Canadian Census will furnish information that should be useful to us in any scheme of insurance and compensation which may be proposed or submitted for consideration in or out of Parliament.

◆

The Quebec Central Railway has passed under the control of the Canadian Pacific, and the New York, New Haven & Hartford Railroads. The identity of the Quebec Central will not be affected.

Plans have been filed for the first modern office building in Prince Albert, Sask. The building will be known as the Woodward Block and will be seven storeys in height, absolutely modern and fireproof, and will be ready for occupation in the course of the winter.

The declaration of a second dividend of one per cent. per quarter by the Quebec Railway, Light, Heat & Power Company, aroused considerable interest in Montreal financial circles, it having been predicted that thecompany could not possibly maintain the payment, and the directors in declaring a first payment of one per cent. did not commit themselves to a continuance of it. The fact that one per cent. has again been declared for the quarter would indicate that the directors are at least going to make an attempt to make it a quarterly affair. A director of the company said that after the dividend was paid a reasonable surplus would remain.

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years,

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

Reports furnished. Scrip handled.
J. C. BIGGS & CO.

The Toronto city treasurer has published a report on the proceeds of sales of tax sale lands. It shows that from 1898 to June 17, 1910, the city has made a profit of $381,650 out of the sale of tax lands. Of this sum $243,399 was expended for various civic purposes, and $79,295 is the amount of the net losses, leaving a balance on hand to-day of $58,258. The cost price of lands still unsold amounts to $193,144. Debentures to the amount of $400,000 which were issued for the purpose of offsetting the arrears will mature in 1915 and will be met out of the $789,911 charged as taxes and interest.

THE WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

On December 31st, 1910, the Prudential Life, of Winnipeg, had total insurance in force of $4,277,028; on June 30th, 1911, the business in force amounted to $5,350,000, an increase in the six months, of over a million dollars. Taking a full calendar year, from June 30th, 1910, to June 30th, 1911, a net increase of business in force of $1,700,000, and an increase of $65,000 in premium income were made. The company has issued an additional 1,300 shares of stock bringing the subscribed capital up to $730,000. They expect to make a net increase in business in force at the end of the present year of $2,000,000. There will also be a material increase in the company's assets as it is anticipated that there will be from $150,000 to $200,000 invested in first mortgages during 1911.

FACTORY LOCATIONS

WINNIPEG

The Supply City of WESTERN CANADA

Offers Greater Combined Advantages to Manufacturers

and capitalists than any city in Canada. The remarkable development of this GREAT CENTRAL MARKET is creating unprecedented demand for home industries.

Winnipeg Wants These Manufacturers

and offers **CHEAP POWER,** cheap sites, low taxation, varied raw materials, backed by the best labor conditions and unexcelled railway facilities for receiving and distribution of goods.

The Manufacturer Makes no Mistake By Getting Close to This Market

Special openings for manufacturing farm and agricultural implements, paper and straw-board mills, men's clothing, ladies' ready-to-wear goods, foodstuffs, starch factory, boots and shoes, felt wear, metal goods, wire nail factory, hardware specialties, flax and jute works, beet sugar factory, elevator machinery, electrical fixtures and appliances of all kinds, automobiles and commercial motor carriages, home and office furniture, leather goods, cereal foods, dairy machinery, building materials, stoves, ranges, furnaces and heating plants, and fifty other smaller lines. Special reports are prepared and mailed free of charge on the manufacturing possibilities of any of these lines of industries by addressing.

SPHERES OF THE ACTUARY.

(Continued from Page 222).

launching their scheme of insurance against invalidity and unemployment, and this is only an indication of the use to which actuarial principles will be put in the near future.

Furthermore, the great development in workmen's compensation in recent years, and, in fact, in many other national questions of great moment, which are intimately connected with the province of the actuary, are confronting the civilized nations to-day and demanding careful attention. Even in many businesses that have hitherto existed without utilizing the services of the actuary, indications are not lacking that in the not distant future there will be a radical change of method. The scientific application of the theory of probability to statistics, which is now becoming more necessary in so many lines of endeavor, must undoubtedly require handling by one thoroughly conversant with actuarial science. These and many other considerations indicate the nature of the future necessity for further developments in the science to keep pace with modern progress.

In All Walks of Life.

But while the actuary will in future have larger fields open to him in which his own peculiar knowledge will be essential, it must not be forgotten that an actuarial training cannot fail to be beneficial in all walks of life, It is probably this fact that has led to actuarial science being given such a prominent place in the curricula of our colleges and universities. In the University of Toronto alone great developments have taken place in recent years. Only a few years ago very little beyond the mathematical theory of probability was studied, whereas to-day, there exists a four year course in actuarial science, which is being studied by multitudes of students, the majority of whom will never engage afterwards in actuarial work, but who realize the benefit of the training along these lines that they are receiving. As the president of the Institute of Actuaries, Mr. G. H. Ryan, stated in his opening address to the institute in reference to the actuarial profession: "It affords a splendid training for almost any walk of life. We may say, without presumption, that even a Chancellor of the Exchequer (and perhaps his legislative proposals) would be the better for a sound knowledge of our subjects. It teaches a true sense of the value and weight of statistics; gives a sure foothold on the dangerous ground of percentages; stimulates the capacity to wrest from figures their inner significance and the lessons they inculcate; and involves, as I have already observed, a wide acquaintance with many broad fields of human effort and activity."

In Other Fields.

The marvellous development of Canada in the matter of material things, of population, of education, and, in fact, of progress in all directions, has taken place chiefly within the last twenty years. Short as this period has been, however, it has been sufficient to prove that an actuarial training furnishes a splendid foundation for business success in many other fields besides life assurance. In spite of the fact that in Canada actuarially trained men have been few in number heretofore, yet several examples may already be cited of such men leaving life assurance and utilizing their energies in other fields with every prospect of success. The wide range of activities thus thrown open is evidenced by the great diversity in the character of the fields entered upon, ranging as they do in the cases under consideration from agriculture on a large scale to manufacturing and investment and finance, thus typifying the world-wide field that lies open to the actuarially trained man. When it is remembered that the training of an actuary involves the study not only of mathematics, but also of accountancy, of banking, of finance, of law, of economics, and of kindred subjects, it will be more easily understood how such a man may very readily adapt himself to modern business conditions, whatever form they may assume in any particular department

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to Intending Investors, large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

If we step aside for a moment and look at the insurance business, says Robert Lynn Cox, we see that it is in reality the shock absorber of human misfortune; it is intended to ease us over the rough spots—in fact, to make life's pathway less rocky than it would otherwise be. We say of life insurance that it is not a charitable institution, but it prevents to a large extent the need for such institutions. It is founded on human sympathy and the fraternal regard which one man must feel for another if mankind is to be happy. Is there a reason why it should not grow and extend? Is there room for doubt that a man who engages in such a business in any capacity, whether in the office or the field, should feel a pride within him for having become an essential part of such a beneficent institution? I know of no business that bears a more intimate relation to the community as a whole, nor which to-day is as likely to bring comfort at the particular time of greatest need. If this be true, it seems that as a business it performs a useful function and is bound to live and grow; that those who enter it will have an ever-widening field of interest and opportunity.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

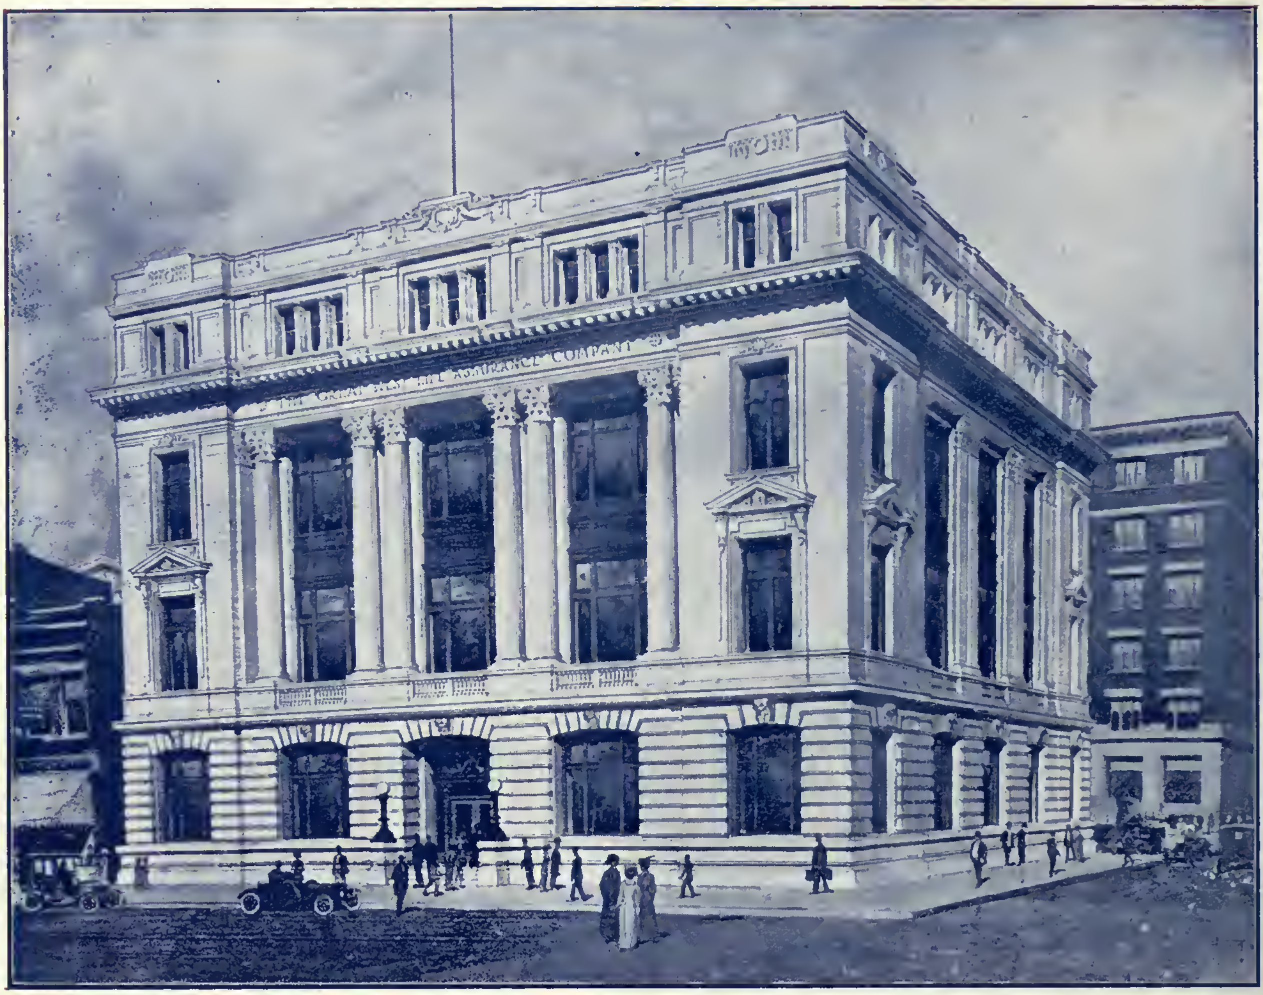
A. E. AMES & CO.

INVESTMENT BANKERS - - - - - - - TORONTO, CANADA



The Great-West Life Assurance Company

recently moved into the new Home Office on Lombard Street, Winnipeg, thus making the last of the many moves necessitated by the Company's rapid growth since its foundation in 1892.

Less than nineteen years old, the Company goes into its permanent home with a Business in force of $60,000,000, representing over 33,000 Policies, with Assets exceeding $8,500,000, writing a monthly Business verging upon $1,500,000, and with an Annual Income approaching $3,000,000.

This success has been built upon the solid foundation of unequalled

RESULTS TO POLICYHOLDERS.

A high rate on investments—a favorable mortality—low expenses—have led to low premiums and high profits—and these in turn have led to the wide and increasing demand for the Great-West Policies.

THE GREAT-WEST LIFE ASSURANCE COMPANY

HEAD OFFICE - - - WINNIPEG

TO LIFE MEN OF ABILITY—looking for adequate opportunity—The Great-West Life offers a most attractive field. Valuable Policies to sell, unequalled Results to show to Policyholders, and the Company's active co-operation are some of the advantages.

PRUDENT PREPARATION
. . IN YEARS OF PROSPERITY . .

"In your prosperity to-day, remember that lean years must come."—Monetary Times.

The prudent man prepares for the lean years by husbanding his resources during the years of plenty. The easiest, simplest, and safest way to do this is to deposit regularly such portion of your income as is not immediately required, in a strong and stable institution like the Canada Permanent, where it will be available when wanted, and in the meantime will be earning interest. Or, all your receipts may be deposited, and your payments made by cheque.

We credit the account with compound interest at

THREE AND ONE-HALF PER CENT.

PULP AND PAPER MANUFACTURING.

The cost of manufacturing pulp and paper in Canada is considerably lower than the cost in the United States. This fact is revealed in an extensive report on the pulp and news print paper industry compiled by the United States Tariff Board. It is a matter of considerable importance in view of the Dominion's extensive forest resources and the provincial regulations requiring the actual manufacture in the province of the raw materials into pulp and paper. The following table gives the average cost per ton of product in the United States and Canada compared:—

	Average cost per tons of production.	
Items.	United States.	Canada.
Ground wood pulp:		
Wood	$10 23	$ 5 70
Manufacturing labor	2 18	1 73
Other costs	2 18	2 13
Total cost in bulk at works	$14 59	$ 9 56
Sulphite fibre:		
Wood	$18 58	$13 13
Manufacturing labor	3 84	3 21
Other costs	9 57	10 13
Total cost in bulk at works	$31 99	$26 47
News print paper:		
Ground wood pulp	$13 27	$ 8 49
Sulphite fibre	8 63	7 41
Other materials	84	99
Total materials	$22 74	$16 89
Manufacturing labor	3 27	3 19
Other costs	6 87	7 45
Total cost in bulk at works	$32 88	$27 53

The most significant deduction from these figures is that the difference in cost of wood per ton of pulp is practically the difference in the total cost. For instance, in ground-wood pulp the total cost is $14.59 for the United States and $9.56 for Canada, a difference of $5.03. The cost of the wood as raw material per ton of product is $10.23 for the United States and $5.07 for Canada, a difference of $4.53, which, deducted from the total difference of $5.03, leaves a difference of 50 cents per ton in favor of Canada, 44 cents of this being in the item of manufacturing labor cost.

The Canadian average cost for sulphite was $26.47, the average for the United States mills reporting was $31.99, a difference of $5.52, of which $5.45 is absorbed by the difference in cost of wood as a raw material, leaving a net difference of but six cents per ton, although the difference in labor cost is 63 cents per ton in favor of Canada.

In news-print paper the effect of wood cost is not so clear, because here the raw material is pulp and not wood, but if we take 80 per cent. of the difference we find in the wood cost in ground-wood pulp, and 20 per cent. of the difference in case of sulphite pulp, we have $4.71 as the amount of the difference in the cost of news-print paper in the two countries, which is due to the difference in wood costs.

The average cost of production of news print in Canada is $27.53 per ton, in the United States $32.88. The difference is $5.35, of which $4.71 is accounted for by difference in cost of wood as raw material in the pulp, leaving a difference of 64 cents, only eight cents of which is covered by the difference in manufacturing labor.

Some interesting details of the efficiency of labor in the Canadian pulp and paper industry are given in the Tariff Board's report. Canadian paper and pulp mills are equipped, as a rule, with the latest and most improved machines made by American manufacturers in the United States. The general managers and superintendents are, for the most part, Americans of wide experience. Those who are Canadians by birth are men who, like the Americans, have had long years of training in American paper and pulp mills. The skilled men, the machine tenders, and other hands who operate the paper machines are, as a rule, Americans brought from the United States for the purpose. They are paid American rates of wages, although in several instances the rates are for a 12-hour shift, instead of an for an 8-hour shift, as in Eastern United States. Excepting for the comparatively small number of skilled men necessary to operate the paper machines and the mechanics employed on repairs, the great majority of the men employed in the paper and pulp mills are classed as unskilled, and receive the pay of unskilled laborers. A study of the comparative wage tables in the report shows that the average rates of pay of unskilled men are lower in Canada than in the United States.

It would seem, then, that with modern mills, American machinery, American-trained managers and superintendents, and American skilled operatives, together with lower rates of wages for unskilled men, the Canadian manufacturing labor cost per unit of production in the modern and well-equipped mills of Canada would be considerably lower than in the modern and well-equipped mills of the United States.

The tables show, however, that the Canadian labor cost per ton of news-print paper is only slightly lower on the average. That 41.5 per cent. of the tonnage reported in the United States carries a manufacturing labor cost of less than $3 per ton, while 54.7 per cent. in Canada falls under $3. The total average for the United States is $3.27 as against $3.19 in Canada, notwithstanding Canada's advantage in average equipment. This indicates that there is greater efficiency and experience in the first-class mills of the United States.

With the exception of the machine tenders the labor employed in Canadian mills is French-Canadian. The mass of French-Canadians have been workers on the farm and in the forests and almost entirely out of touch with industrial life in shops, mills, or factories.

They have had no opportunity for systematic training in manufacturing establishments, and Canadian mill managers do not seem to realize that the men in the log-pond, the log-deck, the barking-room, the grinders, the wet machines, and the numerous other unskilled positions are just as essential in their required places for the manufacture of paper as the skilled paper-machine tenders. Close inquiry of managers, superintendents, and foremen elicited uniform statements that the French-Canadians transferred from the farm and forests were not as yet dependable or efficient. They had not, it was stated, as yet acquired the degree of responsibility essential in every position and subdivision in the process of manufacture nor the close and undivided attention to duty required.

It was further affirmed by managers that this irresponsibility extended to those who were placed in the position of minor foremen. The answer to the statements of the inefficiency of the French-Canadian laborers was the pointing out of numerous instances of efficiency of a high order in the higher grades of employment. It is charged that American-trained superintendents give preference to Americans in the skilled positions, and that no opportunity has been afforded to French-Canadians to advance, and it was pointed out that where strikes occurred and the French-Canadian given a chance he had succeeded.

In a few establishments, in consequence of strikes or threatened strikes by Americans, a policy of training French-Canadians in the skilled occupations has been adopted. At present the high labor cost per ton is owing largely to the fact that the Canadian unskilled laborers do not accomplish as much per man as the laborers in the American mills. This is, however, a matter which in time would correct itself, and it is hardly to be doubted, with an incentive to acquire industrial training and skill and the necessity on the part of manufacturers for imparting such skill, the Canadian paper manufacturers will ultimately train the French-Canadian labor to the point where the manufacturers will reap the full fruit of their best equipments.

The longer and colder winters in Canada also add much to the labor cost, more men being required to handle the frozen lap pulp and other materials, the outdoor movements of men and animals being impeded for a longer time by the frost and snow.

The effect of the long and severe winter is shown in the following labor cost per ton of news-print paper each month during the summer and winter months in a Canadian mill:—

Month of Year.	Wages paid per ton of paper.	Month of Year.	Wages paid per ton of paper.
April, 1910	$3 25	Sept., 1910	$3 38
May, 1910	3 54	Oct., 1910	4 45
June, 1910	3 60	Nov., 1910	4 22
July, 1910	3 76	Dec., 1910	5 10
August, 1910	3 43	Jan., 1911	5 33

These figures represent the total pay-roll cost, not merely manufacturing labor cost. That is to say, all repair and upkeep and all other labor is in this statement of wages per ton of paper. It must not, therefore, be compared with manufacturing labor costs as shown on paper in the tables of cost.

In connection with the Tariff Board's report, it is interesting to recall that the forests of Scandinavia, Canada's principal competitor in the production of pulp and news print, are gradually being reduced. The United States depends upon Canada for about a million cords of wood per year for its pulp mills. It is not prophesying too much to state that Canada will shortly supply more pulp and paper for the world's newspaper presses than any other country. The manufacture of the higher grades of paper will be a slower development, but no less definite.

SMALL CHANGE.

Lemons were at a premium this week. What a fine chance for the get-rich-quick stock operator to be relieved of his capital.

• • • •

During the past week water has been scarce in many towns and cities. The immense quantity of aqua pura in some of our stocks might have been used to advantage.

* * * *

Owing to the heat wave the Montreal Stock Exchange closed down for an afternoon this week. After such an occurrence it is to be hoped the brokers will prevent hot air getting into their coming prospectuses.

CAPITAL INVESTMENTS IN CANADA

—X.—

INDUSTRIAL INVESTMENTS IN CANADA

By Fred. W. Field.

Until recently, British capital has shown comparatively little interest in the development of Canadian industries. During the past two years particularly, a notable change has occurred in this direction, and British capitalists are devoting considerable attention to industrial development in the Dominion. The following table gives the details of Canadian borrowings in Great Britain for the period under review (January, 1905, to April, 1911), for industrial, light and power purposes:—

Industrial.

1905.		
Imperial Paper Mills of Canada, Limited	£	60,000
Montreal Light, Heat and Power Co		150,000
Shawinigan Water and Power Co		500,000
Western Canada Pulp and Paper Co		300,000
		£1,010,000
1906.		
Canadian General Electric	£	220,000
Electric Development Company of Ontario		500,000
Canadian Pacific Sulphite Pulp Co		82,500
		£ 802,500
1907.		
Annapolis Iron Co.	£	140,000
Shawinigan Water and Power Co		200,000
Mexican Light and Power Co		480,000
Canadian General Electric Co.		400,000
		£1,220,000
1908.		
Penmans, Limited	£	300,000
Montreal Light, Heat and Power Co		80,000
Richelieu and Ontario Navigation Co		200,000
Kaministiquia Power Co.		265,000
West Kootenay Power and Light Co		240,000
Penmans, Limited		170,000
Toronto Power Co.		500,000
Western Canada Flour Mills Co.		225,000
Canada Iron Corporation		364,000
		£2,344,000
1909.		
Montreal Water and Power	£	100,000
Montreal Cotton Co.		200,000
British Canadian Asbestos Co.		144,032
National Drug and Chemical Co. of Canada		300,000
Lake Superior Corporation		1,028,806
Northern Light, Power and Coal Co		411,522
Standard Chemical Co. of Toronto		100,000
Canada Car and Foundry Co.		648,148
		£2,932,508
1910.		
Ocean Falls Co., Limited	£	300,000
Canadian Car and Foundry Co.		482,877
Calgary Power Co., Limited		350,000
Pryce Jones (Canada), Limited		70,000
Steel Co. of Canada, Limited		924,600
National Drug and Chemical Co. of Canada, Limited		49,370
Price Bros. & Co., Limited		1,000,000
Canadian North Pacific Fisheries Co		400,000
Western Canada Bag and Envelope Co		12,000
Noiseless Typewriter Co.		20,000
		£3,608,847
1911 (to April).		
Canadian Steel Foundries	£	410,900
Bell Telephone Co. of Canada, Limited		250,000
P. Burns & Co., Limited		200,000
Lake Superior Paper Co., Limited		719,000
Spanish River Pulp and Paper Mills		267,000
Standard Chemical, Iron and Lumber Co. of Canada		200,000
Minnesota and Ontario Power Co.		100,000
Canadian Cottons, Limited		370,000
		£2,516,900

The liking of the London market for equipment issues is noticeable in the above list. Ten electric light, heat or power companies obtained nearly four millions sterling. The Shawinigan Water and Power Company obtained altogether £700,000 and the Montreal Light, Heat and Power Company £230,000. One of the largest industrial borrowers was the Canadian Car and Foundry Company, its loans amounting to £1,131,025. Pulp and paper companies borrowed altogether in the six years £2,368,500. Two iron corporations, the Annapolis and the Canada, got between them £504,000.

Considerable British capital has been devoted to the development of our coal mines, our iron and steel industries, our lumber, pulp and paper industries, our fisheries, our milling industries, our various lines of manufacture, and other more or less local and domestic enterprises.

Canadian government municipal and railway securities have long been regarded with favor by British investors. A general survey of the Canadian outlook and the progress of Canadian development gave satisfactory assurance of returns from investments of this nature. But large investments in miscellaneous securities show a more intimate and detailed knowledge of Canada's commercial and industrial activities. The British investors are becoming familiar with Canada's more localized undertakings. They are finding it advantageous to consider the outlook of the various industries affording openings for profitable investments.

May Be Keen Rivals.

The American is closely allied with Canada's industrial development, and has placed large amounts of money therein. If the present tendency in Great Britain continues, it is likely that within a few years we may find the Britisher and the American not only keen rivals for the import trade of Canada, but also for shares in the financing of its industrial growth.

It is stated that $1,000,000 of English capital will be invested in a new whitewear company with a factory at Three Rivers, Quebec. British manufacturers of high grade ammunition are contemplating the establishment of an assembling plant at Fort William, while a Scotch syndicate were recently considering the manufacture of fertilizers at Sydney, C.B. An English and New Brunswick syndicate was organized in January with capital stock of $5,000,000 for the purpose of developing the mineral oil industry in connection with the shale deposits of Alberta and Westmoreland counties, New Brunswick. Other proposed British enterprises in the industrial line are an electric smelting plant on the Ottawa River, a steel plant on the Fraser River, British Columbia, a lace factory, a perforated music factory, and a furniture factory.

More British Capital.

British capital also became interested this year in a power street railway scheme at Saskatoon, while an English salt firm had under consideration the establishment of a branch factory in Ontario. The stockholders of the Canadian Locomotive Works, Limited, of Kingston, Ont., in June accepted the offer of an English syndicate for the sale of the works. The company was reorganized, the capital stock increased, and the capacity of the works doubled.

Percentage Shares.

In tramway, light and power and industrial bond issues the British investor is prominent. Taking the figures for 1910, we have the following result respecting a total of $7,945,400 tramway, light and power loans:—

Sold in	Amount.	Percentage share.
Great Britain	$4,850,000	61
Canada	3,095,400	39

Of a total of $56,856,500 miscellaneous issues, which included a large number of industrials, the following was the disposition in 1910:—

Sold in	Amount.	Percentage share.
Great Britain	$43,847,500	76.92
Canada	12,859,000	22.73
United States	150,000	0.35

This represents the absorption of industrial bond issues alone, and naturally does not show the extent to which American capital has participated in Canadian industrial development. In the opinion of Mr. E. R. Wood, the prominent Toronto financier, the increase of British patronage of light, power, tramway and industrial issues was the most significant feature of Canadian bond sales during 1910.

The visit of Sir George Doughty to Canada in 1910 was significant in view of his inspection of fisheries off the coast of British Columbia in the interest of influential British investors. It is understood that he has strongly advised that steps be taken to establish a Canadian fishing industry in British Columbia backed by British capital. There is an abundance of whitefish and salmon in the fisheries extending from Vancouver north to Stewart. At present these waters are almost exclusively used by Americans and Japanese. In June, Sir George announced his intention of engaging in the fishing business at Prince Rupert, B.C.

What is a Factory?

Another phase of this subject was discussed by Sir William Priestley, a prominent British manufacturer, on a visit to Canada. He was asked many times if he would justify the establishment of manufactories in Canada, and invariably responded by asking, "What do you mean by the word 'manufactory'?" In Great Britain, it is understood the men who take hold of the raw material are making it into the finished article. In Canada it is spoken of as taking the finished article in bulk from Great Britain or the continental powers of Europe, and simply transforming it into a commodity for the individual.

Sir William would not advocate the establishment of factories in Canada as he understands them in Great Britain, because the purchasing power of Canada to-day is not great enough to justify anyone connected with most of the industries to establish a concern where he has to take hold of the raw material and turn out the finished article, with only 8,000,000 of people—which is about the population to-day of the city of London, and not equal to that of Lancashire.

Purchasing Power Too Small.

"For example, in British Columbia," said Sir William, "I was asked why I, in the worsted trade, could not establish a concern in that province. I replied that their area was as great as France, Prussia and Bavaria together, but that their population, for purchasing power, was only a little greater than my city of Bradford in England. Therefore, it would be foolish for me to think of establishing a manufacturing concern in British Columbia, or even for the consumers in British Columbia to think that such a concern could sell to them economically. The demand upon variety in Vancouver and Victoria is just as great with respect to men's wear and women's wear as it is in any great city in England; and no manufacturer of men's wear and women's wear could possibly make a profit of the consumption of the people of British Columbia, because the cost of production would be so tremendous, to meet all the varied demands. Besides, if politicians in Canada look into the question seriously of the upbuilding of manufactories, they will find there is some natural cause why certain industries have centred in certain districts and in certain countries; and before any English manufacturer in any branch of industry could say he could establish an industry in any part of Canada, he would have first to go very deeply into the natural conditions—water, humidity, and many other qualities that are necessary to different industries.

"After putting the matter in this crude way, I have come to the conclusion that Canada has before her a great future as a manufacturing country; and I seriously believe that what she must do is, first, to increase as rapidly as possible her population, and thereby increase her productive power, and her purchasing power."

Dry Docks and Shipbuilding Plants.

Another important development is the interest of large British firms in the establishment of shipbuilding plants, floating and dry docks in Canada, and the sending of capital from other sources for the same purpose. A large number of new dry docks have been mooted, of which the following are the principal:—

Company.	Proposed Location of Dock.	Estimated Cost of Dry Dock.
Vancouver Dry Dock and Shipbuilding Co.	Burrard Inlet, B.C.	$1,214,150
Canadian Vickers, Maxim Co.	Montreal, Que.	4,000,000
British Columbia Marine Railway Co., Limited	Esquimalt, B.C.	3,000,000
Grand Trunk Pacific Railway Co.	Prince Rupert, B.C.	2,000,000
Dominion Dry Dock Co.	Levis, Que.	....
Esquimalt Graving Dock and Shipbuilding Co.	Pacific Coast	2,637,800
British Canadian Shipbuilding and Dock Co.	Sydney, N.S.	6,000,000

Many, if not all, of these schemes will probably materialize. It is definitely decided that Montreal is to have a first-class dry dock, and undoubtedly the Grand Trunk Pacific Railway will build one at Prince Rupert. The Dominion Dry Dock Company may build at St. John, N.B., instead of Levis. In all the above proposals British capital forms the backbone.

Dry Dock Subsidies.

The Dry Dock Subsidies Act of 1910 gives encouragement to investments of this nature. This Act differentiated between first and second-class docks as follows:—

> "**A first-class dock** shall be capable of receiving and repairing ships of at least 25,000 tons; shall cost not more than $4,000,000; and bonds to this amount or less shall be guaranteed for a term of 35 years.
>
> "**A second class dock** shall be capable of receiving and repairing ships of 15,000 tons; the cost shall not exceed $2,500,000; and the bonds shall be guaranteed for the term of 15 years."

The rapidly increasing interest of British capital in Canadian industrial growth is one of the most important developments of recent years.

REVENUE OF DOMINION SHOWS INCREASE.

The Dominion financial estimate for the first quarter of the current fiscal year shows the continued growth of revenue. For the three months ended June 30 the Customs revenue was $2,500,000 in excess of the receipts for the first quarter of 1910-11. This rate, if continued, would mean an increase of $10,000,000 for the fiscal year, which would bring the Customs receipts up to the phenomenal figure of $80,000,000 for the twelve months.

The total revenue for the three months ended June 30 amounted to $29,239,646, an increase of $2,904,793 over the first quarter of last year. Expenditure on consolidated fund account was $8,935,732, an increase of $102,625. Capital expenditure is returned at $2,303,730, a decrease of $846,305.

For the month of June the revenue amounted to $10,666,205, an increase of $1,053,528 over June, 1910. Expenditure on account of consolidated fund was $5,165,911, an increase of $92,145. Capital expenditure for the month was $1,815,585, an increase of $163,246.

The Royal Bank of Canada has opened branches at Courtenay, B.C., and Lacombe, Alta.

FOREST FIRES IN CANADA.

An Expensive Way to Clear Ground—Illogical to Spend Money on Reforestation When Large Areas of Virgin Forest Are Being Destroyed Annually.

Canada's loss from forest fires during the past century is beyond comprehension, and it is almost impossible to ascertain the actual loss. Messrs. H. R. MacMillan and G. A. Gutches were appointed by the Dominion Government to prepare a report on forest fires in Canada, and they have performed a difficult task in a creditable manner.

So many fires occur that are unrecorded that it is impossible to estimate the quantity of timber annually burned. It is a very large quantity, probably as much as is annually cut for use. Canada has no timber to spare. When other nations came to the point where the domestic timber supply could not meet the demand, the development of transportation and the discovery of virgin forests before inaccessible enabled them to import timber in as large quantities as necessary to relieve the demand. It is safe to say that all the areas of useful timbers existing in the world are now discovered and being exploited. The only countries now exporting timber in quantity are Sweden, Norway, Russia, Austria, the United States and Canada; and of these countries all, or nearly all, with the exception of Canada and Russia, are cutting in excess of the yearly growth. There will be no new continent ready to relieve the scarcity in America, as America was in the case of Europe. Where every other nation had a foreign resource to rely upon, Canada will have none. Canada will need none if the forest fires are checked as other nations have checked theirs, and scientific management of forest land is adopted. It is illogical to spend money in reforestation when large areas of virgin forest are still being annually destroyed by fire.

Up to the present time no steps have been taken in public lands in Canada so to manage logging operations as to provide suitable conditions for the natural reproduction of the valuable trees. Nothing has been done to provide for a continual growth of valuable timber on the land cut over. So far everything has been left to chance, to unaided nature.

An Expensive Method of Clearing Land.

The remark is often made that forest fires are useful in helping to clear the land. It is the most expensive method of clearing the land. Conditions are such now that a settler can usually make some use of the timber he clears off his land. There is nothing gained by burning over land before it is needed by settlers or by burning the timber off land which can never be used for settlement.

Where the soil is a light sand the whole fertility is contained in the upper layers of humus, the product of centuries of decaying vegetable matter. The intense heat created by the burning of the timber consumes this humus and thus destroys the most valuable constituent of the soil. Where the soil is rich this is not the case; the soil may be enriched by the ashes; but where the soil is sandy, the ashes even are blown or leached away and nothing is left but sterile sand.

Where the soil is thin and overlies rock, as in the mountains and in large areas of the public lands in all the mainland provinces, the results of fire are even more serious. In such situations the products of the rock-weathering and plant-growth of ages has been only a few inches of soil. The first serious forest fire destroys all or the greater part of the soil, leaves the remainder loosened or unprotected, so that it is readily carried away by the rains, and the country is left more barren than it was after the last glacier. The fire destroyed at once the existing forest and any possible prospect of a future forest. There are large areas of territory so ruined in Canada. A notable instance is the territory along the Canadian Pacific Railway, north of Lake Superior.

Effects of Fires on Subsequent Growth.

The crop of timber succeeding a forest fire is rarely of as good a quality as that destroyed by the fire. The virgin timber standing on tracts which have been free from fire for long periods is, over the greater part of Canada east of the Rocky Mountains, spruce and pine. When fire destroys spruce and pine timber, one would naturally suppose the next crop would be again spruce and pine. Such is rarely the case. Almost invariably burned-over land, irrespective of what may have grown on it before, produces a dense crop of aspen poplar and white birch or jackpine trees, which have very little commercial value as compared with the spruce and white or red pine which they displace. These trees occupy the ground to the exclusion of more valuable species for long periods after every large fire. If seed trees of the more valuable conifers are present they may again gain possession of the ground, but in the natural course of events hundreds of years are required to establish valuable timber on burned-over land. In fact, excepting the comparatively valueless jackpine, so seldom does one crop of conifers follow another after a fire, that many old lumbermen in the white pine country believe that the soil is incapable of producing two crops of white pine in succession. The real reason is not that the soil cannot bear two crops of pine in succession, but that it seldom gets a chance to do so. Nearly all the clearings in pine timber are made by fire or by lumbering followed by fire. All pine seed-trees and cones are destroyed. Pine seed is not carried very far; it requires about two to five trees to the acre to ensure natural seeding. So there is no chance for fire to get a start. Birch and poplar, the usual crop on burned-over land, sprout prolifically from cut or burned stumps and also produce large quantities of seed every year, seed so light that it is carried many miles by the wind. The result is that burned-over land, unless in exceptional cases where the valuable conifers have had exceptional opportunities, produces a crop of comparatively worthless poplar and birch or jackpine. On the east slope of the Rocky Mountains the valuable Engelmann spruce is after a fire followed by the less valuable lodgepole pine.

Railways a Source of Danger.

Railways are a prolific source of danger to forest land, from the time of the first location survey. The most destructive fires usually originate from the construction camps, but fires start every year as long as the road remains in operation and timber remains along the line. Fires originating from the construction camp and clearing the right-of-way are usually caused by carelessness on the part of workmen and foremen in burning debris, and carelessness or ignorance on the part of freighters and travellers connected with or attracted by the work. Such fires can nearly always be prevented or checked by the maintenance of an efficient patrol along the grade, location line and toll-roads. The law requires a railway building through Dominion lands to pay half of the expenses of such a patrol. The first opportunity to test this arrangement came when the Grand Trunk Pacific was building through the wooded country west of Edmonton. During the two years this work has been progressing, reaching now miles through the timbered country, destructive fires have been wholly prevented, although the right-of-way has been cleared all the way through inflammable timbers and there has been an immense traffic constantly using the trails along the grade and line of location.

The patrol in this construction work is placed in charge of a chief fire ranger who has authority to engage as many rangers as are necessary to patrol the whole line, and who is always on hand to superintend the rangers and see that their work is done in the most effective manner. The cost of thus patrolling 150 miles of the Grand Trunk Pacific in 1909 was $9,595.56, of which one-half was refunded to the company. This system would seem the most satisfactory for preventing fires from railway construction. Unfortunately there is in most cases a lack of legislation requiring the railway companies to share in the expense of fire protection. For instance, while the National Transcontinental is building through the valuable spruce forest of northern Ontario it is not in any way required to contribute to the support of a fire protective patrol, and does not do so. As a rule the cost of preventing fire from railway construction has to be wholly paid by the province. All railway legislation should provide that a part of all the cost of preventing destructive fires from the construction of the road be paid by the company owning the road.

In July, 1910, an arrangement was made between the Transcontinental Railway Commission and the Ontario provincial government by which the former pay one-third of the cost of fire protection along their lines. The other railways refund all expenditure for fire protection along their lines

The following summary gives the approximate loss due to forest fires during 1909:—

District.	Area Burned over. Acres.	Expenses of Fire Protection and Fire Fighting (Govt. and Private).	Value of Timber and Improvements Destroyed.
British Columbia ..	70,000	$40,700.00	$18,400.00
Dominion Lands ..	251,000	62,300.00	45,000.00
Ontario	?	198,821.42	100,000.00
Quebec	....	....	....
New Brunswick	103,000	20,000.00	37,000.00
Nova Scotia	11,000	10,000.00	10,000.00
Total	435,000	331,821.42	210,400.00

Those responsible for the naming of the date of the Life Underwriters' Convention did not figure on the heat wave as an added attraction. The vote is in favor of conventions in the fall.

UNITED STATES STEEL CORPORATION.

Over Sixty-two Million Dollars of Watered Stock, Says Report—Capitalization Alleged to be Far in Excess of Property Values.

The Commissioner of Corporations, Mr. Herbert Knox Smith, has sent to President Taft the first section of an exhaustive report on the Steel Industry of the United States which is both of interest and importance. This report is the outcome of an official investigation ordered by the United States Senate, and when completed will cover every branch of the industry. Part 1, now summarized, deals with the organization, investments, profits, and position in the steel industry of the United States Steel Corporation. Mr. Smith says the Steel Corporation was the culmination and the result of a remarkable period in the steel industry. Until about 1898 the bulk of the business was distributed among a considerable number of concerns. There was sharp competition, modified by frequent pools and price agreements of greater or less duration and effectiveness. In 1898 began an era of consolidation with capitalization ranging from $30,000,000 to $100,000,000, usually mergers of many smaller companies. In most of these, as in the earlier price agreements, the ruling motive was the removal of competition.

They did not finally eliminate competition. On the contrary, a broad movement at once became apparent which threatened competition on a larger scale and probably more severe than any in steel history. This was the process known as "integration." The situation in 1899-1900 was as follows: There were three great companies—the Carnegie Company, the Federal Steel, and the National Steel—dominating the production of crude and semi-finished steel. This may be called the "primary" group. Six other large concerns—the American Steel and Wire, American Tin Plate, American Steel Hoop, American Sheet Steel, National Tube, and American Bridge—severally controlled these lighter finished products. These formed the "secondary" group.

Recognition of Ore's Importance Came Late.

But, large as these concerns were, no one of them was entirely self-sufficient. The "secondary" group was dependent on the "primary" for its crude steel; the "primary" largely dependent on the "secondary" for a market for its products. Few were completely "integrated"; that is, few carried through under one control, with the accompanying advantages, the entire industrial process from the ore to the finished product linking up ore and coal mines, transportation, blast furnaces, steel works, rolling mills and finished manufacture. These great concerns almost simultaneously began the final linking up of the chain of production. Once begun by one concern, others followed in self-defence. The "secondary" companies began to reach back, acquiring ore reserves and crude steel plants. For example in 1900 the Steel and Wire Company, whose supply of materials had previously been purchased mainly from the Carnegie or the Federal Company, planned to make its own steel, likewise the National Tube Company. The "primary" concerns finding their chief customers turning into rivals, retaliated by reaching forward to the manufacture of finished products.

Paramount in importance was the ore. The recognition of that importance came strangely late, but, once recognized, it became an axiom that no large concern could stay in the business unless fortified by its own ore reserves. By 1900 the bulk of the lake ores was in the hands of less than a dozen companies, with a similar concentration in coking coal.

Such were the conditions in the steel industry in 1900. In a few weeks, the United States Steel Corporation was thus organized, and began business on April 1, 1901. Its total capitalization was a little over $1,402,000,000 (including bonds). It is strictly a "holding" company—that is, it does not mine, manufacture, transport, or sell; it simply owns the stock (as a rule all the stock) of its constituent concerns. The concerns acquired were as follows: Carnegie Company, of New York; Federal Steel Company, National Steel Company, American Steel and Wire Company, American Sheet Steel Company, American Tin Plate Company, American Steel Hoop Company, American Bridge Company, National Tube Company, Lake Superior Consolidated Iron Mines. Acquired subsequently: Union Steel Company (1902), Clairton Steel Company (1904), Tennessee Coal, Iron and Railroad Company (1907).

Water in Corporation Stock $62,500,000.

Thus competition between these concerns was eliminated, while enormous profits were made from the flotation of securities, with, also, an unparalleled stock commission to the underwriting syndicate, which netted a clear profit of about $62,500,000 in cash.

At its formation the United States Steel Corporation (referred to herein as the "Corporation") controlled about two-thirds of the country's production of crude steel and from one-half to four-fifths of the principal rolled steel products. It comprised ore, coal, limestone, natural gas, railway and steamship companies, blast furnaces, steel works, rolling mills, finishing plants, and various other properties. It was thus a thoroughly integrated concern, from ore to finished product.

There remained outside the merger a number of great companies of the primary sort, such as Jones & Laughlin, the Pennsylvania, Cambria, Lackawana, Republic and Colorado Fuel and Iron Companies and numerous concerns of the secondary type. While overshadowed by the Steel Corporation, these included strong, efficient, and growing businesses, furnishing a basis for vigorous competition.

The Steel Corporation is the greatest individual concern in the United States and was organized with about 510 millions of preferred stock; 508 millions of common stock; 303 millions of Corporation bonds, and about 81 millions of underlying and miscellaneous obligations; a total of over 1,402 million dollars.

The Bureau finds, on the contrary, that in 1901 the fair market value of its tangible property was about 700 million dollars, slightly less than one-half its capitalization. The other half, the excess of about 700 million dollars, is thus separated and stands out, embodying the essential public questions raised by the Bureau's analysis of its investment. In so far as that excess represented value in 1901, it was value due either to increased earning power from elimination of competition; concentrated ownership of the basic natural resources, iron ore and coal; or, in some degree, integration efficiency.

When such values are capitalized into dividend or interest bearing securities, they involve important public problems. They are merely another name for price policy, and the whole public is ultimately concerned in steel prices.

Average Profit on Investment 12 Per Cent.

Since its formation, the Corporation, from surplus earnings (allowing for depreciation and changes in securities), has made good much of the original excess of its capitalization over tangible property. That excess in 1901 was about 700 million dollars, or 100 per cent., and in 1910 only about 280 million dollars, or 24 per cent. The total tangible value in 1910 was 1,187 million dollars. As in 1901, there is omitted here all the merger values heretofore referred to, and all appreciation of natural resources above the actual cost thereof to the Corporation.

The rate of profit has been calculated not on the Corporation's capital stock, but on the total investment as computed by the Bureau. Operating administrative and general expenses, as well as taxes, have been deducted from earnings; also true depreciation, a matter of some intricacy. The Corporation's allowance for depreciation, including mineral exhaustion and obsolescence, has exceeded a necessary allowance. The Bureau has carefully determined from the records of the Corporation the proper depreciation, and has restored the excess to profits. The average rate of profit on actual investment from April, 1901, to December 31, 1910, was 12 per cent. It was highest in 1902, 15.9 per cent., and lowest in 1904, 7.6 per cent. The yearly rates do not indicate any pronounced tendency, but have on the whole slightly decreased.

Position of Corporation in Steel Industry.

In pig iron production, the Corporation has just about maintained its original position; in 1901 43.2 per cent., in 1910, 43.4 per cent. But in steel, both crude and finished, it has lost ground; in 1901, 66 per cent. of the steel ingots and castings; in 1910, only 54 per cent., notwithstanding great additions to its capacity. Rolled steel products generally show an almost steady loss, especially structural shapes and tin plate. Even in rails there has been no gain.

Its position in ore reserves is much stronger than in any other factor in the business. It is almost impossible, and would be unwise, to attempt any quantitative statement of its proportion of the total ore of the country; but of the Lake ores, on which the present steel industry is based, it has about 75 per cent., and this advantage is materially enhanced by its extensive control of the rail transportation of the ore from the mines to the Lakes. The industry itself rests physically on the ore; the Corporation based one-half its capitalization on the ore; its profits on ore, as will later be shown, are large; and in the ore is its highest degree of concentration and control. The ore, therefore, is of primary significance in the Corporation's dominance, and in that resource chiefly are involved the industry's problems of ultimate public interest.

◆

Mrs. D. Gamelin was badly burned when her clothing caught fire on the street. She was returning from church, when a carelessly thrown match caught in her skirts and flames broke out.

The Ontario Provincial Treasurer received a cheque recently for $118,190 in succession dues upon the estate of Master George MacLean, the infant son of Mrs. Martha MacLean, daughter of the late Senator Fulford. The late Senator willed one-third of his estate to his daughter's child. This amounted to $2,204,000. The mother died shortly after the child's birth, and the baby died two hours later. The father, Mr. George MacLean, of Brockville, becomes heir to the child's fortune.

As a medium for safe investment and for provision for old age, government annuities are steadily growing in favor. There are now over 2,100 annuitants from all parts of the Dominion investing their savings with the government, and the total amount received from the annuitants is now nearly

NEW BRUNSWICK.

Proposed Steamship Company for St. John—Maritime Provinces Ship Fish to British Columbia.

St. John, New Brunswick, July 12.

(Staff Correspondence.)

The outlook for crops in New Brunswick is excellent. The first new potatoes came on the St. John market earlier than usual, and the market is now well supplied with garden produce. The crop of berries will be large—much larger than that of last year.

Rains in June were of great benefit to the lumberman, bringing out many logs which it was feared would be hung up on the streams. Some small drives will not come out, but the mills generally are well supplied and are all busy. The markets for lumber are rather quiet, but shipments are steadily going forward to American and trans-Atlantic ports. The lobster fishery has been a partial failure this season, and it is urged that a close season for a year or two should be established, to enable the crustaceans to increase. The catch of fish generally has been rather light and prices for cured fish continue high.

Some Important Business Transactions.

Two important deals in the wholesale grocery and provision trade of St. John have lately taken place. Messrs. Baird and Peters, of St. John, have bought out the wholesale firm of Messrs. G. H. Harris & Company, of Moncton. Messrs. Baird and Peters now have branches in Moncton, Fredericton, Newcastle and Campbellton. The other deal is the absorption of the tea blending and packing firm of Messrs. Dickason and Armstrong by Messrs. Geo. E. Barbour Company, Limited, wholesale grocers, Mr. Dickason going with that company.

A conference has been held between the civic and provincial authorities to consider what inducements should be offered to secure, if possible, the location at St. John of the plant for the construction of Canada's naval vessels. There is a fine site beside that of the dry dock for which the Federal Government is now asking tenders. Another conference will be held and a strong effort will be made to secure the shipbuilding plant.

The St. John Board of Trade has asked the Trade and Commerce Department to continue the present West India service, and not to adopt the plan which would give St. John only half as many sailings as Halifax. St. John is nearer the west, and should have at least an equal service with Halifax. A delegation will go to Ottawa.

Proposed Steamship Company for St. John.

Dr. E. S. Kirkpatrick lately visited St. John as well as Montreal and Ottawa in the interests of a proposed steamship company, with capital from $1,500,000 to $2,000,000, to operate a service between St. John, Cuba and Jamaica, with two first-class steamships. Dr. Kirkpatrick was lately Canadian Trade Commissioner in Cuba. The Havana Post says the company already has capital enough assured to establish the service. The company seeks power to conduct the service, establish canning factories for fruit, promote tourist travel, operate asphalt mines and do other things to develop trade between Canada, Cuba and Jamaica.

Mr. A. H. Brittain, of Montreal, manager for the Maritime Fish Corporation, says they are shipping fish to Vancouver, and expect soon to sell in Prince Rupert. He says there is a good market in the west for fish from the Atlantic, and he anticipates development in the fishing industry of these provinces.

The Swedish Canadian Lumber Company, which has bought out Mr. R. O'Leary, the Messrs. Kent Electric Company, Messrs. O'Neill and Vaughan, McLeod, Atkinson and Curran Brothers, is now the largest lumber concern that ever operated in Kent County. It has fifty square miles of timber limits, besides private lands, mills, wharves, etc. The Albert Manufacturing Company will build at Hillsboro a new plaster mill, to cost $100,000 to replace the one that was destroyed by fire. Tenders are now being asked for.

The Maritime Oilfield Company has sunk well No. 22 in the Albert areas near Moncton, and struck a gas flow of 2,000,000 feet per day. The Moncton Tramways Electricity and Gas Company has ordered a main laid to Moncton, to deliver 10,000,000 feet of gas per day, and already has two miles of distributing mains laid in the town. A notable industrial development is looked for as a result of the opening of these gas and oil wells.—W.E.A.

◆

The Canadian Pacific and New York, New Haven and Hartford Railways secured control of the Quebec Central Railway, which will still be operated as a separate road.

The Canadian Pacific Railway, and the New York, New Haven and Hartford Railway, will assume control of the Quebec Central Railway. The identity of the Quebec Central will not be affected. The railway is one of the best paying railway propositions in Canada. It has a large tourist business from the States to Quebec.

FIXING THE BOUNDARIES.

Preliminary to Organization of Rocky Mountain Reserve —Damage of Fires.

The forests of the eastern slope of the Rocky Mountains, set aside a few months ago by the Dominion Government as the Rocky Mountain Forest Reserve, have a tremendous influence on the life of the provinces of Alberta and Saskatchewan. Not only are they valuable for the timber they supply, but their preservation and proper management means much in the way of regulating the flow of the streams which issue from them. For use in irrigation and the generation of power it is desirable to have a steady flow of water—not a torrent in spring, which becomes a dried-up stream-bed in summer. In thus equalizing the flow of water the value of forests at the headwaters of streams is universally acknowledged. Of great importance to the agriculture of the prairies, too, is the regulation of the flow of the rivers so as to maintain the level of the moisture in the soil.

The first work undertaken in connection with the reserve was the locating of the boundaries. Two parties of the Dominion Forest Service were engaged all last summer (1910) in marking out the boundaries of the reserve. One of these, under Mr. G. H. Edgecombe, B.Sc., B.Sc.F., worked south from Calgary to the international boundary; the other, under Mr. P. Z. Caverhill, B.Sc., started at Calgary and worked northward to a point almost due west of Lacombe. It is expected that during the coming summer the rest of the eastern boundary of the reserve will be located as far as its northern boundary (some fifty miles north of the latitude of Edmonton). A full report of the work done during the summer of 1910 has just been published.

Land Included in the Reserve.

The boundary as fixed by Order in Council was found to a large extent unsuitable, and the recommended boundary is in almost all cases to the east of it. The main principle followed in fixing the eastern limit was to exclude from the reserve all land suited for farming. The altitude, or height above the sea-level, was another important consideration in fixing the line. Many valleys are included in the reserve which are quite suitable for grazing.

What Fires Have Done.

Immense damage has been done to the reserve by forest fires. Probably seventy-five per cent. of the area has been burned over. In the north, Mr. Caverhill estimates, eighty per cent. of the country has been burned within the last fifty years—sixty per cent. of this area within the past twenty-five years.

The abundance of lodgepole pine (a near relative of the eastern jack, or Banksian pine) and poplar on many tracts in the reserve is a sign of fire having passed over them. These trees are the first to spring up on burned-over land, and by their rapid growth they distance other trees and form the first forest. In the northern part of the region about seventy-five per cent. of the country is covered with a forest of lodgepole pine, unmixed with any other species.

Of an area of eight hundred square miles covered by the "southern" party the distribution of the land was as follows: Timber, 9 per cent.; spruce and pine "poles" (a tree of "pole" size is one from four to eight inches in diameter), 31 per cent.; pine and poplar, 26 per cent.; poplar, 10 per cent.; open grazing land, 14 per cent.; bare rock, 10 per cent.

Game and Mineral Resources.

Game was plentiful in all the region traversed. Bull, cutthroat and grey trout abound in the rivers, and, in their respective districts, duck, grouse and prairie chickens, moose, elk, sheep and many kinds of fur-bearing animals are found.

Among the mineral resources of the country are the coal beds, oil fields (in the south) and quarries of building stone.

◆

Messrs. Swift & Company, Chicago, have purchased the plant of Messrs. D. B. Martin & Company, at the Union Stock Yards, West Toronto. Messrs. Martin do not propose to withdraw from the business, but will continue in the market.

Mr. F. G. Jemmett, general manager of the Sovereign Bank, reports that a much larger proportion than was expected of the shareholders of the bank are subscribing for stock in the new holding company, International Assets. Subscriptions are not yet all in. International Assets is capitalized at $3,000,000, divided into $25 shares, which Sovereign Bank shareholders may buy at par.

A branch clearing house of the Canadian Credit Men's Association of Winnipeg, will be located in Toronto. The objects of the association include a full system of reports on the standing of retail merchants with whom the members do business, the obtaining of desirable legislation and many other benefits to be derived from active co-operation between the wholesale houses. The organization will probably be extended to Quebec.

WESTERN CANADA.

Crop Conditions Are Good—Winnipeg Stock Exchange—Wheat Growers Have Good Year—In the Wheat Markets.

Monetary Times Office,
Winnipeg, July 11th.

Men who are in touch with the crop situation are confident that 200,000,000 bushels of wheat will be harvested, and some estimates place the crop higher than this figure. Railroad and immigration officers are already calculating on how to bring out 40,000 harvest hands. 200,000,000 bushels is twice as much wheat as the West has ever had in one harvest, and the acreage of oats, barley and flax has been greatly increased. The problem of how to handle the crop of 1911 is becoming an interesting matter.

The Canadian Industrial Exhibition at Winnipeg opened July 13th, and will be in session for ten days. Big plans have been worked out, and the Winnipeg Exhibition will keep up its splendid record for enterprise and completeness.

The announcement of the retirement of Lord Strathcona from the office of High Commissioner of Canada, interests Winnipeg very closely. This city has always looked upon Lord Strathcona as a native son, and the High Commissioner was given a royal welcome when he visited the West two years ago. In event of Sir William Whyte being appointed to the place it seems likely Winnipeg will have much the same interest, since Sir William has been one of the city's leading citizens for many years.

Farmers in Manitoba are short of help. Mr. Joseph Burke, Provincial Superintendent of Immigration, says that 5,000 farm hands can now be placed in the province at good wages.

For a month during and after the Exhibition Winnipeg will be the centre of an industry which presents a capital of at least $100,000,000. The farm traction engine contest is now the biggest event of its kind in the world, and no other contest on the American continent of this kind draws such a congregation of men in the machinery world. Mechanical power is adding yearly tens of millions of bushels to Canada's output of wheat. Fifty aggressive firms are fighting for this business. In Saskatchewan many thousands of fertile acres are again being broken up this year by means of steam and gasoline power.

Winnipeg Stock Exchange.

A greater variety and volume of transactions have taken place in the local exchange than is usual. The feature of the trading was the advance of Northern Trust shares to 160. Great-West Permanent held firm around 120, and other issues changed hands at prices which have been quoted for some time past.

The second annual meeting of the Winnipeg Exchange which was held recently shows a marked improvement over the preceding year, not only in the financial condition of the exchange, but as regards the volume of business transacted during the year. The total number of shares of listed stocks traded in is 2,892½, or slightly over 62 per cent. of the total trades on the exchange, with a market value of $319,295, or equal to about 70 per cent. of the market value of all stocks handled, exclusive of mining stocks, and South African scrip. This makes the satisfactory increase in the market value of the listed stocks dealt in over that of the year 1909, of $142,761. The average high is 154.85; the average low is 142.12. In the unlisted stocks the number of trades is 1,772, with a market value of $135,532, or $63,598 less than the previous year. The number of mining shares traded in is 33,978, the market value of which is $9,228.

South African warrants were handled throughout the year, when 527 were traded. The cash value amounted to $382,441.50, which added to the foregoing figures, brings the market value of the transactions for the year up to $846,448, or an increase of $181,730 over 1909. The increase is particularly pleasing since it is shown to be principally in the listed stocks.

The following companies made application and had stocks and bonds listed:—Manitoba & Saskatchewan Coal Company, Northern Mortgage Company of Canada, Commercial Loan and Trust Company.

On the 1st of February last the committee of management of the Toronto Stock Exchange passed a by-law reducing the commission charged members of certain exchanges from ¼ to ⅛ of 1 per cent.; as the Winnipeg Stock Exchange is included among the number, this action should be of considerable benefit to the members doing business with Toronto.

Starland, a limited company, operating a number of moving picture theatres in Winnipeg and Western Canada, has declared a dividend at the rate of 5 per cent. The moving picture business in the West is growing, and is undoubtedly a money-maker for those engaged in it, as it is on account of increased earnings that the above dividend is declared.

The shareholders of the Northern Canadian Mortgage Company who advertised an issue of stock in The Monetary Times some time ago, will also receive dividend cheques shortly, in accordance with the prospectus issued when its stock was put on the market. The rate will be 8 per cent. per annum from the time the money was paid in. The actual earnings on the average capital employed are approximately 16 per cent., which shows the splendid progress made by the Company.

In the Wheat Markets.

The action of the market continues strong, and the situation seems to be gaining strength, values being, if anything, higher than a week ago. The markets continue to be controlled by weather news and its effect upon the growing crops. The promising outlook in Canada is somewhat discounted by the condition of the crop in South Dakota and by the apprehension felt regarding the progress of the plant in the southern part of North Dakota, reports from many points claiming material damage, following the high temperature of last week. The fact that North Dakota met with a partial calamity last year, and that South Dakota is already hard hit, makes the trade extremely nervous and quick to act on bad reports. Until the spring wheat crop has passed the danger line, the market will prove more sensitive to bullish than to bearish influences.

Our local market shows continued activity, following generally the trend of the American markets. During the week there was a good demand for all grades of cash wheat from No. 2 Northern downwards, and a brisk inquiry for the lower grades for export. The movement of wheat from the country has exceeded expectation, the inspections for the month of June amounting to 5,071 cars compared with 3,091 cars in June, 1910. As a result of the hot spell in certain regions of the United States, the trade looks for heavy loss in coarse grains, potatoes and vegetables, which will have an enhancing effect on values later on. Meantime, weather, and the action of coarse cereals will continue the dominating influence.

Grain Growers Have Good Year.

In a very short time the directors of the Grain Growers' Grain Company, of Winnipeg, will issue their statement to shareholders. It is understood that it will be quite satisfactory to them and will show a substantial profit. Some of the directors were so sanguine as to results as to express the opinion that the actual profits would be equal to those of a year ago. To the farmer shareholders this will be gratifying, especially in view of the fact that the company is yet young, and has to overcome some prejudice and antagonism which such growth as it has displayed must necessarily excite. Though only some four years old, it has developed a capital of over half a million, and a surplus equal to more than 10 per cent. of that amount. The next statement will probably show a still larger surplus.

No less than 18,000,000 bushels of grain, it is understood, have been handled by this company, and approximately 10,000,000 have been exported. On such a turnover a substantial profit ought to result, and it is safe to prophesy that the statement for the year ending July last will show it.

The estimates of the provincial department of agriculture, Regina, Sask., show a marked increase in acreage under wheat and oats this year. The wheat acreage in this province is 5,598,235, an increase of 20 per cent. over that of 1910. Land values have gone up fully 25 per cent. The average price of improved lands runs from $20 to $25 per acre, and for unimproved lands from $15.60 to $23 per acre.

At North Portal recently, over two thousand head of cattle were shipped in from Texas. They are all two-year old steers, and will be placed upon ranches at Waldeck, Saskatchewan. Later they will be shipped back to the Chicago market as beef cattle. This is a great tribute to the nutritious value of the native grasses of Saskatchewan.

The International Harvester Company of America reports that during the last two years the company has done more business in agriculture machinery at Saskatoon than at any other point on the American continent.

A survey party is now in the field making the final revision of the route of the Canadian Northern Railway between the Yellowhead Pass and the North Thompson River, a distance of some 83 miles.

The Canadian Northern Railway are not confining their constructive activities to the central parts of Saskatchewan and Alberta, where they at present control more mileage than other lines. Their activities are extending into Southern Alberta. The officials of the company were in McLeod this week and purchased a right-of-way through that town. The line from the main boundary to Lethbridge is now graded to Willowbunch, 80 miles west of the Canadian Pacific Portal-Moose Jaw Line.

VANCOUVER'S FIRE LOSS FOR JUNE.

During June the fire department responded to 47 alarms divided as follows:—Chimney fires, 5; false alarms, 4; smoke scares, 2; fires where damage resulted, 19; stump fires, rubbish piles, tar pots, etc., 13; small fires in buildings where no damage occurred, 4. On June 1st, the department answered a call from South Vancouver where two empty cottages were destroyed near Main street and 29th avenue. These fires were of incendiary origin. The total loss for the month was $87,199, while the value of property involved was $407,525. The insurance loss was $32,754, leaving the loss above insurance paid $54,445. 1,719 gallons of chemical were used and 29,350 feet of hose laid in putting out the fires. The most serious fire during the month occurred at the Central garage, 1233 Georgia street on June 18th. Some thirty-six automobiles were stored in the building, only eight of which escaped injury. The building was a one-storey and basement frame structure, and the fire had a good hold on arrival of the fire apparatus, as the person who gave the alarm came a distance of seven blocks, passing several fire alarm boxes on his way to the fire station. A complete list of fires where damage resulted, follows:—

1st.—Fire in two-storey frame dwelling under construction at 24th avenue and Sophia street, owned by Mr. W. Cohen; roof and upper part of building destroyed; incendiary origin; damage $1,500, covered by insurance. Gasoline launch at the foot of Birch street, caused by a gasoline explosion; launch owned by Mr. J. H. Hatch; damage $25. 4th.—Fire on roof of two-storey frame building at 440 Main street, caused by flying sparks; building owned by Mr. Tulk and occupied by the Western studio and stores; blaze confined to roof; damage, $25, covered by insurance. 5th.—Small fire at 2425 Seventh avenue W., owned by Miss Errington and occupied by Mr. J. Whalen; window curtain and blind destroyed and window frame slightly damaged; damage, $10. 6th.—Fire in roof and attic of 887 Harris street, owned by Mr. Wing Chung Yeun and occupied by Mr. N. Robson; caused by spark from chimney; damage, $475, covered by insurance. Fire in two-storey frame building in the 300 block, Dufferin street, owned by Mr. Miller and occupied by Mr. Gillott, and used as a sash and door factory. The blaze started in the east side of the factory from some cause unknown and burned the roof off, both building and contents suffering considerable damage before the fire was brought under control; damage about $5,000, covered by insurance. 8th.—Fire in storeroom under the stairway at 2104 Thirteenth avenue W., owned and occupied by Mr. W. H. Crosfield; cause unknown; damage, $200, covered by insurance. 9th.—Fire in pantry at 1780 First avenue East, caused by a defective gas stove; building owned by Mr. A. McDonald and occupied by Mrs. Smith; damage, $150, partly covered by insurance. Fire at the Belgium Dye Works in rear of 1837 Tenth avenue east, owned by Mrs. Armaund Boudoux; caused by a gasoline explosion; building destroyed; damage, $875. 11th.—Small fire in upstair room at 2233 Quebec street, occupied by Mrs. Lowe; cause unknown; damage, $5. 15th.—Fire in wharf and conveyer at Heaps' mill, Powell street, caused by sparks from burner; damage, $2,000. 16th.—Fire in elevator motor at 135 Water street, caused by defective wiring; building owned by Mr. E. Gold and occupied by Messrs. Campbell & Muir, fruit warehouse; damage, $15. 17th.—Fire in shed in rear of 1431 Robson street, occupied by Mr. Granville; building destroyed; damage, $100. 18th.—Fire at 1233 and 1235 Georgia street, owned by Mr. Bowers and occupied by the Central Garage and Tudhope Alexandra Company; the fire had a good start on arrival of the fire apparatus and both building and contents were almost a total loss; the building was a one-storey frame structure and about thirty-six automobiles were stored there; cause of fire unknown. 1221 Georgia street, owned by Mr. A. N. Tregent and occupied by Mrs. Arnott, was also slightly damaged; Messrs. D. Sutherland and J. E. Robinson, automobile cleaners, were burned about the face and hands trying to extinguish the fire, and were taken to the hospital for treatment.; damage about $80,000, partly covered by insurance. Small fire on roof in old building in rear of 528 Seymour street, occupied by Mr. C. A. Beagle; caused by flying sparks; damage, $5. 20th.—Small fire at the British Columbia Renovatory, 851 Granville street, cause unknown; building owned by Messrs. William & Crisp, and occupied by Messrs. Granville Brothers; damage, $35, partly covered by insurance. 21st.—Fire in box factory at 324 Prior street, owned by Mr. R. W. Sharp and occupied by the Pacific Box Company; caused by a tar pot boiling over; damage, $5. Fire on roof of kitchen at 862 Howe street, caused by a defective chimney; building occupied by Mr. Thomas; damage, $30, covered by insurance. 28th.—Fire at 439 Granville street, owned by Mr. J. Rogers and occupied by Messrs. McIntyre & Ross and used as a cafe; the blaze started in the vent over the range, damage resulting to both building and contents before it was extinguished; damage $600, covered by insurance.

SOVEREIGN BANK SHAREHOLDERS' MEETING.

The purchase of the equity of redemption in the assets of the Sovereign Bank by the newly-organized holding company, "International Assets, Limited," was confirmed at the annual meeting of the shareholders of the defunct bank, held this week. Nearly fifty shareholders were present. In the report of the directors it was explained that the new company had agreed to purchase the claims of the banks which had assisted the Sovereign Bank at the time of its failure, giving for the claims something over half in cash and the balance in bonds. For the equity of redemption in the Sovereign Bank's assets the new company will give $1,000,000 in its own common stock. The company will become practically the only creditor of the bank. Shareholders of the bank had been given the opportunity of subscribing stock of the new company to the extent of $3,000,000, the capital of the bank, in $25 shares. Mr. F. G. Jemmett, general manager, reported that upwards of $2,100,000 had been subscribed.

The statement presented showed that the total liabilities, including the paid-up capital, amounted to $7,188,461. The assets were $5,637,497, showing a deficit of $1,550,964.

The following comparison of chief items with totals, shows the changes effected during the year:

Liabilities.

	May, 1910.	May, 1911.
Notes in circulation	$ 50,455	$ 83,190
Deposits, demand	75,368	11,044
Deposits, time	180,072	75,818
Loans from banks	4,108,074	3,919,802
Other liabilities	129,800	143,605
Total liabilities	$4,543,851	$4,188,461

Assets.

	May, 1910.	May, 1911.
Specie	$ 23	$ 12
Dominion notes	1,030	60
Balance from other banks	51,828	28,910
Railway and other bonds, debentures, stocks	621,180	601,821
Call loans	82,371	64,819
Current loans	1,150,783	615,946
Overdue debts	3,866,518	2,937,422
Real estate	92,416	56,422
Total assets	$8,230,000	$5,637,497

The Alaskan Central Railway, which with the Chicago, Milwaukee & St. Paul Railway, form the chief assets of the bank, representing $3,000,000 of investments, will be retained. The Alaskan road now runs about 75 miles and is within 115 miles of rich coal deposits. The latter have been withdrawn from development by the United States Government pending new legislation. The bank will await the opening up of the coal fields by the government to small operators, at which time an advantageous sale of the road, it is believed, could be brought about.

The old board of directors was re-elected.

PORCUPINE MINING DISTRICT.

An interesting volume comprising a series of illustrated articles on the Porcupine mining district has been published by the Canadian Mining Journal, Toronto. Much information on the geology of the area and the veins, the topography and general character of the surface, and also of the routes by which access is gained is given and should prove invaluable to the general reader as well as to the mining expert.

The introduction to the book says in part:—"Considering the large number of bona fide investments that have been made in Porcupine, it behoves mining men to do what in them lies to disseminate right information and to discountenance the wild tales that emanate from all irresponsible sources. In whatever way Porcupine may develop, it now seems that in a few mines money will actually be made. But many more may prove profitable if initial sales and promotions are handled decently. In other words, sane exploitation will give the camp a maximum chance; frenzied speculation will shorten the life of individual mines and will injure the camp permanently."

"Porcupine Mining District." Published by the Canadian Mining Journal, Rooms 17-23, Manning Arcade Annex, Toronto, 1911.

The Inland Coal & Coke Company, capitalized at $1,500,000, has been organized at Vancouver, to develop coal measures in the Nicola Valley.

TRADE OF THE UNITED KINGDOM.

Statistics for the Past Five Years—Total Imports and Exports to Foreign Countries and British Possessions.

The annual statement of the trade of the United Kingdom with foreign countries and British possessions in 1910 compared with the four preceding years is being issued in three volumes. Volume I gives abstract tables showing the total value of the import and export trade of the United Kingdom.

The values of the trade imports of merchandise from foreign countries and British possessions (including Protectorates) were:—1906, consigned from foreign countries, £467,974,167; consigned from British possessions (including Protectorates), £139,914,333, total, £607,885,500; 1907, £491,102,400, £154,705,542, £645,807,942; 1908, £464,817,692, £128,135,795, £592,953,487; 1909, £479,453,018, £145,251,939, £624,704,957; 1910, £507,806,758, £170,450,266, £678,257,024.

The value of the total exports of produce and manufactures of the United Kingdom to foreign countries and British possessions (including Protectorates) in the five years were as follows:—1906, consigned to foreign countries, £253,565,853, consigned to British possessions (including Protectorates), £122,009,485, total, £375,575,338; 1907, £287,891,317, £138,143,766, £426,035,083; 1908, £250,338,797, £126,765,027, £377,103,824; 1909, £250,942,263, £127,238,084, £378,180,347; 1910, £283,081,830, £147,302,942, £430,384,772.

Total Exports of Foreign and Colonial Merchandise.

The values of the total exports of foreign and colonial merchandise to foreign countries and British possessions (including Protectorates) in the five years were:—1906, consignments to foreign countries, £75,723,703, consignments to British possessions, £9,378,777, total, £85,102,480; 1907, £81,758,702, £10,183,382, £91,942,084; 1908, £69,639,634, £9,984,063, £79,623,697; 1909, £80,711,271, £10,633,548, £91,344,819; 1910, £91,661,154, £12,099,891, £103,761,045.

The total values of all exports, therefore, were:—1906, £460,677,818; 1907, £517,977,167; 1908, £456,727,521; 1909, £469,525,166; 1910, £534,145,817.

The value of the total imports and exports of merchandise from and to foreign countries and British possessions was:—1906, £1,068,566,318; 1907, £1,163,785,109; 1908, £1,049,681,008; 1909, £1,094,230,123; 1910, £1,212,402,841.

Total Imports From Foreign Countries and British Possessions.

The total imports from foreign countries and British possessions, the figures of which are given above, were made up as follows:—Food, drink and tobacco, 1906, £238,158,156; 1907, £247,290,596; 1908, £244,134,089; 1909, £254,319,383; 1910, £257,681,588; raw materials and articles mainly unmanufactured, 1906, £211,102,714; 1907, £241,248,871; 1908, £203,455,017; 1909, £220,145,496; 1910, £261,175,628; articles wholly or mainly unmanufactured, 1906, £158,185,004; 1907, £154,904,292; 1908, £143,085,597; 1909, £147,671,094; 1910, £156,845,461; miscellaneous and unclassified, 1906, £2,442,626; 1907, £2,364,183; 1908, £2,278,784; 1909, £2,568,984; 1910, £2,554,347.

The exports of produce and manufactures of the United Kingdom to foreign countries and British possessions (including Protectorates) were made up as follows:—Food, drink and tobacco, 1906, £20,563,882; 1907, £22,356,578; 1908, £21,707,770; 1909, £23,335,891; 1910, £26,070,738; raw materials and articles mainly unmanufactured, 1906, £43,837,844; 1907, £55,588,843; 1908, £52,755,940; 1909, £51,156,007; 1910, £53,328,282; articles wholly or mainly manufactured, 1906, £304,957,732; 1907, £341,439,511; 1908, £296,581,975; 1909, £296,758,468; 1910, £342,869,197; miscellaneous and unclassified, 1906, £6,215,880; 1907, £6,650,151; 1908, £6,058,139; 1909, £6,929,981; 1910, £8,116,655.

◆

A fire which destroyed the home of a Jewish bridal couple, just after the wedding party had left the house when the ceremony was over, was the subject of an investigation by Mr. Commissioner Latulippe, of Montreal, recently. The fire had broken out at the house of Mr. Isaac Cohen, machinist, at 4 Mount Charles Place, a small street off St. Dominique street, near St. Lawrence Market, and had consumed most of the place with contents consisting of furniture and clothes.

The Southern New England Railway Company, which will build the branch of the Grand Trunk Railroad from Palmer, Mass., to Providence, R.I., has been formally organized. First Vice-President Mr. F. H. Fitzhugh, of the Grand Trunk, was elected president of the new company, a board of directors was chosen and the amended charter granted by the legislature accepted. Plans are practically complete for the layout of the new railroad, and the route in this State will be filed with the Railroad Commissioners before July 1st. The board of directors as elected is as follows:—Messrs. Clarence M. Hays, of the Grand Trunk, Montreal, chairman; F. H. Fitzhugh and H. G. Kelly, also of the Grand Trunk; G. C. Jones and C. W. Witters, of the Central Vermont Railroad, St. Albans, Vit.; F. H. Baker, of Boston and John S. Murdock of this city.

TRADE PROTECTION.

Ontario Grocers' Guild Discuss Keeping Trade in Proper Channels—Criticism of Manufacturer Who Sells Direct to the Retailer.

For the purpose of devising means for overcoming certain practices in the business, which are admitted to exist, and to discuss a general policy of conduct along fair lines was the topic of the chief discussion at the recent convention of the Ontario Wholesale Grocers Guild at Toronto.

Mr. Frederick T. Smye, of Hamilton, the president of the Guild, said that they should work with the Retail Merchants' Association, as it is important that retailer and jobber should fight the dangers that assail the trade, and to ask their assistance towards keeping trade in the recognized channels, which are from manufacturer to the jobber, to the retailer, and to the consumer. There were frequent complaints from the retailer that some jobbers are trespassing on their right by selling directly to the consumers. The retailer must be protected or the whole structure will be destroyed and they will drift into the troubles experienced in Great Britain and the United States, of chains of stores, buying exchanges, etc.

Price cutting and unbusinesslike methods that creep in are in restraint of trade and should be vigorously dealt with by all. In the verdict of the United States Supreme Court it was decided that business organizations that create a degree of monopoly in pursuit of ordinary business methods are not guilty of an offence.

Honest Self-Protection.

Mr. Hugh Blain, of Eby-Blain, Ltd., Toronto, delivered an address on the Supreme Court decision which he said should put things more or less in a false light in the eyes of some, in that the court declared to be illegal the enforcement of a contract on the retailers by the plaintiff company, a patent medicine concern. This contract, he said, differed radically from those used by the Canadian trade for the maintenance of fixed prices. It took no cognizance of the wholesaler, made the retailer nothing better than an agent, and displayed more of legal ingenuity than of honesty in its composition. The court's decision amounted to endorsation of the Canadian method, wherein "the manufacturer holds out the olive branch and is willing to sell to all, but only recompenses those who comply with his conditions." He gives the wholesaler a rebate, and the latter agrees to give a declaration that he is obeying the terms in the matter of prices. If he refuses to sign it, or if it is learned that he is allowing his retail customers to cut rates, he forfeits his right to the rebate, and may be deprived of a future supply of the goods. Canadians have never claimed the right to fix prices on any other basis than this, and have never tried to regulate them so as to produce other than a moderate profit. Notwithstanding a special act, to prevent rebating by giving a secret commission, was recently passed, the practice still prevails, and it is the very worst form of commercial corruption in the business life of to-day.

Must Protect Themselves.

The administration of justice is lamentably ineffective, and there must be a painful lack of appreciation by the officials of the duties and responsibilities of the department. If the law were properly administered it would be sufficient protection for them, but in default of this, by calling for a declaration from their customers, they have conceived a plan whereby they are able to protect themselves. A section of the Supreme Court's decision, authorizing the obliteration of the serial numbers and other marks of identification on packages, Mr. Bain characterized as a "travesty of justice." He believed it of the utmost importance that each article of goods should retain its individuality throughout its course, as in no other way would it be possible to trace any defect or fraud which might exist. After some discussion, the address was unanimously adopted as an expression of the view of the Guild in these matters.

◆

A three-days session at Buffalo has been arranged by the National Association of Local Fire Agents. On the first day reports of committees and the president's address will be heard; on the second day a special report of the committee on Agency Qualification, Lyman M. Drake, of Chicago, chairman, will be heard, to be followed by an address by the chairman of the New York investigating committee on "The Purpose Underlying Fire Insurance Legislation." Insurance Superintendent Hotchkiss will speak on "State Laws and the Insurance Salesman." At this session the subject of "Underwriters' Annexes" will be discussed, the discussion being opened by Clarence S. Pellet, of Chicago. An open debate will follow on "The Agent's Part in Fire Prevention and Establishing of Fire Marshals." The delegates will on the third day be shown what the splendid passenger steamers of Lake Erie are like, and will also visit Niagara Falls.

BRITISH COLUMBIA.

East Kootenay Lumber Mills Merger—Labor Troubles Still Unsettled—American Lumbermen Jubilant.

(Staff Correspondence.)

Vancouver, July 11.

Mr. J. S. Dennis, it is stated, is at the financial end of the East Kootenay lumber mills merger, mention of which was made a few weeks ago. Mr. Dennis is assistant to the second vice-president of the Canadian Pacific Railway, and resident at Calgary. He knows the West well, and during the past few years has given much attention to the development of the resources of eastern British Columbia. This lumber merger is not the only enterprise in which he is interested. For some years there has been a prospect of development of the power at Bull River Falls, not far from Cranbrook, and he has promised the money, $250,000, necessary to carry that through. Only a short time ago announcement was made of a strong and influential company to develop land resources in the Columbia River Valley at Windermere, and Mr. Dennis was prominent in that.

The Norton Griffiths Company, Limited, is extending its interests in this part of Canada. This is the name of the original company, but with the securing of several large building contracts the Norton Griffiths Steel Construction Company, Limited, was organized. It is proposed to invest $100,000 in a clay proposition at Clayburn, near Mission Junction. There has been a pressed brick works at this place for some years, and the clay is of the finest for facing brick, for which there is a big demand in this city. The property belongs to the Maclure family and they will still retain a large interest.

The Norton Griffiths Company may also become interested in a railway to the Peace River country, and incidentally to its holdings in the Naas River country. An agitation has been started here for the construction of a line to the Peace River, so that the coast cities may secure some of the trade that will arise there.

Labor Troubles Still Unsettled.

A visitor from the Kootenay, familiar with conditions there, tells The Monetary Times that it will be some time before the trouble is settled between the miners and the coal operators. He states that the Conciliation Board cannot handle the matter, and that it will ultimately have to come before the Railway Commission for decision. The evidence was that both the Canadian Pacific and Great Northern Railway Companies held controlling interests in coal mines in the Crow's Nest Pass, and these were operated at a loss, the profit being made up in freight. By this means it was possible to show low figures to keep down wages. For this reason an adjustment will have to be made by the Railway Commission.

There is little question of the seriousness of the situation, and the Nelson Board of Trade at a special meeting passed a resolution asking that the mines be operated pending settlement of the dispute, the wages of the workers to be guaranteed by the Government. The preamble of this resolution sets forth at length conditions as they now exist. Coke for the smelters is being imported from the east, and if a reduction of $1 a ton can be secured in the freight rate it will be a competitor with the Crow's Nest coke. The eastern coke is $9.20 a ton laid down, against $6 to $6.50 for western coke, but the eastern is much more desirable because it materially reduces the percentage of losses in slag.

American Lumbermen Jubilant.

Lumbermen in eastern Washington and northern Idaho are jubilant over the large amount of business being done with the Canadian Middle West. In western Washington they are quite satisfied since they have all the Grand Trunk Pacific business. which will amount to 10,000,000 feet or more for the season. Mr. A. W. Cooper, secretary of the Western Pine Manufacturers, of Spokane, Wash., states that since January the shipments of pine from Spokane to Canada have averaged 90 cars a month, an increase of over 100 per cent. compared with the first six months of last year. He expects a total shipment for the season of 25,000,000 feet, and frankly admits manufacturers in this part of the United States take issue with the National Association, which is fighting the reciprocal trade arrangement. They feel that with reciprocity they will then be able to ship all kinds of lumber into Canada, instead of only the rough grades which come in free of duty now. Their expectation is that Canada will be a good market for several years even under present conditions and much better if reciprocity comes.

Conservative millmen on the American coast are against reciprocity for this very reason as it will mean greater slashing of timber than ever. Limited markets will tend more to conservation of the timber supply. They contend that in the end reciprocity will benefit Canada, for the American in his eagerness will cut ruthlessly to flood the new market as he has flooded his own, and with depression in the lumber manufacturing business in Canada the forests will not have to be cut. When American timber is exhausted, the Canadian will be largely intact.

How Reciprocity Will Work Out For Americans.

Mr. A. E. Watts, a prominent lumberman of East Kootenay, declares that American millmen admit that they are not making any money on the lumber that is being dumped into Canada. They get rid of their cheaper grades, leaving their own market undemoralized for the higher grades and the better prices which the Canadians cannot reach because of high duties. The lumber business in the West is a good indication of how reciprocity will work out for the benefit of the American, and in the arrangement proposed no corresponding benefit is given the Canadian lumber manufacturer.

Thirty men have been engaged for several months past in opening up iron deposits on Vancouver Island in the vicinity of Quimsam Lake and Buttles Lake, where a large area is held by American capitalists under lease from the E. and N. Railway Company. Members of the syndicate are visiting the island this week to inspect the property. They include Messrs. E. B. Hawkins, L. C. Barnett, W. H. Cole, of Duluth; C. E. Stone, of Minneapolis, and Roy W. Jones, Seattle. With them is Mr. Walter Croze, of Pittsburg, a steel expert. If the ore passes the final test at the hands of Mr. Croze, it is very probable that development will be extensive and that an iron and steel works will be established.

PERSONAL.

Messrs. Webb, Read and Hegan, accountants and auditors of Winnipeg, Man., have opened an office at 34 Nicholas Lane, Lombard Street, London, E.C.

Mr. L. G. Bauer, manager of the St. Catherine street branch of the Quebec Bank, Montreal, has been appointed assistant manager of the Banque International.

Mr. H. L. Paynter, formerly manager of the Bank of Vancouver at Port Hammond, has taken the management of the east end branch in Vancouver.

Mr. Leon Benoit, of Winnipeg, is interested on behalf of eastern capitalists in the development of coal measures in Ground Hog basin at the head waters of the Skeena and Stikine rivers.

Mr. Antonio Vennucchi has decided to engage extensively in the silk work industry at Trail, B.C. He will make an exhibit at Trail this year, and next season hopes to be able to show at different exhibitions in the West.

The Canada Life Assurance Company have engaged as superintendent of agencies, Mr. T. G. McConkey, one of the best known agency men in Canadian life insurance circles.

The completion of 25 years' service by Mr. George Hadrill, as secretary of the Board of Trade, Montreal, Que., was made the occasion of a presentation to him by the members of the Board of a cabinet of silver.

Mr. W. C. Mitchell, until recently general superintendent of the Dominion Iron & Steel Company at Sydney, will assume the management of the Algoma Steel Company, succeeding Mr. A. Ernest, who will retain the position of consulting engineer. Mr. Ernest has held the position for some months.

The strength of a bank's vault was shown in Vancouver when robbers failed to get into the repository of the Traders Bank. The scheme was well planned, an entrance being effected through the wall of an adjacent building, and nitroglycerine used. The criminals were evidently masters, but the safe was too strong for them.

Mr. George H. Allan, general manager of The Travellers Life Assurance Company of Canada, has returned to Montreal, after an extended trip from Vancouver, B.C., to Halifax, N.S., on behalf of his company. The Travellers Life Assurance Company of Canada has opened offices and is now doing business in every province in the Dominion of Canada, with the exception of Prince Edward Island.

◆

Matches left lying around was assigned in the Fire Commissioners' Court, Montreal, as the probable cause of two recent fires—that which destroyed the workshop of Mr. Henri Scott, jeweller, 479-81 St. Catherine street east, and that in the premises of Mr. Louis Hart, 160 St. Maurice street. In the case of the former, testimony was given showing that the workmen were provided with matches, which they needed to light the gas blow pipes. The matches were placed on the work bench, and it was probable that they were ignited by rats, which infested the place. In the case of the Hart fire, it is supposed that it owed its origin to matches dropped on the floor of the establishment, which is a grocery shop. No blame is attached to the proprietors in either case.

Mr. Louis Reyersbach, managing director, and Mr. Hugh F. Marriott, consulting engineer of the Central Mining & Investment Corporation of London, England, will visit Canada in August. These gentlemen are making a tour of the Dominion and will visit the most interesting mining localities in this country in company with Mr. G. G. S. Lindsey, of Toronto, formerly president of the Crow's Nest Pass Coal Company. Arriving in New York on the 28th of July they will proceed to New Brunswick and ultimately reach Vancouver, after which they will visit both the Skeena River and the Portland Canal.

MANY LARGE INCORPORATIONS

With a Total Capitalization of Over Thirty Million Dollars--Eighty-three New Companies.

Eighty-three companies, with a total capitalization of $30,239,000, were incorporated during the past two weeks.

The largest companies to be granted charters were the British Collieries (Brazeau) with head office in Winnipeg, and the Thos. Davidson Manufacturing Company, Montreal. Both these concerns have capitals of $5,000,000. The Thos. Davidson Manufacturing Company is authorized to carry on the business of smelting, casting, etc.

A charter has been granted to the Canada Flour Mills, Limited, with capital of $2,000,000. This is a merger of a number of Ontario flour mills, and it is understood that mills in Toronto, Peterboro, Brantford and Hamilton are concerned and possibly others.

The provincial directors are all residents of Toronto. They are: Messrs. Strachan Johnston, R. H. Parmenter, A. J. Thomson, W. S. Morlock, and McB. Wormwith.

Other large concerns are: Hughes Porcupine Mines, Toronto, $2,500,000; International Land & Lumber Company, Ottawa, $2,000,000; Wm. Davies Company, Toronto, $2,000,000. The following are capitalized at $1,000,000 each: Otto Gold Mines, Haileybury. T. D. Robinson & Son, Winnipeg. British Columbia Gas Company, Vancouver. Urban Investment Company, Vancouver. Rea Mountain Mining Company, Vancouver.

The following is a list of charters granted during the past two weeks. The head office of each company is situated in the town, city or province mentioned at the beginning of each paragraph. The persons named are provisional directors:

Michel, B.C.—Union Land Company, $20,000.

Brownlee, Sask.—Warner Grain Company, $20,000.

Moose Jaw, Sask.—Consumers Coal Company, $10,000.

Prince Albert, Sask.—Prince Albert Liquor Company, $10,000.

Swift Current, Sask.—A. W. Snider & Company, $50,000. Bertin's, $25,000.

North Vancouver, B.C.—North Vancouver Coal & Supply Company, $100,000.

Hamilton, Ont.—S. G. Buskard, $40,000; E. Finch Noyes, G. C. Coppley, S. S. Beatty.

Haileybury, Ont.—Otto Gold Mines, $1,000,000; E. C. Ironside, J. R. Corkery, J. B. Moon.

Saskatoon, Sask.—Saskatoon Real Estate Exchange, $10,000. Western Constructors, $25,000.

Guelph, Ont.—Guelph Hardware Company, $40,000; D. L. Myers, J. Stinson, J. W. Bolger, Stratford.

Calgary, Alta.—Land & General Investment Company, $100,000; J. Ruse, G. de C. O'Grady, H. C. Secord.

Jonquieres, Que.—Les Manufacturiers de Jonquieres, $25,000; P. Bergeron, J. E. Marois, J. P. Bergeron.

Paris, Ont.—Crystal Oil & Gas Company, $90,000; J. P. Bell, D. Dexter, Hamilton; J. Hodge, Brantford.

Preston, Ont.—Preston Woodworking Machinery Company, $100,000; M. H. Mullin, W. J. Murray, A. M. Kerr.

Wallaceburg, Ont.—Stonehouse, McDougall, Moore, $60,000; H. A. Stonehouse, D. W. Stonehouse, C. B. McDougall.

Niagara Falls, Ont.—Wm. Rogers Manufacturing Company, $300,000; G. H. Wilcox, G. D. Munson, Meriden; W. K. George, Toronto.

Portage la Prairie, Man.—Portage Fruit Company, $40,000; W. K. Nash, F. P. Bash, Minneapolis; H. B. Finch, Grand Forks, N.D.

Ottawa, Ont.—Peat Association of Canada; W. J. W. Booth, P. L. Adlam, Montreal; P. L. Smyth, Port Hood, N.S. Ottawa Taxi & Auto Company, $100,000; G. C. Hurdman, R. Smith, G. T. Brown. International Land & Lumber Company, $2,000,000; S. A. Huntingdon, R. H. Simonds, C. E. Sellery.

Vancouver, B.C.—John Robertson & Son (Pacific), $500,000. United Lumber & Shingle Mills, $100,000. British Columbia Gas Company, $1,000,000. Urban Investment Company, $1,000,000. Red Mountain Mining Company, $1,000,000. Austrian-Hungarian Club, $10,000. Builders' Investment Company, $50,000. Columbia Estate Company, $500,000.

Regina, Sask.—The Land Company of Canada, $250,000. Neal Institute of Regina, $50,000. Parsons Building Company, $50,000. Wascana Country Club Company, $30,000. Electric Light & Power Company, $100,000. Ehman Land Company, $30,000. Western Wine & Liquor Company, $25,000. Overland Automobile Company of Canada, $20,000; G. R. Rastall, F. R. Mahoney, S. Golder.

Windsor, Ont.—DeVilbiss Manufacturing Company, $40,000; A. DeVilbiss, F. L. Gutchess, F. C. Penoyar, Toledo. Ontario Vacuum Cleaner Company, $40,000; E. Wigle, E. Wigle, A. F. Harwood. Windsor Knitting Company, $40,000; F. C. Rehm, E. G. Frank, N. B. Shelmere, Detroit. Dominion Turpentine Company, $250,000; H. J. Leary, Toledo; D. J. Lewis, Detroit; E. A. Cleary, Windsor.

Toronto.—Canada Flour Mills, $2,000,000; S. Johnston, R. H. Parmenter, A. J. Thomson. William Davies Company, $2,000,000; J. S. Lovell, W. Bain, R. Gowans. Canadian Oyster Company, $40,000; T. Mosley, C. Mosley, J. Mosley. Death & Watson, $40,000; N. P. F. Death, L. Watson, G. G. Wishart. Doan & Charles, $50,000; J. H. Spence, J. R. L. Starr, M. C. Cameron. Hughes Porcupine Mines, $2,500,000; G. A. Archibald, E. J. Foley, F. C. Doran. Baily & Company, $50,000; W. G. Baily, R. D. Hume, W. J. Elliott. Canadian Prairie Securities Company, $40,000; J. S. Fullerton, H. J. Macdonald, H. C. Macdonald. Standard Canadian Investments, $100,000; O. H. King, G. M. Willoughby, A. J. Wise. Sharpe Sales Company, $40,000; A. J. Reid, J. C. Rutter, A. E. Stovel. Porcupine Southern Mines, $40,000; G. Grant, A. Dods, M. Macdonald. Metropolitan Theatres, $100,000; J. S. Lovell, W. Bain, T. B. Miles.

Winnipeg, Man.—Consolidated Investment Company, $200,000; C. H. Locke, K. R. Daly, C. A. Crawley. Daykin-Scott Construction Company, $20,000; T. R. Daykin, W. Scott, C. Blake. North Parkdale Realty Company, $250,000; D. McKay, E. H. Lee, T. R. Dunn. Williams Fur Company, $100,000; M. Williams, W. B. Galbraith, C. S. Gordon. Phoenix Grain Company, $50,000; E. W. Hanna, E. W. Turner, F. J. J. McArthur. Columbia Amusement Company, $30,000; W. S. Jones, J. E. Harrison, G. R. W. Matheson. T. D. Robinson & Sons, $1,000,000; T. D. Robinson, W. E. Robinson, H. W. Robinson. Leitch Land & Investment Company, $100,000; J. S. Leitch, W. Messenger, A. E. A. Evans. Cancilla & Company, $60,000; F. Cancilla, J. M. Vinci, J. Cancilla. British Collieries (Brazeau), $5,000,000; E. Brown, H. W. Butchinson, D. E. Williams.

Montreal.—Dominion Marble Company, $750,000; C. J. McCuaig, R. T. Hopper, R. C. Smith. Highland Estates, $150,000; J. C. Barlow, A. Labreche, G. A. Terrault. Corporate Securities, $50,000; W. F. Chipman, F. G. Bush, G. R. Drennan. Canadian Street Car Advertising Company, $250,000; W. J. Carrique, D. M. Coughlin, W. F. Thompson. Elie Jobin, $150,000; M. Jobin, P. F. Jobin, J. Metivier. G. W. Faust, $50,000; G. W. Faust, A. Bougie, C. Vincent. Ford Iron Company, $50,000; W. F. Chipman, F. G. Bush, G. R. Drennan. Thomas Davidson Manufacturing Company, $5,000,000; A. W. P. Buchanan, J. H. Dillon, E. C. Young. Canadian Sand & Gravel Company, $49,000; F. X. Dupuis, P. L. Turgeon, L. Robillard, Montreal. Luminous Locator Company, $150,000; A. R. McMaster, W. J. S. McMaster, Westmount; G. A. Campbell, Montreal. Dominion Building Corporation, $100,000; W. J. Bellingham, F. G. Robinson, L. Gosselin. Keyless Lock Company, $50,000; E. de Charette, J. de Charette, A. de Charette, of Charette's Mills. Italian Vermicelli & Marcaroni Manufacturing Company, $100,000; E. Tammaro, V. Morin, J. Lemaistre. La Compagnie des Autobus de Montreal, $150,000; J. B. Baillargeon, R. Gaudry, G. Lefort. Central Realty Company, $20,000; F. G. Bush, G. R. Drennan, M. J. O'Brien, E. S. McDougall. Gatlin Institute Company, $50,000; S. M. Dunlop, Woodstock, Ont.; F. A. Stephens, E. G. Stephens, Robinson, Ill. Rena Footwear Company, $20,000; A. Patrie, S. A. Levitt, M. Isaac. Longueuil Gardens Company, $20,000; M. A. Phelan, W. Bovey, Westmount; M. S. Nagle, Montreal. Adamson Muller Company, $20,000; J. T. Adamson, W. H. Martin, G. A. Campbell.

CANADA AND ARGENTINA.

A direct steamer service between Canada and Argentina, rendering unnecessary the transportation of Canadian product at United States ports, is advocated by Don Carlos Galaru, which arrived in Ottawa recently as the new consul-general for the Argentine Republic.

At least fifty per cent. of the Canadian trade with Argentina has been done by shipping by rail to the ports of Maine, Massachusetts and New York, and reshipping from there. Don Carlos Galaru was formerly consul at Boston, and assistant consul-general at New York.

COBALT ORE SHIPMENTS.

The following are the ore shipments, in pounds, from Cobalt, for the week ended July 7th:—La Rose, 170,303; Nipissing, 188,591; Cobalt Lake, 124,356; Coniagas, 59,524; Kerr Lake, 60,340; total, 603,154 pounds, or 301 tons. The total shipments since January 1st are now 25,245,888 pounds, or 12,622 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

INTERNATIONAL MILLING COMPANY.

Earnings of the Company—Investment Trust Company Locate in Toronto.

Monetary Times Office,
Montreal, July 12th.

A public offering of the unsold portion of an issue of $525,000 of the six per cent. collateral trust and refunding mortgage bonds of the International Milling Company of Canada is being made through the Investment Trust Company, Limited. The International Milling Company was the amalgamation of the Canadian Cereal & Milling Company, Limited, and the International Milling Company of Minnesota, which was recently brought about by the Investment Trust Company, which company also organized the Canadian Cereal & Milling Company a year ago. The securities of the International Milling Company of Canada are as follows:—

	Authorized.	Issued.
Common stock	$2,500,000	$1,279,000
Preferred stock	3,500,000	1,995,400
	$6,000,000	$3,274,400
Bonds	2,000,000	1,750,000
Less redeemed July 1st		18,000
		$1,732,000

Earnings of the Company.

Of the above bonds, $1,207,000 are issued for the purpose of retiring the outstanding bonds of the constituent companies, while $250,000 remain in the treasury, and $18,000 have been redeemed. This leaves a balance of $525,000, which is the amount which has been underwritten by the Investment Trust Company. Of this sum about $325,000 have already been sold, so that the public offering will in reality consist of only $200,000. These are being offered at 98½ per cent. of par, making a return of about 6⅛ per cent. on the amount of money purchasers will require to invest.

As to the sufficiency of the earnings of the companies to meet the bond interest, the following will be explanatory:

Net profits of constituent companies during the last fiscal year, before paying interest	$414,194
Interest on $1,732,000 bonds, outstanding at six per cent.	103,920
Surplus earnings	$310,274

It will be seen that the earnings are nearly four times the amount required to pay the interest on the bonds. This is without taking into consideration the amount required to be set aside for the sinking fund and also without making allowance for the increased profits which it is expected will come to the concern because of economies effected through concentration of management.

Investment Trust Company Locate in Toronto.

The Investment Trust Company, Limited, is about to open up branch offices in Toronto, in the Royal Bank Building. It is about two years and a half since the Investment Trust Company was formed, the promoter being Mr. A. J. Nesbitt, who has been managing director from the start. At the outset, the company had a capital of $100,000. The business increased rapidly and within a year the capital was increased to $250,000. At the present time the company has a capital of $500,000, of which $400,000 is paid up. In addition to this, it has surplus and undivided profits amounting to $125,000. The company has been concerned in a number of flotations, such as the Canadian Cereal & Milling Company, and the later amalgamation of this with other milling companies into what is known as the International Milling Company of Canada, Limited. It also put through the deal by which the Montreal Steel Works and the Ontario Steel Company were brought together as the Canadian Steel Foundries, which was later taken over by the Canadian Car & Foundry Company.

The Toronto office will be under the management of Mr. N. L. McLoan. The directors and officers of the Investment Trust Company are as follows:—Messrs. K. W. Blackwell, president, director Merchants Bank of Canada; J. P. Black, vice-president, director Dominion Textile Company; James R. Wilson, vice-president Dominion Coal Company; R. MacD. Paterson, director Quebec Bank; W. M. Dobell, Dobell, Becket & Company; A. J. Nesbitt, managing director, director Canadian Cereal & Milling Company; N. B. Stark, secretary-treasurer.

A municipally owned telephone system, giving unlimited service to the subscribers at $7.00 a year and paying a dividend of 30 per cent. on the original investment, is being advocated by Water Commissioner Stevenson, of London, Ont

INSURANCE RATES IN VANCOUVER.

Board of Trade Discuss the Question—Lumbermen Have Good Year—Prospects Bright for a Large Apple Crop.

(Staff Correspondence.)

Vancouver, July 11th.

Visitors to Vancouver have commented on the number of banks. They are to be found at all the principal downtown corners, and several of them have branches in different parts of the city. There are sixteen parent institutions, and now there is to be seventeen. The Quebec Bank will open here about the 24th of this month and occupy premises on Granville street, to be vacated by the Imperial Bank, which is to move into new quarters on the ground floor of the new Confederation Life Building, adjoining the Canadian Bank of Commerce on Hastings street.

At the meeting of the Vancouver Board of Trade recently, the question of insurance rates was discussed. The subject will come up again at the next meeting. Mr. J. Cotterill introduced the matter saying that the rates were set by underwriters and the underwriters were all insurance men. He suggested the appointment by the government of a commissioner to meet the underwriters, or else the government to strike the rate of insurance itself. He said the rates in Vancouver were as high if not higher than any other city in the Dominion. Mr. D. von Cramer was of the opinion that the rates were high because many buildings in the city were not kept clean enough. Ex-Alderman Hepburn said that excuses could be made for the underwriters, but they had not lived up to their promises. The city had carried out many suggestions made by the underwriters with a view to obtaining a reduction in rates, but no reduction had been made. The chairman suggested that those interested go into the matter thoroughly and discuss the matter further at the next meeting.

British Columbia Lumbermen Have Good Year.

British Columbia lumbermen have had a fairly good year so far and with good crop prospects expect a favorable six months to come. They have one trouble in view, namely, the shortage of cars. Even now at times there are temporary shortages. In average years, there is sharp demand for lumber in September and October, but with a bumper crop it will be better. If the lumber is not moved before the end of October it is too late in the season. It is just at that time that the cars are required for the transportation of grain, and if the coal miners' strike is settled there will be much coal to move from the Crow's Nest pass. The lumbermen have suggested to the Canadian Pacific Railway to facilitate ordering of lumber, that freight charges on all orders placed between now and the middle of September stand over until November 1st. The lumber manufacturers, on their part, have decided to put November 1st on all orders received in the same length of time. If this is done it is hoped that retailers will be encouraged to order ahead of time, which will be of mutual advantage to all parties concerned.

Apple Crop Will Be a Good One.

The peach crop in the Okanagan district this year will be poor. Last winter was severe, and the frosts caught the trees. Because of the unreliability of the peaches new areas being planted out are being put mostly into apples. The Okanagan climate is perfect for apple production, the winter being cold enough to give strength to the trees, and the summer sun gives color to the fruit. The heat and irrigation furthers growth. This year the apple crop will be the largest yet.

Now that the time is drawing closer when the railway on the Portland Canal will afford transportation facilities to mines ready to ship, there is an apparent strengthening in values on the local exchanges. Portland Canal mine stock, which was down in the teens, is firm and steadily advancing. It is expected that the smelter returns will be very favorable, and if they are an impetus will be given to mining in that northern section.

◆

The Imperial Bank is to open a branch in Prince Rupert on Second Avenue, at or near the corner of Fifth Street.

Captain Georges Dimpault and Captain Marchand, retired French army officers, who have been visiting the coast, have invested a quarter of a million dollars in British Columbia.

The officers for the coming year for the Quesnel, B.C., Board of Trade are: Mr. A. W. Cameron, president; Mr. J. N. Yorston, Ex.-M.L.A.., vice-president; Mr. E. J. Avison, secretary-treasurer. Mr. Cameron, who is manager of the Northern Crown Bank, has recently been appointed a justice of the peace for British Columbia.

BANKING IN CANADA.

Sir Edmund Walker Reviews Its History for Londoners —English Bankers Would Like to Adopt Certain Canadian Features.

An interesting address on Canadian banking was given by Sir Edmund Walker at the London Institution. Sir Edmund reviewed the system as applied to trade and industry, and stated that in the history of banking Canada was not, as might be supposed, one of the new countries of the world. Following the systems of barter established by law, the history of currency in the old Canada, which preceded Confederation, began in 1685 with the issue by the French Colony of one of the earliest forms of fiat paper money in the western half of the world; indeed, this ingenious experiment was supposed to have inspired the British colonists of Massachusetts to venture upon the same kind of money. The general use later on of such paper issues by all the colonial governments was naturally followed by the famous continental currency of the revolution. It was because none of this paper money in its later issues was paid in full, and much of it was not redeemed in any manner, that the people of old Canada were so wary and incredulous when, after the establishment of representative government, efforts were unsuccessfully made in 1792, 1807, and 1808 to obtain the authority of Parliament for banks of issue.

To Pay War Expenses.

In order to pay the expenses of the war, issues of fiat money, for which the credit of Great Britain was pledged, were made from 1812 to 1814 through the Army Bill office, and were redeemed during the ensuing four or five years. It was not until after this, in 1817 and 1818, that the first banks were created in Lower Canada, now Quebec. They were at first private corporations, but obtained charters in 1821, to which the Royal Assent (then necessary) was given in 1822. In 1817 the Provincial Parliament of Upper Canada (now Ontario) was also asked to incorporate a bank, and consented, the Lieutenant-Governor, however, reserving his signature for the Royal Assent, which was given in 1821. There was a dispute between two sections of Upper Canada over this charter, and eventually it took shape as a bank, in which the Provincial Government owned about one-fourth of the stock, with a right to name four out of fifteen directors; the only instance, fortunately, of state ownership in our banking history. It could safely be said that the three charters granted in Lower Canada, all practically alike, were the substructure on which all subsequent improvements had been built, and that no very radical changes had been at any time necessary.

Clearing Houses For Country's Products.

Indeed, there were many provisions in these charters which were subsequently included, almost unchanged, in the general Banking Act. The banks soon opened branches and agencies, and imperfect in detail as it was at that time, the present system of banking began its course. From the first the banks exercised, under the scrutiny of Government and press, the great franchise of note issues unsecured by any special pledge; they possessed the identity given by separate charters and clearly distinguishing titles; they opened branches and assumed the widest functions of banking without discussing the precise powers accorded by these charters. Possessing capital quite as large relatively to the size of the community as they had now, they assumed without hesitation a national position as clearing houses for the exchange of the country's products.

Of the banks thus created—three in Lower Canada, one in Upper Canada, two in Nova Scotia, and one in New Brunswick—all but one in Quebec became leading institutions, and all were either in high standing to-day or have honorably amalgamated with existing banks, except the institution in Upper Canada, unhappily joined to the State and said to have been swayed by politics. It failed in 1866, after a career of nearly half a century—the most serious calamity in the history of banking in Canada up to the time of Confederation.

Private Note Issues.

Previous to 1830, while a charter with express power to issue circulating notes was most desirable, there was no law forbidding private individuals to issue notes. In Lower Canada, in that year, an Act was passed partially prohibiting such private issues. But during the disorganized state of trade and finance at the time of the Rebellion in 1837, notwithstanding the penalties, there was a flood of paper issues by private banks and merchants, largely for sums less than a dollar, and it was found necessary, temporarily, to make these issues legal. Until the rebellion it was still possible in Upper Canada for private banks to issue notes, and during the period of trade expansion which preceded the general financial collapse in North America in 1837, several ventures with titles sounding like incorporated bodies, but really private firms, came into existence.

As a result, Upper Canada also passed legislation making such issues illegal. During the ten years preceding the union of Lower and Upper Canada in 1841, ambitious schemes of public improvement had been undertaken, there had been much speculation in land, and trading generally exceeded the financial capacity. In the United States the same conditions had brought about most unsound ideas regarding banks. The people, especially in Upper Canada, were much influenced by these novel views on banking, and about 25 bills on the subject of banking and currency were introduced, but, as such measures had then to be referred to the Colonial Office for Royal allowance, none of these schemes came into effect, and, much as they enjoyed the benefits of home rule to-day, they had to thank the Colonial Office after this lapse of time for its attitude, although there was much criticism of that department at the moment. Thus far no joint-stock bank had failed.

Provincial Bank of Issue.

The first Governor-General of the new province was Lord Sydenham, who held the same currency views as Lord Overstone, and it was at that period that the controversies were being carried on, which resulted, in England, in the Bank Act of 1844. Lord Sydenham favored for Canada a provincial bank of issue, and he outlined a scheme under which he proposed to cancel the right of issue by the chartered banks, remunerating them therefor; and by giving it to this institution, which was not to do a general banking business, he hoped to make a large profit for the Government. He proposed a gold reserve of one-fourth of the issue, with Government bonds for the balance and a fixed maximum for the issue, and he claimed that such a system would ensure ready convertibility. But the Canadian people were intelligent enough to see the defects of such a system, and, apart from other faults, the lack of elasticity alone condemned it. It was opposed, of course, by the banks; but, also, on many grounds, by the general public, and did not become law. The Legislature, however, took advantage of the opportunity to impose a tax on bank notes of one per cent. per annum, on the average amount of circulation. Since 1880 note issues had been a prior lien upon the estate of a bank, prior even to a debt due to the Crown. This legislation was prompted by the failure of a small bank in 1879, which did not pay its notes in full.

Two Minor Defects.

At the revision of the Act in 1890 it was recognized that there were still two minor, though serious, defects in the system. It was frequently alleged by those who admired the National Bank Act of the United States that, while the currency created by it might not be elastic, the notes could not, for any reason, fail to be paid in full, or to circulate without discount throughout the entire area of the United States, while in Canada no similar boast could be made. The area of Canada was enormous relatively to population, and the notes of banks in one province certainly passed at a discount in some of the others—a recurrence in a less aggravated form of a defect in the old State-bank issues of the United States.

And, while it might be confidently asserted that all bank issues secured by being a first lien on the estate of the banks would eventually be paid in full, it was nevertheless true that, because of doubt and delay, the notes of a suspended bank might fall to a discount for the time being. To meet these two defects the bankers at that time proposed the following new features, which were adopted by the Government: (1) To avoid discount at the moment of suspension of a bank, either because of delay in the payment of the note issue by the liquidator or of doubt as to ultimate payment, each bank was obliged to keep in the hands of the Government a deposit equal to 5 per cent. on its average circulation, the average being taken from the maximum circulation of each bank in each month of the year.

Circulation Redemption Fund.

This was called the Bank Circulation Redemption Fund, and should any liquidator fail to redeem the notes of a failed bank, recourse might be had to the entire fund, if necessary. As a matter of fact, liquidators were almost invariably able to redeem the note issues as they were presented; but, in order that all solvent banks might accept without loss the notes of an insolvent bank, these notes bore 5 per cent. interest from the date of suspension to the date of the liquidator's announcement that he is ready to redeem. (2) To avoid discount for geographical reasons, each bank was obliged to arrange for the redemption of its notes in certain named commercial centres throughout the Dominion.

In Canada gold was not used as a currency, but as a bank reserve. Of the legal tenders issued by the Government, over seven-ninths were held as bank reserves, while the remainder were the change-making notes—those smaller than five dollars. So that the business of the country, apart from cheques and other credit instruments, was done with bank notes and small legal tenders.

Fluctuations in Business Volume.

As Canada was a country with wide fluctuations in the volume of business during the year, owing to crop moving and to the great variation in the seasons, it required great flexibility in the currency. Although the number of establishments was very few, branch banking began soon after the first banks were created in 1817. For 60 or 70 years few banks had more than 25 or 30 offices, but the development of Canada, and especially of the west, had greatly changed conditions. At March 31, 1911, the chartered banks of Canada had 2,482 branches, 2,420 of which were in Canada. The two largest banks had at the present time about 236 and 153 branches respectively. The most striking feature was, of course, not the number of branches belonging to any one bank, because, compared with Great Britain, the figures would look quite moderate, but the great area over which these branches were spread and the variety in the circumstances surrounding the banking business at the important points.

At one moment they might be considering the conditions of a particular manufacturing industry, as would be the case in Breat Britain; at the next those of one of the five or six widely separated timber areas, each having its own particular characteristics; the fishing interests of the Atlantic or of the Pacific; placer gold mining in the Yukon, copper smelting in British Columbia, silver mining at Cobalt, or the prospects of the new Porcupine country; the great agricultural, pastoral, dairying, and fruit industries; or immigration and settlement and their effect upon town and railway building. Indeed, there were few things connected with the life of Canada that the banker could afford to leave unstudied, and it naturally followed that a bank with an army of trained observers and a well-organized system for the intercommunication of information other than the facts which must appear in bank returns and ordinary correspondence was likely to have an advantage over those less well informed.

As to Bad Banking.

Doubtless there was a considerable percentage of bad banking in Canada, as in other new countries, but he doubted whether banks in any country were as a rule more explicit in the establishment of credits or do so upon more complete information. Bank failures in Canada showed clearly that there was plenty of careless and unwarrantable banking; but, while he had referred to the system of only one particular bank, he believed that, as a rule, the Canadian banker had a very clear notion of what he regarded as good or bad banking, and that his relations with his customer were marked by a sensible blending of desire, on the one part, to enable his customer to take advantage of the rapid growth of Canada, and, on the other, to guard the interest of his bank. In view of the great expansion of credit in Canada, the matter of their available reserves was gravely important, and they were now large enough to be also keenly interested in the financial conditions of the rest of the world, especially of London and New York. In Canada, the average, for many years, of actual cash held in gold and legal tenders, as against all liabilities to the public, had been about 10 per cent.

But, owing to the system of bank note issues, very little of this was required for daily use, the tills of bank offices being filled with the bank's own notes, which did not appear in its statements as cash because they were not in circulation. Practically, the business across the counter, when not transacted with other paper instruments, was done by means of this till money; the settlements of balances with other banks were made in legal tenders, or by drafts on the chief commercial centres.

As to Inspection and Audit.

In Canada they had no system under which the annual statements of banks were verified by independent auditors, nor had they, as in the United States, a system of Government bank examiners. At the revision of the Bank Act in 1890 they resisted the attempt to introduce either of these systems, because, in their opinion, they tended to produce in the public mind an assurance of safety which would certainly not be warranted by anything that external examination could accomplish. Recent failures, accompanied by false statements and other criminal acts, had caused a widespread demand for some kind of independent examination, and, as they were at the moment engaged in one of their decennial revisions of the Bank Act, the subject was one of unusual interest in Canada. Facts showed that, in the main, those who needed protection were the shareholders, and common sense told them that, so long as banks failed, shareholders must lose, and that no inspection would prevent the making of bad loans, from which cause most failures arose. Audit had not prevented bad failures, and the record of Government inspection was worse. What, then, could they do?

Canada and Its Neighbor.

Mr. F. Huth Jackson, in proposing a vote of thanks to Sir Edmund Walker for his interesting address, drew attention to the contrast of the banking systems now in operation in Canada and the United States. In Canada they had a number of small banks, but connected with institutions with ample resources, which automatically supplied them with funds when required for crop movements. As he had said before, public opinion was the best censor of banking practice, and it was sufficiently strong to keep every bank going on sound principles.

Sir Felix Schuster, in seconding, said that those present had listened to a most interesting address, and one which was full of valuable advice from every point of view, while there was a good deal in it which bankers in the United Kingdom might take to heart with advantage. He was struck by the usefulness of the issue of notes in times of crop movements, by which an elasticity in finance was obtained which was most valuable. He felt it difficult to advise on the different systems of banking, and thought that it was a subject upon which each country must find its own salvation. He considered that the Canadian banks were in a most enviable position in being able to write down their premises account to such a large extent. He thought that the rule adopted, of borrowers only being allowed to have one bank, was one that could be followed out with great advantage in England.

Again, the fact of a customer producing his own balance-sheet when applying for a loan was another proposal he would like to see carried out in the United Kingdom. There could be nothing discreditable in a customer showing his banker an investigation of his accounts for any demand on the banker he might make. The payment of advances within one year was also a very sound banking principle. He inquired whether the savings banks deposits, which were received by banks, were held apart from other deposits, or if they formed part of the ordinary assets of the bank. The question of having an independent auditor was also one of great importance. He believed that an independent audit, although they could not safeguard the public altogether, would be of very great value to the institution itself.

Mr. W. R. Lawson said that what had appealed to him most about Canadian banking was the system of mutual inspection, and this he would like to see adopted by all banks in Great Britain.

NEW ISSUE OF CAPITAL FOR EUROPEAN AND OTHER RAILROADS.

The rapid development of railways in every direction is especially indicated in the stream of new issues of capital by railway companies operating in all parts of the world. During the first five months (January to May) of the present year, the total amount of capital subscribed in the United Kingdom for railway undertakings was £36,647,514, or nearly $10,000,000 more than in the corresponding period of last year. Neither Government securities, nor any class of commercial or industrial enterprise, comes within half of this large sum. The bulk of the money has gone to Canada or the Far East, or, at least, it will probably go to those countries very largely in the shape of locomotives and rolling stock, with the construction of which the workshops are now busy.

It is also evident that this sum does not exhaust the requirements of railway promoters during the current year. In Argentina there are further schemes of extensions to be financed in addition to the probable electrification of the suburban railway system of Buenos Ayres. In Canada the construction of new lines and the building of a third transcontinental railway are contemplated.

In Japan the state has decided that the conversion of the present railways to the narrow gauge is an essential part of the country's development, and in China the construction of railways is a part of the programme of the loan operations of the Powers. In each case British investors will probably be invited to furnish the greater part of the capital, and a busy time appears to be ahead for contractors for railway materials.

From January, 1905, to April, 1911, Canada borrowed in Great Britain £59,204,806 for the building of its railroads.

INDUSTRIAL ACCIDENTS DURING MAY.

Industrial accidents occurring to 173 individual work people in Canada during May, were reported to the Department of Labor. Of these fifty-two were fatal and 121 resulted in serious injuries. In addition, four fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before May, 1911.

In the preceding month there were seventy-six fatal and 106 non-fatal accidents reported, a total of 182, and in May, 1910, there were 133 fatal and 243 non-fatal accidents, a total of 376. The number of fatal accidents reported in May, 1911, was therefore twenty-four less than in the preceding month, and eighty-one less than in May, 1910. The number of non-fatal accidents reported in May, 1911, was fifteen more than in the preceding month, and 122 less than in May, 1910. Altogether there were nine fewer industrial accidents reported in May, 1911, than in the preceding month and 223 fewer than in the same month of the preceding year.

Of eighty returns received during the month, giving the ages of the victims of industrial accidents, five referred to persons under twenty-one years of age, nine to persons between twenty-one and forty-five, and three to persons over forty-five. Sixty-three persons were over twenty-one years of age, but their exact ages were not specified.

◆

As none of the tenders for the $140,000 Consolidated debentures of St. Marys, Ont., were satisfactory, the matter was left over.

While the Montreal fire department were parading on the Champ de Mars, a hurry call from Jacques Cartier pier brought the parade to an ending, the firemen and apparatus hurrying to the wharf to battle with a fire which broke out on the steamer Manchester Corporation. The blaze started in a hundred tons of hay stored in the hold, and spread to a cargo of grain and hardwood flooring.

Stanley Mineral Springs Company, Limited

(*Incorporated under the Manitoba Joint Stock Companies Act*), *March*, 1911.

HEAD OFFICE - - - WINNIPEG, MANITOBA

Authorized Capital: $200,000.00, divided into shares of $100 each.

Present Issue: ONE THOUSAND 7 per cent. Cumulative Preference Shares, plus 50 per cent. of Common Shares (fully paid up and non assessable), at the price of $100 per share of the Preference Stock, equivalent to $100,000.00; of which $63,114.86 is in payment of the purchase price for the properties and assets mentioned in the prospectus and the balance is for working capital.

PAYABLE 10 per cent. on application, 30 per cent. in 30 days, 30 per cent. in 60 days, 30 per cent. in 90 days. Dividends, when declared, will accrue on the amount of money paid in from the dates received.

OFFICERS AND DIRECTORS: Hugh Sutherland, Esq., President, Executive Agent Canadian Northern Ry.; John Galt, Esq., Vice-President, Director Union Bank; Hon. R. P. Roblin, Premier of Manitoba; Joseph G. Carroll, Esq., Director Wine and Spirit Vaults, Limited; D. E. Sprague, Esq., President Sprague Lumber Co., Ltd.; F. S. Wiley, Esq., Vessel Owner, Port Arthur, Ont.; James Whalen, Esq., Pres. Great Lakes Dredging Co., Port Arthur.

BANKERS: Northern Crown Bank. SOLICITORS: Munson, Allan, Laird & Davis, Winnipeg.

AUDITORS: Marwick, Mitchell & Co., Chartered Accountants of Scotland, 1211 McArthur Building, Winnipeg, Man.

LOCATION OF STANLEY SPRINGS

The Famous Stanley Springs are situated in the rocky hills of Western Ontario on the line of the Canadian Northern Railway, nineteen miles west of Port Arthur and Fort William. The water is forced bubbling through an immense natural filter bed of sand at an elevation fully 200 feet above the level of the Kaministiquia River, which flows past the base of the hill. By scientific analysis it has been proved to be a water of remarkable purity, and by the test of experience it is shown to possess all the delightful and healthful properties of the Ideal Table Water, and to blend perfectly with all Wines and Spirits. It is bottled only at the STANLEY SPRINGS, and with the greatest care under hygienic conditions, the Company's plant being equipped with the most modern bottling machinery, and being considered one of the finest mineral water plants on the continent.

PRODUCT

For five years this water has been tested by the public, and the demand for it and the other products of the Company has grown to such an extent that it has become necessary to increase the facilities for handling the business.

Stanley Ginger Ale.—In the autumn of 1910, after exhaustive experiments, Stanley Ginger Ale was offered to the public, and has been pronounced by connoisseurs to be the peer of any Ginger Ale in any country.

Stanley Water gives a unique quality to the Company's Ginger Ale, and the Company has secured a process in manufacturing which produces a perfect result. In Stanley Ginger Ale the Company has a product for which the demand is growing so rapidly that with present facilities it cannot be fully met, and the excellent quality of this article is certain to make it one of the most profitable products of the Company's works.

MARKET

The growing demand for table waters is one of the distinctive features of the age in which we live, and is being rapidly encouraged by doctors and other men of science. The search for a domestic water of the highest class lasted for years, and the finding of this spring in the rocky precincts of Western Ontario was an event of far-reaching importance. The geographical situation of the Spring is also an important feature from a commercial standpoint, as it enables the water to be profitably sold in Eastern as well as Western markets.

THE COMPANY TAKES OVER THE ESTABLISHED BUSINESS

Stanley Mineral Springs Company, Limited, has entered into an agreement to purchase all the assets of the old Company, including the Mineral Springs property, business and goodwill for the sum of $63,114.86 cash, which price is to be reduced as between the two Companies by the amount of stock subscribed in the new Company by shareholders of the old Company on the basis of the prospectus, equivalent to the cash invested by them in the old Company.

APPLICATION FOR SHARES

I hereby apply for.................................. shares of one hundred dollars each, amounting to ....dollars of the capital stock of the STANLEY MINERAL SPRINGS COMPANY, LIMITED, Winnipeg, payable as follows: 10 per cent. with application, 30 per cent. in 30 days, 30 per cent. in 60 days, and 30 per cent. in 90 days.

Name.. Occupation..

Cut this out, fill in the blanks and send to Room 410 Builders' Exchange Building, Winnipeg.

CANADA FINDS AND NAMES A NEW MINERAL.

On the east coast of Bonaparte River, about half way between Cargill and Scottie Creeks, in the district of Lillooet, British Columbia, a new mineral was recently found. Little has been heard of the discovery, but it is recorded with due modesty in the latest report of the Geological Survey Branch of the Mines Department. Mr. F. Sones, Gold Commissioner at Clinton, British Columbia, forwarded the sample to the department. It was made up of two specimens, one of which, measuring 4 inches in length by 2 inches in thickness, consisted of the mineral about to be described along with some scattered remnants of decomposed rock matter; the other specimen, a much larger one, consisted for the most part of decomposed rock matter of a character like that just mentioned. It has a schistose structure, but it has so far decayed that its original composition is completely obscured, and little more than a residue of silica remains. It is not at all unlikely, however, that the original of this rock has furnished the basic constituent of the associated mineral.

The mineral occurs in the form of seams and scattered patches in the altered rock matter just described. Some of these seams attain a thickness of nearly half an inch. In general they present a moderately coarse columnar structure; occasionally, however, the mineral is seen to assume a delicately fibrous form. In the material at hand no distinct crystals have been observed, and the cleavage, although clearly prismatic, is not very well defined. The mineral is readily friable, and breaks with a fine, subconchoidal fracture. It has a pearly lustre, and its color is white, modified by a delicate green tint; it is opaque, even on very thin edges, and has a bitter, saline taste.

Before the blowpipe, on charcoal, the mineral swells and emits bubbles of vapor, but does not melt, and ultimately leaves an infusible mass, which has no effect on moistened tumeric paper. When moistened with a solution of cobalt nitrate and reignited the mass becomes pink. In the closed tube it yields a large amount of water, which reacts neutral to test papers. It dissolves readily in cold water, yielding a clear solution; after addition of ammonium chloride this solution does not give a precipitate with either ammonia or ammonia carbonate, but when a solution of sodium phosphate is added to the ammoniacal solution a copious white precipitate of ammonium-magnesium phosphate is thrown down. The aqueous solution when acidulated with hydrochloric acid gives, with barium chloride, an abundant white precipitate of barium sulphate.

The specific gravity of the mineral at 15 deg. 5 C. was found to be 1.757, and an analysis of selected material, which, however, still contained some included silica, gave the following results:—

Sulphur trioxide	34.52
Magnesia	17.15
Water	46.42
Insoluble matter (silica)	1.78
	99.87

Omitting the included silica, it will be found that the composition of the mineral agrees very closely with that required for the hexahydrate of sulphur of magnesium, $MgSO_4 6H_2O$, which hitherto has only been known as a product of the laboratory. The agreement will be made plainly evident by a reference to the following figures, in which column I. represents the composition of the mineral under discussion, and column II. that required by theory for the normal hexahydrated salt:—

	I.	II.
Sulphur trioxide	35.19	35.09
Magnesia	17.48	17.54
Water	47.33	47.37
	100.00	100.00

As this is the first instance in which this salt has been recorded as occurring in a state of nature, this substance is entitled to be regarded as a new mineral, and the Department of Mines has proposed the name hexahydrite for it, in allusion to the six molecules of water which enter into its composition.

Our only hope is that no one will lay claim to a prior discovery and different name. Up to the time of going to press, Canada's mineral remains as a new one, and its name is hexahydrite.

◆

RECENT FIRES.

Monetary Times' Weekly Register of Canadian Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Fort George, B.C.—Hotel Northern destroyed; loss and origin unknown.

Kelso, Ont.—Business section destroyed; loss unknown; origin, bush fires.

Pottsville, Ont.—Fifty-five buildings destroyed; loss estimated at $75,000; origin, bush fires.

New Westminster, B.C.—City market buildings destroyed; loss about $2,500; origin unknown.

Comber, Ont.—Mr. F. H. Allison's jewelry store damaged; loss about $2,000; origin unknown.

Cochrane, Ont.—Cochrane hotel and six adjoining buildings destroyed; loss and origin unknown.

Northern Ontario.—Forest fires destroy South Porcupine and vicinity; loss is estimated at $2,000,000.

Calumet, Que.—Riordan Paper Company destroyed; loss is estimated at $250,000; origin unknown.

Elmsdale, N.S.—General store of Messrs. I. B. Shappner & Company destroyed; loss and origin unknown.

Boissevain, Man.—House occupied by Mr. E. M. Venables destroyed; loss about $1,300; origin unknown.

Paris, Ont.—Barn of Mr. Charles Gurney, Washington street, destroyed; loss about $1,000; origin unknown.

Thorold, Ont.—Furnace building of Contam's Reduction Company destroyed; loss estimated at $15,000; origin unknown.

Collingwood, Ont.—House occupied by Mr. Scrivener, Simcoe street, destroyed; loss about $1,800; origin, unknown.

Strathroy, Ont.—Barns belonging to Messrs. Taylor, Harnett, and Campbell, destroyed; loss unknown; origin, lightning.

Lucknow, Ont.—House, barns, farm implements, etc., owned by Mr. John Gamble; loss about $4,000; origin, defective chimney.

St. Thomas, Ont.—Barns and contents, owned by Mr. David Barannion, Malachi township, destroyed; loss about $3,000; origin unknown.

Vancouver, B.C.—Back kitchen of McIntyre Cafe, 439 Granville street, damaged; loss about $500; origin, ashes falling from range on floor.

Elora, Ont.—Livery stable of Messrs. Brohman & Peavoy, also 10 horses and implements destroyed; loss estimated at $1,000; origin unknown.

Owen Sound, Ont.—Rotary kiln building of Canada Cement Company's plant at Big Shallow Lake badly damaged; loss and origin unknown.

Parkhill, Ont.—Barn of Mr. David James destroyed, also five calves, 30 tons of hay, some implements and a buggy; loss unknown; origin, lightning.

London, Ont.—Gasoline launch of Mr. Wm. Lewis, corner of Wharncliffe and Dundas streets, badly damaged; loss unknown; origin, careless with matches.

Beaverton, Ont.—Bank barn of Mr. Donald Brown destroyed, also 25 hogs, one cow, six calves, all the poultry and farm implements; loss unknown; origin, lightning.

Aylmer, Que.—Lumber yards of Fraser, Bryson Lumber Company, and the McAuliffe-Davis Company, destroyed, also 10,000,000 feet of lumber; loss about $550,000; origin unknown.

Kingston, Ont.—House occupied by Mr. Isaac Zacks slightly damaged; loss and origin unknown. Orpheum Theatre badly damaged; loss estimated at $2,000; origin unknown.

Sarnia, Ont.—Lumber yards of Mr. W. F. Lawrence destroyed, also Lebel-Turnbull Company and Mr. McGibbon; 7,000,000 feet of lumber burned; loss estimated at $265,000; origin, supposed grass fires.

Galt, Ont.—Stump fences along the Clyde road caught fire from sparks from a Canadian Pacific engine, and before the farmers could get the fire under control a ten-acre wheat field belonging to Mr. Bailey was consumed. The loss will be heavy.

St. Mary's, Ont.—Barns of Messrs. W. Moffit and Donald McLetton, in Blanchard, destroyed; loss unknown; origin, lightning. Barns of Mr. Charles Barnett destroyed; loss unknown; origin, lightning. Planing mill of Messrs. Brown & Company damaged; loss about $1,000; origin unknown.

Winnipeg, Man.—Grand Stand at exhibition grounds destroyed; loss about $75,000; origin unknown. The following companies are said to be interested:—Hudson Bay Company, Brandon Fire, Columbia Fire, London Mutual, Anglo-American, Montreal Canada, Millers' National, Michigan Millers' Mutual, Liverpool Victoria, Rimouski, Lumber Insurance, Winnipeg Fire Insurance, Central Canada, Ottawa Fire Insurance Company, Montmagny Company, Ontario Fire.

Hamilton, Ont.—Broom factory of Messrs. Walter Woods & Company damaged; loss unknown; origin, boys playing with matches. Grand stand at Jockey Club destroyed; loss about $125,000; origin, supposed incendiarism. Residence of Mr. Thomas Burrows, Sr., 74 West avenue north, badly damaged; loss about $1,000; origin, careless with matches. Residence of Mr. Wilson, corner of Lock and Main streets, damaged; loss and origin unknown. Pease's barber shop, King William and John streets, badly damaged; loss about $400.

Embrun, Ont.—Village badly damaged; loss estimated at $20,000; origin unknown. The following places were burned:—House of Mr. Menard, Joseph Dore's house and stable, Mr. F. Pellier's harness shop and dwelling, Mr. Benoit's hardware store, house and stable, Mr. Laroque's dwelling and outbuildings, Mr. Joseph Gannault, dwelling, butcher shop and stables, Mr. Wilfrid Loiselle, house and outbuildings, Mr. Gilbert Emard, house partially damaged.

Montreal, Que.—Dominion Cloak Manufacturing Company, 240 Lemoine street, destroyed; loss about $12,000; origin unknown. Steamer "Manchester Corporation," Jacques Cartier pier, badly damaged; loss and origin unknown. Martin-Senour, Limited, varnish factory, corner of Drolet and Mount Royal east, badly damaged; loss and origin unknown. Rear of 26 St. Justin destroyed, also motor boat; loss unknown; origin, gasoline. 577 and 581 St. Dominique street badly damaged; loss and origin unknown. Cold storage plant of Messrs. Gunn, Langlois & Company, St. Vincent and St. Amable streets, badly damaged; loss unknown; origin, supposed defective wiring.

Toronto, Ont.—Don Rowing Club, Cherry street, destroyed; loss and origin unknown. Building of Farmers' Feed Company, Don Esplanade, badly damaged; loss about $2,000; origin unknown. 82 Cumberland street damaged; loss about $400; origin unknown. Storage warehouse of Mr. Elias Pullen, Bathurst street, badly damaged; loss about $5,000; origin unknown. 41 Alice street and rear of 36 Trinity square damaged; loss about $1,000; origin, paper blaze. Residence of Mrs. L. Banks, 52 Blair avenue, damaged; Mrs. Banks fatally burned; loss unknown; origin, upset lamp. Victoria College damaged; loss about $3,000; origin, lightning. Lower floor of Messrs. Jones Brothers factory, Richmond street, badly damaged; loss about $4,500; origin, spontaneous combustion.

Eganville, Ont.—Town destroyed; loss estimated at $300,000; origin unknown. The following are the principal losses with insurance carried:—John Childerhose, woolen mill, creamery, residence and business block, $25,000; insurance $4,000. Mr. Alex. Mills, general store, storehouse and residence, $24,500; insurance, $7,000; saved $1,000 stock. Mr. J. Ferguson estate, roller mill, $30,000; stock, wheat and flour, $13,000; insurance, $15,000. Mr. John Channonhouse, drug store, business block, residence; loss $18,000; insurance, $2,800. Mr. C. McElligott, hotel, $15,000; insurance, $4,000. Mr. R. Reeves, residence, store, stables and business block, loss $10,000; partly covered by insurance. Mr. James Reeves' estate, business block, laundry and hall, loss $7,000; partly covered by insurance. Mr. James Guthrie, store and residence, loss $15,000; insurance, $5,000. Mr. M. J. McCann, machine shop, harness shop and residence, loss $7,000; insurance, $1,000. Mr. J. D. McRae, saw mill, block, electric light plant, loss $10,000; insurance, $2,500. Mr. Albert Luloff, residence, store and stock, $10,000; insurance, $3,000. Mr. William Luloff, store, stock and residence, loss $5,000; insurance, $1,000. Anglican church, parish hall and rectory, loss $10,000; covered by insurance. Presbyterian church and manse, loss $10,000; covered by insurance. New school in process of building, loss $6,000; covered by insurance. Star Enterprise newspaper plant and stock, owned by Mr. D. A. Jones, loss $3,300; insurance, $1,100. Eganville Leader, owned by Mr. P. McHugh, loss $3,000; insurance, $500. Methodist church and parsonage, loss $12,000; insurance, $8,000. Dumais sash and door factory, loss $7,000; insurance, none. Old public school, loss $5,000; insurance, $3,000.

NORTHERN ONTARIO FIRE SWEPT.

Worst Catastrophe in Ontario's History—Some of the Mines Destroyed—Loss Estimated at Two Million Dollars.

Property loss estimated at $2,000,000.
Towns destroyed, Cochrane, South Porcupine, Kelso, Pottsville.
Territory burned eight miles wide.
Relief fund amounts to $24,000.

As a result of the recent heat wave and lack of rain Northern Ontario was fire swept this week.

From North Bay northward for three hundred miles and covering a wide section east and west flames carried on their work of destruction and death, and miners, prospectors and settlers are in a desperate plight, for supplies, buildings and equipment have been destroyed by fire.

The town of Cochrane, at the junction of the Temiskaming & Northern Ontario Railway and the Transcontinental, was levelled to the ground, and the inhabitants are in urgent need for food and shelter. South Porcupine and Pottsville have been destroyed. Golden City was visited by fire, but the greater part of the town has been saved thus far, only the outskirts being burned.

The south part of Tisdale has been swept clean, and other townships have suffered severely. All the mining camps from Dome to Whitney Township have been burned. Hundreds of people, men, women, and children, were forced to rush into lakes and streams to seek refuge from the intense and blistering heat of the conflagration.

Some of the Mines Destroyed.

The estimated number of dead, so far reported, is placed at 300, but may possibly reach 500, and only three of the eighty-four employees of West Dome have been accounted for. A partial list of the mines destroyed is as follows:—Dome Mines, all of the buildings except Manager Meek's house; loss $800,000, includes all shaft houses, new forty-stamp mill almost completed, and large up-to-date compressor plant. North Dome Mines, loss $50,000, plant and camps. Preston East Dome, loss $150,000, plant and camps. Vipond, loss $100,000, plant and camps. Foley-O'Brien, total loss estimated at $100,000. Philadelphia Mines, loss about $50,000. United Porcupine Mines, loss $20,000. Eldorado Porcupine, small buildings destroyed. Standard, loss about $40,000. Imperial, loss about $35,000. Success, probably destroyed. West Dome Mines, plant and all buildings; loss about $75,000.

Railway Company Issue Official Statement.

An official statement issued by the Temiskaming & Northern Ontario Railway at North Bay places the number of lives lost and actually accounted for at 87, but the general opinion is that this is an exceedingly low estimate. Provincial Police Constable Fred. Lefebvre, who was in Porcupine said that he thought at least 500 lives were lost in the awful holocaust. The following places have been almost completely destroyed:—Cochrane, South Porcupine, Pottsville and Kelso. A strip of country eight miles wide, extending north-east from Porcupine Lake, has been laid low and charred. Mines, homes, shops and forest, all fell before the terrific cyclone-driven blaze. Since Tuesday night trainloads of refugees have gone down from Porcupine and Cochrane to points south.

Those escaping with slight injuries or none have gone through to North Bay to be carried free of charge by the Canadian Pacific Railway and Grand Trunk Railway to their destination. Those more or less severely injured were taken to hospitals in Haileybury, Cobalt, Liskeard and North Bay.

About one thousand people left Porcupine on Thursday, and everything was reported as quiet. All the townships in the district have been completely fire-swept. Pearl Lake, Bewick-Moreing, and McIntyre are the only big mines saved.

WINNIPEG TITLES & MORTGAGE COMPANY.

A considerable proportion of the Winnipeg Titles & Mortgage Company's offering of 500 shares of 8 per cent. preferred stock, has been subscribed. The stock carries a bonus of one share of common for every four shares of preferred stock purchased. The company's authorized capital is $100,000. This corporation was formed with the object of affording a conservative and easy means for the small investor to become interested and reap benefit from increasing values in Winnipeg.

The directors are T. S. Matheson, grain broker; F. C. Hamilton, financial agent; N. J. Black, of the W. Sanford Evans Company, all of Winnipeg, and J. Fleming, Mayor of Brandon.

WE OWN AND OFFER AT 98½ AND ACCRUED INTEREST, TO YIELD ABOUT 6⅛%, THE UNSOLD BALANCE OF

$525,000.00

International Milling Company of Canada

Limited

(Incorporated under the Companies Act, Canada)

6% COLLATERAL TRUST AND REFUNDING MORTGAGE BONDS

Dated 1st June, 1911. Due 1st June, 1931.

Principal and semi-annual interest (1st June and December), payable at the Merchants' Bank of Canada, Toronto and Montreal.

DENOMINATIONS—$100, $500 and $1,000

Redeemable as a whole at 105 and accrued interest on any interest date.

TRUSTEE

INVESTMENT TRUST COMPANY, LIMITED, MONTREAL

STATEMENT OF CAPITALIZATION

	Authorized.	Outstanding.
Common Stock	$2,500,000	$1,279,000
Preferred Stock	3,500,000	1,995,400
Bonds	2,000,000	
In Treasury	250,000	
Redeemed July 1st	18,000	1,732,000

Of the issued bonds $1,207,000 are to be held in escrow to retire underlying bonds.

PURPOSES OF COMPANY:

The International Milling Company of Canada, Limited, will operate as a holding company, and has acquired all the outstanding shares of the International Milling Company of Minnesota, and over 80 per cent. of the shares of the Canadian Cereal & Milling Company, Limited. The above companies own and operate thirteen flour and rolled oat mills, located as follows: Three in Minnesota, U.S.A.; one in Iowa, U.S.A.; one in Moose Jaw, Saskatchewan, Canada, and eight in the Province of Ontario, Canada. The combined daily capacity of these plants is 9,000 barrels of flour and 3,000 barrels of rolled oats. The companies' plants are situated at points that will permit them to take the greatest advantage of the markets both of Canada and the United States, as well as of the foreign markets of Great Britain and European countries.

SECURITY BEHIND BONDS:

The Collateral Trust and Refunding Mortgage bonds now offered are secured by the transfer to the Trustee of all the Shares of the International Milling Company of Minnesota, and over eighty per cent. of the Shares of the Canadian Cereal & Milling Company, Limited. The remaining Shares of the Cereal Company as they are acquired will be deposited with the Trustee, and become subject to the Mortgage. When the balance of the Cereal Company's Shares are acquired these bonds will constitute a first lien on all the assets of the Company now owned or hereafter acquired, subject only to $1,207,000 underlying bonds, which are being annually redeemed by Sinking Fund.

The total value of the fixed and liquid assets of the above companies which constitute the International Milling Company of Canada, Limited, is $3,500,000, or twice the amount of bonds outstanding.

EARNINGS:

The net profits of the constituent companies for their last fiscal year according to the audit of Messrs. Marwick, Mitchell & Company for the International Milling Company, Limited, of Minnesota, and of Messrs. Riddell, Stead, Graham & Hutchison for the Canadian Cereal & Milling Company, Limited, before allowing interest on borrowed money, but after allowing for extraordinary expenditures, repairs, renewals, etc., amounted to $414,194, or about four times the interest requirements on the outstanding bonds.

The earnings for the past year show the position of the company as follows:—

Net Profits of constituent companies for their last fiscal year, before paying interest on borrowed money..............	$414,194
Bond Interest	103,920
Surplus Earnings	$310,274

It is expected that the consolidated companies will effect economies and increase business in a way which was not possible for the individual companies acting independently, and the present management estimate the net profits should run from $350,000 to $500,000 per annum.

MANAGEMENT:

The men who have made the management of both companies particularly successful in the past will continue at the head of their respective companies, and the Board of Directors will include five practical milling men. The latter are J. D. Flavelle, of Lindsay, Ont., President of the Canadian Cereal & Milling Company; F. A. Bean, of Minneapolis, President of the International Milling Company; George E. Goldie, Vice-President and Managing Director of the Canadian Cereal & Milling Company, Limited, and W. L. Harvie, Secretary, and F. A. Bean, Jr., Vice-President, respectively of the International Milling Company.

We would be pleased to forward special circular giving full particulars regarding the Company.

Owing to the unsold portion of the bonds being limited, applications should be made as early as possible, in order to ensure allotment. Orders may be telegraphed at our expense.

INVESTMENT TRUST COMPANY, Limited

MONTREAL TORONTO LONDON, ENG.

UNCLAIMED BANK BALANCES.

The Dominion Government report of the unclaimed balances, dividends, drafts and bills of exchange remaining unpaid, is a volume of over 800 closely printed pages of names, dates and amounts. The total amount of unclaimed balances, etc., held by the Canadian chartered banks is shown as $681,193.69. The majority of the amounts are small. For instance, the Bank of Hamilton shows several instances of unclaimed balances of one cent, being held in one case since 1879.

The publication of the unclaimed bank balances is good, but it seems unreasonable to require banks to carry forward from year to year such small amounts which in all probability will never be claimed. The actual expense of continually transferring these balances from ledger to ledger must have long since offset more than the value of the balance.

In Great Britain the banks are not required to report to the government the amount of unclaimed balances held by them. During 1908, Mr. Bottomley, M.P., endeavored to introduce a bill to provide for the disclosure and handing over by bankers to the department of the Public Trustee of the amount of dormant balances and securities in their possession and of unrepresented old bank notes issued by them. He said the object of the bill was to bring into the possession and control of the State the vast amount of wealth which was lying idle, and in many cases entirely unproductive, in the vaults and strong rooms of the various banking institutions of the United Kingdom.

The following table shows the amount of unclaimed balances held by the various Canadian banks:—

Name of Bank.	1909.				1910.			
	Unpaid Dividends.	Unclaimed Balances.	Unpaid Drafts or Bills of Exchange.		Unpaid Dividends.	Unclaimed Balances.	Unpaid Drafts or Bills of Exchange.

CANADA BREAD COMPANY.

Bond Issue to be Made at an Early Date—Death of Mr. Robert Meighen.

Monetary Times Office,
Montreal, July 13th.

Local capitalists are discussing the merits of the flotation of the Canada Bread Company, Limited, which is now nearing completion in Toronto. It was at first thought that two local bakeries would be included in the organization, but this will be limited to Stuart's Bakery alone. This, with Boyd's, of Winnipeg; Bredin's, Tomlin's, and Weston's, of Toronto, will make up the combination which will be the biggest and first of its character in Canada.

Details give the following preliminary arrangements regarding the capitalization:—

Common Stock	$2,500,000
Preferred 7 per cent. Stock	1,500,000
	$4,000,000
1st Mortgage Sinking Fund, 6 per cent. Bonds	1,250,000

Nothing absolutely authentic is yet known regarding the assets of the constituent companies and the earnings of the past, but preliminary estimates have fairly established that the fixed assets will amount to not less than $900,000, exclusive of goodwill, etc. Against this will be the bond issue. Upon commencing business the company will have in the treasury in the vicinity of $1,000,000 in cash. This will be used for carrying on the business, and for making extensions, and improvements to plants.

The earnings of the five plants during the last year aggregate in the vicinity of $140,000, and it has been estimated by one of the most experienced of the organizers of the concern that, with the advantages which will accrue from concentration of management and the systematizing of the business, the profits of the near future will equal $260,000 per annum. Probably this is based upon the output of one million loaves per week, which it is the intention of the management to reach as quickly as possible. Accepting the earnings of the past, we have the following:—

Aggregate Earnings of Constituent Companies, last year, at least	$140,000
Interest on $1,250,000 Bonds at 6%	75,000
Surplus	$65,000

The earnings of the past, according to preliminary estimates, are sufficient to meet the bond interest nearly twice over. No issue of preferred or common stock other than the bonus which will accompany the bonds is being made at present. There will shortly be made an offering of $1,250,000 bonds at 98½, a bonus of 25 per cent. of common stock being included in the purchase. Already a very considerable portion of the bonds have been underwritten, so that the quantity remaining for the public will be considerably less than the total issue.

Death of Mr. Robert Meighen.

The sudden death of Mr. Robert Meighen was announced this morning. In many years no announcement has caused an equal amount of gloom in the financial and business circles of the city.

Mr. Robert Meighen was an Irishman by birth. He came to Canada when but a youth, and with his family settled in the vicinity of Perth, Ont. Here, as a young man, he began his business career in the general store busi-

Essential Features of The Campbell-Thompson Issue of Campbell Flour Mills Stock

Capable Management Growing Market for Product
Net Profits Future Prospects

MANAGEMENT
The long experience and careful management of the Campbell Flour Mills has resulted in further expansion.

MARKET
Not only is the home market increasing rapidly, but the foreign demand for Canadian flour is growing each year.

EARNINGS
In this particular the results show the Campbell Flour Mills stock to be an **absolutely safe** investment. The Toronto mill earns sufficient in nine months to pay a dividend on the whole of the preferred stock. This will leave the earnings of three months from the Toronto mill, as well as the profits from the Peterboro' and Midland Mills to pay dividends on common stock.

PROSPECTS
Wheat-growing in Canada is only in its infancy, and with a crop of 200,000,000 bushels in sight and the fast increasing demand in foreign countries for flour ground from Canadian wheat, the milling industry will increase by leaps and bounds.

The company owns about three acres of valuable property in the city of Toronto. The books will be closed July 17th.

Campbell, Thompson & Co, 43 King St. W., are offering the stock and will supply prospectus on request.

Application forms on request. Subscription books close not later than July 17th.

Campbell, Thompson & Company
43 King Street West, TORONTO

ness. From the beginning, his success was assured. He accumulated money rapidly, and the business prospered.

His entry into the larger fields of Canadian business life began along about the time of the start of the C.P.R. Mr. Meighen's brother-in-law was Mr. George Stephen, now Lord Mount Stephen, who took such a prominent part in the building of Canada's first, great transcontinental railway. In this association, also, Mr. Meighen began to take the prominent place in the business life of the country which he of late years has occupied.

The time came in the building of the railway when it became necessary to pay more attention to the creation of freight. In this connection the Lake of the Woods Milling Company was formed, Mr. Meighen being, almost from the start, its chief officer. The company was the second of the large Manitoba wheat milling industries to be formed in Canada.

Mr. Robert Meighen has not confined his attentions to the Lake of the Woods Company, although he has made a success of that concern. He has taken, almost all his life, a keen interest in public affairs.

He was a millionaire several times over, having large holdings in many parts of Canada, besides being the owner of stocks in practically all the prominent public utility and other industries of the country. A few years ago he was appointed a director of the Canadian Pacific Railway, which appointment he looked upon in the light of a high compliment. Besides this, he was on the board of management of several concerns, including the Bank of Toronto, and other financial concerns.

◆

MINERAL SPRINGS INVESTMENT OFFERING.

The Stanley Mineral Springs Company, of Winnipeg, has been organized to take over the business and assets of the Stanley Springs in Western Ontario. The company's authorized capital is $200,000 and the present issue is of $100,000. in the shape of 1,000 shares of 7 per cent. cumulative preference shares, together with a bonus of 50 per cent. of common shares. The company's springs are located on the Canadian Northern Railway, 19 miles west of Port Arthur, and are thus admirably situated to supply both eastern and western trade. They produce ginger ale, mineral water and other aerated beverages. The reason for the reorganization of the concern is to finance operations in Eastern Canada. A branch office will be opened in Toronto in January.

Mr. Hugh Sutherland is the president of the company and Mr. John Galt, vice-president. Among the directors are also Hon. R. P. Roblin, J. G. Carroll, D. E. Sprague, F. S. Wiley and G. Whalen. Sir Donald Mann is a shareholder.

The company has issued a complete prospectus which should give the prospective investor an idea of the merits of the proposition. Under capable management, a good business should be built up. The amount of $10,889 is estimated as available for dividends, figured on the basis of 33⅓ per cent. of the factory's capacity.

Trethewey	35.3
Total	2,194.3

The total shipments for May were 1,987 tons.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Port Arthur, Ont.—The city may issue debentures for $635,000 to cover overdraft.

Peterboro, Ont.—The ratepayers will probably vote on a $24,000 by-law to purchase property for park purposes.

Cardston, Alta.—Until July 25th, tenders will be received for $27,000 6 per cent. 40-year debentures. Mr. Thos. C. Rowberry, secretary-treasurer.

Kingston, Ont.—The city will be asked to guarantee the interest on $100,000 bonds of Messrs. Carsley & Company, for new hotel, etc.

Toronto, Ont.—The city council have approved of issue of general debentures to the value of $754,173 for waterworks purposes.

Diamond City, Alta.—Until July 21st, tenders will be received for $4,000 6 per cent. 10-year debentures. Mr. R. Loughton, Secretary-Treasurer.

Whitewood, Sask.—Until August 1st, tenders will be received for $6,000 5 per cent. 30-year debentures for cement sidewalks. Mr. C. S. Barker, Town Clerk.

Windsor, Ont.—On July 24th, the ratepayers will vote on the following by-laws:—$50,000 for new waterworks intake and $11,000 for modern motor fire apparatus.

Ottawa, Ont.—The following by-laws have been passed by the council:—$1,721.21, for widening streets, $220,000 for construction of main drainage system.

Welland, Ont.—The following debentures are advertised for sale:—$75,000, waterworks system; $22,000, new school; $17,489, cement sidewalks; $12,109, sewerage.

Victoria, B.C.—The ratepayers will vote on the following by-laws:—$50,000 for additional street lights, $160,000 for protection of foreshore at the Ross Bay Cemetery.

Bancroft, Ont.—On July 24th, the electors will vote on the following by-laws:—$5,008 for school purposes, and $4,000 for concrete sidewalks. Mr. G. L. Jarman, clerk.

Niagara Falls, Ont.—On July 24th, the ratepayers will vote on the following by-laws:—$65,000 for construction of trunk sewers, $15,000 for improvements, etc., to city hall.

Trail, B.C.—Until July 17th for $250,000 6 per cent. 20-year school debentures. W. E. B. Monypenny, city clerk. (Official advertisement appears on another page).

Welland, Ont.—Until July 24th, for $130,598.63 4½ per cent., 10 and 30-year debentures. J. H. Burgar, town treasurer. (Official advertisement appears on another page).

Ottawa, Ont.—Until September 14th for $85,000 40-vear, $343,500 30-year, and $160,500 20-year debentures. C. Hopewell, Mayor. (Official advertisement appears on another page.)

Edmonton, Alta.—On July 17th, the ratepayers will vote on the following by-laws:—$55,000 for nurses' home, and additional equipment for city hospitals, and $100,000 for street paving.

Ste. Anne de l'Eglise S.D., No. 1254, Man.—On July 20th, the ratepayers will vote on a by-law to issue $6,000 5 per cent. 20-year debentures. S. R. Magnan, secretary-treasurer, Ste. Anne.

Melville, Sask.—Until July 20th for $90,000 5 per cent. 30-year sewer, electric light and waterworks debentures. John Crow, secretary-treasurer. (Official advertisement appears on another page).

Drayton, Ont.—On July 21st, a by-law to raise $4,400 for loan to Canadian Flax Mills, Limited, to grant free site and partial exemption from taxation, will be voted on by the ratepayers. Mr. A. C. Woodman, Village Clerk.

Nanaimo, B.C.—The three by-laws voted upon by the ratepayers resulted in the sewerage extension by-law to raise $50,000, and the British Columbia Hydraulic Power Company agreement being endorsed, and the Agricultural Society loan by-law to raise $5,000 being defeated.

Red Deer, Sask.—The following by-laws have been passed by the ratepayers:—$15,000 for waterworks extension, $12,500 waterworks extension through land recently acquired, $7,000 for sewer system, $3,000 for grading streets, etc., $6,000 for cement sidewalks, $600 for isolation hospital.

Calgary, Alta.—The following by-laws have been passed by the ratepayers:—$55,000 for street railway tracks, the ratification of the agreement between the city and the Canadian Pacific Railway relative to the construction of the big hotel and the changing of the boundaries of the different wards owing to the extension of the boundaries.

Saskatchewan.—The following villages have been empowered to borrow money. The particulars are given in order, name of village, amount, and name of the secretary-treasurer:—Belle Plaine, $800, R. McDonald; Stoughton, $7,000, E. R. Cornell; Alsask, $2,000, W. Quinn; Sheho, $2,000, F. R. White; Brownlee, $4,000, W. J. Wallace; Cupar, $4,000, H. W. Ford; Shellbrook, $8,000, J. M. Speechley.

IN THE BOND MARKET.

Sherwin-Williams Issue Over-subscribed—Bill to Prohibit Trust Companies Doing Brokerage Business Introduced at Washington.

The statement of liabilities issued by the Montreal Water & Power Company shows a total of $6,416,145.25. The assets exceed this by $32,822.26.

The statement of assets and liabilities is as follows: Liabilities: Share capital, authorized, $1,160,000; issued and outstanding, ordinary shares, $28,000; preferred shares, $50,000; St. Cunegonde 5 per cent. debentures, $25,000; prior lien 4½ per cent. bonds (authorized £1,000,000), in hands of trustees for future capital expenditure, £250,600; issued and outstanding, £749,400; total, $3,647,079.96. Five per cent. non-cumulative securities, dependent up to 1912 on net income, $1,074,596.50. Amount due to municipalities payable in from 5 to 20 years without interest, $137,515.18. Amounts earned by contractors on new construction, reservoir, filtration, $188,392.04. Current ordinary liabilities, $41,747.87. Accrued interest and wages, $55,622.76. Reserve accounts for depreciation, $227,328.17. Suspense account, $13,862.77. Balance at credit of profit and loss, $32,822.26. Total liabilities, $6,448,967.51. Assets: Cost of system, franchises, estates, $5,603,741.11. Prior lien, 4½ per cent. bonds in treasury of company, and being part of the $3,647,079.90; issued and outstanding, $225,488.72; discount on and expenses of prior lien bonds issue written off by yearly instalments, $312,191.08. Accounts receivable, $143,978.36. Stable stock furniture, tools, coal, etc., $20,153.33. Pipes, fittings, $22,114.85. Unexpired insurance, $1,358.24. Cash on hand and in bank, $119,938.82; total, $6,448,967.51.

Trust Companies and Brokerage Business.

A bill to prohibit trust companies from issuing statements to the public or depositors, inviting investments in securities and from engaging in brokerage business in stocks and bonds, has been introduced by Senator Newcomb at Washington. Some of the large national banks and trust companies have been especially active in the transaction of stock and bond business of late years and complaints have been made by brokerage houses that they were losing business on account of this activity. There has been little question of the legality of this business, and it has been considered beneficial to the public that banking institutions should engage in this line as being under the control either of the national or state government, there was less liability of loss to the investor than by trading through an uncontrolled firm. On the other hand, it is argued that firms that make a business of studying market conditions are in a better situation to advise their customers than banking institutions.

Sherwin-Williams Issue Heavily Over-Subscribed.

The announcement was made by Mr. J. W. McConnell that owing to the large amount of applications received in response to the offering of preferred stock of the Sherwin-Williams Company of Canada, Limited, a heavy reduction was necessary on all subscriptions for more than twenty-five shares. The small subscriptions, for ten shares and under, were allotted in full. Over 550 applications for amounts varying from one to three hundred shares each were received, thus making an average allotment of 25 shares on the total of $1,500,000 preferred stock placed in Canada. The response to this issue has been gratifying, making it one of the most successful ever offered the Canadian investor.

TOOKE BROTHERS, LIMITED, PURCHASED.

Mr. G. P. Grant, of the Dominion Bond Company, Toronto, and Mr. H. P. Robinson, of the Atlantic Bond Company, St. John, N.B., have completed arrangements for the purchase of Messrs. Tooke Brothers, Limited, who are recognized as one of the largest manufacturers of men's furnishings in Canada. The company has factories at Montreal, and Lachine, and warehouses at Halifax, St. John, N.B., Quebec, Toronto, Winnipeg, and Vancouver. The firm was originally started in 1870.

There will be no change in the management of the company, but there will be an increase in the capitalization to take care of future extensions. No public issue of bonds is to be made.

Three bids were received for the $3,500 4½ per cent. 10-year debentures of Elora, Ont., which were awarded to the Elora Lodge of Oddfellows.

Thirteen offers were received for the Galt, Ont., $25,000 20-year 4½ per cent. debentures. The award was made to the Ontario Securities Company, Toronto.

CABLED NEWS FROM LONDON.

(Cable Correspondence by special arrangement with The Montreal Star).

London, July 6th.—A fresh issue of bonds of the Northern Light, Power & Coal Company is expected.

These will rank ahead of those outstanding which have fallen in price since September from 89 to 55. The new proposal for a new issue is in connection with the scheme for reconstruction of the entire undertaking.

Applications have been made to the Stock Exchange to list Ontario Government £500,000 4's, and Canadian Car & Foundry £15,000 6's.

July 7th.—By the aid of a magnifying glass, very small type on the back of a recent prospectus of the Dominion Saw Mills and Lumber Company is found to disclose the fact that no less than 12½ per cent., allowing for a price of 97½, was paid to those who carried the operation through, namely, underwriting commission 3 per cent., over-riding 2 per cent., procuring fee 1½, issuing fee 1 per cent.

The same mass of small type, which is published to comply with the Companies' Act of British Columbia, gives details of other contracts connected presumably with an earlier bond issue, an underwriting commission of 50 per cent. in cash and 250 per cent. in common stock appears to have been paid.

July 7th.—At last Canada scores a success with a municipal issue.

Recent municipal loans have been left in the hands of underwriters to the extent of 50 and 75 per cent. of the total, but the city of Edmonton issue of £302,000 4½ per cents., at 103, through Sir W. M. Aiken's organization, has proved an exception. It is officially stated that it is already oversubscribed.

The underwriters got nothing in reply to the question "how was it managed," except the official reply, "by hard work."

July 8th.—Regarding recent rumors about Erie and Canadian Pacific Railway, the Financial News says: "A Canadian authority asserts that Erie is a widely distributed stock, and is held largely on margin and borrowed money. The control may be had in the open market if there are people who really want it."

July 11th.—Friends of the Hudson's Bay Company say there will be no changes in the directorate.

Lord Strathcona's speech at yesterday's meeting of the company shows how completely he is identified with the affairs of the company, and how fully he holds the confidence of the shareholders.

The only points of criticism raised at the meeting were directed towards Mr. Burbidge, the new director.

One shareholder said: "This year the shareholders find that £400,000, instead of being divided among them as dividends, is being kept back, presumably for the benefit of the stores. We all hold Mr. Burbidge responsible for that."

Mr. Burbidge in reply said he had nothing to do with the big sum carried forward other than as one of the directors, but he quite concurred that it was the right thing to do.

Mr. Thomas Skinner, deputy-governor, said with reference to the modernizing of the company's store business, that, unless they advanced with the times, their store business would die out.

◆

CLEARING HOUSE RETURNS.

REGINA'S RECENT BOND ISSUE.

Editor, Monetary Times.

Sir,—In your issue of Saturday, June 24th, 1911, I note an editorial comment to the effect that you take the opportunity of criticizing the principle involved in the letting of street railway bonds by the city commissioners of Regina.

Regarding this matter, I have to say that the highest and most acceptable tender for the city debentures was from the firm of Nay & James, and that two of the conditions of their tender was that no other debentures should be offered by the city for three months from date, and that no bonds for street railway or other purposes be issued.

The city commissioners decided to place the debentures with Nay & James, but found the condition regarding the street railway bonds somewhat objectionable. In the interests of the city they asked Messrs. Nay & James to withdraw the condition regarding street railway bonds and the firm consented to do this. The question of the decision as to who should get the city debentures was not affected in any way by this action on their part, and we, therefore, cannot see how any principle involved in the letting of these debentures can be objectionable.

Tenders are very seldom received by us on any particular work but what some explanation of the tender is necessary, and the commissioners cannot see that they have established any objectionable precedent by their action regarding these debentures.

I hope this will put the matter in the proper light, as we do not wish to have any misconstruction placed on our action in the matter.

Yours, etc.,
A. J. McPherson,
City Commissioner.

Regina, Sask., July 1st, 1911.

[We are glad to print the above explanation which will be accepted by all critics as quite satisfactory.—Editor Monetary Times].

AMERICAN LIFE CONVENTION.

There are ten subjects provided already for addresses and discussions at the annual meeting of the American Life Convention in September, and some of them promise to be of decided interest. One, on "The Power of the Policyholder," is by Robert Lynn Cox, of New York; one upon "The Agent and the Medical Department," by an Indiana man; and another upon "The Agent, His Contract, and His Compensation," by an Illinois man. Then there is a paper upon "Non-participating Business," by a Cleveland man; one upon "Keeping Business on the Books," by a man from Colorado. A Texas actuary, Mr. Cathles, proposes to speak on how much business it is safe for young companies to write during their first years of existence. Considering the plunges and splashes some new American companies are making to get hold of new business, this should be a valuable subject of debate.

WANTED

Advertisements under this heading will be accepted hereafter at the following rates: "Position Wanted" advs., one cent per word each insertion; "Men Wanted" advs., two cents per word each insertion; "Agencies Wanted" advs., two cents per word each insertion. A minimum charge of fifty cents per insertion will be made in every case.

A large and responsible Western Land and Investment Company has sold over a million dollars of First Mortgages to private investors, and has had no defaults either in principal or interest. It would undertake to guarantee to those having money to invest a net return of 6% on the best security the country affords, and the guarantee of company having a capital and surplus of over half a million dollars. Address Box 301, Monetary Times.

LONDON AGENCIES for Canadian Companies or Businesses in **Financial Matters** will be undertaken by The London Agency, Limited, 65 London Wall, London, England.

POSITION WANTED.—Young man wants position in good office. Six years' experience in banking. References and experience furnished upon request. Box 325, Monetary Times.

INSPECTOR WANTED.—Applications invited for Inspectorship of British Fire Office for North-West Provinces. One with some field experience preferred though not absolutely essential, but must have good underwriting training.

Correspondence will be treated confidentially if desired.

Apply stating age, qualifications, etc. P.O. Box 1386, Montreal.

DIVIDEND NOTICES

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED.

Notice is hereby given that a dividend has been declared of One per cent. on the Ordinary shares in the Capital stock of The Mexican Light & Power Company, Limited, payable on the 15th day of July, 1911, to shareholders of record, at the close of business on the 8th day of July, 1911. That the transfer books of the Company for the Ordinary shares be closed from the 10th day of July to the 15th day of July, 1911, both days inclusive.

By order of the Board.

W. E. DAVIDSON,

Toronto, Canada, June 28th, 1911. Secretary.

MEXICO TRAMWAYS COMPANY.

Notice is hereby given that a dividend of One and Three-Quarters per cent. (1¾%), (being at the rate of 7 per cent. per annum), has been declared on the capital stock of the Mexico Tramways Company for the quarter ending June 30th, 1911, payable on the 1st day of August, 1911, to shareholders of record at the close of business on the 17th day of July, 1911, and that the transfer books of the company will be closed from the 18th day of July, 1911, to the 31st day of July, 1911, both days inclusive

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada, New York City, N.Y., Mexico City, Mexico, London, England, and its branches.

The holders of bearer share warrants, on detaching from their share warrant coupon No. 9, and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York City, or London, England, on or after the 1st day of August, 1911, will receive in exchange for each coupon the sum of One Dollar and Seventy-Five Cents ($1.75), representing the amount of the dividend.

By Order of the Board,

W. E. DAVIDSON,

Toronto July 3rd, 1911. Secretary.

CARRIAGE FACTORIES, LIMITED.

PREFERRED STOCK HOLDERS' DIVIDEND NO. 4.

Notice is hereby given that a dividend of 1¾ per cent. for the quarter ended 15th July, 1911, being at the rate of 7 per cent. per annum on the paid-up Preferred Stock of this Company, has been declared, and that the same will be paid on the 31st day of July to the Preferred Shareholders of record on the said 15th of July, 1911.

By order of the directors

W. F. HENEY, Secretary.

PAY-AS-YOU-ENTER CAR CORPORATION.

50 Church Street.

New York, June 17, 1911.

The Board of Directors have this day declared a quarterly dividend of one and three-quarters per cent. (1¾%) on the Preferred Stock of this Company, payable July 15, 1911, to stockholders of record at the close of business July 5, 1911. Checks will be mailed by the Standard Trust Company of New York.

CHARLES S. FIELDSTEEL,

Secretary

THE SHAWINIGAN WATER AND POWER COMPANY.

Dividend Notice.

Notice is hereby given that a dividend of one and one quarter per cent. (1¼%) has been declared upon the Common Stock of the Shawinigan Water & Power Company, for the quarter ending June 30th, 1911, payable July 20th to shareholders of record at the close of business on July 7th.

By order of the Board,

W. S. HART,

Montreal, June 20, 1911. Secretary.

Maple Leaf Milling Company

LIMITED

DIVIDEND NOTICE

NOTICE is hereby given that a Dividend of one and three-quarters per cent. (1¾%) has been declared on the Preferred Stock of Maple Leaf Milling Company, Limited, for the quarter ending July 4th, 1911, payable July 18th, 1911, to shareholders of record July 4th, 1911. Transfer Books will be closed from July 4th to July 17th inclusive.

By Order of the Board,

J. CARRICK

Secretary

FOR RESULTS ADVERTISE IN THE MONETARY TIMES

DEBENTURES FOR SALE

CITY OF TRAIL, B.C.

Tenders will be received for twenty-five thousand dollars ($25,000) twenty year 6% City of Trail school debentures, maturing July 3rd, 1931, up to 8 p.m., July 17th, 1911.

W. E. B. MONYPENNY,
Clerk.

$589,000.00.

City of Ottawa, Ontario.

Debentures for Sale.

Tenders by registered letter only, addressed to "The Chairman Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa, until 3 p.m. on Thursday, 14th September, 1911, for the purchase of $85,000.00 forty-year debentures, $343,500.00 thirty-years and $160,500.00 twenty years.

They are all a liability of the City at large, and bear four per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $73,500.00 thirty year debentures, and the other for the remainder of the debentures, $515,500.00.

All tenders must be on the official form.

The tender for the $73,500.00 must be accompanied with a marked cheque for $1,000.00, and the tender for the $515,500.00 with a marked cheque for $5,000.00.

Accrued interest from 1st July, 1911, must be paid in addition to the price tendered.

The $73,500.00 debentures are in $1,000.00 denominations, principal and interest payable in Ottawa.

The remainder of the debentures will be made in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $73,500.00 can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,
Ottawa, 1st July, 1911. Mayor.

TOWN OF MELVILLE, SASK.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to noon, July 20th, 1911, for the purchase of the following debentures of the Town of Melville.—

30-year Waterworks Debentures	$63,000
30-year Electric Light Debentures	22,000
30-year Storm Sewer Debentures	5,000
Total	$90,000

All debentures are in denominations of $1,000, are payable at the end of thirty years, and dated July 2nd, 1911. They bear interest at five per cent. per annum, payable yearly at the Merchants Bank, Melville. Sask. Offers to be made payable at Merchants Bank, Melville, and to include accrued interest, printing debentures and bank charges. Validity guaranteed by the Municipal Commissioner of the Province of Saskatchewan.

Tenders to be marked, "Tenders for Debentures."

JOHN CROW,
Melville, Sask. Secretary-Treasurer.

TOWN OF WELLAND.

Debentures for Sale.

Sealed tenders will be received by undersigned up to 12 o'clock noon, July 24th, 1911, for four lots of debentures, amounting in all to $130,598.63, bearing 4½% interest, payable half-yearly. Life of debentures, $101,000.00, 30-years and $29,598.63 for 10 years.

Full particulars on application.

The highest or any tender not necessarily accepted.

J. HAMILTON BURGAR,
Welland, Ont. Town Treasurer.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

Seven to One

That is about the ratio. About seven times as many persons are injured as die from all causes yearly. Accidents are a more prolific cause of death than any disease except lung diseases.
Twice as many people are accidently killed as die of old age.
Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

The Prudential Investment Co., Ltd.

Head Office - VANCOUVER, B.C.

Authorized Capital	$2,000,000.
Subscribed Capital	$1,000,000.
Assets of over a Million Dollars.	
Paid-up Capital	$670,000.00.
Reserve	$250,000.00.

Owing to the fact that the ordinary stock of the company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchanges, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C.; or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

THE GREAT-WEST PERMANENT LOAN COMPANY

Head Office - WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. D. Martin, Esq., Wholesale Druggist, ex-President Winnipeg Board of Trade, Director The Canada National Fire Insurance Company; James Stuart, Esq., President James-Stuart Electric Company; E. L. Taylor, Esq., Barrister-at-Law, Second Vice-President Monarch Life Assurance Company, Director the Canada National Fire Insurance Company; F. H. Alexander, Director The Canada National Fire Insurance Company, Secretary.

THE WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

The shareholders of the Pacific Pass Coal Fields, at a recent special general meeting, ratified the by-law passed by the directors for acquiring securities of the Canadian Coal & Coke Company, and for selling to that company securities of Pacific Pass Coal Fields.

FACTORY LOCATIONS

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of June, 1911, incorporating, James Steller Lovell, accountant, William Bain, book-keeper, Robert Gowans, Henry Chambers, William George Flood and Robert Musgrave Coates, solicitor's clerks, Samuel Goodman Crowell and George Hamilton Cassells, solicitors, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of a packing house in all its branches, and to pack, smoke, preserve, can, bottle and prepare for consumption and use, and to buy, sell and deal in all and any products of cattle, sheep, hos, and other animals, and all the by-products thereof; (b) To buy, sell, import, export, improve, prepare, deal and trade in cattle, pigs, poultry, fish, game and live and dead stock of every description, milk, cream, butter, cheese, eggs, sausages, table delicacies, vegetables, fruits, canned and preserved goods and any other commodities, goods or things; (c) To kill cattle, sheep, hogs and other animals, and generally to carry on the business of an abattoir company; (d) To carry on rendering establishments, tallow chandleries and sausage manufactories; (e) To carry on the business of cheese, butter, provision, vegetable, fruit, meat and general supply merchants, butchers, grocers and general provision merchants and dealers; (f) To establish, operate and conduct shops for the sale of all the articles manufactured and dealt in by the company, and any other goods, wares, or merchandise which may be advantageously dealt in, in connection therewith; (g) To carry on the trade or business of wholesale warehousemen, including the furnishing to others of both cold and dry storage facilities; (h) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; (i) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (j) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations, and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on or any business similar thereto, or possessed of property suitable for the purposes of this company' business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (l) To raise and assist in raising money for and to aid by way of bonus promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (o) To amalgamate with any other company having objects similar to those of this company; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any companies; (q) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking (r) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The William Davies Company, Limited," with a capital stock of two million dollars, divided into 20,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

PORT MANN

Port Mann has been officially announced as the Pacific Coast termina of the Canadian Northern Railway Company's transcontinental line. We hold large tracts of land at this point, within the area selected by the railway company for its townsite. We would be pleased to send you reliable maps and general information relative to this new scene of developmentin British Columbia. As one of the pioneer investors at Port Mann, we believe you will be well advised to consult us before making any investments at this place.

With branch offices in various parts of the Province we are in touch with many good opportunities for investments that you might care to hear about.

LIFE ASSURANCE COMPANIES

First British Insurance Office Established in Canada, 1804

INTENDING ASSURERS
Should read the "THREE MINUTES" Leaflet of the
PHOENIX ASSURANCE CO., Limited
OF LONDON, ENGLAND (Founded 1782).

Copies of this and full information regarding the Company's system, its equitable principles and liberal policies, may be obtained at the Head Office.

100 ST. FRANCOIS-XAVIER STREET, MONTREAL

The Company offers to the Public every advantage which
LIFE ASSURANCE
conducted under the most favorable conditions is capable of affording.

At the BONUS DIVISION for the five years ending 31st DECEMBER, 1910,

(1) A UNIFORM ADDITION of $85 per $1,000 was declared on all classes of Full-Bonus Policies.

(2) A GUARANTEED BONUS was also declared of $12.50 per $1,000 per annum on Full-Bonus Policies becoming claims by death, and $17 per $1,000 per annum on Endowment Assurances maturing before 31st December, 1915. These bonuses apply to new as well as existing policies.

H. B. F. BINGHAM, Life Superintendent.
R. MacD. PATERSON, J. B. PATERSON, Joint Managers.

AGENTS WANTED

The London and Lancashire Life and General Assurance Association, Limited,
of London, England,

offers excellent opportunities to young men desirous of permanently connecting themselves with a thoroughly reliable life company.

HEAD OFFICE FOR CANADA
164 St. James St. Montreal

The Quebec Bank will locate a branch in Vancouver, B.C., at an early date.

A branch of the Flexible Conduit Company, of Penn Yan, N.Y., will be located at Guelph.

The capital of the Trethewey Silver Cobalt Mines, Limited, has been increased from $1,000,000 to $2,000,000.

The North American Smelting Company will erect a smelter at Kingston, Ont., at an early date. The smelter will cost about $36,000.

The North British Rubber Company, Limited, of Edinburgh, Scotland, may locate a branch in Calgary at an early date.

THE CHIEF DIFFICULTY
that confronts the new man entering the Life Insurance Field is the securing of GOOD PROSPECTS. This difficulty is eliminated when you write for an INDUSTRIAL COMPANY, the debits of which are an inexhaustible mine for both ordinary and industrial business.

BANQUE INTERNATIONALE DU CANADA.

In our issue of July 1st, through a typographical error, we spoke of the Banque Nationale du Canada. This should have been the Banque Internationale du Canada. We regret the error. The following is the official list of directors: Mr. Stanislas Badel, of Messrs. Frères & Company, bankers of Paris, Paris; Mr. R. Bickerdike, member to the federal parliament, ex-vice-president of the Bank of Hochelaga, Montreal; Mr. S. V. Chomereau-Lamothe, officer of the Legion of Honor, Honorary Governor of the Banque de France, administrator of Credit-Foncier de France, Paris; Mr. Rodolphe Forget, member to the federal parliament, vice-president of the Montreal Light, Heat & Power Company, president of the Richelieu & Ontario Company, president of the Quebec Railway Light & Power Company, Montreal; Sir Georges Garneau, Chevalier of the Legion of Honor, ex-mayor of the city of Quebec, Quebec; Mr. J. N. Greenshields, King Councillor, director of the Wabasso Cotton Company, director of the Quebec Railway Light, Heat & Power Company, Montreal; Mr. Georges Martin, Chevalier of the Legion of Honor, ex-inspector of the Finances, president of the Compagnie Francaise d'Etudes au Canada, administrator of the Cie Génèrale Francaise des Tramways, vice-president of the Confiance-Vie, Paris; Mr. Raoul Saultter, of Messrs. Odier, Sautter & Company, bankers, administrator of the Cie des Phosphates et Chemin de Fer de Gafsa, Paris; Hon. L. O. Taillon, member of the private council of His Majesty, Montreal.

◆

OHIO'S STATE BUILDING LAW.

Ohio has a state building law, and professes to be the only state possessing one, which causes the spectator to say that, if the law is a good one, it is desirable that Ohio's example might well be followed by other states whose lawmakers and citizens desire to conserve the lives and property of their people. It would be well, however, before enacting such laws, if their projectors would consult with the engineers of the National Board of Fire Underwriters, who have done so much towards improving building laws and fire protection all over the Union.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

THE UNIQUE RECORD
of Canada's Oldest Life Assurance Company

ESTABLISHED
in 1847—64 years ago.

THE COMPANY'S AIM
Security and Profit to Policyholders and Beneficiaries. Prompt Settlement of all Claims.

ITS POLICIES
Extremely simple, safe and profitable. Practically free from restrictions. Liberal Guarantees.

ITS SIZE
Over $130,000,000 of Assurances in force resulting from a steady increase of well-selected risks. The Income for 1910 was over $6,945,000.

ITS STRENGTH
Assets over $41,000,000, carefully distributed over a wide variety of high-class securities. Policy Reserves are valued on a 3% and 3½% basis, a higher and stronger valuation than required by Government.

ITS SURPLUS EARNINGS
Each year is showing an increase in Surplus earned, that for 1910 amounting to over $1,233,000, the largest in the Company's history. This is due to a favorable mortality, a low expense ratio and high interest earnings; in other words, good management.

THE RESULT
Since the inception of the Company its Policyholders have been paid or credited with $11,500,000 more than they have paid in premiums. The Profits declared in 1910 were, on a cash basis, 40% greater than at the previous division. The Assets have more than doubled within the past twelve years. The year 1911 shows continued and increasing prosperity.

THIS RECORD BELONGS TO THE
CANADA LIFE ASSURANCE CO.
T. G. McConkey, Superintendent of Agencies. Head Office—Toronto

The Best Paid Hard Work in the World

Life Underwriting has been described as
"The Best Paid Hard Work in the World"
and consequently, one of the most remunerative vocations in which anyone without capital can engage.

THE EQUITABLE LIFE ASSURANCE SOCIETY
OF THE UNITED STATES

has several openings for men who possess organizing ability and who can work up a business from territory at present inadequately developed. Plenty of hard work and commensurate remuneration to those who possess the necessary qualifications

PRUDENT PREPARATION
. . IN YEARS OF PROSPERITY . .

"In your prosperity to-day, remember that lean years must come."—Monetary Times.

The prudent man prepares for the lean years by husbanding his resources during the years of plenty. The easiest, simplest, and safest way to do this is to deposit regularly such portion of your income as is not immediately required, in a strong and stable institution like the Canada Permanent, where it will be available when wanted, and in the meantime will be earning interest. Or, all your receipts may be deposited, and your payments made by cheque.

We credit the account with compound interest at

THREE AND ONE-HALF PER CENT.

THE GRAND TRUNK PACIFIC.

The predicted date of completion of the Grand Trunk Pacific Railway has been changed more than once. Mr. Charles M. Hays, the president of the road, recently spent six weeks inspecting the greater part of the system now under construction. After this visit, he stated the road will be completed from the Atlantic to the Pacific ocean in 1914—a forecast which has the benefit of twelve months' elasticity. From Winnipeg to Edmonton, ninety-five per cent. of the territory on both sides of the new transcontinental is good wheat-growing land. The remaining five per cent. is suitable for grazing purposes. But Edmonton is not the end of the fertile belt in Alberta. For 150 miles west of the provincial capital, there is more excellent land. This fact will in due time help Edmonton considerably. It must naturally become the distributing point for the Peace River region as well as for other large stretches of country, the settlement of which is but a matter of a few years.

Good progress has been made with the section of the road running through the clay belt of Northern Ontario. This is completed a considerable distance both east and west of Cochrane, a divisional point of the Grand Trunk Pacific and the present terminus of the Temiskaming Railway. On both sides of the line again, there is good farming land.

By the time the main line is finished to the port of Prince Rupert, in British Columbia, the company's branch from the port of Montreal to the main line will have been built and ready for traffic. Three charters have been granted by parliament for connecting Montreal with the main line.

The Grand Trunk Pacific will be able to give considerable assistance in the movement of the Western crop this year. The company has elevator facilities at Fort William. Last season they brought over their road 6,000,000 bushels of wheat to Lake Superior. During the coming crop movement, they anticipate carrying 12,000,000 bushels to the head of the lakes. A branch line will tap the coal deposits west of Edmonton, where the mines will be operated by at least three eastern companies. The distance from the coal mines to the main line is about fifty miles, and this track is practically completed.

The road will be practically level from ocean to ocean, the average gradient being four-tenths of one per cent. On completion, the company will take over the eastern section from the Dominion government and will operate it for the first seven years at cost, and after at a rental of 3 per cent. on the cost of construction. The completed Grand Trunk Pacific Railway will be made up as follows:—

Section.	Miles.
Monction to Winnipeg (National Transcontinental, under construction)	1,805
Winnipeg to Edmonton (constructed)............	793
Edmonton to Prince Rupert (part constructed)....	962

The Canadian Northern Railway will probably have a completed transcontinental by the time the Grand Trunk Pacific is running trains from the Atlantic to its sister ocean. Canada will then have three coast-to-coast railway systems.

SOME PRACTICAL WORK

The city of Winnipeg is doing some practical immigration work which might well be emulated by other metropolitan centres from coast to coast Through the medium of the Imperial Home Re-Union Association, the families of British workmen already in Winnipeg are assisted so that they may join the chief wage earner in Canada. The leading business men of the city have united and guaranteed a fund of $20,000 for this good work. The applicant for assistance pays the largest cash amount possible of the total required to bring his wife and family across the ocean. The Re-Union Association, which has Mr. Charles H. Roland, the well known publicity commissioner, as secretary and trustee, then advances the balance and arranges the transportation, the applicant repaying the loan monthly on the best terms possible.

The Association, which has been in existance only eight months, has already dealt with 197 applications, of which 167 have been granted. As a result, the population of Winnipeg has been increased by 870, 167 wives having joined their husbands in the Western Metropolis, with 703 children. At one meeting applications were received for transportation costing in the aggregate $2,070. That money will bring nineteen families from overseas, and the applicants have paid cash deposits totalling $622. In only two cases have those asking for help failed to keep their promise to repay the loans obtained.

In these instances, a wife only, no family was assisted. Mr. Roland thinks these two couples have found a better situation elsewhere in the West and will remain true to their obligation.

From an economic standpoint, the scheme of the Imperial Home Re-Union Association has considerable merit. When the husband is earning in Winnipeg and his wife and family are in England, he invariably sends to the Old Country a monthly payment for the maintenance of his relatives there. At the most conservative estimate, each man would send $25 per month. The 167 wage earners, therefore, whose families have now joined them, were previously sending cash every month to the extent of $4,925 or $59,100 per annum, whereas now that amount will be expended locally. In addition, the re-united families have become greater wage earners and consequent assets to the country in the shape of labor and purchasing power.

As will be seen, the operations of this excellent Association have been eminently successful. The secret of that success would appear to rest largely in the fact that the applications are dealt with by keen business men, who are usually good judges of human nature. Where applications have been rejected there have always been the best of reasons. The meetings remind one of Guardians' gatherings in Great Britain. There the committee's decision usually means for the applicant outdoor relief or the workhouse. In Winnipeg, the committee's assistance means the re-union of a family, the locating of that family in one of the best countries in the world, with prospects of health, a career and prosperity. At the last meeting of the Association it was ascertained that nine of the families who were assisted came from England, eight from Scotland and two from Ireland. Similar associations have been inaugurated in Brandon and at other points in the West. The work is most practical and is to be highly commended.

NORTHERN ONTARIO.

The disastrous forest fires in Northern Ontario have emphasized three important points—the terrible fire waste in Canada, the vast resources of Ontario's Northland, and the irrepressible pioneering pluck, energy and optimism of the people of that country. Unfortunately, the fire hazard there, as elsewhere in the Dominion, is very great. Settlers are sometimes too anxious to clear their land, with the result that a small fire, started to demolish some underbrush, develops into a widespread forest fire. Prospectors are frequently too eager to gain early knowledge of the minerals on their claims, with the result that camp fires spread and bare the rocks, accidently devastating a far larger area than originally intended.

Towns are often in a hurry to look important with buildings and local improvements, overlooking the vital fact that the bush around their community should be cleared so that the possibility of destruction by forest fires is made remote. The Northern Ontario disaster is a reminder that Canada is burning property at the rate of nearly $25,000,000 per annum, and that the greater proportion of this fire waste is avoidable. Carelessness is responsible for more than half the fires which occur in losses help to retard the inflow of British and foreign capital.

Despite the havoc which the flames have wrought in the North of Ontario, the spirit of its men remains. While the ashes of towns are smouldering, the cry has gone forth for new towns and better ones, and their building has begun. The loss of life is the saddest feature, but aside from that, the pioneers of the Northland are not lamenting. Their faith in the country is backed with large undeveloped resources in the shape of excellent farm lands, good timber, rich minerals and extensive water powers. The helping hand which has been stretched towards them is welcome and deserved.

CAPITAL INVESTMENTS IN CANADA

—XI.—

LAND AND LUMBER INVESTMENTS IN CANADA

By Fred. W. Field.

In land and timber properties there is a small amount of British money when compared to the investments of United States interests, although much more British cash is now being invested. The estimate of United States capital in British Columbia mills and timber is $52,000,000. Great Britain's land and timber investments can scarcely exceed in the six years a sum of $24,000,000. The large railroad corporations have been instrumental in selling considerable land areas overseas, while land companies, some with offices on both sides of the Atlantic, have disposed of many thousands of acres.

Timber propositions apparently have been almost monopolized by United States capitalists, when considering money other than Canadian. In real estate, while the British investor does not predominate, he holds large areas in the aggregate, and is buying heavily at the present time. If any provinces are more favored than another by the English buyer they appear to be British Columbia and the Western provinces, although Ontario real estate has also attracted considerable sums. While there is comparatively little English capital in the lumber industry except a few instances where sawmills have been established in connection with pulp manufacturing plants, activity is noticed in the development of fruit lands in British Columbia's interior. These areas are acquired, irrigated and then leased, or sold, in small holdings. This is recognized as a good opportunity for returns. Irrigated lands in Alberta have also met with a large sale. During 1910, the Britisher exhibited greater interest in lumber propositions.

The following is a list of the land and lumber company flotations in London from January, 1906, to April, 1911:—

Land and Lumber

1906.	
Western Canada Land Co.	£ 300,000
Southern Alberta Land Co.	400,000
	£ 700,000
1907.	
Canadian Estates, Limited	£ 215,000
Western Canada Timber Co.	75,000
	£ 290,000
1909.	
British Columbia Fruitlands, Limited	£174,600
Southern Alberta Land Co.	300,000
	£474,600
1910.	
British Columbia Fruitlands	£ 174,600
Canadian Western Lumber Co., Limited	1,500,000
Western Canada Land Co., Limited	300,000
British Empire Timber Co.	500,000
Dominion Sawmills and Lumber Co., Limited	800,000
Swanson Bay Forests, Woodpath and Lumber Mills, Limited	150,000
Canadian Mills and Timber, Limited	100,000
Anglo-Canadian Land Co., Limited	475,500
Dominion Sawmills and Lumber Co.	800,000
	£4,800,100
1911 (to April).	
Canadian Wheatlands, Limited	£ 350,000
North Saskatchewan Land Co., Limited	450,000
Anglo-Canadian Timber Co. of British Columbia	225,000
Columbia River Lumber Co.	600,000
	£1,625,000

Two of the companies, the Southern Alberta and Western Canada, went to the London market twice, the former obtaining a total of £700,000 and the latter

£600,000. Most of the loans were raised in connection with Western lands. Among the purposes of issue were colonizing, fruit land development, saw-milling and lumber cutting.

Appreciation of Real Estate.

The buying of town and city real estate is a growing feature. Britishers own property, in some cases very valuable, in all the leading municipalities. Land purchases for the next few years will probably be confined chiefly to the prairie and the Pacific Coast provinces. Wheat and farming lands will likely be the chief choice in the former, while fruit lands are making the best appeal to British capital in British Columbia.

Undoubtedly the rapid appreciation of real estate in or near growing towns, large and small, is becoming a matter of more common knowledge across the ocean. The manner in which Canada has developed, and is still developing, transportation facilities is one of the most important aids to the increasing value of real estate. The Dominion experiences periodical "booms," which are unhealthy for legitimate speculation and investment. The trouble is that the future is sometimes discounted to too great an extent. Conservative financiers and Canadian bankers generally have in the past acted as an effective check to wild speculation in land. A knowledge of Canadian conditions and possibilities, national and local geography, is obviously essential to the purchase of land which will yield a good return to the investor.

Real Estate and British Capital.

In the past six months a large amount of British capital has been placed into Canadian lands and city and town real estate. A British syndicate purchased for cash three large blocks of Canadian Northern land in Saskatchewan, the deal amounting to more than $2,000,000. Another syndicate has purchased city blocks in many districts in Western Canada, while English and Scotch investors recently secured control for about $500,000 of 250 acres along the Lake Shore Road, Toronto. Another English syndicate has purchased orchards in Ontario and Nova Scotia. The products therefrom will probably be shipped to the London market.

Among recent real estate deals are the purchase of the Dominion Trust Building at Vancouver by English capital for approximately $1,000,000. An English syndicate has also studied the field with the intention of expending $1,250,000 in the establishment of summer hotels throughout the Dominion. Much money is likely to be invested by Great Britain in Canadian real estate during the next few years.

Caution is Necessary.

Mr. H. F. B. Jones, the London manager of the Canadian Bank of Commerce, after a trip through Canada last year, was inclined to the belief that in a great many cases in the West the prices being paid for outside properties is not justified by local conditions. One hesitates to say, with past experiences in view, that these prices will not still advance, but he advocated for British investors the necessity of exercising the utmost caution in speculating in properties outside the towns proper. In several of the large Western centres there probably will be scope for investments in city property for some time to come, but even in this caution is desirable.

Until recently the Americans controlled by far the greatest proportion of timber limits and pulp mills. Early this year British investors purchased timber in British Columbia, one deal involving the sum of $2,000,000, while English capitalists purchased late last year 56,000 acres of pulp-wood limits on the north-west coast of Vancouver Island. Another million dollar deal was consummated about the same time in Canada's Pacific Coast province. An influential financial company, of London, not long ago acquired the Dickie timber limits of Nova Scotia, comprising about 405,000 acres. These are indications of an increasing interest in this line of investment.

Pulp and Paper Industry.

There are great possibilities for the investment of British capital in the pulp and paper industry, Northern Ontario, Quebec and British Columbia particularly possessing the raw materials and water powers. British investors in Canadian pulp and paper producing industries can find much to interest them in the report of the United States Tariff Commission recently submitted to the Senate by President Taft. In regard to the question as to how far American mills are on an equal basis for competition with the Canadian mills in the matter of equipment, the report presents the answer that the total average of equipment and efficiency is slightly better for Canada than for the United States It is declared that in 44 per cent. of the American mills investigated, a condition exists as to machinery and equipment, which would force them, if obliged to meet really extensive competition from Canada, greatly to curtail other expenses, greatly increase their investment for equipment, or shift to making other kinds of paper. The Commissioners find that a ton of news print paper is made in Canada for $5.35 less than it is made in the United States. The average Canadian cost is given at $27.53, and the average cost in the United States at $32.88. The duty upon a ton of news print paper under the present tariff is $3.75. Taking all the items into consideration, as the report enumerates them, the comparative costs follow:—

Costs in Canada and United States.

The total average cost of a ton of ground wood pulp in bulk at a mill in the United States is $14.59; in Canada it is $9.56. The total cost of a ton of sulphite fibre in the United States is $31.39; in Canada it is $26.47. The total materials entering into the manufacture of a ton of news print paper in Canada are shown as $16.89, and in the United States as $22.74. The labour cost of a ton of paper in the United States is shown to be $3.27, and in Canada $3.19. All other allowances for manufacturing costs in the United States are $6.87, and in Canada, $6.45. Labor costs in all the items concerned run very closely alike.

One feature of the report shows that the cost of manufacturing news print paper in the United States varies widely. The lowest cost recorded is $24.50 a ton; the highest is $43. From this the tariff board strikes an average of $32.88. At the Canadian mills the lowest price recorded for producing a ton of news print paper is $24.97, and the highest is $30.18. Average, $27.53.

CANADIAN WOODS IN BRITAIN

Official holidaying and labor troubles have had their effect on the wood trade in the United Kingdom, for a very quiet June is announced. Less consumption is recorded, and the imports have not been at all excessive. In square pine the movement has been slight, prices firm. Neither oak nor elm has been in request. Pine deals showed a usual import; in the Mersey, according to Farnworth and Jardine, the imports of pine and spruce deals from New Brunswick and Nova Scotia for the month amounted to 12,360 standards compared with 10,470 standards the preceding June; stock is somewhat increased but values are maintained. Birch logs in light consumption, stocks moderate but values firm: planks in low supply at steady prices. Stocks of United States oak planks much increased, and prices have further declined. Of United States hickory logs stocks are heavy and prices low. Of ash logs only first class are asked for. The supply of pitch pine are increased but prices have not fluctuated. For Canada butt staves there is a good demand and practically no supply. Of British Columbia and Oregon pine the import of the month amounted to 9,000 cubic feet; values are maintained, and the stock is moderate. California redwood firmly held.

TRADE WITH FRANCE.

Continual Increase in Commercial Relations Between the Two Countries.

The report of the Canadian section of the British Chamber of Commerce in Paris has recently been received by the Department of Trade and Commerce, and the greater part of it is published hereunder, as being of interest to Canadian firms:—

As mentioned in last year's report, the Franco-Canadian Commercial Convention was ratified by the two Governments on February 1st, 1910, but owing to delay on the part of the French Government, it came into operation in France only on the 15th February, upon which date the text of the treaty appeared in the Journal Officiel. The result of the treaty, even in the short period which has elapsed, has been to materially increase the trade relations between the two countries, but the advantage is more particularly noted as regards exports of French products to Canada. The value of these products for nine months, ending December 1st, 1910, is $8,450,196 as against $7,182,861 for the same period in 1909. The Canadian exports to France, although showing an increase, have not increased in the same proportion. The provisional Canadian statistics are as follows:—

Nine months ending December 31st, 1909	$2,049,831
Nine months ending December 31st, 1910	2,137,810

Cause of Difference.

The principal cause for this inequality is the shortage and consequent high prices of agricultural products in Canada, and it is also owing to the apparent neglect of Canadian producers and manufacturers in seeking for a new market in France.

This Chamber has continually urged upon Canadian merchants to take more active steps in pushing the sale of their goods in France, for which there is a demand in certain lines. We have been in continual communication with the Canadian Manufacturers' Association with regard to this matter, and we have been assured of their active co-operation.

We would mention that in the course of the year, this Chamber has received calls from representatives of Canadian houses, and has also received letters of inquiry as to the possibilities of their doing business in the French market. Such inquiries have received our closest attention, and no efforts have been spared to assist the manufacturers in obtaining the information desired, and business has resulted in most cases.

At the end of this report will be found statistics as to the trade between Canada and France during the last eight years, which will convey a very clear idea of the continual increase in their trade relations.

It will be noticed that dating from the year 1906, both imports and exports materially increased, and this date coincides with the establishment of the direct line of steamers between France and Canada.

The treaty which came into operation on February 1st, 1910, will undoubtedly be the cause of a further and lasting impetus to trade, which will be shown as soon as figures can be obtained for a complete period of twelve months.

We have acknowledged our indebtedness to Mr. A. Poindron, Canadian Trade Commissioner for France, for a copy of his very exhaustive and carefully prepared report to the Canadian Government on the Franco-Canadian Convention, and its probable fiscal and economic effects upon trade between France and the Dominion.

The Chamber has published in pamphlet form the complete text, with schedules of the Franco-Canadian Convention, and has sent these out in large numbers to all those in Canada interested in trade with France. Further copies are at the disposal of any person who will make application for same to the Secretary of the Chamber.

New Customs Tariff.

Early in the year a new French customs tariff was under discussion by the French Chambers, and your committee viewed with alarm proposals to increase the import duties on certain products mentioned in the treaty, the most important being agricultural implements. Several meetings of the committee took place with regard to this matter, and a memorial was addressed to the French Government, and the French authorities were also interviewed by members of our Canadian Section. Communications were also made upon the subject to the British Embassy, and to the Canadian Government.

Unfortunately, our efforts were only partially successful, the result being that the former duty on agricultural implements of 9 frs. per 100 kilogs. was raised to 12 frs. per 100 kilogs. As this latter is the minimum rate in the French tariff, Canada is not at a disadvantage compared with other countries, and the change has not resulted in any decrease in the importation of Canadian agricultural machinery into France; on the contrary, the present year's imports show an increase. Most of the other items mentioned in the Canadian treaty as benefiting by the minimum duty into France remained unchanged. The following items are the most important exceptions:—

Canned meats, raised from 15 frs. to 20 frs. per 100 kilogs.

Fresh apples, raised from 2 frs. to 2 frs. 50 c. per 100 kilogs.

Salted pork, ham and other salted meats, from 30 frs. to 35 frs. per 100 kilogs.

Lard, from 25 frs. to 30 frs. per 100 kilogs.

The new French tariff came into force on April 1st, 1910.

Certificates of Origin on Canadian Goods.

Almost immediately after the ratification of the Franco-Canadian Convention, difficulties arose regarding the production of certificates of origin which are required by the French Customs. A large portion of the Canadian imports into France is purchased from importers in Liverpool and elsewhere in England, and it was consequently difficult if not impossible to obtain certificates of origin for these goods in Canada. Owing to the refusal of the French Consuls in England to visa certificates of origin for Canadian goods, this Chamber made representations to the Director General of Customs in Paris, with a view of overcoming this difficulty. The result has been entirely satisfactory, principally owing to the fact that, at our request, Chambers of Commerce in England have taken the necessary steps to assure themselves that the certificates of origin delivered by them are for bona fide articles of Canadian origin. We would again remind Canadian shippers, and also shippers in England of Canadian produce, that certificates of origin must accompany shipments of those articles which pay the French minimum tariff under the terms of the Franco-Canadian Convention, but only in the case of the minimum tariff on such goods being lower than the general tariff.

Certificates of origin require to be taken out before a local magistrate in Canada, or to be delivered by the Chief of Customs at the place of export, or by a Chamber of Commerce, or local authority, Mayor, Commissioner of Police, Judge, President of Tribunal of Commerce, or Consular Agents of France at the place of sending or shipment.

For certificates of local authorities, the signature must be legalized by the French Diplomatic or Consular authorities.

In accordance with Article 9 of the Convention, visas or the certificates shall be delivered free of charge, when they are issued in the country of origin.

Statistics of Franco-Canadian Trade.

As experience has proved that the statistics of all countries are more reliable for imports than for exports, we append the French official figures for imports from Canada, and the Canadian figures for imports from France.

Imports into France from Canada (French official statistics) during the years ending:—

	Francs.
December 31, 1902	4,445,000
" 31, 1903	5,636,000
" 31, 1904	4,684,000
" 31, 1905	6,391,000
" 31, 1906	7,310,000
" 31, 1907	6,334,000
" 31, 1908	8,006,000
" 31, 1909	10,150,000

Imports into Canada from France (Canadian Official Statistics) during the years ending:

June 30, 1902	$ 6,672,146
" 30, 1903	6,580,029
" 30, 1904	6,206,511
" 30, 1905	7,201,679
" 30, 1906	7,698,047
March 31, 1907 (9 months)	6,679,349
" 31, 1908	10,251,717
" 31, 1909	8,028,806
" 31, 1910	10,170,903

Mr. Rodolphe Forget, M.P., has resigned as a member of the executive committee of the Montreal Stock Exchange.

Mr. H. Schulz, of Madison, Wis., and Mr. A. C. Stielow, Milwaukee, were in Fernie last week. If power can be obtained, Mr. Stielow may establish a pulp mill in the Crow's Nest town.

HAMILTON FIRE LOSS FOR 1910.

Contains Interesting Statistics — Fire Chief Wants Automobile Combination—Some of His Recommendations.

Fire Chief Ten Eyck, of Hamilton, Ont., has issued his annual report, which is a comprehensive survey of the work done by his department during 1910.

During the year the Department responded to 377 alarms —21 were from street signal boxes, 293 telephone calls, 2 on private call bell, 7 on Dominion Messenger and Signal Telephone, and 54 verbal messages, being an increase over 1909 of 82 alarms and the greatest number in any one year in the history of the Department. There were 199 day alarms and 178 night alarms. Of the above number of calls 156 were for fires of a more or less serious nature. The total loss by fire and water for the year was $94,408.00, total insurance on property damaged or destroyed $1,892,725.00. Insurance over loss $1,799,157.00.

Nearly two-thirds of the total loss for the year was due to five fires alone, namely: The City Hospital, Barton Street East, January 22nd; the Gurney, Tilden Co., Limited, Stove Foundry, etc., John Street North, February 17th; the Taylor Mulvaney & Co., Charles Street, April 21st; the Hamilton Brick Co., Aberdeen Ave., July 1st, and the Duncan Lithographing establishment, Macnab Street South, September 15th, involving a total loss of $60,880.28, leaving a loss of $33,528.00 for the remaining 151 fires or an average of $222.04 for each fire. Although there were 35 more fires in 1910 than in 1909 the loss was $4,890.26 less.

Some Interesting Statistics.

The total loss by fire and water for the year 1910, $94,408; total insurance on property endangered, $1,892,725; insurance paid on property damaged or destroyed, $93,568; amount of loss on property not covered by insurance, $840; insurance over loss on property insured, $1,799,157; number of fires where claims were made, 129; where no claims were made, 27; in frame structures, 47; in stone structures, 11; in brick structures, 54; in roughcast structures, 1; in corrugated iron structures, 1; in cement structures, 1; calls for help outside of city, 2; rubbish fires, 54; chimney fires, 10; fires caused by children and matches, 34; fires caused by firecrackers, 1; fires caused by hot ashes, 18; fires caused by electric current and defective wiring, etc., 23; fires caused by carelessness, 33; false alarms, 19; incendiary fires, 17; fires caused by sparks from locomotives, 13; fires caused by spontaneous combustion, 12; fires from unknown causes, 35; alarms from other causes, 108.

The department laid 81,150 feet of hydrant hose, 100 feet of garden hose, and 11,400 feet of chemical hose; total, 93,650 feet.

The fire department equipment consists of:—2 steam fire engines, 3 combination chemical engines and hose wagons, 2 hook and ladder trucks, 4 hose wagons, 2 supply wagons, 1 buggy. Apparatus in reserve:—2 hose wagons, 1 hook and ladder truck, 1 70-foot extension ladder on wheels, 1 lumber wagon, 9 sets of sleighs, 1 cutter. Cotton hose, rubber lined, 2½ inch, 8,200 feet first-class, 3,050 feet second-class, 2,900 feet inferior; total, 14,150 feet; 8 chemical extinguishers.

Recommendations of Fire Chief.

The fire chief recommends that an automobile combination should be purchased with a full equipment of tools, etc., and built to carry 1,000 feet of 2½ inch hydrant hose, 200 feet of chemical hose and a 40-gallon chemical tank. This equipment would be used to cover the outlying and mountain districts.

The following recommendations are also made, that six thousand feet of hose should be purchased for the department as the number of feet in reserve is less than the number of feet carried on the apparatus. It is very important that the hose should be purchased as several thousand feet have been in use a great many years and is inferior and unsafe for fire service. It is essential that there should be two extra changes of hose in reserve as it was necessary to put wet hose on three pieces of apparatus after the Magee, Walton ice house fire, which was a very serious matter, especially in the winter season. Two hundred feet of chemical hose should be purchased for Combination No. 3.

Serious Fires Usually Occur During Meal Hours.

Fifteen more men should be appointed on the department as there is not a meal hour in the year but what there are one or more pieces of apparatus with only two men on them, which is very inadequate for efficient fire service. Several very serious fires in the past, broke out during meal hour, and the department was badly handicapped as there were not enough men on the apparatus to properly man the same, and it was necessary to call on volunteers to assist in laying hose, raising ladders, etc., which is very unsatisfactory and is a very unsafe practice, as the volunteers are unskilled in the handling of hose and ladders, which might be the means of causing a very serious accident. Two sleighs should be purchased for the department to be used for hose sleighs and two of the sleighs in use at the present time and which are too light for the work they have to do, can be converted into coal tenders for the steam fire engines and for general use.

◆

PROVINCIAL COMPANIES' LICENSES.

Manitoba Drafts Legislation to Squeeze Concessions from Ontario.

It appears that an interesting skirmish has occurred between the Manitoba and Ontario governments respecting the granting of licenses to extra-provincial corporations. Several Manitoba companies desired licenses to transact business in Ontario, the provincial government there stating they would be unable to grant the licenses unless the companies in question first obtained Dominion licenses. This they refused to do, questioning the legality of such action on the part of the Ontario Government.

In the Meantime.

In the meantime, a bill was framed by Winnipeg interests providing that unless the various provincial governments granted inter-provincial privileges respecting corporations, they should not be given Manitoba licenses. This apparently had the effect of changing the opinions of the powers that be in Toronto, and the Manitoba companies were given their provincial licenses in Ontario. The following is the legislation in question, entitled "An Act Respecting the Licensing of Extra-Provincial Corporations."

"His Majesty, by and with the advice and consent of the Legislative Assembly of Manitoba, enacts as follows:—

Declared Null and Void.

"1. All licenses heretofore granted under "An Act respecting the Licensing of Extra-Provincial Corporations," being chapter 10 of 9 Edward VII, to companies or corporations incorporated by or under the authority of a statute of any of the other Provinces of Canada, in which Provinces companies incorporated under the laws of Manitoba are denied similar licenses or privileges to do business in such Provinces, are hereby declared null and void, and all said companies are hereby replaced in the position they would have occupied under the said Act if they had not received such licenses.

"2. Every extra-provincial corporation incorporated by or under the authority of an Act of the Legislature of any other Province of Canada applying hereafter for a license under said Act shall, in addition to the other formalities required, produce evidence to show that similar licenses or privileges are granted to Manitoba companies in the Province where the head office of such company is situated.

"3. This Act shall come into force on the day it is assented to."

◆

CHARTERED ACCOUNTANTS MEET.

The twenty-fourth annual meeting of the Institute of Chartered Accountants of Ontario, was held at Niagara-on-the-Lake recently, and was attended by members from various parts of the province.

The president's address related progress in many directions, but deplored the tendency of members to allow the development of the function of the Institute and the conduct of its affairs to devolve upon the few. The election of officers resulted as follows:—President, Mr. R. E. Young; first vice-president, Mr. A. K. Bunnell; second vice-president, Mr. Osler Wade; secretary-treasurer, Mr. Arnold Morphy; registrar, Mr. T. Watson Sime. Council: Messrs. A. K. Bunnell, R. J. Dilworth, George Edwards, Edmond Gunn, J. W. Johnson, M.L.A.; W. T. Kernahan, Arnold Morphy, W. R. Morris,, Bryan Pontifex, G. M. Stiff, C. S. Scott, W. B. Tindall, Osler Wade, H. J. Welch and R. E. Young. Auditors: Messrs. R. J. Baker and R. F. Rowlands. Representatives on council of Dominion Association: Messrs. George Edwards, W. T. Kernahan and G. M. Stiff. Scholarships were presented to Messrs. R. J. Baker, E. F. Rogers and William Pratt.

◆

The article in The Monetary Times issue of July 8th, entitled, "A Life Insurance Ramble," did not include the names of the National Life, of Toronto, or the Prudential Life, of Winnipeg. This was an unintentional omission on the part of the author.

CROP CONDITIONS ARE SATISFACTORY.

Spring Wheat is Given a High Average—Flax Shows Increase.

The condition of the field crops of Canada on June 30th, as compiled in the census and statistics offices, Ottawa, from the reports of a large staff of correspondents, is quite satisfactory, although, on account of uneven rainfall, it is not uniform for all the provinces. Even in parts of the same province, as in Ontario, there is considerable inequality. For the most part in that province excellent reports are made, but there are districts in which the grains and hay have been badly affected for want of rain in May and June.

For the whole of Canada the condition of winter wheat is only 75.26 per cent. as compared with 100 for a full crop. This is 10 per cent. less than last year, 2 per cent. less than 1909, and nearly 14 per cent. less than three years ago. In Ontario it is only 73 per cent. of a full crop, as compared with 94.29 last year, 78.6 in 1909, and 88 in 1908. In Alberta, the only other province in which winter wheat is largely grown, the condition this year is 83.22 per cent., compared with 63.62 in 1910, 65.65 in 1909, and 95 in 1908.

Spring Wheat Given High Average.

Spring wheat in all the provinces this year is given the high average condition of 94.78 at the end of June, which is better than in 1910 by 12.65 per cent., better than in 1909 by 8 per cent., and better than 1908 by nearly 15 per cent. Ontario and British Columbia are the only provinces in which the crops are under 90, and in Saskatchewan and Manitoba it is close to 100.

The average for barley is 93, which is 6 to 10 per cent. better than in the preceding three years. It reaches close to 95 in the North-West Provinces, Prince Edward Island and New Brunswick, and over 90 in Nova Scotia and Quebec, a point below 90 in Ontario, and only 84 in British Columbia.

Oats show an average of 94.46 for all the provinces, which is higher than any year since 1908, and 95 or higher in Prince Edward Island, New Brunswick, Quebec and the North-West Provinces. In Ontario it is close to 90, and over 90 in British Columbia.

Flax Shows Increase.

Rye, peas and mixed grains are given a condition of about 90 for the Dominion, and are higher than in any year beginning with 1908.

Hay, clover and alfalfa are below last year's condition, and pasture is a point higher. In the three North-West Provinces the condition of pasture is over 100.

The feature of late cereals is the increase of area in flax, which is nearly 300,000 acres more than last year. The largest increase of flax is in Saskatchewan, where this crop in recent years has grown in favor.

Live stock does not show much change from last year, but their condition at the end of June is very satisfactory. All classes are within less than two points of 100, and an excellent uniformity is shown throughout all the provinces.

◆

AVERAGE DURATION OF HUMAN LIFE.

Actuary R. Henderson, of the Equitable Life of New York, recently made public some very valuable information touching on the average length of human life, or in other words, the average age of all persons now living. Among other things he said:

The American Experience Table is the basis of most insurance calculations made in this country, but the original table begins only at age 10. It has, however, for certain purposes been extended back to zero, and on the basis of the table so extended, out of 143,819 persons born, 100,000 of them will reach the age of ten years, 85,441 the age of thirty years, 69,804 the age of fifty, 38,569 the age of seventy, 847 the age of ninety, three the age of ninety-five and none will attain the age of ninety-six. The complete expectation of life of (or the average number of years lived by) each of those born is 41.5 years. However, on account of the heavy mortality in the first year of life, those surviving the first year will then have an expectation of 48.7 future years, or an expected total lifetime of 58.7 years, those attaining thirty an expected total lifetime of 65.3 years, those attaining fifty an expected total lifetime of 70.9 years, and those attaining seventy an expected total lifetime of 78.5.

On the assumption that the American Experience Table correctly represents the mortality of the human race and that the population is stationary, the average of those living at any time is 32.8 years. The average age upon the same assumption of those dying is 41.5 years, which is the same as the expectation of life at birth. The average age at death of the people now living considered by themselves as a separate group would be twice the average present age of the race, or 65.6 years. In other words the people at present alive have completed in the aggregate the first half of their lives.

RISE IN FARM LAND VALUES.

One Authority Fails to See Dangerous Inflation—Comparison with Wall Street Securities.

Census figures, showing percentages of increase in land values, since 1900, in some of the important Western States, have recently been published. They are summarized by The Financial World as throwing some light on current discussion of dangerous inflations in values. That paper is of opinion that the increases shown "are not excessive as a whole, considering all the factors." The official figures for several States are given as follows, the percentages being increases:

Missouri	107%	Montana	394%
Iowa	123%	Colorado	300%
Kansas	188%	Idaho	518%
Nebraska	231%	Nevada	163%
South Dakota	376%	Oregon	262%
North Dakota	321%		

Does Not Show Danger.

The average of the above increases for the period since 1900 is about 200 per cent.. Our contemporary remarks that it has been swollen "largely by the disproportionate enhancement in values in Colorado, Montana and Idaho. In these minin States mining industries have been the chief factor in the advances. Another important element in the rise has been the development of irrigation, while in the agricultural States, land speculation has been accountable for some of the increase. As a whole, however, the increase "does not show that dangerous state of inflation alleged by some economists." Commenting further on the figures, the writer says:

As to Securities.

"It would not be difficult to point to many securities in Wall Street which have had a proportionate, if not greater, rise than has been witnessed in the land values in the West. Union Pacific, for instance, ten years ago sold at 45 and the rise since then has been 400 to 500 per cent. In the same year, 1900, Southern Pacific could be bought on the New York Stock Exchange at 30 and it is now quoted at 114, and has been as high as 139. Louisville & Nashville was as low as 69 in 1900, and has sold as high as 160 in the ten years intervening. Curiously, however, the rise in stocks has not been as uniform as that of the land values of the Western States. In 1900, for instance, New York Central was actually selling 15 points above its present price; the price of St. Paul in 1900, then only a 5 per cent. stock, was at one time during the year close to 150. It is selling below 120 to-day, and paying 7 per cent. instead of 5.

Why Land Values Increased.

"Probably one reason why land values have increased so steadily is that prices of farm products have almost steadily mounted in the decade, and the production of gold has increased so much that this has also been a very large factor in the commodity price and land value level being constantly prest upward. No such fluctuations in the prices of lands have taken place in the ten years as have been witnessed in the case of stocks, which in the decade have gone through two panics—that of 1903 and that of 1907. 'Short selling' in the case of land is also impossible, and this has also helped to maintain values.

"To sum up, the increase in land values seems quite justified by the increase in population and the rise in the prices of farm products in the ten-year period. The land speculation has been excited at times, but it has been sporadic and has not caused inflation in loans to the dangerous extent alleged by some writers. Loans are now being placed on a very conservative basis, and much of the inflation of last year, and on which some of the figures of the census bureau are based, has been corrected."

◆

LLOYD'S AND THE FARMERS BANK.

A motion has been made before the acting Master-in-Chambers at Toronto, for permission for the liquidator of the Farmers Bank to serve a writ upon the directors of Lloyd's, Great Britain, who are outside the jurisdiction of the Ontario High Court. Difficulty is anticipated in collecting the $50,000 which Mr. E. R. C. Clarkson, the liquidator, claims as the amount of two annual policies held by the bank on the honesty of its employees. Formal proof has been forwarded to Great Britain of the defalcation of Mr. W. R. Travers, but Messrs. Bicknell and Company, solicitors for the liquidator, are getting ready to issue a writ at any date. The motion before the Master-in-Chambers is not being pressed at present, but an order must be made by him before the writ can be issued. As yet he has been furnished with no affidavits or other material.

QUEBEC ASBESTOS FIELD.

Notes of Some Recent Developments—Work Resumed on Property Prospected Twenty Years Ago.

Some new developments in the Quebec asbestos fields are recorded in the latest report of the Geological Survey branch. New concentrating mills have been completed and put into operation at the Bell, the Jacobs, and the Black Lake Consolidated Mines. The maximum capacity of these mills is from 800 tons to 1,000 tons of rock per day. The B. and A. Asbestos Company at Robertson, and the Berlin Asbestos Company near Leeds station, have built 4 cyclone mills which are also in operation on their respective properties; while the Belmina Consolidated Company, having acquired the property formerly owned by the Asbestos Mining and Manufacturing Company at Chrysotile, has re-equipped the mill and mine, and has renewed operations in both.

Asbestos at Numerous Points.

The Thetford Asbestos syndicate of Montreal has recently done some substantial development on lot 24, range A, Coleraine. A pit 60 feet by 50 feet has been carried to a depth of 45 feet. As far as could be judged from the walls, the rock carries a workable quantity of asbestos, an appreciable portion of which is crude. There is a boss of granite near the pit, and exposures in the vicinity show asbestos at numerous points, over an area of some 10 or 12 acres.

The present equipment consists of a cable derrick, a hoist, one steam drill, two pumps, and a 65 horse-power boiler; but an adequate mining and hoisting equipment is expected soon to be installed, and a concentrating mill built. The right-of-way has been obtained for a tram-line to connect the property with the Quebec Central Railway, less than 2 miles distant.

In Commercial Quantities.

The property is situated near the eastern side, and in the northern part of the serpentine area, which contains the principal mines of Black Lake. Asbestos is reported to have been discovered in commercial quantities on lots 2, 3, and 4, range B, Coleraine. There was no opportunity found during the season to verify the report.

One of the most important developments for the asbestos industry, however, is the establishment by the Asbestos Manufacturing Company of large works at Lachine, Quebec. This plant—the only one of the kind in Canada—is designed to manufacture all classes of asbestos goods. When completed the factory will have a capacity to consume about 1,000 tons of asbestos fibre per month. The plant was built by and is being operated under the management of Mr. G. R. Smith, long the manager of the Bell Asbestos mine. A more complete description of the plant and process will be given in a later report.

In the district examined this season few occurrences of asbestos have been found. On lot 22, range VI, Melbourne, about 100 feet south of the Melbourne slate quarry, a small pit was sunk some 35 years ago in the dump, of which there is a small amount of fairly good milling rock. The surrounding rock is drift covered, and the pit or shaft is partially filled with debris. It is locally reported that a small shipment of crude asbestos was made from these workings by the operators of the Melbourne slate quarry about 1876, and which was probably the first asbestos shipped from Canada.

Near Key pond some prospecting and development was done by Mr. R. H. Fletcher of Sherbrooke, and others, during the past season, but no very definite results were obtained.

Prospected Twenty Years Ago.

The principal development of the district has been made by Mr. John McCaw on lot 26, range IX, Brompton township, near Brompton lake. On this property, which was somewhat extensively prospected some twenty years ago, work was resumed in the spring of 1910. Asbestos is exposed in pits that have been opened in different parts of the property, over a distance of half a mile. In general, it may be said that the contents of the wider veins are usually hard and brittle, but that the smaller veins contain a quality of fibre that may be used. More complete development of the property probably awaits better facilities for transportation. A little slip fibre has been obtained in the first range of Stukely, south of Long pond. Except in the localities mentioned the rock of this district usually contains too much pyroxene to yield an asbestos-bearing serpentine.

◆

The Western Life Assurance Company will open in Vancouver shortly. Mr. Adam Reid, prominently connected with the company, is on the coast regarding the expansion.

STEEL IN SASKATCHEWAN.

Railroads Will Line the Province With More Than a Thousand Miles of New Track.

Railroad construction is active in Saskatchewan, where more than 1,000 miles of new railway track will be laid this year. Last year, this rapidly developing province led all others with total new track of 475 miles. The following are the details of this year's new mileage:—

Railroad.	Miles.
Canadian Northern	330
Grand Trunk Pacific	340
Canadian Pacific	348
	1,018

The longest single stretch of railway being constructed is 100 miles. About 1,300 miles of new grading will be done this year. Total construction for this year is almost one-half as great as in the preceding five years. At the end of this year there will be 4,752 miles of track in Saskatchewan.

Lines to be Constructed.

According to the best information obtainable, the following list of lines will be constructed by the various railways this year unless something compels the railways to change their plans:

By the Canadian Northern Railway—Aylesbury, westward to Davidson, 15 miles; Battleford, Jack Fish line, 40 miles to be laid; Thunderhill extension, 70 miles west of Manitoba; Delisle branch, from Goose Lake line, 35 miles; Moose Jaw, southeast, 100 miles; Rossburn extension, 20 miles; Shellbrook line, 50 miles.

This makes a total of Canadian Northern Railway construction of 330 miles this year.

By the Grand Trunk Pacific Railway—Melville to Regina, 70 miles; Battleford to Biggar, 50 miles; Regina to boundary line, 90 miles; Regina to Moose Jaw, 40 miles; Young to Prince Albert, 90 miles.

This makes a total of Grand Trunk Pacific construction this year of 340 miles.

Canadian Pacific Extensions.

By the Canadian Pacific Railway—Outlook, northwest, 60 miles; Craven to Colonsay, 65 miles; Weyburn to Lethbridge, 20 miles; Estevan to Bulyea, 10 miles; Lauder extension, 20 miles; second track from Moose Jaw to Pasqua, 7 miles; second track from Moose Jaw to Caron, 16 miles; Moose Jaw, southwest, 35 miles; Swift Current, southwest, 45 miles; Swift Current, northwest, 35 miles.

This makes a total for the Canadian Pacific Railway of 348 miles.

CANADIAN MANUFACTURERS' ASSOCIATION.

The annual meeting of the Toronto Branch, Canadian Manufacturers' Association, was held at Toronto recently, with Mr. W. C. Phillips, the retiring chairman, in the chair. Mr. S. B. Brush and Mr. G. Frank Beer were elected, by acclamation, chairman and vice-chairman for the coming year. Balloting for members of the Executive Committee and representatives on the Executive Council and the Exhibition Board followed, resulting:—

Executive Council—Messrs. Geo. Brigden, S. H. Chapman, W. P. Cohoe, R. J. Copeland, W. L. Edmonds, R. D. Fairbairn, John Firstbrook, A. Fleming, R. S. Gourlay, S. Harris, S. R. Hart, W. C. Laidlaw, C. B. Lowndes, J. S. McKinnon, S. J. Moore, C. M. Murray, J. P. Murray, Frederic Nicholls, W. C. Phillips, A. T. Reid, Thomas Roden, A. S. Rogers, F. A. Rolph, T. A. Russell, J. F. M. Stewart, W. B. Tindall, Geo. W. Watts, S. M. Wickett.

Toronto Branch Executive—Messrs. W. H. Alderson, Geo. Brigden, Percy C. Brooks, A. R. Clarke, R. J. Copeland, W. C. Coulter, W. C. Laidlaw, James Litster, Geo. B. Meadows, T. F. Monypenny, C. S. Pettit, Thomas Roden, J. C. Scott, Richard Southam, J. F. M. Stewart.

Exhibition Board—Messrs. S. B. Brush, John Firstbrook, Ed. J. Freyseng, Geo. C. Heintzman, Wm. Inglis, Geo. T. Irving, J. S. McKinnon, Jas P. Murray, W. C. Phillips, Frank A. Rolph, T. A. Russell, J. O. Thorn.

◆

Mr. J. R. Macleod, of Liverpool, N.S., has become a partner of Messrs. F. B. McCurdy & Company, Halifax, N. S. Mr. Macleod is still officially connected with the enterprises of which he was the organizer—vice-president of the Nova Scotia Fire Insurance company, president of the Pulp company that bears his name, and director of Stanfields, Limited—while he is also a director in the Maritime Telegraph and Telephone company.

WEST'S NEW OUTLET.

Where Will Timber for Hudson Bay be Obtained?—Interesting Report by Forestry Department on Timber Resources.

Where is the timber for the construction of the Hudson Bay Railway to be obtained? and will the country through which the line passes be able to furnish it? To answer these questions was the main object of a survey party sent out by the Forestry Branch of the Department of the Interior in the summer of 1910. The report by Mr. J. R. Dickson, B.S.A., B.S.F., assistant inspector of Forest Reserves, has just been published, and is of great interest to those concerned in the building of the road.

Starting at The Pas, on the Saskatchewan River, the party traversed the country around Mitishto Lake, the Mitishto River, the Grass River system, with its many lake expansions, including Wekusko Lake, Pakwa, or Pakwahigan Lake, Setting and Split Lakes, and the Nelson River system, including Cross and Sipiwesk Lakes, Wintering and Landing Lakes. The return journey was made by way of the Minago or Pine River. Some two hundred and thirty-five miles of the line of the proposed route of the railway was thus covered.

Sizable Timber Confined Almost to Water Courses.

The party was composed of the chief forester and three field assistants and five others. The work was of the nature of a reconnaissance, the method adopted being to run lines at intervals of three to six miles, the compass being used to give the direction. The men worked singly, and an average day's work was four to six miles and return. Field glasses were carried, and were often used to get an idea of country that could not be reached on foot.

The sizable timber is confined almost entirely to the water-courses. Spruce is, generally speaking, the only timber that is found large enough for saw-timber or railway ties. The poplar, birch and jack pine are invariably too short, spindly, limby and crooked, for any use save fuel or pulpwood. Very, very few live tamarack trees are to be had; the rest have been killed by bark-beetles.

The total number of ties available in the district covered is estimated at about 360,000, which, at 3,000 ties to the mile, would be sufficient for about half the distance covered. Of saw-timber there are about nine and a half million feet. For pile timber the dead tamarack and the largest of the close-grained black spruce could be used. There is a very large supply of fuelwood available, and there will also be a large supply of pulpwood, but much of the timber is as yet too small even for that.

Timber Destruction is Tremendous.

The destruction of timber, and this, be it observed, in a district where lumbermen have never penetrated, is tremendous. Fire and insects are responsible for this, especially the former. Practically every part of the eight thousand square miles covered by the survey party has been visited by two great, general fires, one eighty years ago, the other forty. In quite a number of places the fire had evidently leaped lakes a mile, or more, in width. Often a fire lives all winter in the dry moss and breaks out again in the spring following.

Bark-beetles have also done an incalculable amount of damage. They have killed practically all the tamarack and are now at work on the mature spruce.

After the trees have been killed by the beetles, a windstorm (and severe wind-storms are very frequent in the region) overthrows the fallen trees and the mass of debris which forms is ignited by a lightning flash. So a severe fire starts and may burn over many miles of country.

Can Fires be Prevented?

The protection of the timber of the region from fire is a tremendous problem. Extension of the patrol is suggested, but in a country so large and practically uninhabited, it would be a task of great difficulty to check a fire, if once it got started, be the ranger ever so efficient. As to starting fires Mr. Dickson considers the Indians more careful than white men, and far more so than the half-breeds.

So far as investigated, the rate of growth of trees in the region is very slow. A period of one hundred years will produce white spruce of a diameter of eight to twelve inches, poplar of eight to ten inches, and black spruce of four to five inches. It is the cold wet soil of the muskegs which is largely to blame for the slow growth, the country being so level that good natural drainage cannot be secured.

Brief notes are given in regard to the character, soil, climate, plant-growth and agricultural possibilities of the region, its minerals, fish, game and fur animals, and these will be found of great interest.

◆

Mr. R. A. Kirkwood, secretary of the Moose Jaw Board of Trade, has resigned.

ENGLISH CORPORATION MAY WRITE

Automobile Insurance in Canada—Car and General is Looking Over the Field.

The Car and General Insurance Corporation, Limited, a large and well-known English concern, may commence business in Canada. Mr. Frederick Thoresby, the company's general manager, has concluded a visit to Montreal, Quebec, Toronto, Ottawa and Winnipeg, in order to acquaint himself with the country and to look for possible openings for his company.

The Car and General Insurance Corporation has a capital of £250,000, of which £100,000 or more has been fully subscribed. The premium income in 1907-8 was £174,952. The company writes insurance in the following departments: Motor cars, private or business vehicles; Workmen's Compensation Act, 1906; Employers' Liability Act, 1880, etc.; non-tariff; fire—non-tariff—new bonus idea; driving accidents, claims by public, damage to assured's vehicles, fatal and non-fatal injury to assured's horses; infringement of patents and trademarks; personal accident policy for women; burglary, larceny, housebreaking, sickness, personal accidents, fidelity guarantee.

Companies Throughout Great Britain.

The company has offices throughout England, Scotland and Ireland. Mr. Thoresby, in an interview with The Monetary Times, stated that his company introduced automobile insurance in England, and he thought the outlook for the business in Canada was good. The directors of the company are as follows: E. Manville, M.I.E.E., chairman, Kincaid, Wallter, Manville & Dawson, consulting engineers; William Birtwistle, J.P., chairman, John Hawkins & Sons, Limited, Preston; J. Marshall Gorham, M.I.C.E., M.I.E.E.; Frederick Kerr, managing director, Anglo-Portuguese Telephone Company; E. Shrapnell Smith, editor Commercial Motor; Robert Ward, director London and Provincial Marine and General Insurance Company, Limited.; secretary, R. T. Thomson; general manager, Frederick Thoresby.

Automobile Insurance in Canada.

The following is an abstract of automobile insurance written in Canada in 1910:—

	Premiums of the year.	Number of policies new and renewed.	Amount of policies new and renewed.	Number of policies in force in Canada at date.
Aetna Insurance Co...	$ 9,564	232	$ 463,087	180
Canadian Casualty & Boiler	16,066	303	769,073	182
Hartford Fire	3,052	...	163,420	...
Home Insurance Co...	15,706	462	849,000	338
Travellers' Indemnity Co. of Canada......	7,737	213	2,130,000	132
Totals	$52,125	1,210	$4,374,580	832

	Net amount in force at date	Losses incurred during the year	Claims paid	Unsettled claims not resisted	Resisted
Aetna Insurance Co.	$ 353,687	$ 2,154	$ 2,154	None	None
Can. Casualty & Boiler	486,095	11,051	10,194	$2,690	None
Hartford Fire.	131,320	35	35	None	None
Home Insurance Co.	676,500	9,021	8,471	550	None
Travellers' Indemnity Co. of Canada ..	1,320,000	2,671	76	2,595	None
Totals	$2,967,602	$24,932	$20,930	$5,835	None

Mr. Thoresby returned to England this week.

◆

TABLES OF EXCHANGE.

Tables of Exchange between United States of America and Great Britain, is a volume which should find favor with the business man, for it is arranged in the simplest form possible and can be read by anyone at a glance. The compiler, Mr. A. Lecoffre, late chief accountant of the Comptoir National D'Escompte de Paris, in the introduction, says that the tables have been compiled and checked with the same great care as his other exchange and interest tables, which are now, as far as accuracy is concerned, considered standard works.

Tables of Exchange between United States of America and Great Britain, by Mr. A. Lecoffre. Messrs. McCorquodale & Company, Limited, London.

SEVENTY-NINE NEW COMPANIES

With Total Capitalization of Over Twenty Million Dollars—Mills Interested in Recent Flour Mill Merger.

Seventy-nine new companies with a total capitalization of $20,252,000 were incorporated during the past week.

Seven companies have a capital of a million dollars and over, as follows:—Tooke Brothers, Montreal, $2,500,000. North Coast Land Company, Vancouver, $2,500,000. Plenaurum Mines, Toronto, $2,500,000. Porcupine Kendall Gold Mines, Toronto, $2,000,000. Vancouver, California Oil Company, Vancouver, $1,500,000. Redstone Mining Company, Toronto, $1,000,000, and Princess Royal Island Mining Company, Vancouver, $1,000,000.

Eight mills will compose the recently organized flour mill merger in Ontario as follows:—McLeod Milling Company, Stratford; the Canada Flour Mills, Chatham; John Campbell & Company, St. Thomas; James Goldie & Company, Guelph; the Rutherford Milling Company, Blenheim, and the Carter & Company, St. Mary's. These companies will operate under the name of the Canada Flour Mills Company, with Mr. A. C. McLeod, now manager of the McLeod Milling Company, of Stratford, as general manager. The combined output of the new merger amounts to about 4,500 barrels per day, while the head office will be in Toronto.

The following is a list of charters granted during the past week. The head office of each company is situated in the town, city or province mentioned at the beginning of each paragraph. The persons named are provisional directors:

Wilmer, B. C.—Windermere Orchards, $250,000.

Merritt, B. C.—Merritt Orange Hall Co., $15,000.

Phoenix, B. C.—Phoenix Investment Co., $250,000.

Westminster, B. C.—Art Stone & Marble Builders, $250,000.

South Fort George, B. C.—Northern Telephone & Power Co., $250,000.

Nelson, B. C.—Elford Boat Co., $50,000. Nelson Club Cigar Co., $50,000.

Kingston, Ont.—Church Life, $5,000. Mrs. V. K. Birkett, L. H. Birkett.

St. Marc Des Carrieres, Que.—D. Naud, J. O. Naud, J. D. Naud, St. Alban.

La Tuque, Que.—Club Champlain, $10,000. W. Plante, J. A. Tremblay, J. E. Desbiens.

St. John, N.B.—Natural Products, $4,000. C. D. Jones, F. P. Vaughan, W. E. Raymon.

Brantford, Ont.—Mohawk Land Co., $100,000. H. Cockshutt, L. Harris, J. A. Sanderson.

Port Stanley, Ont.—Port Stanley Telephone Co., $1,000. N. Burton, E. Earnshaw, A. Burton.

Navon P.O., Ont.—Russell Rural Telephone Co., $9,000. G. J. Bonsfield, R. Clarke, W. H. Cox.

Hartland, N.B.—Hartland Woodworking Co., $15,000. J. T. G. Carr, D. H. Nixon, S. S. Miller.

L'Islet, Que.—Compagnie de Briques de L'Islet, $49,000. J. Belanger, P. Kirouac, P. Gaudreau.

Walkerville, Ont.—Walkerville Hardware Co., $60,000. A. D. Green, J. R. Coate, J. W. Coatsworth.

Ottawa, Ont.—Mica Company of Canada, $300,000. H. S. Ross, R. Taschereau, T. Rinfret, Montreal.

Summerland, B. C.—Okanagan Commercial Orchards Co., $100,000. Angove & Stinson Co., $25,000.

Providence Bay, Ont.—Manitoulin Island Rural Telephone Co., $2,000. W. I. Wagg, F. Wagg, A. Caddel.

Brockville, Ont.—Coleman Baking Powder Co., $50,000. H. A. Stewart, J. Culbert, A. M. Patterson.

Dryden, Ont.—Weiner, Presner & Co., $20,000. J. Weiner, K. Weiner, Dryden; P. Presner, Winnipeg.

Windsor, Ont.—Canadian-Detroit Lubricator Co., $10,000. C. H. Hodges, H. C. Hodges, C. R. Hodges, Detroit.

Brighton, Ont.—Canada Rex Spray Co., $40,000. F. O. Moburg, Omaha; J. H. Morrow, O. L. Morrow, Brighton.

Winnipeg, Man.—Griffiths Electric Contractors, $500,000. N. Griffiths, J. K. Bock, E. P. Powles, London, Eng.

Sorel, Que.—St. Lawrence Sand Gravel Dredging Co., $49,000. H. Beauchemin, L. J. Beauchemin, L. P. R. Beauchemin.

St. Maurice, Que.—Compagnie de Chaux De St. Maurice, $20,000. P. Ebocher, P. Ebocher, St. Maurice; P. E. Blondin, Grand Mere.

Newcastle, N.B.—Miramichi Tanning Extract Co., $298,000. J. C. Miller, Millerton; E. Hutchison, Douglastown; J. D. Creaghan, Newcastle.

London, Ont.—I.X.L. Spice & Coffee Mills, $40,000. D. Gwalchami, H. Pocock, W. Claris. International Foundry Co. $75,000. C. H. Mitchell, M. W. Calcott, A. H. Gault.

Victoria, B.C.—Coronet Coal, Mineral & Oil Lands, $250,000. Omineca Water & Power Co., $50,000. West Pacific Canning Co., $50,000. British Realty, Ltd., $10,000.

Hamilton, Ont.—Canadian Mathews Gravity Carrier Co., $100,000. J. S. Lovell, S. G. Crowell, W. Bain, Toronto. Consumers Lumber Company, $75,000. G. H. Long, F. Burton, R. Stewart.

Montreal.—Daigneau & Co., $10,000. J. P. B. Daigneau, A. de Bellefeuille, J. E. Bernard. J. A. Davis & Co., $100,000. J. H. Brittle, W. H. Lunney, H. J. Elliott. Rudel-Belnap Machinery Co., $40,000. L. A. David, W. H. Lunney, J. H. Brittle. Tooke Bros., $2,500,000. W. F. Chipman, F. G. Bush, G. R. Drennan. St. Lawrence Boulevard Land Co., $100,000. W. T. Heney, H. Paiement, O. J. Miller. Rena Footwear Co., $20,000. A. Patrie, S. A. Levitt, M. Isaac. Central Realty Co., $20,000. F. G. Bush, G. R. Drennan, M. J. O'Brien. Gatlin Institute Co., $50,000. S. M. Dunlop, Woodstock; F. A. Stephens, E. G. Stephens, Robinson, Ill.

Vancouver, B. C.—Columbia Laundry, $50,000. Wray & McKee, $50,000. Crown Stopper Co., $500,000. Webster Bros., $25,000. South Westminster Investment Co., $50,000. Canadian American Land and Townsite Company, $250,000. Vancouver California Oil Co., $1,500,000. British Canadian Gypsum Syndicate, $35,000. Burrard Lubricating Oil Syndicate, $50,000. Research & Development Agencies, $200,000. G. V. Cousins, O. B. MacCallum, P. F. Brown, of Montreal. Alberta Financial Corporation, $250,000. Halloran Construction Co., $10,000. Princess Royal Island Mining Co., $1,000,000. Clark, Green, Wade Logging Co., $10,000. Walker Land Co., $75,000. North Coast Land Co., $2,500,000. Vancouver Auto Transfer Co., $100,000. Ymir-Wilcox Development Co., $500,000. British Columbia News Co., $20,000. J. R. Tanguay, W. H. Lunney, H. J. Elliott, all of Montreal.

Toronto.—Rockwood & Co., $300,000. G. Grant, A. Dods, M. MacDonald. Sovereign Hall Co., $25,000. W. H. Skitch, J. M. McGowan, G. McKenzie. Dominion City Estates, $350,000. G. Fuller, Manchester, Eng.; J. J. Hoidge, A. E. Adams, Toronto. Sovereign Construction Co., $50,000. J. I. Grover, Misses. L. O. Richardson, E. K. Avery. Leak & Co., $40,000. W. Leak, H. A. Leak, Miss M. H. Leak. Standard Canadian Investments, $100,000. O. H. King, G. M. Willoughby, A. J. Wise. Boase, $60,000. J. B. Boase, C. E. Boase, Miss N. M. Jones. Georgian Land & Building Co., $40,000. J. S. Lovell, W. Bain, S. M. Mehr. Alonzo W. Spooner, $40,000. Miss M. A. Spooner, Port Hope; G. L. Smith, R. H. Greer, Toronto. Redstone Mining Co., $1,000,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock. Plenaurum Mines, $2,500,000. H. E. Rose, A. G. Ross, H. Armstrong. Porcupine Kendall Gold Mines, $2,000,000. F. Regan, C. M. Garvey, S. F. Adalia. Noon Universal Coupler Co., $100,000. M. G. Hunt, H. J. Macdonald, C. S. Warner. G. P. Macagy Realty Co., $100,000. W. H. Pearson, T. W. Anderson, R. L. Kleiser. Canadian Hanson & Van Winkle Co., $100,000. R. W. Hart, G. M. Clark, C. H. C. Leggott.

A LIFE INSURANCE SHIELD.

Mr. J. A. Wilson, the provincial manager for Manitoba of the Prudential Life Insurance Company of Winnipeg, has won the Prudential News shield, which is awarded by the company every half year to the agency writing the largest amount of business in that period.

The lettering on the shield, which is mounted on polished oak, reads as follows: "The Prudential News Shield, presented by the Prudential Life Insurance Company for semi-annual competition 1911. Best agency." The actual size of the polished oak mount is 19½ by 17¼ inches and of the shield 13½ by 11½ inches. Mr. Wilson's photograph appears elsewhere in this issue.

FOREST PRODUCTS OF CANADA.

Value of Wood Pulp Exported—Dutiable Imports from Great Britain Increased—Forest Area of the Dominion.

The most definite and complete statistics in relation to forest products are those in regard to import and export furnished by the trade returns. These show that in 1868 the total unmanufactured wood products exported were valued at $18,742,625, while in 1908 they reached the sum of $44,170,470. Manufactured wood products in 1908 amounted to $4,997,795, making a total for 1908 of $49,168,265, says Mr. A. H. D. Ross, M.A., M.F., of the Faculty of Forestry, University of Toronto, in a comprehensive report recently issued.

Of the unmanufactured wood products $12,956,521 went to other parts of the British Empire, including $11,843,094 to Great Britain; $27,470,574 went to the United States; $401,280 went to the Continent of Europe; $2,968,246 to South America and the West Indian Islands; $112,415 to Mexico, and $163,500 to China and Japan. The United States is a customer for over 60 per cent. and Great Britain for over 25 per cent. The square timber trade declined from 651,736 tons valued at $4,188,862 in 1868, to 59,833 tons valued at $1,520,005 in 1908. The average price per cubic foot increased from 16 cents to 63 cents. Timber was prepared in this way for shipping to Great Britain and the chief advantages were the removal of sapwood and the greater convenience over round logs in lading vessels. It is a decided advantage to have this wasteful method replaced by the shipping of deals to the British market.

In 1890 the value of the pulpwood exported was $80,005. Much the greater proportion in each year has gone to the United States, and since 1903 the whole export has been to that country. In 1904 the export to the United States was 479,238 cords valued at $1,788,049, and in 1908, 901,861 cords valued at $4,655,371. From these figures it will be seen that in five years the quantity of pulpwood exported from Canada to the United States has almost doubled, and that its value has increased 160 per cent. The increase per cord was from $3.73 to $5.16. The last report, that of 1907, in regard to consumption of pulpwood in the United States shows a total of 3,661,176 cords, of which the Canadian product formed about one-fourth.

Value of Wood Pulp Exported.

The value of wood pulp exported in 1890 was $168,180, and in 1908 $4,037,852; the value of the export to the United States being $3,545,530, and to Great Britain $485,199. The quantity of mechanically ground pulp exported was 4,027,939 cwt., and of chemically prepared pulp 783,224 cwt.

The total export of wood products would be about three billion feet, board measure.

Notwithstanding the fact that Canada exports forest products largely, there is a considerable import, mainly from the United States. The total value of the imports increased from $2,412,572 in 1874 to $12,032,595 in 1908. For the ten years, 1897 to 1906 inclusive, the total imports amounted to $59,934,770, $57,520,731 coming from the United States, $919,398 from Great Britain, and the remaining $1,494,541 from other countries. For this period 94 per cent. of imports were from the United States, two per cent. from Great Britain, and four per cent. from other countries.

In recent years the western prairie provinces have imported considerable quantities of lumber and other construction material from some of the western states, particularly Minnesota. In 1905 the import of pine from Minnesota and Wisconsin was 125,000,000 feet, board measure, but this fell in 1907 to 62,642,941 feet. In the older provinces there is a considerable import of hardwoods, such as oak, ash, walnut, hickory, cherry, etc., which is largely due to the denudation of the hardwood districts in south-western Ontario and elsewhere. The import of oak for 1908 was 54,542,685 feet board measure, but this was exceeded by pitch pine (under which are included several species of pine from the southern states) with an import of 68,946,389 feet, board measure. The import includes also such manufactured articles as furniture, veneers, hubs, spokes, staves, dressed lumber, ties, lath, shingles, etc.

Dutiable Imports From Great Britain Increased.

Between 1874 and 1906 dutiable imports from Great Britain increased from $30,450 to $106,563, whilst free imports varied greatly. From the United States dutiable imports have increased from $911,211 in 1874 to $2,310,836, whilst free imports have risen from $1,398,870 in 1874 to $5,939,059 in 1906. For the ten years, 1897 to 1906, inclusive, the total imports amounted to $59,934,770, $57,520,731 coming from the United States, $919.398 from Great Britain, and the remaining $1,494,541 from other countries. Thus it appears that in recent years about 94 per cent. of imports are from the United States, 2 per cent. from Great Britain, and 4 per cent. from other countries.

The sources of information in regard to forest products available annually are the reports of the cut on Crown lands obtained through the returns furnished to the Dominion and Provincial Governments, but these are incomplete in the respect that they give little or no information of the cut on lands which are held privately, and which furnish a considerable proportion of the total product. The product of the year 1907, as shown by such returns, was in the neighborhood of three and one-half billions of feet, board measure. The pine of the eastern states, including white and red pine, still leads in the production with probably one-third of the total, spruce taking second place with about one-fifth. Other species are not so distinguished in the returns that the quantities can be determined. The hardwood production, as far as the returns show, was less than 2,000,000 feet, board measure.

It is only at the decennial census that information is obtained in regard to the whole forest product, including that from private lands. The census of 1901 showed a product valued at $51,000,000, and including a total of about nine billion feet, board measure. With the rapid development of the lumber and pulp industries, and the increasing interest in the whole question of the timber supply of Canada, it is desirable that information of a reliable nature in regard to the forest product should be available from year to year. The necessity for such information was recognized some time ago in the United States, and the Forest Service and the Census Bureau have, with the co-operation of the lumber associations and manufacturers, carried out a scheme for gathering annually the statistics of forest production, which is now so fully elaborated as to give reliable results. The report for 1907 shows a cut in the United States of 40,256,154,000 feet, board measure, of lumber, 3,663,602,000 of lath, 11,824,475,000 shingles.

Forest Area of Canada.

The information available in regard to the forest area of Canada is of the most general nature, and the various estimates which have been made are uncertain. Actual knowledge is confined to restricted areas and general conclusions are based on deductions therefrom, on judgments from climatic, geologic and other conditions, or on measurements made upon the map. In regard to the timber granted under timber license, and that included in forest reserves, there is fairly definite information, but in regard to the general forest areas knowledge is confined to the routes of travel followed by and reported on by the members of the staff of the Geological Survey. No attempt, except the survey undertaken by the province of Ontario in 1900, has been made either by the Dominion or Provincial Governments to have any systematic examination or estimate of the greater forest areas. In the interests of accurate knowledge of one of the greatest of Canada's natural resources, it is desirable that in all the provinces, and in Dominion territory, a forest survey should be undertaken and systematically carried out throughout the whole forested area.

In the census of 1891 the forest area of Canada was estimated at 799,000,000 acres. More recent estimates reduce the area to between 500,000,000 and 600,000,000 acres, but this will include areas of timber which are not at present merchantable, and for land covered with merchantable timber presently available estimates have been made as low as 200,000,000 acres, and even 100,000,000 acres. These are estimates based from deductions from a general knowledge of conditions or of special areas, and none of them are entitled to great reliability. The stand of timber is even less known, but between five and six hundred billion feet of timber suitable for sawing would be a conservative estimate. In addition there are large areas suitable for pulpwood. The whole forest area of Canada has suffered so severely from fire that the average stand must be computed at a low figure. The area included in forest reserves and parks in the Dominion is 128,060,800 acres, and the area held under timber license or lease is 75,800,000 acres, but these areas overlap to a considerable extent.

District Under Dominion Administration.

The district under Dominion administration includes the provinces of Manitoba, Saskatchewan and Alberta, and in the province of British Columbia a belt of forty miles in width along the main line of the Canadian Pacific Railway and a tract of three million acres at the headwaters of the Peace River. It also includes all the districts outside of provincial jurisdiction. The area under license and permit is 9,422 square miles, or 6,030,080 acres. The area included in forest parks and forest reserves is 16,296 square miles or 10,429,440 acres.

The lumber cut in 1907 was 141,050,292 feet, board measure of lumber, 14,273,300 lath and 60,000 shingles. The cut in the railway belt in British Columbia was 42,000,000 feet, board measure, and the remainder, consisting mainly of spruce, but including also jack pine, tamarack and fir, was cut in the prairie provinces. The official returns do not differentiate the species. No general survey of the timber districts has been made, but special surveys have been made of some of the forest reserves The forest area has been computed at ninety-six million acres, and the stand of timber at one hundred and ninety-two billion feet, board measure.

BRITISH COLUMBIA.

Active Interest Being Taken by Prospective Foreign Financiers—Hudson Bay Company Will Locate Several Stores in Province.

(Staff Correspondence.)

Vancouver, July 15th.

Investments in British Columbia are at present occupying the attention of many people. This week, British, French and American investors have been looking over the ground. A week or two ago a prominent Belgian was here and went into the Okanagan where a Belgian syndicate has a large undertaking. These men do not make trips here merely to observe, but to act. This field looks so good to Mr. Herbert E. Burbidge, stores commissioner for the Hudson's Bay Company at Winnipeg, that he announces a new $1,500,000 departmental store for Vancouver, which will give this old-established concern one of the biggest stores in the west. At Kamloops, the Hudson's Bay Company will spend over $100,000, at Vernon $60,000, and at Victoria, the best part of a million. Not only is there present business, but immediate future development will create a great new trade.

French and German Capital Interesting.

Mr. V. T. Roberts, of Winnipeg, was in the city during the week, and announced that French and German capital was securing, through him, options on waterfront property, both in Vancouver and Victoria, to have holdings in view of commercial development when the Panama Canal is opened for traffic. It was stated that an option on the R. P. Rithet & Company's wharf at Victoria had been secured, but this was denied by the company, while in Vancouver the property mentioned was that on Burrard Inlet of Robert Kelly, lying in the east end. This indicates how much is being thought of western Canadian ports and of their importance when the new cut-off is established at the Isthmus.

Mr. R. M. Bauer, already largely interested in this province, is here from London to inspect his holdings and perhaps invest further. Several propositions have been submitted to him by his agents. He says there will be British capital available for mining propositions, especially for northern properties in the gold producing sections.

Mr. E. H. Heaps, of the big lumber firm of Messrs. E. H. Heaps & Co., and interested in several industrial and financial enterprises, has returned from a lengthy stay in London, and brings back news of having established a financial agency in the old country which will finance any reasonable and worthy proposition. He says that a number of manufacturing enterprises will be announced shortly. While in London he effected a reorganization of the Columbia Taxicab Company, which will hereafter be known as the Columbia Taxicab and Motor Company. Certain lines of internal combustion engines are to be manufactured.

Another to return from London is Mr. F. R. Glover, assistant manager of the British Columbia Electric Railway Company. He states that a remarkable interest in British Columbia is being shown by financial men in the old country. From personal conversation he is satisfied that two score men will withdraw capital invested in Great Britain and place it where there are good prospects for returns. British Columbia will get some of these.

Prospective Investors from France.

Among the prospective investors from France are Prince de Croy and M. Maurice de Schlumberger. The latter name would hardly indicate French origin but he is the confidential representative of several French financiers, and is looking into land and timber propositions. He stated that several millions of capital from France was available for investment in this country. Foreign investors, he said, are averse to Canada's acceptance of the reciprocity proposal, and that if adopted it would have a tendency to keep money out. Prince de Croy stated that he was here seeking further outlets for capital belonging to his family. He, too, warned against reciprocity if foreign capital was to be encouraged.

American investors were represented by Mr. H. W. Stone, president of the British-American Timber Company, of Duluth; Senator E. B. Hawkins and Messrs. E. B. Cole, R. W. Jones, J. C. Barnett and W. J. Croze, all of Duluth. Mr. Stone declared Canada to be the best field for investors, stating that the laws which govern the transaction of business in the Dominion makes practically impossible the abuses of which big interests are at present accused in the United States. These men are interested in timber and mineral propositions here, and after looking over their holdings of 20,000 acres near Comox, containing iron deposits, they may exploit them. Before leaving for Duluth, they conferred with the C.P.R., and that company will place an engineering party in the field to locate a branch line fifteen miles long from the E. & N. railway, which will be needed if work goes ahead.

The impression is that this party is connected with the purchase of the large magnetite iron deposits on Texada Island from the Puget Sound Iron Company, and held by them for thirty years. Work has already been done on this property.

Much Interest in British Columbia.

Home capital is invested in the enterprise of the Western Canada Power Company which has so far advanced that it is now before the councils of Vancouver and surrounding municipalities to secure rights for pole and power lines. Its lines in Vancouver will be underground.

The Vancouver, Westminster & Yukon will have its first issue of bonds in London shortly. This railway company has a charter for a line to the north, and by the time the bridge across Second Narrows of Burrard inlet is ready, its representative says that the line in the vicinity will be constructed. Application has been made for right of way through the Indian reserve at North Vancouver.

Announcements such as these indicate the interest being taken in British Columbia and the activity in prospect. This progress is on both mainland and island. On Vancouver, where development is steadily proceeding, an increase of 40 per cent. in the business of the past year is noted by wholesale merchants in Victoria. Trade on the island is in a condition of unequalled prosperity and it is expected that the coming year will create a new record.

Vancouver Stock Exchange Has Successful Year.

The Vancouver Stock Exchange has started on its new year, after a successful twelve months. During the past year about 9,631,303 shares have changed hands, with a value of about $2,568,704.36. This is a big increase over the business of the year previous which was 1,829,716 shares of the value of $673,842.64. Officers for this year are: President, Mr. J. S. Rankin; vice-president, Mr. G. I. Gwynne; honorary secretary, Mr. J. D. Mather; treasurer, Mr. C. D. Rand; following to act on the executive; Messrs. Thorne, Humble and Austin.

The Pacific Electric Heating Company, with headquarters at California, and branch factories at New York and Chicago, manufacturers of electric irons, electric toasters, etc., will establish a Canadian factory at Vancouver. Mr. R. R. McCrea is here in connection with the matter. At first, only assembling will be done, but a later plant will be established and the company's products manufactured in entirety here.

CANADA'S CLAUSE IN ANGLO-JAPANESE TREATY

Formal intimation has been given in the House of Commons of an exchange of notes, dated July 7, between the United Kingdom and Japan, prolonging for two years the most-favored-nation clause of the Anglo-Japanese commercial treaty of 1894, as regards Canada.

It is understood that this is a temporary arrangement to tide over the period within which Canada may abandon the British Imperial treaty system, so far as it affects Japan, and negotiate an independent treaty of her own.

This act of commercial separation from the rest of the Empire on Canada's part is all the more noteworthy because, in the event of any complications arising with Japan over this very treaty, or over trade, immigration, or fishing questions, it is upon British naval supremacy, based upon British commerce, that Canada would rely to maintain her rights.

RICE LEWIS & SON

The long-established metal and hardware firm of Messrs. Rice Lewis & Son, Toronto, are being provided with new quarters to accommodate them when the King street front of the present building is vacated. In 1909 the business passed into the charge of Messrs. Fisher and Gilverson but now these gentlemen, having completed the purchase of the capital stock of the company have associated with themselves Messrs. James W. McMillan, Walter J. Lawson, Fergus E. McDonald and E. R. Kastner. The new board, composed as above, will therefore consist mainly of men who have been in the employ of the house from fifteen to twenty-five years, and helped it to grow to its present dimensions in Toronto.

It should be noted that all the old interests have been retired without creating any company debt or obligation, or encroaching upon the capital stock of $310,000, which is still supported by a substantial surplus. The company is, we are told, moreover, in the fortunate position of being free from debt of any kind.

TORONTO STREET RAILWAY.

Montreal Largely Interested—Mr. Forget's Plans Find Favor—Cedar Rapids Power Company—Montreal Water and Power Company.

Monetary Times Office,
Montreal, July 19th.

That Mr. D. Lorne McGibbon intends to proceed immediately with the development of his Cedar Rapids power is evidenced by the fact that Mr. Henry Holgate, C.E., is parting company with the firm of Messrs. Ross & Holgate, with which he has so long been associated, in order to become president of the Cedar Rapids Power Company.

The company will proceed immediately with the development of the site secured, and in the course of a few years expect to deliver 50,000 horse-power. Mr. Holgate has been at work on this proposition for a considerable time past. Although the details of the plans have not yet been adopted by the government, the principles were long since accepted, more especially as Mr. Holgate, in his various relationships with St. Lawrence water powers, has always taken the stand that the interests of navigation must first be served, and that water powers are secondary matters. In the case of the Cedar Rapids power engineering works it is expected these will throw back into the navigation channel a considerable quantity of water which has hitherto escaped down another channel, so that there is every reason to expect that the government will find the detailed plan acceptable.

Will be an Advantage to the Consumer.

As, at the present time, only about 62,000 hydraulic horse-power is being delivered in the city of Montreal, it may easily be seen to what an advantage the 50,000 horse-power from the Cedar Rapids will be to consumers. There must be added to this the power to be presently offered by the Canadian Power Company, say, 10,000 horse-power, and there is also the 40,000 horse-power extra recently contracted for by the Montreal Light, Heat and Power Company from the Shawinigan Company. The outlook is promising for the future requirements of the users of power in Montreal and vicinity.

A peculiar situation has developed in connection with the complaint against the Montreal Light, Heat and Power Company, which has for some time now been before the Public Utilities Commission. The Power Company objected to the hearing of this case by the Utilities Commission, and the Commission decided against this objection, which decision was subsequently upheld by one of the courts. The chairman of the Commission recently announced that the hearing of the case would be proceeded with as quickly as possible. The Power Company now announce that they have already met the views of the complainant, who has withdrawn his complaint.

Montreal Water and Power Company.

The discussion over the purchase of the Montreal Water and Power Company by the city of Montreal at a cost of nearly $7,000,000 still continues before the Montreal city council. The argument presented at the recent meeting was that it would be better for the city to wait until the contracts between the new wards and the power company expired, and then take them over and supply them with water. In reply it was stated that the longer the matter was delayed the more would it cost the city to make the purchase, as the company was now spending large sums in building a reservoir and improving the system generally.

City Auditor Pelletier submitted the following report as to the cost of buying out the company:—

The city would be called upon to buy the capital shares of the company, valued at	$1,020,000 00
Loan of 5 per cent., floated by Ste. Cunegonde	250,000 00
Company's debentures and various obligations.	3,592,670 00
Other obligations bearing interest	1,074,596 50
Debts owing to various municipalities	387,666 98
Due to contractors	185,392 06
Current debts	41,747 87
Accrued interest, etc.	55,622 76

Toronto Street Railway and Montreal Interests.

Considerable interest is being shown in financial circles in the situation as respects the Toronto Street Railway.

The success of Mr. Rodolphe Forget last week in persuading Sir William Mackenzie and other chief officers of the road to adopt his programme and the opposition which it is claimed this programme is meeting among the civic authorities in Toronto are topics of conversation here. Local people do not seem to understand as yet what the civic authorities have to do with the question of the capital of the road or with the manner in which shareholders may decide to distribute their profits. It is also understood that there is a strong disposition in Toronto to municipalize the railway when its franchise expires some ten years hence, and that partly with this end in view the city has already laid down sections of lines on different streets, and may possibly even install a service, either of cars or of motor buses before a great length of time.

As 69 per cent. of the stock of the Toronto Street Railway is owned in Montreal or the Province of Quebec, it is only to be expected that Mr. Rodolphe Forget's proposals find favor here. Heretofore, it would seem that betterments and improvements or extensions to the road have been made out of profits. Last year the amount devoted to this purpose was over $610,000. By the sale, at par, of $2,000,000 of the $4,000,000 stock by which the capital of the company is to be increased, the company should be in a position to add to and improve its rolling stock enormously, as well as to make extensions to plant and tracks.

The $1,000,000 which will remain in the treasury will be available for similar purposes whenever necessary. The $1,000,000 which will be given the present shareholders as a bonus, together with the price at which they would be entitled to subscribe to the new stock, is regarded as only a fair equivalent for the modest percentage on the total earnings of the company which they received in the past. With the city of Toronto receiving as its share from the railway upwards of $700,000, and with $610,000 being applied against betterments, they argue that the amount paid them in dividends, namely, $560,000, was altogether too small. As for the future, they consider the increase in the dividend to 8 per cent. from the previous 7 per cent. only justice.

Montreal Largely Interested in Toronto Street Railway.

Since the high price and the excitement which accompanied the announcement of the decision of the directors the stock has been easier, having lost about six points. Whether this is due to the belief that the price was too high, or to the attitude of the civic authorities in Toronto, is difficult to say. It would seem that the shareholders do not look for any serious disadvantage to result.

Montreal, for years past, has held a large quantity of Toronto Railway stock. These holdings have doubtless been increased during the past year or so, and more particularly during the past few months, a large quantity having changed hands on the Stock Exchange. The stock has gone into the hands of a number of religious and monetary institutions in addition to the ordinary holdings, and this gives a permanent aspect to values. This stock must have been accumulated all the way from $90, or even less, per share up to about $150 per share. As this province holds fully $5,500,000 worth of stock out of the entire present capital of $8,000,000, it will be seen that Montreal has made good out of its association with Toronto Railway.

◆

MEXICAN YEAR BOOK.

The Mexican Year Book, a statistical, financial and economic annual, compiled from official and other returns, is now in its fourth year of issue. It contains much information relative to the various states and territories of the federation, railroad and public utilities, mining, agriculture, banking, custom house tariffs, etc., and should be on the desk of everyone interested in Mexico. Not the least interesting part of the volume is the section devoted to an explanation of the federal government, in which it is stated that the present constitution was adopted in February 5th, 1857, and although it has since undergone certain modifications, both through additions and amendments in its essential features and aims, it still corresponds with the liberal intentions and spirit of its framers.

The compilers are to be congratulated for furnishing those interested in Mexico with so readable a volume.

The Mexican Year Book, 21/-. London, McCorquodale & Company, Limited, 40 Coleman street.

◆

MUNICIPAL HANDBOOK OF TORONTO.

The Municipal Handbook of Toronto, compiled by Mr. W. A. Littlejohn, city clerk, contains much valuable information regarding the city. It covers in a comprehensive manner the various municipal departments and acts as a vade-mecum to those interested in municipal finance. The compilation of the handbook must have entailed considerable work.

◆

The call for payment of double liability on stock of the defunct Farmers Bank of Canada, has been made to the shareholders by Mr. G. T. Clarkson, liquidator.

Lieut.-Col. Frank S. Meighen has been elected president of the Lake of the Woods Milling Company, succeeding his late father in that position. The new president was the unanimous choice of the directors.

OBLIGATIONS OF INVESTMENT BANKERS TO THEIR CLIENTS.

Investment Banking is a Responsibility That Requires Experience and Good Judgment.

Investment banking is a serious, responsible business. An investment banker is in one sense like a merchant. He buys securities at wholesale and sells them at retail. In another sense he is a counsellor. He must offer his clients sound advice regarding their investments. He must recommend to each customer securities adapted to the particular needs of that customer. The banker as a merchant is under the heaviest of obligations to handle goods of honest value. He may not take advantage of the principle, "Caveat emptor." Unlike most wares sold by merchants, the goods a bond dealer handles must never wear out. They must remain sound and true for ten, twenty, or fifty years, and at the end of their life they must be redeemed at their face value. The investment banker, therefore, who has a proper appreciation of the nature of his calling will make the matter of the safety of the securities he handles his chief concern. He will bring to his aid all his skill, judgment and experience to assure himself of the soundness of the bonds he offers. The responsibilities of the bond dealer are particularly heavy for another reason. His client, frequently, when buying securities relies absolutely and completely upon his recommendations. These are some of the interesting assertions of Mr. Allen G. Hoyt, who addressed the Finance Forum, New York, recently.

Many Bond Buyers Cannot Afford Loss.

The investor has neither the time, the money, the knowledge nor the experience necessary to enable him to determine the value of the bonds he is buying. He is completely in the banker's hands. The dealer of the right sort will not regard lightly the obligations imposed upon him by the relation of trust which he bears to his client. The banker ought to be exceedingly careful of the character of the bonds he sells. People buy of him for investment; they are not speculating, and they cannot afford to lose. Many of his clients are absolutely dependent upon the income from the securities they buy for the wherewithal with which to live. If any of the securities turn out to be worthless some of the holders may actually suffer for the necessities of life. The bond buyer does not expect to take any chances; he is a loaner of money, and all he is promised for parting with his money is the payment of the loan at maturity with a certain specified rate of interest for the use of the money by the borrower. The bond buyer who buys the securities of a corporation, for instance, will be entitled to receive only the interest on his money and the payment of the principal at maturity.

Investigation a Prerequisite of Safety.

No matter how successful the corporation may be, the bond buyer gets no part of the surplus earnings of the corporation, however large they may become. The earnings, above the payment of the interest on the indebtedness, belong to the stockholders, who are, in fact, the owners of the property. If any risks are to be incurred the stockholders should take them. The bondholder is merely a creditor; he is concerned only in the security of his loan, and that security ought to be ample. So the investment banker, in investigating this matter of the safety of the bonds he offers to his clients, spends a great amount of his time and money. He brings all his skill, judgment and experience to bear on this all-important question, and if the banker is lacking in skill, if his judgment is faulty, or if his experience in his profession has been limited, disaster is almost certain in store for him and his clients through the purchase of unsound securities.

Each Class of Bond Specially Investigated.

Each of the four general classes of bonds requires on the part of the banker a special method of investigation and handling. To do a comprehensive business in municipal securities requires on the part of the banker an extensive experience. This and his judgment come into play in considering the character of a municipality. With wide experience he knows whether a municipality offers adequate security for a loan. He knows the many technicalities necessary to make the bonds legal. In dealing in railroad bonds the banker must have skill, judgment and experience in determining the matter of safety. The investigation differs considerably from the procedure in municipal issues. While a great many different railroad issues may be said to be so well secured that there is little likelihood of there ever being a default, it is true that each issue differs in quality from every other issue. The service the banker renders his customers in connection with high-grade railroad issues is to supply securities at a little lower price than other bonds of equal merit are bringing in the market. In handling bonds on roads of mediocre credit the banker must use special care. His investigation of each issue must be thorough and exhaustive, not only of the road's financial position, but also of its physical condition. In dealing in public utility and industrial bonds the responsibility of the banker to his clients is particularly heavy.

Bankers the Investors' Guardians.

Public utility issues rank higher generally than industrials, because their earnings fluctuate less. When a banker handles an entire issue he becomes identified with the property, and on him is the entire responsibility for the future history of the bonds. The responsibilities of the banker in dealing in corporation bonds are particularly heavy. As the banker frequently buys an entire issue, the bonds are held exclusively by his own clients, and he must not only be convinced that the bonds are safe, but that he must make a market for them as well in order that his clients may borrow on them or convert them into cash, if they find it necessary to do so. The banker must not only assure himself that the bonds are sound when he buys them, but that they will continue safe under whatever conditions may arise. He usually keeps in touch with the property as long as the bonds are outstanding, and often by advice or moral pressure or some other influence he is able to prevent ill-considered action on the part of the owners of the property which might prejudice the standing of the securities.

RAILROAD AND COMPANY EARNINGS.

Railroad earnings for week ended July 7th:—

	1911.	1910.	Increase or decrease.
C. P. R.	$2,096,000	$2,022,000	+ $74,000
G. T. R.	943,095	879,36	+ 63,733
C. N. R.	346,550	294,800	+ 51,750
T. & N. O.	29,175	24,457	+ 4,718
Halifax Electric	5,696	4,882	+ 813

Land sales of the Canada Northwest Land Company for June were 2,809 acres less than a year ago. Following is a comparison for the month and for the year to date:—

	Acres.	For.
June, 1911	5,156.51	$ 80,884.12
June, 1910	7,965.66	104,357.52
Decrease	2,809.15	$ 23,473.40
Jan. 1 to June 30, 1911	21,065.92	283,565.18
Jan. 1 to June 30, 1910	35,065.92	420,450.29
Decrease	14,126.90	$136,885.11

Shawinigan earnings continue to show big gains. For May the gross was $84,450, against $60,140 last year.

The Temiskaming statement shows a surplus as of July 1st of $309,951.73, made up as follows:—Cash on hand, $247,902.38; owing from smelters, $42,659; ore on hand, $35,944.85; accounts receivable and stock on hand, $25,119.86; unearned insurance, $3,138.05; total, $354,764.14, less accounts and taxes payable, $44,812.41; surplus, $309,951.73.

Toronto Street Railway gross earnings by months, with the gains to date, are:—

		Increase.
January	$362,380	$31,033
February	335,108	27,334
March	372,946	29,404
April	367,535	37,594
May	406,885	46,631
June	401,186	36,391
	$2,246,040	$208,387

The monthly earnings of the Montreal Street Railway are as follows:—

		Increase.
January	$363,147	$40,102
February	326,628	26,598
March	368,079	35,298
April	367,410	31,408
May	419,459	58,978
June	419,347	46,088

The Royal Bank of Canada will open a branch at Medicine Hat, Alta.

The Royal Bank of Canada has opened a branch at Athabasca Landing, Alta.

The Bank of Toronto has opened a branch office at 516 St. Lawrence Boulevard near the corner of Ontario, street, Montreal, under the management of Mr. C. L. Parkinson.

The directors of the Russell Motor Car Company, Limited, Toronto, have declared a quarterly dividend of 1¾ per cent. for the quarter ending the 31st instant, on both preference and common issues payable August 1st to shareholders of record on the 20th.

MANUFACTURING FIRE RISKS.

Mr. E. P. Heaton, Insurance Manager of the Canadian Manufacturers' Association, Replies to Mr. T. L. Morrissey.

Editor, Monetary Times,

Sir—Mr. T. L. Morrissey, the resident manager in Canada of the Union Assurance Society, has broken a long silence in a communication published in your issue of July 1st. The silence is rather emphasized by the unusual length of time that has elapsed since the publication of the articles criticized, which appeared in the December number of Industrial Canada. Probably Mr. Morrissey has been actuated by a desire to temper justice with mercy and has awaited a seasonable time to throw out suggestions more or less seriously disturbing to me. When Mr. Morrissey suggests "If the Manufacturers had but a slight modicum of that wisdom of which they seemingly claim a monopoly, they would recognize that fact and begin by muzzling their insurance expert," it is at once apparent that the time when this act is to be carried out has been more or less aptly chosen and excuses its dilatory appearance.

Lest such evil befall me and Mr. Morrissey finds himself in a position to gloat over a prostrate foe, there are some impressions or fancies I would like to place on record.

Wrote Article and Leader.

I have one impression among others, that Mr. Morrissey in writing his letter to The Monetary Times dipped his pen in gall at the very outset. In the December number of Industrial Canada there appeared an article under my name and a leader; the article inspired in Mr. Morrissey the suggestion that I should be muzzled; the leader seems to have touched him in a different spot for of that he writes: "Which prove that our good friends, the manufacturers, can think sanely on this subject if left to themselves." It so happens, however, that both the article and the leader were written by the same person and on the same day. For the one I am condemned, the other meets with undisguised approval. I hope Mr. Morrissey will not rob me of the supreme satisfaction I feel at having written something during my life that he describes as sane, even although the commendation was gained through an unsigned leader.

Results of Importance.

I have another impression and that is that Mr. Morrissey has never evidenced any desire to look at the fire insurance situation from the standpoint of the Manufacturers, and it is quite possible they might not consider him a safe man to follow.

Once more, I have the impression that the Manufacturers have derived enough benefit from their Insurance Department to make them unwilling to either muzzle their officer or abandon their work. Mr. Morrissey in his letter credits us with results of great importance and I am quite ready to let it go at that. And I have the still further impression that if the Underwriters, represented by Mr. Morrissey, would seek by co-operation to remedy abuses or remove misconceptions (a co-operation always denied to us) better results might be attained than by muzzling the dog.

To get back to Mr. Morrissey's letter for a moment. There are two outstanding complaints therein against the Manufacturers. The first is that their "expert" (though I disclaim the title) should have his ear to the ground and catch the tread of the movement to repress the fire waste. How sad it is to think that six years' work must go for nothing and that this material and vital part of our work has failed to catch Mr. Morrissey's ear. We have been rather boastful of the fact that the entire forces of the Manufacturers' Association have been working to this end, always realizing that a lower loss ratio or cost created an unanswerable argument in favor of lower rates.

Old Fashioned Application.

The second outstanding complaint in Mr. Morrissey's letter is that in my article in the December issue of Industrial Canada I was guilty of an offence in advising our members not to sign applications. Mr. Morrissey must surely recognize that most of the insurance companies are voluntarily getting away from the old-fashioned application. I doubt very much if Mr. Morrissey himself demands one for one-twentieth of the risks he accepts of the class to which my advice was tendered.

Why should the companies want applications on Manufacturing risks? Do they not maintain an elaborate and costly inspection and rating service? Is it not a fact that Mr. Morrissey is bound not to write a manufacturing risk without the rating of the Canadian Fire Underwriters' Association and then at no less rate than promulgated by that body? Is it not a further fact that such ratings are not promulgated by the Canadian Fire Underwriters' Association until after inspection? All the facts about a Manufacturing risk are therefore available to Mr. Morrissey, and it would appear to the writer that such knowledge, being otherwise obtainable, should not be required from the applicant.

Probably Mr. Morrissey has been led into his criticism without having regard to the class of assured to whom my advice was given; I should not take issue with him if he limited his demand for applications to those risks for which the required information is not so accessible.

I join Mr. Morrissey most heartily in his commendation of every movement designed to lower the fire waste of the Dominion, and as an Association we stand pledged to support whatever tends in that direction.

Yours, etc.,
E. P. HEATON,
Manager Insurance Department, Canadian Manufacturers' Association.

Toronto, July 17th.

STANDARDIZATION OF MINING ACCOUNTS.

Recommendations for Development Expenses—No Decided Opinion on Depreciation—Classification of Expenditures.

An interesting report in the Standardization of Mine Accounts and Cost Sheets has been issued by the Institution of Mining and Metallurgy. A special committee prepared the report after ascertaining the views of a large number of engineers and other authorities in various parts of the world, the object in view being to get mining accounts compiled on a uniform basis, so as to facilitate a fair comparison of the accounts of one company with those of another. The report states that until the producing stage is reached all expenditure should be charged to capital account, and recommends that the grouping should be under the following heads:—(1) Property; (2) Main Shafts, or Main Adits; (3) Machinery and Plant; (4) Buildings; (5) Surplus Works (including reservoirs, water service, railway sidings, roads, &c.); (6) Underground Development; but it is pointed out that the underground development may be subsequently treated either as a temporary development account or as a permanent capital charge. By way of explanation of the mode of dealing with the expenditure the committee point out—(1) That main shafts or adits to reach ore bodies should be charged direct to capital. (2) That inclined shafts which develop ore, subsidiary shafts, winzes or other workings which assist development should be charged to underground development. That all other expenditure should be carried to a general expenditure account to be distributed proportionately (as soon as possible after the mine has reached the producing stage) over the remaining heads of expenditure after deducting any revenue which may have been received.

After Producing Stage is Reached.

On the subject of development expenses it is recommended that, after the producing stage is reached, no expenditure should be charged to capital account except large special items, such as the sinking of new main shafts to reach ore bodies, and that all deepening of main shafts after the ore body has been reached, the sinking of interior shafts, as well as all driving, cross-cutting, raising, winze-sinking, and plat-cutting, should be charged to development account, which account should be treated as a main head of working costs, or, alternatively, that the whole of the development before and after the producing stage should be debited with an average rate of development redemption, slightly in excess of the average cost at which the payable ore reserves have been developed reckoned on a milling basis. The object of this is to extinguish gradually the temporary account, and thereafter charge all ore-development direct to working costs. The redemption would be effected by debiting working costs with so much per ton milled. This seems satisfactory so long as a sufficient rate of development redemption is fixed to extinguish the account within a reasonable time.

Old Shafts and New Ones.

It is further recommended that, in view of the probability of the main shafts being sooner or later superseded by new ones, the cost of the original shafts should be written down gradually, so that when new shafts are required there will not be an addition to capital expenditure under that head.

On the subject of depreciation the committee recommended that if any existing * * * * * machinery, plant or buildings should be entirely superseded and replaced, the cost of the old items should be written off capital to profit and loss, either at once (if small), or in the case of large items by instalments spread over as short a period as the responsible engineer may recommend.

Further on, after pointing out that plant and buildings are liable to become obsolete and have to be superseded, it is recommended:—"That suitable financial provision should be made gradually out of revenue in the case of every mine for new machinery and plant, which will probably be needed before the mine is worked out; and it is explained that such provision is generally made (often to an insufficient extent) by means of depreciation charged annually or semi-annually to profit and loss account on the original cost of the plant, buildings, &c., the amount written off being fixed according to a conservatively estimated life of each item." Another method which attains the desired end of making provision for contingencies in an equally effective way without depreciation, is to include regularly in the working costs an allowance of a certain sum per month, or per ton, under a separate main heading of Provision for Additions to Machinery and Plant, or to appropriate each year a certain proportion of the profit to a special reserve fund.

Classification of Expenditure.

With regard to replacements of minor machinery and plant, the committee consider that these should be charged to working costs. If this is done, care must be taken that a separate account is kept for these items (which should be articles of short life), so that their replacement shall not also be covered by the depreciation rate provided for the other plant. The concluding portion of the report deals with working accounts and costs sheets, and here there is little to criticize. The classification of expenditure which is recommended is as follows:—(1) Development. (2) Extraction of ore. (3) Sorting at surface, preliminary crushing and transporting. (4) Reduction costs (that is, ore treatment). (5) Administration charges and general charges at mine. (6) Realization charges on products. (7) Taxes and royalties of all kinds, shown separately. (8) Head office charges.

The object which the Institution had in view in issuing their report is a commendable one, and so far as it deals with practical mining matters it is of considerable value.

GREAT WEST LIFE'S NEW BUILDING

The official opening of the Great West Life Assurance Company's new building at Winnipeg took place during the convention of the Great West Life agents in that city last week. The office consists of four storeys and is so constructed as to be able to carry an additional ten storeys. On each side of the main corridor on the ground floor are large rooms, each almost half the width of the building and the whole length. Here are located two elevators, with fittings and grill work of bronze. Throughout the building the floors and the walls of the corridors are of marble, and as it is of the steel skeleton type of construction, with all steel columns and beams encased with terra-cotta, it is fireproof. Any danger of fire reaching the various floors by way of the elevator shafts has been avoided by using doors of solid bronze and polished wire glass, which prove an effectual barrier. Similar doors shut off the staircases on each floor.

The second and third floors are entirely devoted to the use of the Great West Life Assurance Company. On the second are the executive officers, including the agents' and investment rooms. Also on this floor is Mr. Brock's private suite, and opening from it the board room.

A successful agents' convention was held in the building last week. Mr. Brock addressed the meeting, referring to the success of the company since its foundation in 1892, and especially to the company's satisfactory experience in respect to its western investments.

Delegates who spoke were Messrs. W. F. Crosbie, of Manitou; W. R. C. Hewat, of Halifax; J. B. Morgan, Edmonton; Stanley Henderon, Vancouver; Arthur Wheeler, Victoria; C. P. McQueen, of Calgary; J. N. Yeomans, of Winnipeg; N. B. Fitch, of Casselton, N. D.; and L. Bouvier, of Montreal.

The secretary (Mr. A. Jardine), in an entertaining address, gave to the assembled agents an account of many of the early experiences of the company, he having been secretary of the company since its commencement in 1892.

In the afternoon an instructive address was given by Dr. H. H. Chown, the company's senior medical director, followed by a paper on "The History of 1,000 lives" by the company's actuary, Mr. C. C. Ferguson, A.I.A., F.A.S.

During the afternoon the convention was visited by the president and several of the directors of the company, and on behalf of the board Mr. G. F. Galt welcomed the members of the convention to the new Home Office building, in commemoration of the opening of which the gathering was held.

WINNIPEG'S CIVIC ESTIMATES.

Why Rate of Taxation Has Been Increased—Uncontrollable Expenditure Growing in Keeping with Expansion of City.

A statistical summary of the civic estimates of Winnipeg, Man., for the current year with comparisons with the figures for last year has been prepared by City Controller Evanson to show how the estimated expenditure for this year is made up, and how the total of this expenditure governs the striking of the new general tax rate of 13.25 mills for the current year. The statement is naturally composed wholly of figures, and while quite plain to the experienced accountant, is hardly so plain to the uninitiated. The statement shows a gross increase of $549,137.55 in the total estimated expenditure. In 1910 the estimated expenditure was put at $2,431,896.01 while for the current year it is $2,981,033.56. The estimated expenditure for 1910 was exceeded by $35,527.63, and this amount had to be provided for in the total for 1911.

There is an increase this year in every item of the estimates as appropriated to the various departments, with the single exception of the miscellanous amounts set to the credit of the board of control, which is smaller by $1,724,41.

Not only is the estimated expenditure larger than last year by over half a million, but the revenue of the city shows in the statement as being actually less than last year by $36,667.24. The actual revenue this year is estimated at $86,926.20 more than in 1910, but the 1910 revenue account shows a credit balance of $123,593.44 carried over from 1909. Thus 1910, with its abnormally low rate of 10.80 mills, may be said to have robbed 1909 to the extent of that credit balance, and also robbed 1911 to the extent of the debit balance of $36,527.63, which had to be carried forward to 1911.

Why Rate Decreased.

Taxpayers are interested in knowing why it has been found necessary to raise the general rate from 10.80 to 13.25, an increase of 2.45 mills. The figures just referred to, which show as a net falling-off in the revenue amounting to $36,667.24 which represents .62 mills of the increase of 2.45. This leaves 1.33 mills of the increase to be accounted for, and it is made up in the net increase in expenditure.

Mr. Evanson has figured that 1.16 mills of the increase is in expenditures which are classed as "non-controllable," that is, the council has no say whatever in determining what these amounts shall be. These include the fixed charges (interest, and sinking fund) on the debenture debt of the city, which is increased $53,292.53; the hospital grants, which are unchanged this year; the municipal commissioners' levy (provincial tax), which is increased by $2,000; the school board funds for the year, which are greater this year by $119,070: the parks board allotment, greater by $9.430, and the police department expenses, which show an increase of $85,535.30, mainly due to the new police stations.

Increase in General Expenditures.

There is another new item in the "miscellaneous" column this year for $40,000 for the maintenance of the new hospitals.

The increase in the general expenditures over which the council and the board of control have direct supervision and control, represents .67 mills of the total increase. The increases show in every department. One large item is in the street commissioner's department, of $32,080. This is made up partly by an increase appropriation for winter work, but mainly from the natural increase in the work of the department.

Extension of Waterworks.

The great extension of the water system in all parts of the city is partly responsible for the big increase shown in the fire, water, and light department, but a large proportion of this increase comes from the equipping of the several new fire halls, for which the ratepayers have voted in the past two or three years, the increase in the "controllable" expenditure is defended by the controllers as absolutely justified by the enormous growth of the city.

The figures showing the percentage of increase in the general tax rate are, to a certain extent, misleading. It must always be borne in mind that the new rate of 13.25 will be levied on a much increased assessment. In 1910 the rateable assessment was $157,608,220, while for the current year it is $172,677,250. The net percentage of increase in the taxation is therefore larger than is represented in the simple difference between 13.25 and 10.80.

Mr. H. W. Trenholme, who lately resigned the managership of the north end branch of the Canadian Bank of Commerce at Winnipeg, was recently presented with a set of table silverware by his bank associates and friends.

"Where We Go"

in Western Canada.

IN 1906 *The Monetary Times* opened its own office in Winnipeg and put in a permanent staff for the purpose of more adequately taking care of that particular part of the Dominion.

In the interval *The Monetary Times* has been enabled in a most peculiar way to bring Western Canada to the attention of investors and manufacturers in all parts of the world. It has done genuine expansion work and as a result the prestige and influence of the paper has been steadily on the increase.

In 1906 we had three regular advertisers west of Port Arthur—to-day we have 107.

Not only in the matter of advertising patronage has great headway been made—the growth of our circulation in the West has been no less remarkable.

While *The Monetary Times* has always had a good circulation in the West, the fact is that whereas in 1906 we sent a few copies into cities like Vancouver, Victoria, Winnipeg, Edmonton, Regina, Calgary, &c., we are sending them in each week now by the hundreds.

That this large circulation in the big centres has not been brought about to the exclusion of pushing circulation in the smaller cities and towns is evidenced by the following list. It shows how very evenly the weekly copies of *The Monetary Times* are distributed.

THE MONETARY TIMES

OF CANADA

Montreal Toronto Winnipeg

CANADIAN ORDER OF CHOSEN FRIENDS.

Some Information as to Its Present Condition and Future Prospects.

The Canadian Order of Chosen Friends is an assessment society, operating under provincial license in all the provinces of the Dominion. It was organized in the city of Hamilton in 1887 as the rebellious offspring of the old American Order of Chosen Friends, which had crossed the international bridge and started several lodges on the Canadian side a few years before. It is now the patriotic boast of the grand officers of this beneficiary institution that it is "purely Canadian," and they affect to regard with scorn and contempt any rival institution which had its origin in the United States.

The parent order has long since passed to the graveyard of assessment "has-beens," and its Canadian progeny is rapidly approaching that critical period in its existence when it must either put up its rates or shut up its lodge and go out of business. It is now in the twenty-fifth year of its age, and the history of all assessment insurance societies shows that the Nemesis of inadequate rates inevitably overtakes them before they attain their thirtieth birthday. At least, such has been the experience of the A.O.U.W., Royal Arcanum, K.O.T.M., Foresters, and other large insurance societies, who have been compelled by the cold logic of insurance science to undergo radical revolutions in their rates of assessment.

Admits Both Sexes to Its Ranks.

The C.O.C.F. admits both sexes to its ranks. It offers them life insurance and sick benefits on equal terms, the former compulsory between the ages of 16 and 45 (originally the age limit was 51, until recently reduced by Grand Council). The sick benefits are optional to those who belong to the life insurance department. According to the last Grand Council reports the total membership of the Order stands at 37,680, of whom 24,126 are males and 13,554 females. The average age of the membership is 40.11 years. Altogether, there are 602 councils or lodges regularly chartered.

The average death rate is 7.4 per 1,000, an increase from 6.9. Over 45, it goes as high as 12 per 1,000.

The reports of the grand officers as presented to the session of the grand body, consisting of over five hundred representatives, held in Toronto last month, show that during the biennial period, 1909-1911, a total of 11,076 applicants were admitted, while 7,218 were annulled or suspended, making a net gain of only 3,858 in the two years.

The figures submitted by the grand organizer demonstrates the fact that, notwithstanding his bragging, it cost the society $13.72 for every new member it took in to maintain its trifling net gain of about 1,900 a year. The grand organizer ought to have "a splendid staff." They are costing the Order over $25,000 a year. But he should not point grandiloquently to "our remarkable progress as the best evidence of their ability." The inflow of "new blood" is so slow that it can scarcely be perceived or noticed in the growth and up-build of the body corporate.

Life Insurance Fund Shows Stagnation.

But it is in the schedules dealing with the life insurance fund that the most serious evidence of stagnation—indeed, of retrogression—is to be found.

The following authentic statement should be convincing on this point. The figures in the first column give the amounts received for the first five months of this year, 1911, in the form of assessments; the second column gives the amounts paid out in death and disability claims or transferred to the investigation fund (solicitor's department):—

Month.	Cash received.	Claims paid.
January	$28,457 76	$11,337 98
February	28,334 15	42,735 41
March	28,830 43	27,246 06
April	27,921 01	28,903 78
May	29,531 62	39,495 38

Notice that during the months representing one-quarter of the year the grand treasurer paid out in liquidation of death and disability claims a sum of $8,833.64 in excess of receipts from assessments. In addition to that, on May 31st there were death claim papers in the grand recorder's hands demanding $55,378.

What the Order Has to Its Credit.

The Order has to its credit a cash balance in the bank of $90,611, and municipal debentures worth $769,952—total assets, $860,563, as against the enormous liability of upwards of thirty-four million dollars. It requires no prophetic vision to see that a slightly unfavorable disturbance in normal conditions would soon reduce to zero the so-called "cash reserve." Then would follow the panic and the collapse. With a membership marking time, an increasing death rate, and an impairment of the cash in the bank to meet death claims taking place, the end is in sight.

There are 1,350 men in the Order now between the ages of 65 and 75. They are waiting in the calm assurance that their beneficiaries will share between them the big sum of one and a half million dollars, which the C.O.C.F. has contracted to pay them. In a few short years every dollar of that amount will have "fallen in." The question is, "Where is the money coming from?"

Membership and Insurance, 65 Years of Age and Upwards.

Age.	No.	Insurance.
65	239	$260,810 00
66	226	250,727 00
67	192	202,852 00

New Tables Have Been Repeatedly Submitted.

We are not disposed to hold the grand officers and the grand executive responsible for the unfortunate plight into which the C.O.C.F. is drifting. They have never ceased sounding a faithful warning against inadequate rates. They have repeatedly submitted new tables based on the Hunter rate; but Grand Council has turned a deaf ear to all the admonitions and advice of their chief officers. The representatives of the subordinate lodges have scouted and scorned the recommendations of their executive to adopt a scale of higher rates in the interests of future solvency and perpetuity of the Order. They have actually howled down those who have advocated such a policy. In this unwise course they have accepted the leadership of demagogical "organizers," who are in receipt of a commission, and, like Demetrius, who made silver shrines for Diana of Ephesus, they fear that "their graft is in danger to be set at nought."

So it was utterly useless for the grand councillor to plead as he did in his last address to Grand Council as follows: "While we have quite a large amount on hand for the payment of claims, to one who has had an opportunity of looking into conditions it is only a drop in the bucket when we look into the future as regards liabilities from increased death rate and disability payments; and the time is not far distant when we shall see these funds rapidly disappearing if this grand body does not take time by the forelock and take the necessary precautions to prevent such a calamity.

Delay in Adopting Adequate Rates may Mean Disaster.

"Such a step cannot be taken too soon, as already there has accumulated a large liability from inadequate assessments which will be hard in time to overcome; and further delay in adopting adequate rates means almost sure disaster. I feel that I would be recreant in my duty if I did not bring this to the attention of this grand body."

Yet though an angel from heaven had come down and told them they were on the quicksands of ruin they would not hear him. They wanted to believe the demagogues. Whom the gods destroy they first make mad!

RECENT FIRES.

Monetary Times' Weekly Register of Canadian Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Inverary, Ont.—Village badly damaged. Loss and origin unknown.

Aylmer, Ont.—Charlton block destroyed. Loss estimated at $23,000. Origin, supposed incendiarism.

Canso, N.S.—Three stores and three residences destroyed. Loss about $14,600. Origin unknown.

North Vancouver, B.C.—Wallace shipyards destroyed, also a new yacht. Loss and origin unknown.

Codrington, Ont.—Barns belonging to Mrs. Eakins destroyed. Loss unknown. Origin, lightning.

Lambeth, Ont.—Barns owned by Dr. G .A. Routledge destroyed. Loss about $2,500. Origin, lightning.

Sault Ste. Marie, Ont.—Clarendon block, Brock Street, destroyed. Loss about $15,000. Origin unknown.

Chatham, Ont.—Store of McDonald Furniture Company, King Street, destroyed. Loss and origin, unknown.

Harwich, Ont.—Barn of Mr. Martin Doyle destroyed, also team of horses. Loss unknown. Origin, lightning.

Lakefield, Ont.—Saw mill of Mr. John McGrath destroyed. Loss about $2,000. Origin, spark from engine.

Brockville, Ont.—Four barns owned by Mr. Clem Bevens destroyed, also 150 tons of hay. Loss unknown. Origin, lightning.

L'Orignal, Ont.—Stables owned by United Counties of Prescott and Russell destroyed. Loss about $500. Origin unknown.

St. Jerome, Que.—Business section destroyed. Loss estimated at $150,000. Twenty-seven families homeless. Origin unknown.

Peterboro', Ont.—Home of Mr. Thos. Franks, 481 Homewood Avenue, damaged. Loss unknown. Origin, careless with matches.

East London, Ont.—Butcher shop of Mr. Robert Quick, corner of Quebec and Dundas Streets, damaged. Loss and origin unknown.

Sudbury, Ont.—Townships of Hanner, Capreol, Wisner, Sellwood, and Hutton, fire-swept. Loss about $250,000. Origin, forest fires.

Cramah Township, Ont.—Barns of Mr. Wm. Polloch destroyed, also farm machinery, team of horses, a bull, etc. Loss about $5,000. Origin, lightning.

Madoc, Ont.—Barn of Mr. Adam Forestell destroyed, also 20 tons of hay, 250 bushels grain, and farm implements. Loss estimated at $3,000. Origin, lightning.

Toronto, Ont.—Copeland-Chatterson building, 77 Queen Street West, destroyed, also Sergeants' Mess, 10th Royal Grenadiers. Loss about $22,000. Origin unknown.

Montreal, Que.—Sheds of Connell Coal Company, St. Etienne Street, Point St. Charles, destroyed, also 1,000 tons of coal. Loss estimated at $18,000. Origin, supposed incendiarism.

Nanaimo, B.C.—Shingle mill of Ladysmith Lumber Company, two residences, two machine shops, and five cabins, destroyed. Loss about $20,000. Origin, spark from refuse burner.

Amherst, N.S.—Forest fires raging in western portion of county which originated on lumber property owned by Messrs. Cochrane & Roley, Fox River. Incendiarism is claimed as origin.

Victoria, B.C.—Three buildings on North Park Street destroyed. Miss Smart burned to death. Loss and origin unknown. Store room of Messrs. T. N. Hibber & Company damaged. Loss about $500. Origin, supposed carelessness with matches.

Vancouver, B.C.—Elliott block, south side of Trounce Alley destroyed. Loss about $2,000. Origin, supposed mice and matches. Stores at 944 and 966 Main Street destroyed. Loss about $10,000. Origin, defective gasoline stove.

Windsor, Ont.—Kitchen of Crawford house badly damaged. Loss unknown. Origin, overheated stove. Gasoline launch owned by Mr. John Nunn badly damaged. One young lady lost her life. Loss unknown. Origin, back fire from exhaust.

Maxville, Ont.—Town destroyed; the chief losses are: Messrs. Smiley and Robertson, sash and door factory, saw mill and lumber yard; loss, $30,000. Mr. J. W. Smiley, residence and granary; loss, $5,000, on house and granary, $2,000. Messrs. W. H. Dwyer and Company, Limited, Ottawa, two granaries; loss, $3,000. Mr. R. Woodruff, residence; loss, $2,000. Mr. D. Duperent, residence; loss, $1,500. Mr. D. McMillan, stables; loss, $1,200. Grand Trunk Railway Company, station, platforms, five box cars loaded with pressed hay, rails, etc.; loss, $20,000. Mr. A. J. McEwan, logs; loss, $1,200. Total loss is estimated at $100,000; origin unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Brantford, Ont.—Sarfe Varnish factory sustained loss of $3,000 on stock and $685 on buildings; insured in ten companies.

Port Moody, B.C.—Shingle mill of Messrs. Emerson Lumber Company, Limited, sustained loss of $10,000 on buildings and $1,000 on stock; insured with Factories Insurance Company.

Following is a list of insurance involved in the fire in the works of the Canada Machinery Corporation, Limited, at Preston, Ont:—Boston, $5,000; Central Canada Manufacturers, $50,000; Dominion, $12,500; Economical, $16,000; Federal Underwriters, $20,000; Fitchburg Mutual, $10,000; Gore Mutual, $16,000; Lloyds (£26,000), $130,000; Lloyds (£4,000), $20,000; London Mutual, $25,000; Lumber Insurance Company, $25,000; Michigan Millers, $10,000; Millers' & Manufacturers', $32,000; Montmagny Mutual, $24,000; National British (£7,000), $35,000; National General (£7,000), $35,000; Old Colony, $3,750; Ottawa, $24,000; Pennsylvania Millers' Mutual, $5,000; Perth Mutual, $7,500; Texas National, $10,000; Waterloo Mutual, $7,500; Wellington Mutual, $7,500; Western Reserve, $3,750; York Insurance Company, $12,500; total, $547,000.

Northern Ontario.—Estimates of the recent fire loss are made up as follows: South Porcupine, $350,000; Porcupine City, $250,000; Golden City, $30,000; twelve of the largest mines, $500,000; many small prospecting mines in four townships, $50,000; prospectors' cabins, tools, supplies and clothes in five townships, $10,000. No computation for losses sustained by the mines in work done, or loss of time that must be borne during the next three months, is made.

Comber, Ont.—Mr. F. H. Allison sustained loss of $507 on stock and $125 on buildings; insured with Sovereign and Metropolitan.

Toronto, Ont.—Messrs. Jones Brothers & Company sustained loss of $3,000 on stock and $1,000 on buildings; insured with a number of companies.

Regina, Sask.—Mr. C. T. Laird, hardware store, loss on goods, $10,500; insurance on goods, $11,000; following companies interested: American Central, Union Assurance, Commercial Union; loss on building, $1,274; insurance, $7,000; companies: National, Springfield Fire and Marine; cause, vapor of benzine igniting and causing a can of gunpowder to explode. Mr. George Worobetz, general store, insurance on stock and building, $7,650; Winnipeg Fire and Middle West Insurance Companies; loss not settled; cause unknown. Mr. A. Counsell, incubator, slightly damaged; cause, lamp upsetting. Mr. R. J. Burdett, stable, loss $300; insurance, $300, Central Canada Fire Company; cause, small boys smoking. Mr. W. Williamson, stable, slightly damaged; cause, drunk smoking. Mr. F. England, stable, slightly damaged; cause, smoking. Mr. E. B. Andros, stable, no damage; cause, cigarette smoking.

REDUCE THE FIRE WASTE.

Advice of Minnesota's Fire Commissioner—Fire Marshal Law.

That the reduction of fire waste is one thing in which there is a community of interest between the fire insurance companies and the assured, was a statement recently made by Minnesota's new insurance commissioner, Mr. J. A. O. Preus. A few years ago, he said, a Fire Marshal Law was passed in Minnesota. It was done largely through the efforts of the fire insurance people, who were perfectly willing that they be taxed one fourth of one per cent. upon their gross premium receipts for the maintenance of this department. In passing this law the legislature saw fit to set aside only a small part of the tax so collected for the maintenance of this department, the balance to be turned into the state treasury.

At the recent session of the legislature the entire amount of one-half of one per cent. tax was, largely through the efforts of the recently appointed aggressive fire marshal, Mr. Keller, placed at the marshal's disposal.

Fire Marshal Law.

The law was also amended in other respects and it is fair to say that Minnesota has to-day as good a fire marshal law as any state in the Union.

"The fire marshal's office," said Mr. Preus, "has in several states, particularly in Ohio and Massachusetts, proven to be the best agency through which to fight the great American plague, fire waste, and we will from now on expect great results from this office in Minnesota. But if any exceptional progress is to be made there must be co-operation between this office, the fire insurance companies and the insuring public. From the history of the fire marshal law, as I have recalled it, it is not necessary to urge upon fire insurance men to co-operate with the department, but the general public must be induced to do so, and in this you underwriters must assist.

Popularize Fire Protection.

"The movement for fire protection must be agitated and popularized.

"A short time ago I received a circular urging me to ask the Governor if he would not be willing, by proclamation, to set aside a day on which to teach fire prevention in our schools. He informed me that he would be very glad to do so, and this will be done some time in September. This is a move in the right direction, but it is not sufficient. More must be done to make the movement popular.

"A year ago Governor Eberhart secured for St. Paul the National Conservation Congress. This convention gave a much needed impetus to the conservation policies of natural resources promulgated by our former President Roosevelt.

"The bulk of natural resources annually destroyed in Minnesota consists of forests destroyed by fire. It can be said that as a direct result of the National Conservation Congress, the Governor's recommendation to the legislature, relative to a new Forest Service, was passed and an annual appropriation of $75,000 was set aside for the protection of our forests. And the National Conservation Congress will have a farther reaching effect than this. The conservation of our natural resources has been agitated and popularized and our minerals and streams, and water-falls, and our soil will soon receive attention from our legislature. Why not fire waste? Why should our people not be instructed as to the enormous destruction of resources?

Suggests Fire Prevention Day.

"It has occurred to me that the day which the Governor sets aside for instruction in our schools, relative to fire and fire waste, be even more extensively observed as Fire Prevention Day. Why not, on that day, hold a Fire Prevention Congress in our capitol city? There we could have represented by delegates, villages, cities, fire insurance companies, commercial clubs, and other organizations interested in the matter. There architects, engineers, and experts on fire prevention could instruct in the method of constructing fireproof buildings, the maintaining of fire lines; building of chimneys; proper care to be taken in the use of combustibles, etc., etc. It is not sufficient that you fire insurance men alone congregate and pass resolutions. You cannot cope with the situation alone. You must have the co-operation of the public, of the state government and of our state legislature.

"You say our natural resources when once exhausted cannot be replaced. That is true; but neither will the same building which has been destroyed by fire, rise like a phoenix from the ashes. A building destroyed by fire is a total loss to the commonwealth. I heard a man say, the other day, in speaking of fire prevention, that he had far more respect for the man who holds him up on the street and takes his money, than for one who burns his house to get the insurance, because the former keeps the money in circulation, but the fire bug virtually throws wealth into the bowels of the earth.

Get Commercial Club Co-operation.

"I said the movement for fire prevention must be agitated and popularized. The annual fire loss of a city or village should be taken up by the Commercial Clubs and other organizations and these clubs should, in turn, co-operate with the State Fire Marshal and the city or village council, and seek to reduce the number of fires; and urge the legislature to pass laws which will reduce the number of fires. But such quasi public organizations as Commercial Clubs will not pay any attention to our fire extravagance unless their attention is called to it by the people of our cities and villages. They should be made to see and feel what the fire tax of their communities amounts to each year. In 1910 the city and village tax per capita in Minnesota amounted to $7.29. In 1911 this fire tax will perhaps equal one-half of the communal tax. Most important of all it is that each individual realize the extravagance in this regard.

Only Ten Per Cent. of Fires Unavoidable.

"It is estimated that at least 90 per cent. of all fires in the United States are unnecessary and due either to carelessness, ignorance, or deliberate arson.

"As stated before, in the United States the per capita fire tax annually amounts to about $2.51, while in Europe the per capita tax is about 33c. The fire losses, together with the cost of fire prevention in the United States, aggregate annually about $500,000,000.00, or about one-half of the amount which Congress annually appropriates for the maintenance of this Government.

T. E. WILLIAMS,

Secretary, Montreal Life Underwriters' Association.

Tremendous Fire Cost.

"It is estimated that the cost of our fires per annum is equal to one-half the value of all new buildings erected in the country, and that every minute our country is losing $500 through loss by fire. Ten to twelve thousand people annually lose their lives through fires. We are annually expending hundreds of times more for fire extinguishing than we do for fire prevention. The ratio should certainly be changed.

If these, or other more striking figures, were brought home to the individual there is no doubt but what there would be co-operation and concerted action in fighting our national plague.

People would undoubtedly use safety matches.

They would not fill lamps or stoves by artificial light.

They would keep oils of all kinds in metal cans.

They would not permit children to use matches, or to fill stoves and lamps.

They would see to it that particularly chimneys were properly constructed and examined from time to time.

Canadian Life Underwriters' Convention

FIRST DAY

Almost three hundred life insurance managers, directors, actuaries, superintendents and field men, gathered at the Royal Alexandra at Winnipeg last week. The occasion was the annual convention of the Dominion Life Underwriters' Association. The meeting had been held in previous years at Toronto and Quebec and the life underwriters met west of the Great Lakes for the first time.

The Toronto and Montreal contingent went to Winnipeg on a special car and were entertained at Chicago by the life insurance men of that city. The Canadians were tendered a banquet at the Hotel La Salle. Addresses were made by several Chicago underwriters and by the visitors. Mr. E. R. Machum, of St. John, delivered a humorous speech charging Mr. T. B. Parkinson, the Dominion Association's secretary, with the "crime" of making the numerous and excellent arrangements for the welfare and comfort of the underwriters. Mr. Machum condemned the secretary to be "pinned in the neck." Mr. Parkinson was then presented with a splendid scarf pin.

Members From the West.

The Calgary, Edmonton, Vancouver, Victoria, Saskatoon, Brandon, and other Western members, arrived on Monday and the Toronto and Montreal men on Tuesday morning. The registration of delegates proceeded at once.

The convention opened in the afternoon on the "Winnitoba," and the business proceeded as the commodious vessel made her way down the Red River, with its historic banks recalling to the visitors, the Canada of the olden days, the most striking reminder being the old ramparts at Lower Fort Garry.

As to Coronation Honors.

Mr. Wm. McBride, the president of the Dominion Association, in a witty speech, introduced Mayor W. Sanford Evans, saying he was disappointed that he could not present Sir Sanford instead of Mr. He was sure that Mr. Evans, Hon. R. P. Roblin, Ginger Snooks, the city scavenger, and Mr. McBride himself, were disappointed at not receiving knighthoods during the Coronation festivities.

Mr. Evans then welcomed the delegates, stating there had been no disappointment respecting Coronation honors on the part of Mr. Roblin and himself. He was sorry that Mr. Snooks and Mr. McBride had been disappointed. He had a great respect for the life insurance business and wished it success, and referred to the remarkable success of Canadian companies in past years.

Mr. H. B. Andrews, president of the Winnipeg Association, also welcomed the delegates, as did Mr. J. E. Hughes, of Brandon.

Mr. J. H. Brock, managing director of the Great West Life Insurance Company, of Winnipeg, in extending additional welcome to the visitors said he commenced the business of soliciting 47 years ago. In 1869, he first got in Troy, N.Y., an agents' manual of the Mutual Benefits Life Company. When he came to Canada, it was well to have that early experience, as he started a company of his own. The Great West Life building was one of four storeys. Later he hoped that they would add ten more storeys, when the days arrived that throngs would come for life insurance to the agents of all companies.

Mr. T. B. Parkinson replied to the words of welcome. That all the strong insurance men do not live in the East, was apparent, he said.

On arrival at Selkirk, the delegates took a stroll around the town and returned to Winnipeg during the evening, well ready for sound sleep after a long day of labor, pleasure and refreshment.

SECOND DAY

The second day's proceedings opened with a most interesting discussion of a five-minute paper given by Mr. N. T. Truell, of Regina. The subject was, "The best method of closing an application," and "Is there a psychological moment; if so, how can the agent recognize it?"

In discussing the best method of closing an application, said Mr. Truell, it is presumed that a certain amount of preliminary work has been done and that the agent possesses a knowledge of his business and natural aptitude. The latter no company can supply and no treatise can inculcate. The successful agent must be able to adapt his own methods to the man, the occasion and the environment. In short he needs tact, initiative and common sense. He must be possessed of real force—moral and mental. Physical force is desirable, but fortunately it is not a vital attribute. He must never for one moment acknowledge to himself the possibility of defeat. He must never for one moment allow his will to be subservient to that of his prospect and underlying his every thought and word and act must be the consciousness that he is battling for the right and that right must win.

The Underwriters' Convention at Winnipeg. The delegates were entertained by the city of Winnipeg at Assiniboine Park.

In his preliminary work the agent must have shown his good judgment in the selection of his prospect and have obtained sufficient information, either from outside sources or from a previous interview, or at the beginning of the present one, to enable him to select the plan best suited to the prospect's needs and to determine the amount of insurance which he may safely sell him.

An opportune hearing must then be secured. This means a season when the prospect can be seen and danger of interruption is least—but it means more. The mental attitude of the agent himself must be right or the interview will likely fail. I believe more depends upon the mental state of the agent, continued Mr. Truell, than upon any other factor in writing life insurance. If one starts the day in a depressed condition and does not rouse himself from his lethargy, he need look for no satisfactory results from the day's labor.

Granted an opportune hearing, promptly must the mind of the prospect be disabused of the idea that it is the old, old story he is to hear and the old, old arguments he is to answer. On the contrary he must be made to understand at the opening of the interview that he is talking to a live man, dealing with a live issue and in a live manner.

Must Tell the Story Quickly.

The agent must tell his story quickly, but plainly. He must be brief and explicit; general remarks may convince, but they rarely cause a man to act. He must never lose sight of the fact that his object is to secure the application, and, as the fisherman analyses every movement at the end of his line to detect the psychological moment to strike, so must the agent keep every nerve alert for the precise moment to produce the application form. He must not talk too much. It is a nice point to decide when one has talked enough. His points must be clear and when made the prospect must be given a moment to comprehend their full meaning. There are times in an interview when a single word uttered by the agent will undo all he has done or at least destroy, entirely, the effect of a point well made.

R. S. ROWLAND,

Chairman of the Transportation and Hotel Committee, Winnipeg Life Insurance Convention.

He must be concise and absolutely truthful, prepared to meet every difficulty fairly, but must never anticipate difficulties by bringing them up himself. His whole aim should be to persuade, to move, to get his prospect interested, to induce him to ask questions; to lead him, while all the time he thinks he is leading the agent, to excite his curiosity, to keep him busy investigating or talking, but yet never to give him time to say no.

The agent should compliment the good judgment and discernment of his prospect whenever possible to do so, always remembering that a man will act more quickly on his own arguments than on those of the agent.

To summarize. The agent who has learned the value of honesty, system and industry, who is able to think and create, who realizes that the action of the prospect will depend more upon the measure of quiet determination and strong conviction in the mind of the agent than upon any other circumstance and who has sufficient energy and concentration to give his most careful attention to each and every canvass he makes, will become a power for good, will attain the highest success in his calling and his name, linked with that of his company, will be heralded to posterity.

Mr. J. E. Hughes, of Brandon, on behalf of Mr. Scarliffe, of St. John, read some notes on this topic. No matter what line of work is taken up, he said, we all know from the individual following that line, some method or rule must be followed.

The Best Method.

"From the subject before me the best and no other method is called for, therefore, when going to close an application, the first thing is to look towards yourself, not the prospects. Do you, as you approach your prospect, feel tingling through your senses the positive fact that you have accomplished your task even before you have come to it, in other words: Do you take proper care of your own health? Do you keep your appearances neat and clean? Do you keep your body cared for, by getting proper sleep and nourishing yourself with food that will put back-bone in you, and finally, are you following this vocation with a determined will to make every day count for bettering humanity, the company you represent and last, but not least, your own family.

"In your case, I take it for granted," wrote Mr. Scarliffe, "that all the foregoing items are being followed, therefore, you call on Mr. Jones at his home, just after he has partaken of his meal and has a good feeling towards all mankind. It is a bad rule to canvass a man when his stomach is empty, and as you enter with a pleasant smile you shake hands with a hearty clasp. Possibly after entering, the chair offered you may be across the room from Mr. Jones; do not waste time talking, but find some excuse to get in closer touch with him. Show him some literature or draw his attention to some matter whereby you have to cross the room and when there just draw your chair to be seated close to him so that the light will fall on his features.

"If there is twilight in the room under some pretext get a light. Begin to look at figures and in an offhand way say, 'the light is dim, etc,' and at once your prospect will have a light brought in and here is your chance to greet Mrs. Jones with a hearty shake of the hand and mention the subject to her. Nine cases out of ten she will sit down and now you have your chance for selling your goods.

"No doubt, you have a sample policy with an application inside it, open this and spread it out on the table and ask Mr. and Mrs. Jones to draw their chairs up to see some point in the policy by stating, 'In taking this policy you want to understand it thoroughly and it's my greatest pleasure to give you the full particulars.' At once your prospect sees your sincere interest in making everything plain, though he may reply, 'I don't want to take any to-night.' Remember that you sold this policy before entering, and do not let this thought leave you as you reply, 'Oh, well, you will soon and now is the time for me to make it clear to you and Mrs. Jones.' Go into each detail and be so careful to make clear answers to any questions.

Story of Mr. Jones.

"After your policy is explained, say, 'This is the application we use and all you have to do is sign it.' Here Mr. Jones may remind you he stated previously he did not want it just now. Turn to Mrs. Jones and directly questioning her say, 'Mrs. Jones, you would like to have your husband carry protection.' Do not say wouldn't you, but you would, as you have in this way made an assertion that states a positive fact and the lady generally answers 'Yes.' You now have her consent and it is up to you to state to Mr. Jones every time you can 'you need insurance,' putting stress on need and soon he will feel the word 'need' taking hold of his mind and he eventually will answer you 'Yes.' Now is the time for you to again put your pen in his hand saying. 'sign here.'

"This being done and a settlement paid down do not linger too long, for having the confidence of both man and wife, it is best for you to leave before any after-thought can be brought out. In leaving shake hands and say, 'I have gained another friend, for you will always be pleased to remember our little talk to-night and where you can drop a word to a friend of yours in favor of insurance, I am sure you will do me the favor.' Thus you have closed your application and sent out a satisfied man, who will canvass for you, making another prospect."

Deliver the Policy.

Mr. T. J. Parkes thought the best method to obtain a new policyholder was to get him to sign, get the cash and deliver the policy. He agreed there was a psychological moment. A few years ago an agent called on him, saying that there was a peculiar risk to see. Mr. Parkes discovered that the prospective policyholder was a crank. He went around town to learn the crank's peculiarities. The speaker produced a policy, application form and a statement of his company.

He commenced slowly to fill up the application. "I am not going to sign that," said the crank. "I have not asked you to sign it," replied Mr. Parkes, "you are suspicious of my company, of me. I leave these papers with you and will be back in three days." Mr. Parkes thought that was the psychological moment in that case, the moment of disappointment. Three days later he closed the application.

Mr. Parkes did not know how the life insurance agent could recognize that moment. The field man had to have the sixth sense. There had to be the correct mental attitude towards the prospective risk. If the sixth sense were not cultivated, the psychological moment could not be recognized.

J. E. HUGHES,

President, Brandon Life Underwriters' Association. Mr. Hughes was unanimously elected vice-president of the Dominion Association, but found it necessary to withdraw.

Mr. Williams, of Montreal, said there was much in suggesting to the "risk" what he was wanted to do. There was considerable importance in being in an affirmative rather than a negative frame of mind. He recalled the story of the banker who wrote to an insurance company expressing a desire for a policy and giving the agent twenty minutes' interview. The field man talked his time away without result. "I thought you wanted insurance," said the agent, on being told his time was up. "I did," replied the banker, "but you do not know your business."

Do Not Talk Too Long.

"We must keep testing the prospective policyholder's attitude towards our proposition," said Mr. Williams. "We must get opinions to coincide. We must ask him questions and show him figures concerning the proposal." Some agents seemed to have a hypnotic influence, but only a few. One word of advice, he had: Do not talk too long to your man.

The first requisite of the field man, said Mr. John R. Reid, of Ottawa, was an intelligent equipment. The best way to write insurance was to learn how not to do it. The school of experience was a fine training ground. He must have confidence in himself and in his business. One man should do the talking when two are soliciting. Conversation should be concentrated on the application for insurance.

Cheerful optimism was invaluable in the field man's work, so was persistent system. Too much theory about life insurance should not be preached to the applicant. The business was obtained chiefly by talking of the application itself. Mr. R. Work, of Winnipeg, read some interesting extracts on this subject from an insurance text book.

Winnipeg Entertained Delegates.

The delegates were then given an auto ride around the city and entertained by the civic authorities in princely style. Alderman Adams welcomed the visitors, saying he remembered the time when a life insurance agent was looked upon as a bore. To-day he looked upon the life insurance business as a profession. Insurance men should be the best men obtainable in the community. He thoroughly believed in life insurance. The men who applied for insurance without solicitation, were increasing.

City Clerk Brown, of Winnipeg, then handed Mrs. Wm. McBride a handsome bouquet. Mr. J. W. W. Stewart, of the Monarch Life of Winnipeg, further welcomed the big convention; as did also Controller Waugh. Mr. Wheeler, of Victoria, B.C., tendered thanks, on behalf of the visitors, for the splendid reception.

Mr. T. B. Parkinson presented the secretary's report in part, as follows:—

"During the ten months that have passed since our last annual meeting, there has been added to our organization seven new local associations: Edmonton, Moose Jaw, Saskatoon, St. Catharines, New Glasgow, Port Arthur and Victoria, B.C., in the order named, and we now have thirty-four local associations actively engaged in the work of expansion.

"Some of the older associations have done heroic work in increasing their membership, viz.: Toronto, Winnipeg, Montreal, Regina and London. The president of each of these associations has been an enthusiastic hustler. The fact that the number of associations is increasing, taken together with our experience during the past year, makes it absolutely necessary that some changes should be made in our system of organization. At present annual meetings are held in almost every month of the year, and we urge this convention to adopt some measure that will make each local association's year begin in the same month, say the month of January. It is further thought advisable that each local association should pay its fees to the L.U.A. of Canada during the month of June of each year, and in future all prize membership contests should end in this month.

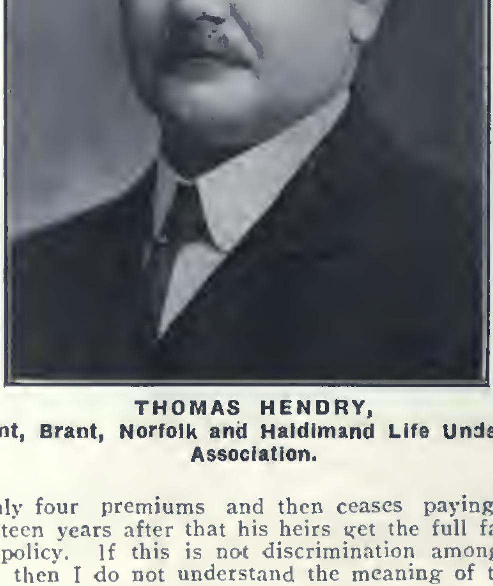
"The secretary has had a large amount of correspondence with the different associations, also with individual members, during the past year, but in the case of the local associations it would have been reduced at least one-half had the year been uniform. Only past secretaries will realize the importance and amount of this work.

"At this point I want to publicly acknowledge the valuable assistance rendered by the assistant-secretary, Mr. A. S. Macgregor. He has spared neither time nor pains to make this report complete, and if there is anything lacking, the blame rests not with him, but with the local secretaries."

In the afternoon, Mr. Wm. McBride, the president, delivered in a straightforward presidential address. He was gracefully introduced by Mr. J. W. W. Stewart.

Discrimination Among Policyholders.

"Our Federal government legislators," said Mr. McBride, "have wisely expressed their contempt of discrimination among policyholders and penalized it as best they could; yet most of our companies are discriminating against earlier policyholders and in favor of more recent ones in the matter of extended insurance. For example, an old policyholder may have paid nineteen premiums on a 20-year endowment policy, and through perhaps an oversight neglected to pay the 20th one. He dies soon after and his poor widow learns with sorrow and dismay that the policy lapsed, and that there is nothing coming to her. A newer policyholder pays only four premiums and then ceases paying. If he dies sixteen years after that his heirs get the full face value of the policy. If this is not discrimination among policyholders, then I do not understand the meaning of the term. We should urge upon the Life Officers' Association to dole out even-handed justice and see that the old policyholder, whose premiums perhaps gave the company its initial start, gets the same liberal treatment afforded the more fortunate and more recent policyholder.



THOMAS HENDRY,
President, Brant, Norfolk and Haldimand Life Underwriters' Association.

"Again, some companies have lost all the gallantry characteristic of civilization, and discriminate against the fair sex in favor of the coarser sex. Many of the companies charge a lady about $5.00 extra per $1,000 on a life plan, because they argue she is a poorer risk in consequence of her sex. Yet if the same lady asked the same companies for an annuity policy, she would get a smaller annuity than a man of the same age, because they would argue she is a better risk in consequence of her sex and would live longer to draw the annuity. Companies' actuaries should be made see the ridiculous anomalies in these discriminations.

"Another absurd theory some actuaries are trying to propound and carry out is that where a risk is substandard the same loading should be imposed on the highest premium as on the lowest. In other words, if an applicant were good enough for an ordinary life with a lien but happened to select for himself a 10-year endowment, exactly the same lien would be attached to the endowment policy. I have had discussion with an actuary who is putting this theory into actual practice, but owing to his being a pure theoretic faddist he would not see any force in arguments adduced by any practical field man. Some reasonable uniformity should be adopted in dealing with such cases, and it is up to the Life Officers' Association to eliminate in some way these inconsistent irregularities.

"Most of the companies have uniform premium rates on participating policies. Among the companies who have not adopted uniform rates the divergence is hardly perceptible. On non-participating policies, however, many of the companies have adopted "go-it-as-you-please" rates. A few companies lowered their non-participating premiums a little ostensibly to meet competition, but really to give themselves a dishonest excuse for splitting agents' commissions in two.

"One company lowered its rates only 15 cents per $1,000 at age 20 and to recoup themselves for this paltry reduction deducted $2.98 from the agent's commission and compelled its agents throughout the whole Dominion to comply with the new scale of commissions or get out. A more contemptible subterfuge of excuse for reducing agents' commission I cannot imagine, and I hope the Life Officers' Association will give the officers of this company the censure they deserve and at the same time make every effort possible to establish reasonable uniformity in rates and in commissions on non-participating policies.

"Many evils result from some companies giving agents on non-participating policies only one-third of the commissions allowed on participating policies. Such companies are neutralizing the high moral code our associations are trying to build up.

"Another discrimination which at least one American and one Canadian company are guilty of is a discrimination against the poorer man and in favor of the wealthier one. If a man is able to carry $5,000, he gets it for a good deal less than five times the cost of $1,000. If he can afford $10,000 he gets it for less than twice the cost of $5,000 and if he can stand $40,000 he gets it for considerably less than four times the cost of $10,000, and so on.

J. O. PECK,
President, Windsor Life Underwriters' Association.

"I am quoting from policies of $1,000, $5,000, $10,000 and $40,000, which have been recently brought to my notice

SPECIAL OFFER TO

LIFE INSURANCE MEN!

The Monetary Times will be sent to any life insurance man weekly to January 1st, 1913, for three dollars, provided that the subscription is received on or before August 15th, 1911. The subscription will begin with the date of the post mark of the letter enclosing your three dollars and will include a free copy of our pamphlet containing the report of the Convention. Be sure to address your order to Life Insurance Department,

in Edmonton and Winnipeg. I think such unfair discrimination is a direct violation of the Dominion Insurance Act, and that the guilty companies should be penalized. Either our association or the Life Officers' Association should lay the facts before the Insurance Department, though if that Department moves as slowly as it did in the case of the Canadian Guardian Company, old Gabriel may be tooting his trumpet before sentence against the evil work is executed.

East versus West.

"There is still another discrimination some companies are guilty of, viz.: discriminating against Eastern agents in favor of Western ones. The tide of emigration is westward and for one policyholder that moves East there are at least twenty-five who move West and pay their renewal premiums to Western agents. Some companies have a very equitable arrangement by which the agent who wrote the risk gets about two-thirds of the renewal commission and the agent who collects the premium gets the other one-third, but several companies allow the collecting agent to retain the whole renewal commission, thereby defrauding the underwriter of the risk out of his legitimate earnings. I have in vain tried to point out to the managing directors of some of these companies the iniquity of allowing such a state of affairs to exist.

H. B. ANDREWS,

President, Manitoba Life Underwriters' Association, Winnipeg, Man., winner of Prize Essay Competition.

"The Western agents who take advantage of their Eastern confreres in the same company and steal their hard-earned commissions, are twisters ten times more contemptible than the agent who stoops so low as to attempt stealing a risk from another company.

As to Making Estimates.

"Our Federal legislators are to be commended for having prohibited the giving of estimated profits on policies. I wish they had gone farther and penalized giving estimates as to when a life policy might be paid up. It is most unfortunate that it has been necessary to lodge complaints against one Canadian company, some of whose agents have been accused of making absurd estimates as to when a holder of a life policy might expect his payments to cease. This has been the source of considerable friction. I hope that the officers of this company may be wise enough to request their agents to abstain from making any estimates along this line.

"I desire to call your attention to a most anomalous state of affairs in the province of Quebec and the eastern part of Ontario, where a certain company is operating. This company is employing all the physicians they can get in the double capacity of agent and medical examiner and giving them double fees amounting to from $6.00 to $20.00 per 1,000, according to the nature of the policy. The Quebec City Association has unanimously passed a resolution condemning this and asks us to pass a similar one and state that all the self-respecting physicians strongly disapprove of such an arrangement and the consequent strain upon the moral of a physician who gets his fee if the risk goes through, but not if declined.

"The Quebec Association also asks for an expression of opinion from you as to whether it is desirable that men should be employed as agents when bond companies refuse to issue bonds owing to unfavorable reports on the character and financial standing of such agents. I think there can only be one answer to this.

"We should also as a body protect the action of certain companies issuing 'jug-handled' contracts containing clauses like: 'The authority of the agent shall terminate immediately upon the mailing or telegraphing to him of such notice. Once the agent has signed such a contract he has no legal redress for dismissal, even though he wrote thrice the business stipulated and was perfectly straight in his accounts. Nepotism has protruded itself in some companies and the agent who has the best field and is the greatest producer is the one running the greatest risk if an influential director wants to place a relative in a lucrative position.

"Another objectional clause in a contract reads thus: 'This contract cancels all former contracts and the said company is hereby released from all claims whatsoever connected with any former contract.' Though this clause may seem guileless, it is far from it, and my attention was called recently to the case of an agent who had served a company 14 years and built up a large renewal interest. A deceitful agency superintendent informed him that in consequence of his long and satisfactory services they had decided to increase his first year commission by five per cent. and that he might now sign the new contract already prepared.

"Though this objectionable clause was not in his old contract it was in the new one and he walked into the trap without noticing it, until some renewal receipts due soon after were not forthcoming, and upon his writing for them he was requested to read his contract, from which he could see he had no further interest in business written under former contracts. He sought the best legal advice, but learned he had no recourse against the company inasmuch as he had unwittingly agreed to the terms of the contract. This is by no means an isolated case. Every agent should carefully scrutinize his present contract and any future one he may be asked to sign, and if all agents will refuse signing such one-sided contracts the companies referred to will be forced to eliminate such unfair clauses. As I have said elsewhere, we agents should hang together, since if we do not we may be hanged separately.

Whole and Part Time Agents.

"The time is opportune for discussing the desirability of having agents whether whole time or part time men licensed just as they are in New York State. In that State if an agent, sub-agent or broker, is found guilty of the violation of any of the insurance decrees of the state, his license is cancelled and cannot again be granted him till after the expiration of three years from the date of his conviction. This has a wholesome and deterrent effect upon unscrupulous agents, particularly if they are influenced by any fear of being driven out of the ranks of accredited life insurance salesmen.

W. LYLE REID,

Secretary, Ottawa Life Underwriters' Association.

"We should urge upon the Life Officers' Association to devise some equitable system for retiring old agents who have given their companies long and faithful service and who, when exhausted work has worn out the human machinery, should not be needlessly thrown into the scrapheap. Our railway companies, banks, large departmental stores, and other concerns employing labor wholesale have matured such schemes. Three of our Canadian companies are now giving serious consideration to adopting a plan.

BOND OFFERINGS

Our QUARTERLY LIST of offerings just published gives complete descriptions of the following GOVERNMENT, MUNICIPAL, CORPORATION AND INDUSTRIAL ISSUES

An investment may be had of $100, $500 or $1,000 denomination—Income yield as high as 6%. Each issue offered has been thoroughly investigated for our own purchase, affording the small and large investor like benefit in choosing a desirable security. A copy sent on request.

DOMINION SECURITIES CORPORATION

LIMITED.

26 KING ST. EAST
TORONTO.

LONDON·ENG·

CANADA LIFE BLDG.,
MONTREAL.

"In Harvard, Columbus and some other American universities, insurance chairs have been established, whereas in Canada (except in the Belleville Business College), I do not know of any educational institution where even a single lecture is given on insurance. Laval University, if funds can be secured, is willing to set a good example to our other Canadian Universities in this line. We should have life underwriters' institutes at all the leading points in Canada. This would entail paying the salary and expenses of some efficient lecturer and supervisor, which the Life Officers' Association should defray, but it would be money well spent and prove a profitable investment for all life companies operating in Canada if they would adopt concerted action in this matter.

DOUGLAS J. SCOTT,

Vice-President, Manitoba Life Underwriters' Association, Winnipeg, One of the Entertainment Committee.

"I think it would not be out of place for us to suggest to the Life Officers' Association that they should have an agents' 'Caution Bureau,' somewhat on the same lines as the 'Library Bureau' of Boston. The secretary of this bureau, to whom reports could be sent of agents guilty of financial or other irregularities, could in turn put all companies on their guard in reference to black-listed agents. There are some unscrupulous agents, most of whom have been driven out of the country, who exploit the public and local insurance managers.

"The Federal Government wisely prohibits the giving of estimates, but we have some younger companies working under various provincial charters, in several provinces, giving estimates still. Some pressure should be brought to bear upon those provincial governments in hopes that they may follow in the wake of the Federal legislature in this matter. In suggesting this, I am not actuated by any unfriendly feeling towards these companies, who cannot be censured for using estimates, when they are within their legal rights in so doing.

Suggests a Publicity Bureau.

"I hope you may see your way clear to urge upon the Life Officers' Association the necessity of a 'Publicity Bureau' for educating the public through the public press in reference to the advantages of life insurance. The great masses whom we solicit and who read daily or weekly newspapers rarely see in any paper any readable article on life insurance. Our magazines never touch on it and we agents waste our precious time in individually creating the demand before we have a chance to furnish the supply. One good readable article in a newspaper of wide circulation would do more in one day towards creating this demand than a hundred agents could accomplish in a week."

An interesting discussion followed Mr. McBride's address. Mr. Williams, of Montreal, thought much money was wasted in insurance advertising. It was not utilized to the best advantage.

Mr. Parkinson suggested a committee to report on the question of publicity respecting the benefits of life insurance. Mr. McBride was made the first member of the committee.

Mr. Parkes moved that a memorial should be presented to the Life Insurance Officers' Association respecting the practice of discriminating against older policies with regard to extended insurance privileges.

Mr. Puffer seconded.

Mr. Burrows, of Belleville, discussing the insurance of females, said his company did not insure females on ordinary life rates. If actuaries tell us the risks are greater on females at certain periods, than males, the companies should charge higher rates.

Mr. John R. Reid spoke of the female physical hazard. He thought the field men should not interfere in the actuarial field.

Mr. Young, of Regina, thought there was not the same insurable interest in females.

Mr. N. T. Truell, Regina, thought there was no discrimination in rates prior to marriage, after which there were greater physical risks.

Mr. Read reminded the delegates that the companies were collecting statistics on this question.

The attention of the Life Insurance Officers' Association was drawn to the action of a certain company in appointing medical men as medical officers and agents combined. A standing vote in favor was taken.

Mr. Parkes proposed a central bureau of information for the registration of undesirable agents.

Mr. Charles Jerome Edwards, of New York, described the working of a caution bureau inaugurated by the National Life Underwriters' Association.

Mr. Parkinson hoped that next year the insurance men would be enjoying the railroad rates now granted to commercial travellers. They gave freight to the railroads and the insurance companies loaned them money by holding their bonds.

THIRD DAY

Mr. H. J. Powell, the president of the National Association of Life Underwriters, United States of America, was received with applause and musical honors, being introduced by Mr. McBride. Mr. Powell is trying to get his two legs on the right side of 70,000 miles in a visit to the various underwriters' associations throughout the neighboring republic.

Mr. Charles Jerome Edwards, former president of the National Life Underwriters of the United States, was then introduced by Mr. McBride, and recalled his first acquaintance with Canadian insurance men in 1907, when he was elected president of the National Association at Toronto. The present day, said Mr. Edwards, was the decade of the square deal. That spirit had come into life insurance spheres to stay. Since 1905, since the Association movement had gained sway, and since reforms had taken place in home offices, reforms had also taken place among the agents, and were undertaken by the field men voluntarily. This would do much to upbuild the insurance business and create a proper appreciation of insurance on the part of the public.

J. ARTHUR WILSON,

Secretary, Manitoba Life Underwriters' Association, Winnipeg, and a member of the Banquet Committee.

The Canadian Insurance men had done more in five years than the American men had accomplished in twenty-five years in the way of purifying the insurance profession. The five presidents of the Dominion Association, Messrs. G. H.

INVESTMENTS FOR JULY DIVIDENDS

CANADIAN GOVERNMENT AND MUNICIPAL BONDS

We have just issued a new debenture list containing full particulars of the following offerings, as well as a number of others, all of which combine the requisites of safety and good interest return. Among them are a number of securities especially suitable for the

INVESTMENT OF TRUST FUNDS

in the Province of Ontario, and also the other Provinces. Our offerings are purchased by us only after careful investigation, and will meet the requirements of the most conservative investor. We shall be glad to mail a copy of our list on request.

COLLECTIONS

In Canada, Cuba and British West Indies handled promptly on favorable terms

Allen, H. C. Cox, John R. Reid, E. R. Machum and Wm. McBride, had shown remarkable ability in furthering the Association movement.

A Good Ethical Standard.

There was great importance in setting up a good ethical standard in the insurance field. Mr. Edwards recalled the early days when little desire existed for life insurance. To-day things had changed. Everybody wanted a policy. Life insurance had become as important as banking and now formed a vital part of our economic life. This was largely due to the men who had pioneered the way in days past.

H. A. KENTY,

One of the Winnipeg underwriters, and a member of the Entertainment Committee.

Respecting the relations of the insurance companies and the public, the speaker thought the best way to serve the policyholder was to establish confidence in the policyholder. All life insurance in good companies was good life insurance. We could not serve the policyholder best by unfairly comparing another company's policies. The best service to the policyholder was to create satisfaction in the man who carries a policy and a respect for life insurance. The field man should not damn another agent's policy. The agent made the company more than the company did the agent. The policy took was the policy he wanted, and the policy he could afford to pay for.

A Word on "Twisters."

Mr. Edwards has little respect for the agent who condemned another agent who had written a policy previously on the same "risk." It did not help insurance. The "twisting" of policies was an abominable feature. He had done all he could to stop that evil. In studying the position, he found that the bottom of the matter was whether or not an agent was doing a constructive rather than a destructive business.

The question as to where competition should cease was important. When was it right for one agent to retire in favor of another? There was a time in the soliciting of life insurance when competition should cease, although it was difficult to determine that time. The life underwriters' associations lived for principle and co-operative effort. The movement had developed a splendid spirit. The relation of the agents appeared to be excellent. Because of that, there should be the recognition of the exact time when competition should stop. All agents should arrive at the point when they could distinguish that moment. When an agent had created a demand for life insurance, made an appointment, had the application ready, that would seem to be the time for the competing agent to withdraw.

Greatest Business in the World.

He thought the life insurance business was the greatest business in the world. The opportunities were wonderful. The field of the days of George Graham, George Cox, and even Wm. McBride, had enlarged in an amazing way. Life insurance was a beneficent institution doing the greatest good of any human institution.

A hearty vote of thanks was proposed to Mr. Edwards for his stirring address and a tribute paid to his good work.

Mr. McBride expressed his regret that the daily newspapers in Winnipeg had not taken a greater interest in such an important convention as that of the insurance men of Canada.

The London Association suggested that the life underwriters' associations should have representation on the local boards of health throughout the country.

Actuaries Take a Hand.

Mr. D. E. Kilgour, actuary of the North American Life, referred to part of Mr. McBride's address in regard to female risks. In the early years, the actuary had to eke out an existence by figuring rates and writing policies, too. Respecting the question of female insurance, the companies were becoming more liberal, but they wanted to make sure that there was a good insurable interest. Women, he said, up to 50 years of age, were worse risks than men. All life companies wanted to write insurance on women. Mr. McBride had said that a lien should not be charged, but, said Mr. Kilgour, one of the best companies in Canada and another in New York had adopted that plan. Companies must get adequate premiums and they could then pay adequate commissions. The demand for a low priced policy prevented that at present. It was not the function of field men to tell any company that it must charge certain rates. No man, however, was more worthy of his hire than the life insurance agent.

Mr. Read, actuary of the London Life, thought that questions of technicalities, such as rates for female risks, should be left to experts. The insurance companies were investigating the question of women risks and would shortly have some excellent statistics on which to base their rates. The medical directors of the insurance companies were also having their decisions questioned, because certain risks were refused. He thought these were matters for the actuary and the medical officers.

Award of Cup.

The John R. Reid cup for the greatest per cent. increase in paid-for members, was presented by Mr. C. J. Edwards to the Montreal Association. Mr. H. J. Kay received the goblet on behalf of the winners. Mr. Kay was largely responsible for the Montreal Association's success, having obtained 62 new members himself. In replying, Mr. Kay invited the delegates to Montreal in 1912. The invitation was unanimously accepted.

S. M. BEARDSLEY,

President, Nova Scotia Life Underwriters' Association, Halifax, N.S.

Mr. H. J. Powell, president of the National Association of Life Underwriters, with typical Kentuckian accent and in a charming address, conveyed the greetings of the American insurance men to the Canadians. He thought it was important that new members should be obtained. The men who were doing unprofessional business should belong to the movement. It was easier to sell insurance than give it away. President Taft once said he had never read his insurance

Are you satisfied with the outlook?
Are you making the most of your ability?

Is there a future before you?
Do you want to be a leader of men?

THE UNION LIFE

Head Office, Toronto **Assurance Company**

1910	210,686 99	67,854 04	1,047,584 39	2,027,739 29

The Home Life issues all popular forms of policies, free from restrictions, and with liberal guarantees.

A few good districts are open for Agents of energy and ability.

policy. When asked why, he replied that he trusted the agent who sold it to him. That was a high tribute to the agent. The man who worked only for his commission was unfit to be in the business.

The agents could best help one another by learning how to sell insurance. The field man should forget all about his commission and think only of his client. The insurance man should know his business. It was better to have a thorough knowledge of one's own company than a little knowledge of every company. The premium should never be quoted until the desire for insurance had been created.

Talk With The Pencil.

The eye will catch a point before the brain. Talk insurance with the pencil, but do not talk too fast. The expressed consent to take life insurance should not be waited for but the implied consent instead. Big writers of insurance only ask for a man's age and to whom he wants policy payable. Some got the "risk" to sign the blank only. Much of the other information could be obtained in the city directory.

The field man knew the technical terms and should not talk too rapidly because the applicant was not familiar. Many agents read their policies up and down and backwards before the prospective policyholder could read it the right way up. The agent should talk his own company and let the other companies alone. Mr. Powell told some interesting anecdotes to illustrate this point.

Interfering With Prospects.

By criticising another company's policy, the agent was creating a desire in the "risk" to examine the other policy. Mr. Powell did not place much faith in talk about prospects. One agent complained about a colleague interfering with his prospects. It was found that the other fellow was looking over the city directory. No man had a corner on prospects.

Many life insurance managers are responsible for the failure of agents. The manager gave a wrong impression of the business. The home office should tell the field man that he was entering a profession and should work hard to master it. The agent should conserve his time; he should not wait around the business man's office.

Nine-tenths of the men in country districts do not know the company in which they are insured. Like President Taft, they trusted the agent. The man behind the rate book must be made of the right stuff.

The field men should attend to their affairs and let the home office look after their business. Rejections of applications were probably justified even when the agent thought otherwise. The home office point of view was not always plain but the field men were the soldiers and must obey. A hearty vote of thanks was accorded Mr. Powell for his address.

Fishermen and Agents.

Mr. George H. Allen, the first president of the Dominion Association, paid a graceful tribute to the welcome extended by the Winnipeg Underwriters, and the excellent arrangements made for the visitors. Mr. Allen cleverly described the various life insurance agents, comparing them to various fishermen. The agent who could insure an hostler or a bartender, and no one else was a minnow catcher. The man who got healthy business which stayed on the books might be termed the life blood of underwriting. Then there was the big man who wrote big business. He did not like the man who dropped into town in the morning and out in the evening. He was the dog fish of life insurance. He was the lightning special in underwriting, the man who was the curse of the profession.

Organization was one of the greatest assets in life insurance. It was not so important as to what work one could do as to what work one could get done.

Too Many Plans in the Rate Book?

An interesting debate was engaged in on the following:—"Resolved, that the present rate books contain too many plans of insurance." The Eastern men took the affirmative and the Western, the negative. A diversity of plans was not good, thought Mr. H. B. White, of Brockville, because it was largely responsible for the lightning agent. Three or four plans appeared to be the best and most favored.

Mr. W. D. McBride, did not think that the lack of multiplicity of plans in the rate book created a lack of concentration. The agent should not be too lazy to study the various plans. The "lightning special" had only one plan in the rate book. Consequently a man got what he paid for but not always what he wanted.

Mr. H. A. Kay, of Montreal, ascertained that there were at least 100 plans of insurance, but the task of learning how many there actually were, was almost impossible. The new agent learned a lot about many plans instead of a little knowledge about a few plans. There were too many different forms of policy and the lazy man got confused. There should be fewer plans so that a man may learn well what he is selling. Insurance should be sold on its merits.

New Agent Was Confused.

Mr. C. J. Edwards agreed that the new agent sometimes became confused in the multiplicity of plans. He believed one of the greatest curses in life insurance was too liberal treatment, such as loans on life policies. In that way about $500,000,000 of supposed insurance in the United States was not properly on the books. The new agent should have an abridged rate book.

Needed Something New.

Mr. Burrows, of Belleville, found fault with the agent who quoted half a dozen plans at once. The field man needed something new, but it should be honestly represented. He should talk the one that suits the prospective policyholder best.

Mr. John R. Reid thought the fact that a small leaflet was often given to new agents instead of the full rate book, showed there was a danger of too many plans.

Mr. T. J. Parkes stated that he tied his new man to three plans until they were conversant with those. He thought there were not too many plans.

T. J. PARKES,

A delegate to the Convention from Sherbrooke, Que.

Mr. T. F. Conrod's idea was that there were only two forms, and they could be varied, according to the taste of the applicant. Innovations were useful and helpful. It was the duty of the agent to do his best with all the material that was in the rate book.

Appointment of New Officers.

The following were appointed the new officers of the Association:—Honorary president, T. B. Parkinson; president, A. Homer Vipond; vice-presidents, J. A. Tory, N. T. Truell; president of National Association Life Underwriters, U.S.A.; secretary and treasurer, Geo. E. Williams; chairman of the executive, H. C. Cox; member of National Association Life Underwriters, W. McBride, M.A.

The following are the members of the executive committee:—Brantford, Jno. Burbank; British Columbia, H. M. Ramsay; Brandon, F. B. Richardson; Brockville, H. B. White; Central Ontario, D. H. Moore; Calgary, J. W. Keith; Cape Breton, C. W. Semple; Edmonton, M. W. Regan; Eastern Townships, Thos. J. Parkes; Grey and Bruce, R. A. Macgregor; Guelph, W. H. Nowell; Hamilton, W. H. Seymour; Huron, A. W. Waddell, Jr.; Kingston, S. Houghton; London, Mr. Elliott; Montreal, H. H. Kay; Manitoba, H. B. Andrews; Moose Jaw, A. W. Irwin; Niagara, R. C. Young; Nova Scotia, W. J. Marquand; New Glasgow, J. L. McDuff; Ottawa, W. M. Stevens; Prince Edward Island, J. O. Hyndman; Port Arthur, G. P. Ames; Quebec, J. T. Lachance; Quinte, Burrows of Belleville; Regina, J. H. H. Young; St. John, G. W. Merritt; Sault Ste. Marie, R. E. Carney; Saskatoon, J. A. McMillan; Toronto, R. J. Stuart; Victoria J. Foreman; Windsor, J. O. Peck; Waterloo, W. Lochead.

DON'T GAMBLE

with death, for you will surely lose in the end. Taking chances by neglecting life assurance is a great gamble. Your wife and children will be the sufferers.

A policy with the Sun Life of Canada, costing only a few cents a day, will build a wall of protection around your home.

Better sign an application TO-DAY.

"By the street of to-day, man goes to the House of to-morrow."

Write to Head Office, Montreal, for literature on the policy you want.

WRITE FOR AN
AGENCY CONTRACT

G. H. MINER,
Managing Director.

The crowning function of the convention was held on Friday evening in the shape of a banquet at the Royal Alexandra when about three hundred guests enjoyed a feast of table delicacies and oratory, under the chairmanship of Mr. E. R. Machum.

Mr. J. A. M. Aikins, M.A., K.C., of Winnipeg, gave an outline of the qualities he thought necessary in the make-up of an insurance man. He was glad they had met in Winnipeg. The gathering would do much to cement the ties of East and West. The greatest danger in Canada, he thought, was the fact that there were two great populations separated by a great geographical division. The leaven which must come would come largely from Ontario. A loyal feeling towards Eastern Canada would have to be created among the Europeans and others whose first acquaintance with the Dominion was made in Western Canada. A Canadian national sentiment should be fostered. Sentiment light as air but strong as iron would bind the people of Canada together.

Value of Patriotism.

Mr. Aikins dwelt upon the value of patriotism. The newcomers should be told of Canada and its great prospects. Our country had greater natural resources per capita than any other country in the world. All these natural resources in Canada should be used for the development of Canada. Canada, he hoped, would live happily and become the greatest country in the finest Empire. The new citizens should be taught the history of Canada.

A. HOMER VIPOND,

The new president of the Dominion Life Underwriters' Association.

Mr. Aikins hoped that Canada would not depend upon Great Britain as it had done in the past. England had done much for Canada. The Dominion has room for a great population. Canada's destiny was to become the right arm, heart and head of the Empire. It was the Dominion's duty to do its part in Empire and repay the great debt it owed to Great Britain.

Mr. Charles Jerome Edwards emphasized the loyalty of Canada and made a stirring speech upon the men of Canada and the Dominion's undoubted destiny.

Mr. Machum next introduced Mr. H. J. Powell, of Kentucky, the land of fair women and brave men, fast horses and good whiskey. Mr. Powell got his listeners in good humor with a cascade of good anecdotes, following with some good advice as to furthering the life underwriters' association movement.

Mr. John R. Reid expressed his delight at all that the Winnipeg underwriters had done for the success of the convention. Mr. Reid then presented Mr. McBride with a tie pin as a token of the appreciation of the association. Mr. McBride replied suitably and asked for the co-operation of the associations with the new president.

Mr. A. Homer Vipond, the new president, in his maiden presidential speech, stated his feeling of gratitude at the support which he knew was his from his colleagues.

The programme was punctuated by songs given by Mr. McSweyn, of Winnipeg, and Burrows, of Belleville. Mr. H. B. Andrews, Mr. J. W. W. Stewart, and others, also made brief speeches.

CONVENTION ECHOES

The membership of the Dominion Association is 1,384.

* * * *

Conscience and character are better than cash.—J. A. M. Aikins.

* * * *

Ten men came from Montreal to get the convention for that city in 1912.

* * * *

The city of Winnipeg certainly entertained the delegates most handsomely.

* * * *

The Monetary Times had three staff representatives at the Convention.

* * * *

Parkes still retains the medal as the particularly proud and piquant poet.

* * * *

Messrs. McBride, Parkinson & Scott would like a present of a new voice.

* * * *

K. of K. means Kitchener of Khartoum, and B. of B., Burrows of Belleville.

* * * *

Our country is too broad for the schisms that shake petty lands.—J. A. M. Aikins.

* * * *

President McBride was once a school teacher, "boy spanker" he called his office.

* * * *

The destiny of Canada is to remain a part of the great British Empire.—J. A. M. Aikins.

* * * *

Life insurance field men never say "You bet your life." They leave the other fellow to do that.

* * * *

The active photographer who snapped the group would make a good hook and ladder fire chief.

* * * *

Hard work and good honest character produces the business in insurance—Burrows of Belleville.

* * * *

The Brandon Association helped the Winnipeg Association to defray the expenses of the Convention.

* * * *

The convention was run on time, and the programme was not too crowded, two meritorious features.

* * * *

With his smiling face and bald head, Mr. Read, of London, was commanded to appear as a platform guest.

* * * *

Mr. McBride's presidential address certainly contained some solid thinking matter, and touched some live questions.

* * * *

Mr. H. B. Andrews, Winnipeg, and Mr. Vivian Reeve, of London, were the winners in the prize essay competitions.

* * * *

Mr. J. E. Hughes, of Brandon, was the official prestidigiteur, a title which even an accident company would not insure.

* * * *

The press representatives were well looked after. The daily newspaper reporters were absent from the most important session.

* * * *

If the subjects chosen for prize essays were more specific instead of so general a nature, a better sheaf of results might be gathered.

* * * *

The Monarch Life Assurance Company gave a souvenir in the shape of a facsimile of the first insurance policy issued in America, 1761 A.D.

* * * *

Alderman Adams, of Winnipeg, said he was too old to be insured. Immediately two hundred lusty voices shouted their willingness to "write him."

* * * *

The friendly clash between field men and actuaries illustrated that even in the same profession, there are various departments requiring peculiar knowledge.

We Believe it pays in dollars to do right, whether in the treatment of our patrons, our representatives, or our competitors.

We Want more good, reliable men.
Three Managers' positions are open in the West.

We Believe we merit our slogan, viz.:

"THE MONARCH LIFE IS A GOOD COMPANY"

PRESIDENT—J. T. GORDON, President Gordon, Ironside & Fares, Winnipeg.
1ST VICE-PRESIDENT—NICHOLAS BAWLF, President N. Bawlf Grain Company, Winnipeg.
2ND VICE-PRESIDENT—E. L. TAYLOR, Director Great West Permanent Loan and Savings Company, Winnipeg.
MANAGING DIRECTOR—J. W. W. STEWART.
SECRETARY AND ACTUARY—J. A. MACFARLANE, A.I.A.
SUPERINTENDENT OF WESTERN AGENCIES—R. S. FLETCHER.

Head Office: Commercial Travellers' Building, Winnipeg, Canada

THE FEDERAL
Life Assurance Company

Home Office - - HAMILTON, Canada
DAVID DEXTER, *President and Managing Director*

Capital and Assets Exceed - -	**$ 4,866,443.08**
Insurance in Force Exceeds - -	**22,500,000.00**

The Company is desirous of adding a few men of ability who can produce results to their agency force in the Provinces of Manitoba, Saskatchewan and Alberta.

FOR INFORMATION APPLY TO

R. S. Rowland,	Manager for	Manitoba, Winnipeg
J. P. Brisbin,	" "	Saskatchewan, Regina
T. W. F. Norton,	" "	Alberta, Calgary

Mr. J. A. Wilson, the energetic secretary of the Winnipeg Association, has dispensed with his beard. City Clerk Brown has enough for two men anyway.

* * * *

One of the delegates was overcome by oratory during the second day's session and fell off his chair. "That gentleman has the floor," announced the chairman.

* * * *

Mr. J. W. W. Stewart, of the Monarch Life, was introduced by President McBride as "the best looking man in Winnipeg," a sort of a monarch of the life he surveys.

* * * *

Treasurer Macgregor, of the Dominion Association, confidentially told the secretary that he had struck the balance four times—and it did not hurt the balance a little bit.

* * * *

The address of Mr. H. J. Powell was the most practical of the convention. He is a vice-president of the Dominion Association as well as president of the American Association.

* * * *

No one seemed to remember personally the first policy issued in America. "Before my time," was the usual reply to inquiries. The policy was issued in 1761.

* * * *

In extending a welcome to the delegates, Mayor Evans spoke of the great growth of "real ———," and then stopped short and said "insurance." Which only shows how real estate is gripping the West.

* * * *

Mr. H. B. Andrews' address of welcome delivered on the boat was punctuated with shrill whistles from the vessel's siren. The big man of the Imperial Life at Winnipeg announced his inability to compete.

* * * *

Controller Waugh told the visitors that the key of Winnipeg had been lost, so the delegates could not be locked in, the city did not want to lock them out and the Police Commissioners would not lock them up.

* * * *

Poetical quotations and dictionary definitions were at a greater discount than usual. That is as it should be. The convention is for life insurance purposes rather than a knowledge of Webster and Longfellow.

* * * *

Mr. Wm. McBride, the immediate past president of the Dominion Association, made a splendid chairman. Though family troubles had weighted recent weeks, he kept on smiling and made the most genial host imaginable.

* * * *

Alderman Adams said he was never afraid to stand up in a parlor or sleeping car and say he was a Canadian. Our experience is that to say anything in a sleeping car is to invite a boot bombardment from sleepy travellers.

* * * *

President McBride complimented a prominent Western underwriter on having "given up the mean, miserable, mercantile life he was following, for the noble profession of life insurance." The underwriter's modesty is proverbial.

* * * *

Mr. E. R. Machum's chief sorrow seemed to be the erring ways of the executive committee. They were here, there and everywhere when wanted at any meeting. If they did not answer his call, well, he would just, er, Machum.

* * * *

Mr. D. J. Scott, of the Union Life, Winnipeg, has three possessions of value—the knack of insurance canvassing, a triple expansion voice, and a signature that makes one's hair curl. His voice especially was a feature of universal admiration.

* * * *

The Royal Alexandra with its 600 rooms was crowded, two in a room being the order of the day, with cot beds rigged up in all kinds of corners. Six or seven felt such an affection for the convention room, that they even slept there.

* * * *

Life insurance, sweetening every night the sleep of millions of people with tired brains and troubled hearts, and saving from utter desolation and want thousands of bereaved families every year, is a fact which could not have existed but for the life insurance agents.—Elizur Wright.

* * * *

Charles Jerome Edwards' photograph was once printed in a Toronto daily with words beneath indicating him as a delegate to a mechanical convention. A copy was sent to him. He replied that so long as he was not branded as a walking delegate to the bricklayers' union, he would let things slide.

When Mr. H. J. Powell, the president of the National Association of Life Underwriters arrived in Winnipeg, he had to search strenuously for a room. Mr. George H. Allen, Montreal, suggested that a room might have been engaged previously for "President Taft," and when the president failed to appear, hand over the room to Powell.

* * * *

The Dominion Association are to collaborate with their United States colleagues in designing an association badge or button. How would this do? A life insurance agent rampant, surrounded by prospective risks, passive, medical officer's eye in left hand and actuary's pen in right hand corners respectively, the whole to be surrounded by a dotted line, supported by a beaver and the words, "Your money on your life."

* * * *

Mr. Williams, of Montreal, stringed the sentimental chord when he recalled the time he proposed to his beloved beneath the light of the silvery moon. The delegates were discussing the psychological moment in getting a man to take life insurance. Mr. Williams told of the psychological moment in getting the lady's signature on a curved instead of a dotted line. "You doubtless embraced the opportunity," interposed President McBride.

R. GEORGE McCUISH,

An old newspaper man and now a life insurance district manager, who with others looked after the Press at the Convention.

* * * *

The following was the bill of fare at the luncheon tendered to the delegates by the city of Winnipeg:—Lobster Salad, Non-Participating Dressing; Radishes, a la Assiniboine Park. Cold Options—Imperial Beef, with Andrews Sauce. Inspected Ham, A. E. Union Tongue, a la Scott. Dressed Veal, Wilson Mode (dues paid). Rowland's Federal Relishes. Endowment Salads—10-Pay Tomato, 15-Pay Lettuce, 20-Pay Potato. North American Fruit Salad de McBride. Jellies with Whipped Cream, a la Straight Life. Johnston's New York Cakes. Kenty's Continental Fruit. Great West Ice Cream, Brock Flavoring. Coffee (Paid-up Policy). Tea (Instalment Policy), Lemonade (Lapsed Policy).

* * * *

Great credit is due to the committees of the Manitoba Life Underwriters' Association who had charge of the arrangements for the very successful life insurance convention just concluded. The following were the various committees:—Transportation and Hotel: R. S. Rowland, H. Walker. Reception: the Executive Committee of Manitoba Life Underwriters; H. B. Andrews, Chairman. Entertainment, D. J. Scott, F. D. Macorquodale, H. A. Kenty, J. St. C. Clark, J. A. Wilson, G. D. Underwood. Banquet: J. A. Wilson, R. G. McCuish, J. G. Stephenson. Press: R. G. McCuish, T. F. Conrod, R. S. Rowland. Finance: H. B. Andrews, G. D. Underwood, J. E. Freeland. All these gentlemen worked hard to insure that the convention would be "the best yet," as Mr. John R. Reid characterized it.

The British Columbia Life Assurance Company

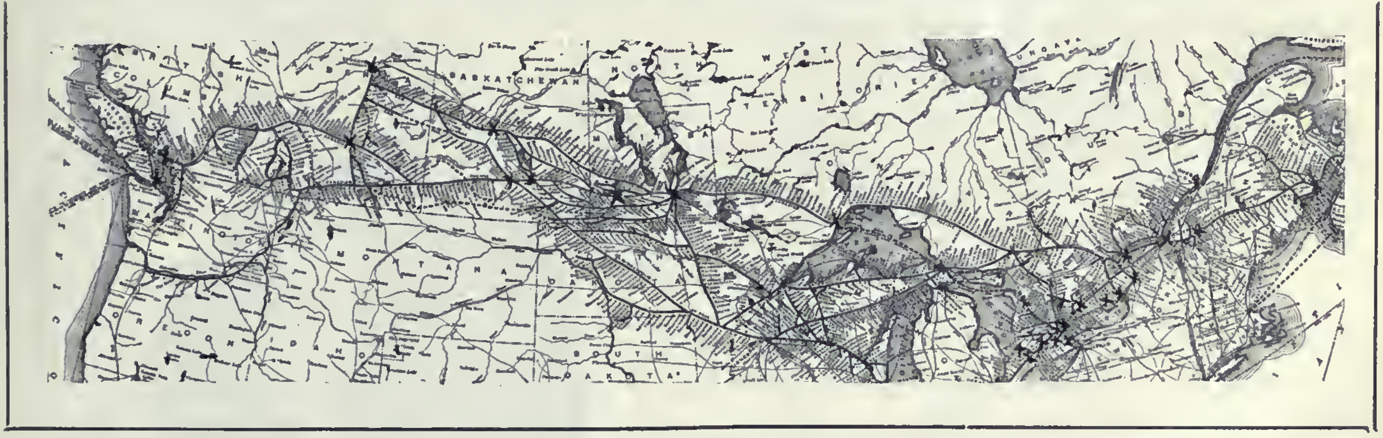
H. J. POWELL,

Manager, Kentucky Agency, Equitable Life. Mr. Powell delivered a splendid address to the Life Underwriters' Convention at Winnipeg.

CHARLES JEROME EDWARDS,

The "Gatling Gun" insurance man from New York, who addressed the Winnipeg Convention.

Life Underwriters' Associations from Coast to Coast



The following is a list of the Life Underwriters' Associations of Canada, the details being in order, name of organization, officers and membership:—

BRANTFORD—T. Hendry, president; D. Thorburn, secretary; 14.

BRITISH COLUMBIA—E. W. Keenleyside, president; H. D. A. Birmingham, secretary; 30.

BRANDON, MAN.—J. E. Hughes, president; T. McWherter, secretary; 30.

BROCKVILLE—C. H. McLean, president; H. B. White, secretary; 10.

CENTRAL ONTARIO—J. I. Allen, president; G. Southwell, secretary; 54.

CALGARY, ALTA.—F. McDonald, president; F. W. Norton, secretary; 35.

CAPE BRETON—C. W. Semple, president; A. M. Crofton, secretary; 19.

EDMONTON, ALTA.—De Blois Hubandeau, president; R. Young, secretary; 20.

EASTERN TOWNSHIPS—W. Leveque, president; S. J. A. Hyndman; 35.

GREY AND BRUCE—R. A. McGregor, president; S. J. N. Glazier, secretary; 12.

GUELPH—W. E. Broley, president; G. P. Hamilton, secretary; 20.

HAMILTON—R. Ripley, president; W. H. Seymour, secretary; 50.

HURON DISTRICT—A. Waddell, president; J. Stewart, secretary; 20.

KINGSTON DISTRICT—J. W. Corbett, president; J. K. Carrol, secretary; 22.

LONDON—G. McBroom, president; D. A. Sinclair, secretary; 80.

MONTREAL—J. C. Tory, president; G. E. Williams, secretary; 182.

MANITOBA—H. B. Andrews, president; J. A. Wilson, secretary; 240.

MOOSEJAW.—A. W. Irwin, president; W. P. Hinman, secretary; 14.

NIAGARA DISTRICT—J. K. Kernohan, president; H. E. Ross, secretary; 15.

NOVA SCOTIA—H. S. Crosby, president; S. M. Beardsley, secretary; 42.

NEW GLASGOW—J. L. McDuff, president; J. M. Baillie, secretary; 11.

OTTAWA—A. J. Micklejohn, president; W. Lyle Reid, secretary; 19.

PRINCE EDWARD ISLAND—W. K. Rogers, president; T. E. MacNutt, secretary: 28

PORT ARTHUR, ONT.—G. P. Ames, president; C. E. Duffy, secretary; 22.

QUEBEC—J. T. Lachance, president; J. T. Chennard, secretary; 57.

QUINTE DISTRICT—B. F. Butler, president; J. E. Parks, secretary; 26.

REGINA, SASK.—D. E. Spencer, president; W. J. Walton, secretary; 50.

ST. JOHN, N.B.—J. W. V. Lawlor, president; H. W. Roberts, secretary; 28.

SAULT STE. MARIE—R. E. W. Ziegler, president; A L. Dawson, secretary; 15.

SASKATOON—R. A. Trelevan, president; H. L. Colwill, secretary; 20.

TORONTO—H. C. Cox, president; J. B. Hall, secretary; 206.

VICTORIA, B.C.—J. Foreman, president; G. L. Wright, secretary; 20.

WINDSOR—J. O. Peck, president; A. G. Roberts, secretary; 14.

WATERLOO—W. Lochead, president; G. A. Miller, secretary; 15.

CANADA'S FINANCE IN LONDON.

New Issues Have Not Fared Very Well—Loans for the First Six Months.

The Royal Bank of Canada has made its first public issue in London advertising the prospectus of the Canadian Pacific Lumber Company £350,000 6 per cent. first mortgage bonds, to bearer at 93.; M. B. Carlin is President.

GEORGE H. ALLEN,

The well-known Montreal Insurance manager, who acted as first president of the Dominion Life Underwriters' Association. Mr. Allen addressed the recent Convention.

The purpose is to acquire British Columbia properties. The present issue is nearly covered by assets exclusive of timber, and, including the timber issue, is secured more than three times over.

Underwriters had to take 85 per cent. of the Algoma Railway issue, which is now quoted at a discount of 2½ per cent.

The British Columbia Electric is offering to shareholders £600,000 new stock, namely, £200,000 5 per cent. cumulative preferred at 1s. premium, £200,000 preferred ordinary at 20s. premium, and £200,000 deferred ordinary at 4s. premium.

Sponsors of the recent issue at 90 of £154,100 five per cent. debentures of the Belding Paul Corticelli Silk Company say that nothing is sufficiently definite yet to show the result of the subscription list, closed July 4. The public are understood to have taken a very small part in the subscriptions.

Arrangements are completed for the Canadian lake merger in connection with the Manchester Liners, Limited, of which Lord Furness is chairman. The capital involved in the Canadian part of the agreement is twenty million dollars, covering a fleet of 50 vessels.

Application has been made to the London Stock Exchange to list: Canadian Cottons £376,000 fives; Western Canada Investment Co. £100,000 fives; British Columbia Electric Ry. £200,000 deferred, £200,000 preferred, £200,000 fives; Cascade W. P. & Light Co., £285,500 first mortgage; Mexico Tramways, $5,664,200 common; City of Port Arthur, £110,700 four halves, and Western Canada Land, £100,000 fives.

Figures complied by the London Economist for the first six months of the year show that next to Canada, the United States is the largest borrowed from London, and that in spite of the diversion of funds to this country, the British investor is still pouring money into American enterprises. While we took something like $95,000,000 from Britain in the half year ending with June 30th, the United States in the same period received just $5,000,000 less. The United States' borrowings, which were largely upon railway bonds, were actually only about half of the corresponding half year in 1910. Among the other foreign countries, Brazil takes second place with loans of $65,000,000, the greater part of which has gone into railways.

This is The London Economist's analysis of capital issue according to their geographical distributions:—

Destination of New Capital

—First Half of Year—

	1909.	1910.	1911.
	£	£	£

Total	£56,521,200	£84,522,800	£65,230,000
Total for first half year	£121,073,500	£188,077,000	£117,483,800

J. K. CARROLL,

Secretary, Kingston Association of Life Underwriters.

"The drop in the United Kingdom total is practically due to the issue of the £21,000,000 of Exchequer bonds last year, and the fact that nearly £17,000,000 was publicly subscribed for British industries shows that when more capital is required it is obtained with ease, in spite of the competition of a multitude of foreign issues which have to offer higher rates of interest.

"Indeed, it is a matter for congratulation that in a time of rapidly improving trade British industries have been compelled to come to London for a comparatively small sum only, for of the above total a part was for trust and financial purposes not necessarily connected with home enterprises.

"The capital required by the colonies has declined heavily, as compared with last year, Canada and India having taken very much less. The 'Other British Prosessions' total is naturally lower, as at this time last year the rubber boom brought an immense number of Malayan companies before the British public. Among foreign countries considerable declines are shown by some of the chief absorbers of English capital."

WANTED

Advertisements under this heading will be accepted hereafter at the following rates: "Position Wanted" advs., one cent per word each insertion; "Men Wanted" advs., two cents per word each insertion; "Agencies Wanted" advs., two cents per word each insertion. A minimum charge of fifty cents per insertion will be made in every case.

A large and responsible Western Land and Investment Company has sold over a million dollars of First Mortgages to private investors, and has had no defaults either in principal or interest. It would undertake to guarantee to those having money to invest a net return of 6% on the best security the country affords, and the guarantee of company having a capital and surplus of over half a million dollars. Address Box 301, Monetary Times.

LIFE INSURANCE SUPERINTENDENT REQUIRED.

An old-established British Insurance Company, **anxious to extend its business in Canada,** requires the service of a thoroughly competent Superintendent (age 25 to 40). An excellent opportunity for a really good man.

Applications stating experience and qualifications to be addressed to P.O. Box 2160, Montreal.

Communications will be considered confidential.

POSITION WANTED.—Young man wants position in good office. Six years' experience in banking. References and experience furnished upon request. Box 325, Monetary Times.

INSPECTOR WANTED.—Applications invited for Inspectorship of British Fire Office for North-West Provinces. One with some field experience preferred though not absolutely essential, but must have good underwriting training.

Correspondence will be treated confidentially if desired.

Apply stating age, qualifications, etc. P.O. Box 1386, Montreal.

An offering of $1,200,000 of Canadian Puget Sound Lumber Co., Ltd. first and refunding mortgage 6 per cent. sinking fund gold bonds are being offered in New York. The company's headquarters are at Victoria, B. C. The capitalization is $6,500,000, of which $5,000,000 represents stock. The bonds which are being offered at 100 and interest yielding 6 per cent, are secured by a First Mortgage on 31,604 acres of standing timber, together with logging equipment and railroad on said property, total valuation being $4,182,702.60. Also by a refunding mortgage on 22,294 acres of standing timber, together with logging equipment and railroad thereon, and mill property and real estate in the City of Victoria, the total valuation covered by refunding mortgage being $2,029,014.74. The total net valuation (which includes cash and current assets amounting to $814,331.41) aggregates, after deducting reserves for timber cut, $6,993,290.05, over 4½ times the total authorized bond issue.

DIVIDEND NOTICES

MEXICO TRAMWAYS COMPANY.

Notice is hereby given that a dividend of One and Three-Quarters per cent. (1¾%), (being at the rate of 7 per cent. per annum), has been declared on the capital stock of the Mexico Tramways Company for the quarter ending June 30th, 1911, payable on the 1st day of August, 1911, to shareholders of record at the close of business on the 17th day of July, 1911, and that the transfer books of the company will be closed from the 18th day of July, 1911, to the 31st day of July, 1911, both days inclusive

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada, New York City, N.Y., Mexico City, Mexico, London, England, and its branches.

The holders of bearer share warrants, on detaching from their share warrant coupon No. 9, and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York City, or London, England, on or after the 1st day of August, 1911, will receive in exchange for each coupon the sum of One Dollar and Seventy-Five Cents ($1.75), representing the amount of the dividend.

By Order of the Board,

W. E. DAVIDSON,
Secretary.

Toronto July 3rd, 1911.

DOMINION COAL COMPANY, LIMITED.

PREFERRED STOCK DIVIDEND.

Notice is hereby given that a dividend of three and one-half per cent. upon the Preferred Stock of the Dominion Coal Company, Limited, has been declared, payable August 1st, 1911, to shareholders of record at the close of business on Wednesday, 19th July instant.

By order of the Board of Directors.

C. S. CAMERON,
Secretary.

Montreal, July 15th, 1911.

BRITISH COLUMBIA PERMANENT LOAN COMPANY.

DIVIDEND No. 26.

Notice is hereby given that a dividend at the rate of 9 per cent. per annum has this day been declared on the Permanent Stock of the Company for the half year ending June 30th, 1911, and that the same will be payable at the Head Office of the Company, 330 Pender Street, Vancouver, B.C., and at the Branch Offices in Halifax, St. John, Winnipeg, and Victoria on and after July 15th, 1911.

R. H. DUKE,
Manager.

Vancouver, B.C., July 13th, 1911.

CARRIAGE FACTORIES, LIMITED.

PREFERRED STOCK HOLDERS' DIVIDEND NO. 4.

Notice is hereby given that a dividend of 1¾ per cent. for the quarter ended 15th July, 1911, being at the rate of 7 per cent. per annum on the paid-up Preferred Stock of this Company, has been declared, and that the same will be paid on the 31st day of July to the Preferred Shareholders of record on the said 15th of July, 1911.

By order of the directors

W. F. HENEY, Secretary.

INSURANCE COMPANIES IMPROVE HEALTH CONDITIONS.

The thinkers among the officials of the prominent life companies are doing things in the direction of improving health conditions. Mr Messenger, the actuary of the Travelers', made a trip to various American cities to study their sanitary condition. He investigated their supply of drinking water, the disposal of garbage, the sewage system, the inspection of meats and provisions, the climatic conditions, and the ordinances of the boards of health. He was not, probably, actuated entirely by public spirit in this trip, but had in view the betterment of his company's policyholders. He has this to say about improving the rate of mortality:—

It will be well to consider for a moment the immense gains resulting from a comparatively slight improvement in the mortality rate. The regular life insurance companies in the United States, not including the industrial business, are paying about $150,000,000 a year for death claims. This is about $12 per thousand dollars of insurance in force. If the rate of loss was reduced from $12 to $11 per thousand of insurance the companies would gain in reduced claims about $12,500,000 every year. To secure a favorable mortality these companies are paying about $6,000,000 a year for medical examinations and inspection reports before the risk is accepted—and practically nothing for this purpose after the policy is issued. If they were to expend half as much in a combined general effort to lower the mortality rate probably the results in dollars and cents would be fully as great as results obtained from the money already expended on initial medical examinations. The average policy is for about $2,500, and the average premium about $100. If a company postpones the death of one of its policyholders for one year it means an advantage to the life prolonged which can scarcely be measured in dollars and cents. To other policyholders who in the last analysis pay the death claims it means that they receive one more premium ($100) and have another year's use of the amount of the claim ($100) —making a total of $200 additional receipts as the result of postponing the insured's death for one year. If this could be brought about by the expenditure of $5 or $10 or $25 it does not require any unusual acuteness to see that the investment is a good one for policyholders.

Johnston, McConnell & Allison, Bond and Investment Brokers, **Montreal**
We recommend as a SAFE and PROFITABLE INVESTMENT the bonds of
THE CANADIAN LIGHT AND POWER COMPANY
carrying a bonus of stock. The Company's plant is situated at St. Timothee, Que., twenty-seven miles from the City of Montreal, and will be in operation early in 1911. Full particulars will be cheerfully furnished upon application.

$1,000 will be invested in any sound Company duly incorporated in the Dominion of Canada who requires an efficiently managed **London Agency** in **Financial Matters**, and is prepared to pay a reasonable fee for services rendered. Address, with full particulars,
THE LONDON AGENCY, LIMITED
65 London Wall, London, E.C., England

The mortgage provides a sinking fund of 75 cents per thousand feet of timber cut and sold (sufficient to retire the bond issue almost twice over) and also provides for the maintenance of a quick asset fund of $300,000 for the further protection of bonds and continued operation of properties. Management is in the hands of experienced lumber and business men who have successfully conducted lumber operations in the past.

Bonds of the North Atlantic Collieries Company, with a face value of $110,000, were sold at Halifax, N.S., recently at auction to Mr. T. F. Tobin, barrister, for $29,000, or one-quarter of their par value. The bonds were offered for sale on account of the recent failure of the company to pay interest on them.

The Dominion Securities Corporation has secured a 60-day option on $220,800 bonds of Penticton at 97. They are to exercise the option on 50 per cent. before the expiration of that time, and to do their best to place the remainder of the issue within the next three months.

Scarth S.D. No. 1451, Man.—On July 29th the ratepayers will vote on a by-law to issue $2,500 20-year 5 per cent. debentures. A. P. Power, secretary-treasurer, Virden.

Collingwood, Ont.—Until August 15th for $96,900 4½ per cent. 20 and 30-year debentures. A. D. Knight, town treasurer. (Official advertisement appears on another page.)

Welland, Ont.—Until July 24th for $130,598.63 4½ per cent. 10 and 30-year debentures. J. H. Burgar, town treasurer. (Official advertisement appears on another page.)

Ottawa, Ont.—Until September 14th for $85,000 40-year, $343,500 30-year, and $160,500 20-year debentures. C. Hopewell, Mayor. (Official advertisement appears on another page.)

◆

BOND NOTES

The total bond issue represents an indebtedness of but 42 cents per thousand feet of timber owned.

The district in which the timber is located practically assures immunity from any serious damage by fire.

The Montreal civic officials are now at work on the figures of the city debt. It was stated that the debt would amount to $55,000,000, with interest charges at $2,500,000. The debt last year was $37,700,000.

The timber securing this issue is practically all located on tide-water and is, therefore, without dependence upon any railroad or other conditions controlled outside of the company. Its geographical location is such that it would find a ready sale as standing timber at any time.

The net earnings of the constituent companies for 1910 operating separately were $257,836.63, nearly three times the annual interest charges on total bonded indebtedness. Economies incident to consolidation without reference to new business should largely increase these earnings.

◆

FIRST INSURANCE POLICY.

The first insurance policy was issued by the Lombards, the great bankers, in the thirteenth century. At that time the Italians were extensively engaged in commerce, and in order to protect their shipping interests the "insurance contract" was introduced in their country and thence spread quickly to all the Maritime States of Europe.

DEBENTURES AWARDED.

Small Schools.—$8,000, to Messrs. Alloway & Champion, Winnipeg.

Kelliher Village, Sask.—$4,000 6 per cent. 15-years, to Messrs. Nay & James, Regina.

FARMERS BANK CASE.

The charge against Mr. W. J. Lindsay, that he did conspire with Mr. W. R. Travers and others, to secure the charter of the defunct Farmers Bank of Canada by submitting false statements to the Treasury Board at Ottawa, was resumed before Magistrate Denison at the Toronto Police Court on Thursday.

Several witnesses were examined and it was stated that representation had been made to the finance department to prevent the issuing of the bank's charter, and that the bank officials had experienced difficulty in securing the same. Mr. W. R. Travers admitted the charter had been procured on the strength of a list, part of which was not true, also that Mr. Lindsay knew about the falsity of the list.

Magistrate Denison said that there was sufficient evidence to commit the defendant for trial, but that perhaps it would be fairer to the defence to hear what Mr. Wm. Laidlaw had to say. The case was continued yesterday.

DEBENTURES FOR SALE.

Tenders for debentures will be received by the undersigned, up to September 1st, 1911, for the purchase of Twenty Thousand Dollars ($20,000) Town of Didsbury Debentures.

Information furnished upon application.

J. M. REED,
Didsbury, Alta. Town Clerk.

BRITAIN'S VITAL STATISTICS.

The annual summary of marriages, deaths and births in Great Britain for 1910, lately issued, shows that there has been a slight increase in marriages and a decrease in both births and deaths, which fell to the lowest rates on record.

In England and Wales the marriages numbered 267,000, corresponding to a rate of 14.8 persons per 1,000 of the population of all ages. This was 0.2 per 1,000 above the corresponding rate of 1909, but 0.7 below the average rate in the decade 1900-1909. In 1899 the marriage rate was 16.5. The deaths were 483,000, equal to 13.4 per 1,000 of the population. This was 1.1 per 1,000 below the rate of 1909, the lowest hitherto recorded.

There is a satisfactory decline in infant mortality. The proportion of deaths under one year of age to registered births was 106 per 1,000 in 1910, or 3 per 1,000 less than 1909, the lowest recorded up to that year. Compared with the decade 1900-1909, the rate of infantile mortality showed the remarkable decrease of 26 per 1,000 births. Births numbered 897,000, an average of 24.8 per 1,000 of the population at all ages. This was 0.8 per 1,000 below the rate in 1909, which was the lowest rate reached till then. Compared with the preceding ten years, the birth-rate showed a decline of 2.7 per 1,000.

With regard to London, the marriages in 1910 numbered 39,000, a rate of 16.0 per 1,000 of all ages, or an increase of 0.2 per 1,000 on the previous year. The London births numbered 114,000, a proportion of 23.6 per 1,000 of the total population—the lowest in the metropolis since civil registration was established. Deaths in London were 61,700, a rate of 12.7 per 1,000 of the population. This was 1.3 below that of 1909, which was at that time the lowest on record.

RAILWAY MILEAGE OF THE WORLD.

According to statistics in the Archiv fur Eisenbahnivesen, the railway mileage of the world in 1909 was 625,698 miles. This was divided as follows:—

	Miles.		Miles.
Europe	204,904	North America	277,014
Asia	61,800	South America	42,329
Africa	20,809	Australia	18,849
Total	625,698		

Of this total mileage 54 per cent. is in the Western hemisphere and 10,000 more in North America than in Europe and Asia together, although the latter geographical division has 1,280,000,000 inhabitants, against 115,000,000 in North America.

During the four years ending in 1909 the mileage added to the different continents has been the following:—

	Miles.		Miles.
Europe	12,359	South America	8,273
Asia	11,197	Australasia	1,396
Africa	4,518		
North America	25,057		
		Total	62,800

The world's total investment in 1909 amounted to about $51,600,000,000, which is about $33 per inhabitant.

AMERICAN FRUIT MERGER COMPLETED.

Negotiations for the merger of fruit and steamship companies under the name of the Atlantic Fruit & Steamship Co. have been completed and the plan declared operative.

The new company will include the Atlantic Fruit Company, Cayo Acosta, Tanano Agricola, Simon Fruit Company, J. Simon and Company, Cuba Fruit Company, Central American Growers and Transportation Company, Donald Steamship Company, and a half interest in the Kurringwass Fruit Company. These concerns own large areas of land in Jamaica, Nicaragua and Cuba and control, through growers' contracts and leases, the production of other large tracts.

The appraised value of the property and assets is placed at $8,000,000 and the net quick assets of the new company will exceed $2,000,000. The actual net profits of the companies operated separately in 1910 were $294,000 and in 1911 (partly estimated) $472,000. The company has an authorized capital stock of $15,000,000 of which $5,000,000 will be held in the treasury against the conversion of bonds and $2,500,000 will be issued at par for cash or property. The present bond issue is $2,500,000 being 6 per cent. first mortgage 20-year convertible bonds, part of an authorized issue of $5,000,000.

The board of directors of the new company will include Mr. J. S. W. Holton, president of the Sterling Coal Company of Philadelphia; Messrs. Thornton Rollins and James C. Fenhagen, president and vice-president, respectively, of the Maryland National Bank of Baltimore; Mr. John A. Donald, president of the Donald Steamship Company of New York; Marquis de Maury, of Paris, France; Messrs. J. Simon, of Baracoa, Cuba; G. W. Farrell and Charles M. Hart, of Montreal; John Pringle, Charles Pringle and A. W. Farquharson, of Jamaica; Joseph di Giorgio, I. R. Ward, James A. Fechtig, Jr., Salvatore di Giorgio and Henry J. Buck, all of the Atlantic Fruit Company of New York.

According to the prospectus issued it is estimated that the total earnings of the new corporation in 1912 will be $850,000; in 1913, $1,180,000 and in 1914 $1,610,000.

* * *

Mr. J. J. Hunter, formerly manager of the Penticton branch of the Canadian Bank of Commerce, has opened an office in Vancouver as a financial broker.

◆

Baron von Polenz, Berlin, Germany, states that the Porcupine Canada Gold Mines, Limited, of which he is general manager, has purchased three claims in Porcupine named the Joslyn, the Canadian Northern Explorers, and the Kahle, situated between the Rea and the Foley-O'Brien properties, and has paid over $30,000 for them. "The Porcupine Canada Company," said the Baron, "is more or less of a holding or operating company, and it will furnish the money for the purchase of further properties in the Porcupine district."

The Prudential Investment Co., Ltd.

Head Office - VANCOUVER, B.C.

Authorized Capital	$2,000,000.
Subscribed Capital	$1,000,000.
Assets of over a Million Dollars.	
Paid-up Capital	$670,000.00.
Reserve	$250,000.00.

Owing to the fact that the ordinary stock of the company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchanges, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C.; or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

THE GREAT-WEST PERMANENT LOAN COMPANY

Head Office - WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come: and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. The British Columbia Permanent Loan Company notifies its shareholders of a dividend of nine per cent. per annum on the permanent stock of the company, for the half-year ending June 30th, 1911. This company has experienced a profitable half-year, large additions having been made to assets and surplus.

Respecting the reported decision of the British Columbia Steel Corporation, Limited, capitalized at $10,000,000, to start work at once in Port Mann, Mr. R. P. McLennan, president of the Bank of Vancouver, states that he is not a director, and that he had no connection with the enterprise. Other Vancouver directors, among them ex-Mayor C. S. Douglas, said that they had no stock in the corporation. Mr. A. P. Gillies, of Tacoma, the father of innumerable schemes, chiefly on paper, is one of the organizers of the British Columbia Steel Corporation.

THE WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of June, 1911, incorporating, James Steller Lovell, accountant, William Bain, book-keeper, Robert Gowans, Henry Chambers, William George Flood and Robert Musgrave Coates, solicitor's clerks, Samuel Goodman Crowell and George Hamilton Cassells, solicitors, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of a packing house in all its branches, and to pack, smoke, preserve, can, bottle and prepare for consumption and use, and to buy, sell and deal in all and any products of cattle, sheep, hos, and other animals, and all the by-products thereof; (b) To buy, sell, import, export, improve, prepare, deal and trade in cattle, pigs, poultry, fish, game and live and dead stock of every description, milk, cream, butter, cheese, eggs, sausages, table delicacies, vegetables, fruits, canned and preserved goods and any other commodities, goods or things; (c) To kill cattle, sheep, hogs and other animals, and generally to carry on the business of an abattoir company; (d) To carry on rendering establishments, tallow chandleries and sausage manufactories; (e) To carry on the business of cheese, butter, provision, vegetable, fruit, meat and géneral supply merchants, butchers, grocers and general provision merchants and dealers; (f) To establish, operate and conduct shops for the sale of all the articles manufactured and dealt in by the company, and any other goods, wares, or merchandise which may be advantageously dealt in, in connection therewith; (g) To carry on the trade or business of wholesale warehousemen, including the furnishing to others of both cold and dry storage facilities; (h) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; (i) To purchase o otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (j) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations, and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on or any business similar thereto, or possessed of property suitable for the purposes of this company' business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (l) To raise and assist in raising money for and to aid by way of bonus promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (o) To amalgamate with any other company having objects similar to those of this company; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any companies; (q) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking (r) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The William Davies Company, Limited," with a capital stock of two million dollars, divided into 20,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 28th day of June, 1911.

THOMAS MULVEY,
Under-Secretary of State.

1-2

Dated at Toronto this 3rd day of July, 1911.

BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for THE WILLIAM DAVIES COMPANY, LIMITED.

For the Moncton, N. B., $125,000 4½ per cent. 40-year waterworks debentures six tenders were received, one from Halifax and five from Toronto bond houses. Messrs. Aemilius Jarvis & Company, Toronto, were the successful bidders.

Five offers were made for the $7,500 5 per cent. waterworks debentures of Southampton, Ont. As previously noted, these were awarded to C. H. Burgess & Company, Toronto.

Six bids were received for the $6,000 5½ per cent, 20-year debentures of the Rural Municipality of Wood Creek, Sask. The offer of the National Finance Company, Regina, was accepted.

For the $15,000 6 per cent. 20-year road debentures of Huron Municipality, Sask., six bids were received. As previously noted, the award was made to Messrs. Wood, Gundy & Company, Toronto. The other offers were from Winnipeg and Regina bond firms.

BIG BOND SALE OVER THE COUNTER.

Nearly Ten Million Dollars' Worth of Philadelphia City Securities Have Peculiar Experience.

The big American banking interests last week refused an offering of $9,750,000 City of Philadelphia 4 per cent. bonds, on terms to which Mayor J. E. Reyburn thought that Philadelphia's credit entitled the city. The total bids amounted to but $14,412,000, of which $9,750,000 was made up by a joint bid of Drexel & Company and Brown Brothers of Philadelphia on an all-or-none basis. The syndicate's bid was at 100.1523. There were no bids of consequence from outsiders.

The Mayor expressed his disappointment at the low price offered, which, report had it, was due to an agreement among financial interests. He announced that he would award $3,534,000 of the issue to bankers, brokers, and individual citizens whose bids were higher than the price offered by Drexel & Company and Brown Brothers. He said that he would at once offer the balance "over the counter" at 101.

Recalls a Similar Plan.

Philadelphia's attempt to place its securities direct, instead of through the agency of banks and bond houses, recalls the failure of a similar plan when tried in New York. In February, 1907, at a time when money conditions were very bad, and a severe panic was impending, the Controller of the city offered $1,500,000 of water bonds and $2,500,000 in assessment bonds. For the first issue he received aggregate bids of only $511,000, and for the second of $1,075,000. At about the same time Philadelphia made a public offering of $5,000,000 of 3½ per cent. bonds, for which it received total bids for only $125,000. An offering of $3,000,000 3.65 per cent. bonds of the City of St. Louis likewise proved an utter failure.

In the middle of the summer of 1907 Controller Metz succeeded in getting a law through the Legislature which gave the city the right to sell bonds "over the counter" at a price not less than par. It was believed that such an offering would bring forth millions of dollars which people had saved up, but which they feared to trust to the ordinary investment channels. On Aug. 12 the Controller offered $15,000,000 of city 4s, and received total bids for only $2,713,000. Time money was then bringing 6 per cent., and bankers deplored the necessity which forced New York City into the financing market at such a time. As had been expected in banking quarters, the offering proved to be a flat failure, the total bids for the issue amounting to but $2,713,000.

Over the Counter.

Controller Metz thereupon availed himself of the privilege accorded by the new law, and offered the bonds "over the counter." The result was discouraging, no response of any consequence being made by investors. Subsequently the bonds were offered to all those with claims against the city, and contractors, property owners, and others who saw no chance of having bills paid within three months accepted the bonds at par in payment of their claims.

This device, recalls The New York Times, which was at first welcomed as an ingenious aid to the city's credit, proved to be the undoing of what demand remained for city bonds. Many of those who had taken the 4s in lieu of money immediately tried to realize on their securities, and the bonds were peddled around Wall Street at 97. This destroyed any possibility of further sales "over the counter" at par, besides lowering the price of all previous city issues. At length the Controller was forced to ask permission to make the city issues 4½ per cent. bonds, and a large offering on this basis, made almost in the midst of panic conditions, brought a gratifying response from banks all over the State, with the result that the issue was largely oversubscribed and an unpleasant situation relieved.

◆

Six Toronto bond firms bid for the Peterborough County, $11,000 4½ per cent. 20-year debentures, which were awarded to Messrs. Brent, Noxon & Company.

UNDEVELOPED IRON RESOURCES OF CANADA.

Possibilities of Great Northern Areas—Water Transportation From Hudson Bay May Solve Problem.

No estimates of the amount of available iron ore in Canada have been made by any of the various Governmental officials, says Mr. A. B. Willmott, in an interesting pamphlet, "The Undeveloped Iron Resources of Canada."

In a report by Hayes(4) on the Conservation of Natural Resources in the United States, an estimate is made of the iron ores in the countries adjoining the United States. The estimate is there made of available ore as follows: British Columbia, thirty million tons, Ontario, nine million tons, Nova Scotia, four million tons, total forty-three million tons. This would be considered a sufficiently high figure for ore already known. At the same time the possibilities and indeed probabilities are so great that a much larger tonnage must be considered as likely to be found. The Lake Superior type of bedded deposit is known to occur in the extreme north-west of our country in the Yukon territory and in the south-east in New Brunswick, a distance of twenty-eight hundred miles. At numerous points between these extremes, Keewatin rocks of the great Archæan shield are known to occur and in nearly every case where these have been carefully searched the iron formation has been found. In far from all of these occurrences will the iron formation be productive of commercial ore but we have every reason to expect that with careful and detailed exploration many of them will. Large areas at present are so far from transportation that they cannot be considered as possible sources of iron ore for years to come.

Water Transportation From Hudson Bay May Solve Problem.

On either side of the shores of Hudson Bay the Archæan rocks are found much as they border both sides of Lake Superior. Already, with a most limited amount of exploration, we know that rocks of Keewatin and Huronian age are found bordering the shores of this island sea and that these series of rocks carry the iron formations just as they do around the basin of Lake Superior. Sixty years ago the production of iron ore on Lake Superior in the quantity in which it is produced to-day would have been looked on as an utter impossibility. It was urged that the district was so remote from supplies of coal that the ore even if found could not be profitably smelted. With the tremendous cheapening of transportation this has proved to be a false prophecy and it is quite possible that water carriage from Hudson Bay may yet solve the transportation problem for that great region. It should further be remembered that Hudson Bay itself is navigable for quite as long a period each year as Lake Superior.

In considering the possibilities of our great northern areas it would be well to bear in mind what has been accomplished in Sweden during the last few years. Some of the largest deposits of iron ore in the world are now being mined in that country within the Arctic Circle. Geologically these ores occur in the Pre-Cambrian rocks found to such a large extent in our own country. The exact equivalent in type of ore deposits is at present not known here; but it is quite within the bounds of possibility that such may yet be found.

The Clinton ore deposits which yield such a large portion of iron ores of the United States occur but to a limited extent in Canada and cannot be looked on as probable large producers. In Newfoundland, however, two of our eastern steel companies have very large iron ore reserves in beds of this type.

◆

NORTHERN ONTARIO'S FIRE LOSS.

Well-known Toronto Fire Underwriter Says Loss is Slightly Over One Million Dollars—Unlicensed Companies in the North.

Cochrane	$250,000
Porcupine	150,000
Mines	650,000
Scattered losses	50,000
Total	$1,100,000

The above is Northern Ontario's fire loss as estimated by a well-known Toronto fire insurance underwriter. The loss is approximately one-twelfth of that sustained by the Toronto fire of 1904.

"I do not believe that the losses will be fatal to any of the Ontario companies," said the underwriter, "the stronger companies will scarcely feel it, while the weak ones will be rendered just a little weaker. Some of these latter have been having a hard time to struggle along lately, and a few more big fires will mean that they will be compelled either to increase their capital or go out of business. The fire risk is always great in a new, wooded country, and as a consequence, the stable companies were very careful about issuing policies there. The prevailing rate was ten per cent., and some even went so far by way of protecting themselves, as to reinsure, that is, have another company take over their risks in excess of a certain amount.

Unlicensed Companies in the North.

"I am afraid there were quite a few policies in the north held in unlicensed or 'wildcat' companies from the United States. These people seldom make payment in case of a fire, and the property owner who has been induced by low rates to take one of their alleged policies, finds himself in a bad position. People who invest in such policies do so either through ignorance of business methods, a desire for cheap insurance, or because they cannot get enough insurance in reputable registered companies."

The London and Lancashire Company was interested to the extent of $60,000, with an additional $10,000 in the Mercantile. Of this $70,000 total some $48,000 was reinsured. Messrs. Burnett and Ormsby, the factory underwriters, who took the place of the Ottawa Fire Insurance, held $25,000. The Law Union and Rock, $17,000. Dominion Fire Equity, $3,000. Rimouski, Crown and York, $25,000. Charles Ring and Company, an American concern, in what is known as the non-tariff class of insurance, from $50,000 to $60,000.

A Mortgage
is the best known and most popular kind of security in which to invest money. Selected under proper conditions, it affords the safest kind of investment.
Saskatchewan Mortgages
are the most popular mortgage security in Canada to-day. We sell these mortgages to yield a very attractive rate of interest. We guarantee payments, and make collections and remittances without cost to the investor.

Mr. M. Bergeron, architect, Montreal, has notified the city that he intends to claim before the courts the sum of $7,000 which represents what he lost by fire at his house on 3rd avenue, Viauville, which could not be saved by the brigade, owing to the lack of water pressure. Mr. Bergeron claims he was entitled to adequate fire protection which was absolutely lacking.

The need of having an official appointed has been urged by Chief Tremblay of Montreal, after referring to the loss at St. Jerome and Calumet, from both of which points a call for aid was sent to Montreal, he said a paid and competent federal or provincial inspector should be selected at once, whose duty would be to visit all the towns of the province and inspect the fire departments, or what passed for such, and advise in what way they could best be improved.

A young man in London, Ont., was riding a bicycle when he discovered that his back was warmer than the exertion warranted. He dismounted and in an instant later was wrapped in flames. It is thought that his clothes were ignited either through matches in his pockets or by a spark from a pipe.

"Vancouver Facts" is an interesting booklet compiled by Mr. Pollough Pogue for Messrs. The F. U. Lantz Company, Limited, of Vancouver, B. C. The booklet contains answers to the questions most frequently asked about the commercial capital of the Pacific coast, and is replete with much statistical information.

In the hope of saving the bank funds at South Porcupine the bank clerks put the money into grips, placed the grips in canoes and pushed boats into the lake, where three or four hundred people were wading around in water up to their necks. Had they left it in the small bank safes it would undoubtedly have been destroyed. The only alternative was to trust the people, and this they did with great success.

Mr. Dennis Murphy, of Ottawa, has been elected a director of the Prudential Investment Company, Limited, Vancouver, B. C. Mr. Murphy is interested in the Ottawa Electric Railway, he is also a director of the Bank of Ottawa, The Ottawa Gas Company, and Canadian Railway Accident Company, and is on the board of the Shawinigan Water and Power Company of Montreal, The Nipissing Mines' Company of New York, and the Canada Cement Company of Montreal.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

A. E. AMES & CO.

INVESTMENT BANKERS - - - - - - TORONTO, CANADA

The Great-West Life Assurance Company
recently moved into the new Home Office on Lombard Street, Winnipeg, thus making the last of the many moves necessitated by the Company's rapid growth since its foundation in 1892.

Less than nineteen years old, the Company goes into its permanent home with a Business in force of $60,000,000, representing over 33,000 Policies, with Assets exceeding $8,500,000, writing a monthly Business verging upon $1,500,000, and with an Annual Income approaching $3,000,000.

This success has been built upon the solid foundation of unequalled

RESULTS TO POLICYHOLDERS.

A high rate on investments—a favorable mortality—low expenses—have led to low premiums and high profits—and these in turn have led to the wide and increasing demand for the Great-West Policies.

THE GREAT-WEST LIFE
ASSURANCE COMPANY
HEAD OFFICE - - - WINNIPEG

TO LIFE MEN OF ABILITY—looking for adequate opportunity—The Great-West Life offers a most attractive field. Valuable Policies to sell, unequalled Results to show to Policyholders, and the Company's active co-operation are some of the advantages.

INVESTMENT AND LOAN COMPANIES

Investment vs. Speculation.

> "A high return should at once excite suspicion in the mind of the prospective investor."
> —Financial Post.

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investments, or endeavouring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favourite investment, because they know that if they invest $1,000 in these Bonds, they will get the $1.000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upwards. They are, therefore, available for the investment of small sums.

BRITAIN, GERMANY, THE UNITED STATES, AND OUR TRADE.

Among travellers in Canadian hotels and Pullman cars, endless stories are heard concerning the incompetent Britisher. So states Mr. Richard Grigg, British Trade Commissioner in Canada, in a further report to the Imperial Government on Canadian-British trade. The irony of the situation, he adds, is that hotel and Pullman car alike owe their existence to money obtained in Great Britain, and represent the skill and industry of the Britisher. Some new phases of our trade relations are treated in his report. The Commissioner, while emphasizing the necessity for greater enterprise on the part of the overseas manufacturer, says that the promotion of closer trade relations between the two countries cannot depend solely upon the efforts of the British producer.

"If British trade with Canada," he says, "is to increase until it occupies the position which a true conception of Imperial interests seems to demand, it is necessary that from the Canadian side every opportunity should be afforded which a sympathetic public opinion can offer. In this connection the large and growing needs of municipal authorities may be mentioned. The period between the advertisement of calls for tenders and the date of their reception, is frequently so short that no effective British tender can be rendered, and it has happened on many occasions that excuses have been sought and found, under which the lowest British tender has not been accepted, and in one case a local producer was allowed to address the council after learning that the engineer had recommended the acceptance of a British tender. The result of persistence in such a policy would obviously be that outside tenders would cease when tendering firms are convinced that their labor is in vain, with the usual effect of an agreement among local producers as to prices, which could not be to the advantage of the tax-payer, to say nothing of the reflection upon Canadian credit and fair play in the financial centre of the Empire.

"It appears probable that the force of public opinion has exercised an important influence in regard to a possible increase in rates of ocean freight based upon combination—rates that are already higher than would be the case if the ordinary conditions of competition existed. While the Commissioner hopes that no effort will be lacking to impress upon British producers the great importance of the closest attention to Canadian industry and the Canadian market, it appears to him that the fullest individual Canadian co-operation should be sought for the British effort both to support and supply that market."

The establishment of branch factories by American firms in Canada has undoubtedly assisted American trade in this country. The Commissioner has felt it to be his duty in some cases to advise the establishment of branch works in Canada, and it has been necessary to this matter to deal with a difficult and delicate position. There is little doubt that the figures of American imports are affected by the existence of such branch works. While the primary object of the Canadian tariff is to obtain revenue for the needs of the country, it is also framed for the encouragement of Canadian industries, and to that end it exempts from duty material required in Canadian works, or admits them on a low scale of duty; and, although an important proportion of imports connected with branch works consists of raw material, and enters free of duty, there still remains a considerable import of manufactured and partly manufactured articles which enter Canada in connection with such establishments. It is obvious that a large firm with branch works would feed them as far as possible with both raw and partly manufactured material from their headquarters and not from a foreign source, and it must be remembered that in many cases competition is only possible through the existence of such branches. While, therefore, it is not the Commissioner's duty to recommend a transfer of industry from Great Britain to Canada, it may be his duty to advise the construction of branch works in Canada in certain cases as a means of avoiding loss to British industry.

In this connection, Mr. Charles Pepper may be quoted. That gentleman was employed by the United States in 1905 to discharge exactly the same duties as those which were entrusted to the writer in 1900; he has, therefore, intimate and practical knowledge of Canada and Canadian conditions. His report upon American trade with Canada was an able paper, and the United States Government have indicated their understanding and appreciation of his services by utilizing them since the date named in highly important and responsible positions in connection with American trade. United States citizens have entered into the industrial life of Canada not so much by the purchase of bonds as by acquiring a share in the capital and conduct of works. In dealing with the subject of American capital invested in this way, Mr. Pepper says:—

"It is not, however, the actual amount of the capital that is so important as the fact that the United States has a direct or indirect interest in so many Canadian concerns, and money is constantly flowing back and forth, some of it in the form of dividends from branch factories, and probably a larger proportion in the form of purchases of raw material and factory supplies. The establishment of branches of American factories on Canadian soil is not recent, but the movement has been very marked during the past five years. Many of these enterprises draw not only their raw material, but machinery parts and partly fabricated material from the factories in this country (the United States); that is particularly shown in branches of the iron and steel industry."

In the past year the tendency of British capital to establish industrial works in Canada has been marked, and an expansion of this policy is likely in the near future.

While it is generally recognized that in the past five years a well-defined increase has occurred in the understanding and appreciation of Canada and the Canadian market in Great Britain, the rivalry of the United States and Germany remains as a potential factor. There has been on the part of British traders a larger number of persons representing various lines of trade visiting Canada, and a more intelligent effort to meet the conditions of the market has been evident. The advance in these respects, however, has not reached the level which has been attained in the United States. In this connection it is interesting to quote the report of the British Trade Commissioner in New Zealand, who says: "If I were asked to sum up the impressions as to the growth of trade done by Great Britain's principal competitors in New Zealand, viz., Germany and the United States, I should say that the cheapness of his goods brings business to the German manufacturer, while the American succeeds because of his knowledge of human nature."

As in New Zealand, so in Canada. German aggressiveness and cheapness of goods have greatly increased German trade with Canada. On March 1st, 1910, the abrogation by Canada of the German surtax came into effect, following the withdrawal of Germany from the position she had taken up on the British preference question in 1899. In 1909, prior to the withdrawal of the surtax, Canada's imports from Germany totalled $6,050,365. In 1910 the figures had changed to $7,935,230, and for the year ended March 31st, 1911, German imports to Canada were valued at $10,047,340. The American's knowledge of human nature in commerce and a close appreciation of Canadian conditions- have helped his trade in the Dominion. The British captain of industry may well watch the German and American in relation to Canada' import trade.

GOLD IN MANITOBA.

With the great agricultural possibilities of Western Canada, it is difficult to understand why the people of that country have the slightest desire to dabble in mining shares. Growing wheat and dealing in real estate should keep them fairly busy, without other hobbies. The Penniac Reef Gold Mines, Limited, with an authorized capital of $3,000,000, is making a good attempt to magnetize the money of the small Western investor. They have issued attractive literature, stating that three million tons of ore is in sight with an estimated value of $34,200,000. Despite that fact, the company, with the typical philanthropy of mining promoters, are willing to allow the public to get a portion of this wealth. They are selling $1 shares at 35 cents. So anxious are they that this golden opportunity should not be overlooked, that a stand was taken at the recent Winnipeg Industrial Exhibition and six or seven men handed out literature respecting the company's claims, talked mining lore, and possibly sold some stock.

The Penniac Reef Gold Mines are located 85 miles east of Winnipeg. The prospectus tells us that "many of Canada's most prominent mining engineers, together with practical miners and prospectors, have pronounced the property to be the greatest ore deposit in America." The value of that statement largely depends upon the names of the so-called prominent mining engineers, who are not mentioned.

We are told that 300 tons of ore per day with an average value of even $6 per ton, and mining and milling at a cost of $2 per ton, gives a net profit of $1,200 per day. An investment in machinery of $100,000 will give a net profit of $438,000 per year. We would suggest that the directors raise the $100,000 between them and enjoy the large annual profit. It would be too bad for the investing public to intrude in such an excellent money-making scheme.

SMALL CHANGE.

An astonishing instance of civic blindness is the attitude of the ratepayers of Pointe Claire, a pretty village near Montreal. The council recommended fire protection, including the purchase of a steam fire engine, to cost the village, say, $75 a year. The citizens voted on the proposal, and rejected it almost unanimously! This same village was nearly wiped out of existence in 1901, only the church and the convent being saved. No wonder Chief Tremblay, of Montreal, pleads for Government interference to compel villages and towns in Quebec to protect the lives and property of the reside

CAPITAL INVESTMENTS IN CANADA

—XII.—

INVESTMENTS IN CANADIAN MINES

By Fred. W. Field.

The investment of British capital in Canadian mining enterprises has been small. On the whole, the English investor has learned many bitter lessons, causing him to regard the Dominion's mining proposals with some suspicion. At the same time, the Canadian investor has had similar experiences, while the American to a great extent has remained unscathed. In the meantime, Canada's legitimate mining industry has suffered. The following table shows the production of minerals in Canada in 1910:—

	1910. Value.
Copper	$ 7,209,463
Gold	10,224,910
Pig iron	11,245,630
Lead	1,237,032
Nickel	11,181,310
Silver	17,106,604
Other metallic products	559,186
Total	$58,764,135
Less pig iron credited to imported ores	9,594,309
Total metallic	$49,169,826
Asbestos and asbestic	$ 2,476,558
Coal	29,811,750
Gypsum	939,838
Natural gas	1,312,614
Petroleum	388,550
Salt	409,624
Cement	6,414,315
Clay products	7,600,000
Lime	1,131,407
Stone	3,499,772
Miscellaneous non-metallic	1,886,704
Total non-metallic	$55,871,132
Grand total	$105,040,958

In 1886 Canada's mineral production was valued at $10,221,255. The following are the details of Canadian loans in London for mining purposes:—

Mining:	
1905.	
Western Canada Cement and Coal Co.	£225,000
Northern Sulphite Mills of Canada	100,000
	£325,000
1906.	
Western Dominion Collieries, Limited	£300,000
1907.	
Vancouver Copper Co.	£ 80,000
England's Premier Cobalt Mining Co.	220,000
Bluebell Gold Mines	20,000
	£320,000
1909.	
Dominion Oil Co.	£120,000
East Tilbury (Canada) Oil Fields	200,000
Ymir Gold Mines	20,000
Canadian Mineral Rubber Co.	170,000
Dominion Mica Co.	15,000
Dominion Iron and Steel Co.	1,200,000
Canada Cement Co.	360,082
Manitoba and Saskatchewan Coal Co.	51,440
	£2,136,522
1910.	
Canada Cement Co.	£ 205,500
Amalgamated Asbestos Corporation	624,480
West Canadian Collieries Limited	200,000
Nova Scotia Steel and Coal Co., Limited	309,000
Canadian Oil Producing and Refining Co., Ltd.	75,000
Canadian Collieries (Dunsmuir) Limited	2,054,800
Oklahoma Oil Co.	67,000

Hawthorne Silver and Iron Mines Co.	100,000
Standard Oil Co. of Canada	160,000
British Columbia Goldfields of Canada, Limited.	40,000
	£[illegible]52,200
1911 (to April).	
Ontario Porcupine Gold Fields Development C	[illegible]00,000

Only one of the mining companies which have borrowed money in London has visited that market a second time. In 1910 £4,452,200 were raised by Canadian mining companies overseas, compared with £2,136,522 in 1909. The loans for previous years never exceeded £400,000. The following table shows for what minerals the money was raised:—

Mineral.	Amount.
Gold	£ 680,000
Silver	320,000
Iron and coal	4,731,660
Copper	80,000
Oil	622,000
Cement	790,582
Miscellaneous	909,480
	£8,133,722

Heavy Mining Investments.

In addition to the £8,133,722 representing public flotations in London on behalf of mining companies, a large amount is otherwise placed in Canadian mining propositions. In the Cobalt, Elk Lake, Gow Ganda, Porcupine and Larder Lake districts approximately $1,025,000 have been invested by direct purchase of mining stocks and claims. A few hundred dollars have been placed in gold mining companies in Nova Scotia, while coal properties in the same province account for perhaps $500,000 in the five years. Prior to the period covered by this investigation of this subject, large sums of British money were placed in the mines of Nova Scotia and British Columbia.

Coal companies in the prairie provinces account for approximately six millions of British capital. It is in British Columbia that Great Britain holds a far greater interest in mining than has been the impression. From special inquiries it is found that in round figures the capital investment is $50,000,000, the most notable mine perhaps being the Le Roi at Rossland.

Leaving past history, such as the Rossland, British Columbia, and Yukon booms to take care of themselves, we may examine the question of capital investment in the two most important camps of recent date, Cobalt and Porcupine. Cobalt has been a veritable Oliver Twist, so far as capital is concerned. Always the cry has been for more. Millions of dollars have consequently been emptied from pockets. Thousands of innocents, though, forgot the ventriloquial powers of the fakir. Plenty of coin has been sunk into alleged mining properties—properties consisting of little but a potato patch, a few shrewd and conscienceless men, some ready pens, and several hundredweights of optimistic literature. The capital story of Cobalt is interesting. Three personal factors were prominent—the man from Canada, the man from Britain, the man from the United States. When stories of the mining camp first commenced to tickle the imagination, comparatively few men of the Dominion got into the field right away. New York and Boston poured a human stream into Ontario. The cash was there, too.

Americans Were Ahead.

The fame of Ontario's mineral wealth had not then hit London's investment susceptibility. The consequence was that citizens of the United States, possessing well-defined bumps of foresight, wiped off the Cobalt bloom from the Cobalt plums. Incidentally, they gathered in a pretty respectable basketful. The belated got smaller fry; others managed to get only the stalks. It has so happened that, although the first to come were the first to be served, something remained for the later. Something there is yet for future investors.

Europe's interest in Cobalt, passing and monetary, until the summer of 1908, was inspired by the things that should not have been. For several years London knew only of Cobalt promoters, who[illegible] apparent and intense desire to let in British capita[illegible] on a lifetime's chance, bordered on the ridiculous. It is not easy to cheat John Bull. Neither is it wisdom. Sidetracked illegitimately of one dollar, one need not appeal to him again. His purse-strings remain tightened, no matter how honest the second enterprise may be.

The visit to the camp of a party of European mining engineers in September, 1908, was the best Cobalt eye-opener for Europe. At Cobalt they soon discovered that even he who knows not the difference between hematite and neophyte might label Cobalt a mining region. In the mines of South Africa, the inexperienced must be told what is ore and what is good for the dump heap. The inexperienced visitor to Northern Ontario's mines can learn a mining thing or two by no more than a little amateur scratching. The mining engineers of Europe, although disciplined to bridle their opinions, let them run during their Canadian visit. So it was that the stamp of technical knowledge and desirable approval was impressed upon Cobalt in half a dozen languages. If the principals, the corporations, the friends of these men have a habit of taking good advice, the coming of foreign capital for mining development is but a matter of time.

Generally speaking, wild speculation has been eliminated from Cobalt's existence. Unfair it is to say that the mine managers and those around them exhibit no interest in the price peregrinations of stocks. The manager having no time for an occasional glance at the stock exchange blackboard would probably be asked to look for a new job. But the chief feature of the camp is that real mining is considered of primary importance. While methods at the beginning were crude, science now has been brought to bear upon the art of bringing up ore from the earth's bowels. As time progresses still further scientific treatment will find activity. With this era of mining proper came foreign interest of value in Ontario's minerals. While speculative drum-banging and gong-beating continued, men whose opinions are worth more than a cheap luncheon, held aloof. Cobalt has demonstrated its deservedness of capital. Further, it can shove that demonstration up to the hilt into the hide of incredulity. Capital need not fear to cast in its lot with Cobalt. The eternal provision that capital must not play blind man's buff in a mining camp, holds good also.

Even now a large number of Cobalt companies are finding a reorganization of their finances an imperative necessity. Usually this does not bode well for the small investor.

Porcupine Gold Camp.

We have heard of Porcupine for several years, but, as the area was difficult of access, little prospecting was done until two or three years ago. When the Timmins brothers commenced to show results, the onlooker who remembered their exploits in Cobalt commenced to take notice. A Toronto barrister is said to have been the first to discover gold along the shores of Porcupine Lake. He forsook, for the time being anyway, the spheres of legal tomes for the region of mineral Domes, East and West, and Preston East and others.

About five hundred miles separate the new gold camp from Toronto. That means, if things go well, Porcupine will have a population of size. The first question one is likely to ask is whether the attractions are of comparative permanency or of a temporary nature. To this are two substantial replies. The Consolidated Gold Fields of South Africa, the Moreing-Bewick people, the Anglo-French Exploration Company, with J. B. Tyrrell, F. A. Heinze, the Montana copper king, and others, would not have their fingers in among the Porcupine quills unless they anticipated something tangible later. Again, we have the statement of Mr. H. E. T. Haultain, of Toronto, a mining engineer on whose word explicit reliance can be placed, that there are promising prospects scattered over a very large area which will take years to explore. One may be assured, therefore, of some permanence.

Cobalt and Porcupine.

In many ways, the beginning of Porcupine resembled the birth of Cobalt. But there are several important differences. The American pretty nearly swallowed Cobalt before the Canadian had decided that the savor was good or that his digestion for a new silver mining camp was strong enough. Porcupine, on the other hand, already has an international flavor. News of what might be expected got overseas in remarkably quick time. Scotch capital was early in the field, and so was London with a corps of prominent mining engineers, who immediately gave the camp importance. Canadians profited by their Cobalt lesson, with the result that they froze on to Porcupine instead of waiting to be frozen out. American capital has also had its look in, and intends to stay. Unlike Cobalt, Porcupine is not likely to be dominated by Uncle Sam's money. There is another vital difference, too. The silver camp lay yawning long before big mining interests prodded it to action. As soon as Porcupine was discovered, the big men of the mining world allowed it no time for beauty sleep. They were there in a trice with their colleagues to size the situation. That done, Northern Ontario will know them for some years.

Price Asked for Prospects.

A third difference in the two camps is one of sentiment, though it also kept out capital for a while—that was the price asked for prospects. When mining magnates and their scouts began to become as numerous as shacks in the camp, the prospector imagined his pile made. He thought that London and Edinburgh would bite at gold-colored bait. That was a bad oversight, and London and Edinburgh turned their heads the other way, which soon brought prospects salesmen to reasonable figures. Mr. C. A. Moreing says that many men asked more for a Porcupine prospect than he would think of paying for a mine in West Australia. The fact that mining engineers and magnates know the difference between a mine and a prospect should be borne in mind by the prospector. That fact, too, will prove of assistance to the camp's development. As yet only one Porcupine flotation has been made in the London market.

The Canadian mining industry has suffered from lack of capital. Money, to a large extent, has been focused on what may be termed "boom" regions. There are numerous opportunities in the Dominion for profitable investment elsewhere than in famous mining camps. *The Canadian Mining Journal* again drew attention to this fact recently. "Deposits," it said, "of such minerals as iron pyrites, scheelite, chalcopyrite, pyrolusite, graphite, gypsum, barite, magnesite, and so on, are lying undeveloped in many parts of eastern and western Canada. Not a few of these deposits can be easily and quickly proven. Many of them are already known to be commercially workable. The growth of our own markets alone demands that they be exploited. The possibilities of the foreign markets lends additional inducement.

"Even more attractive are the chances that offer in the older gold fields. Study of provincial and federal reports shows that some of the gold discoveries of from thirty to fifty years ago were as rich as anything of recent times. But not until within the memory of this generation have circumstances been such as to encourage a large measure of enthusiasm. The limiting conditions were the lack of means of communication, and the absence of adequate media of information.

"Times have changed. It is now possible to work to advantage all kinds of mineral deposits throughout the length and breadth of the Dominion. To the disappointed searcher for cheap bonanzas in Porcupine we would suggest that he read up the mining history, not only of Ontario, but also of British Columbia, Quebec, and Nova Scotia; and that he take steps to ascertain for himself the merits of forgotten districts."

◆

Lightning struck a gas well on the farm of Messrs. Joyce brothers, a short distance west of Merlinwood, during a recent storm. The bolt broke the tap off and ignited the enormous pressure of gas. The gas is still burning in a gigantic jet, and all efforts to put out the fire so far proved unavailing.

LAKE OF THE WOODS MILLING COMPANY.

History of the Company Shows Steady Growth—Is an Attempt to Gain Control to be Made?

Monetary Times Office,
Montreal, July 26th.

Now that Col. Frank Meighen has been appointed president of the Lake of the Woods Milling Company, recently made vacant by the death of his father, any attempt made by outside parties to obtain control may be strongly opposed. The market has recently strengthened, and at the close last night sales were taking place at 150, which is about four points up for the week. The volume of the trading suggests that some one is accumulating stock, the turnover being in blocks of considerable size. Whether purchasing is on account of inside or outside interests is a point which is being discussed in Montreal.

It is now about twenty years since the Lake of the Woods Milling Company was organized. During the first half of the company's life, the stock was held privately, not being listed on the stock exchange. The capital of the company had been but $500,000, and as the profits frequently ran into large figures the dividend was a handsome one. During the year ending August 31st, 1902, the dividend paid by the Woods Company was 20 per cent., while the amount set aside to the reserve, etc., was exactly 50 per cent. on the capital of the company. The contingent account received nearly ten per cent. of the capital. Altogether the net profits that year amounted to $397,655, or almost 80 per cent. of the capital of $500,000. The reserve account was already twice the amount of the capital.

It is not often that the net earnings of an industry equal 80 per cent. of the capital. Nor were the earnings of the Lake of the Woods to long maintain this percentage. This was not due to a falling off in earnings so much as to an increase in capital. The time had come when Lake of the Woods began to attract the attention of outside financiers. It was no doubt through their intervention that the capital of Lake of the Woods was increased to $1,500,000 seven per cent. preferred, all issued, and $2,500,000 common, of which $2,000,000 was subscribed and paid up. In addition to this was issued $1,000,000 six per cent. bonds.

Profits Continue to Increase.

The profits during the year ending August 31st, 1904, amounted to $500,374, which was considerably greater than those already mentioned. The surplus during the same year was $253,394, but the amount of reserve was very much less than in the past, being, after the surplus had been added, only $564,142. The assets were now $5,267,557, or more than double.

For some considerable period no further alteration took place in the capital of the company. The assets of the company increased steadily until they reached $6,302,163 at the end of the fiscal year 1907.

The net earnings for the year 1905 showed a very heavy falling off, but the dividend was maintained and a surplus of $84,000 was yet shown for the year. Out of the larger earnings and increased surplus for 1906, the reserve was considerably increased. The net earnings in 1907 reached $618,473. The dividends were still maintained at their former rate and the excess was carried forward in the surplus of $393,473. This brought the total surplus up to $835,345.

As the surplus increased, the shareholders expressed their dissatisfaction with the six per cent. dividend they were receiving. Representations were made to the president, who replied that there would be no increase in the dividend until the rest account equalled the amount of the bonded indebtedness,, so long as he remained president. The following year, although the net earnings fell off largely, the amount carried to surplus was considerably smaller than in 1907. The reserve account now amounted to $935,265, which was the largest since the increase in capital mentioned. In 1909, the earnings were $723,380. The surplus for the year was $391,880, bringing the reserve up to $1,284,395. The shareholders were given a bonus of ten per cent., making a total payment of 16 per cent. to the common stockholders that year.

Attempt to Gain Control is Made.

Another attempt to obtain control was now made. During this year the capital was increased $100,000, making a total of $2,100,000. The new shares were issued to friends of the directorate at better than market prices, the intention being, no doubt, to maintain control. The following year the profits showed a slight falling off again and the surplus for the year was but $23,726, the reserve still continuing in excess of $1,000,000. During that year a bonus of five per cent. was declared and the dividend was increased to seven per cent., making a total payment of twelve per cent.

ARGENTINA IS ALSO A MAGNET.

For British and Foreign Capital—Remarkable Development Likely to Rival Canada's Progress.

Argentina has made rapid progress during recent years Its resources and possibilities are generally considered to rival those of Canada. As in the Dominion, development in Argentina has been largely financed by British capital. In 1908 Great Britain had more than £170,000,000 invested in the railroads of the Argentine. In a volume respecting that country, Senor A. B. Martinez, an Under Secretary of State in the Republic, and Dr. Maurice Le Wandowski, give a mass of interesting and instructive detail, all leading up to the central position that there is unlimited scope for the employment of foreign capital and labor in the reclamation of the desert lands of Argentina. The first need is the construction of a railway, from anywhere to anywhere, and once this necessity is provided, everything else will follow. The whole well-being of the country is bound up with the provision of the means of transport, and all the statistics quoted go to show the amazing prosperity enjoyed of late years by the Argentinos as the result of the development of their country by English investors.

Railroad Development.

A table is given showing for each year from 1886 to 1908, the mileage in operation, the capital cost, the revenue, and the net profit of the railways then constructed. Dealing with approximate figures only, it may be taken that in 1886-7 the mileage open was 4,000 miles, the capital expended was £30,000,000, and the net profit provided an all-around interest of 4¾ per cent. In the next five years the 4,000 miles open increased to 8,000, the capital was £75,000,000, but the net revenue of 1891 was £62,000 less than the net revenue of 1886, although the mileage had doubled and the capital expended was two and a half times as great. The all-around interest on railway capital in that year was 1¾ per cent.—the lowest depth to which it reached. The next ten years were years of fluctuating gold premium, and during that period only 2,000 miles of line were added, although the capital increased to £105,000,000. The interest on capital during these ten lean years averaged 2.30 per cent.

With the dawn of the twentieth century the finances of Argentina brightened somewhat; agricultural prosperity and greater financial stability had their effect on railway construction, and in the seven years 1891-8, 5,000 further miles of railway were worked and £65,000,000 was added to the capital. According to the statistics quoted by Senor Martinez, the mileage at the end of 1908 was 13,250 miles, the total capital was £169,000,000, and the all-around interest was 4⅔ per cent. This grand total, however, includes certain State railways "of the second class," the separate cost of which is not given; whatever it may be, it would not go far to modify the general conclusion that England had in 1908 equipped the Argentine Republic with its system of railways at a cost but little short of £170,000,000.

Land and Wild Stock.

Before the coming of the railways the land, with the stock running wild upon it, constituted the sole substantial asset of the Republic, and was possessed, almost in its entirety, by the descendants of the early Spanish settlers, estimated to number some 200,000. Nominally the land belonged to the government, but when sales were made the land was offered at prairie values, and bought almost exclusively by the native Argentinos, and they it is who, with a few conspicuous exceptions, have realized the enhanced values which the railways have given it. The Argentinos have nothing corresponding to the Doomsday Book prepared by King William I., nor to that preparing by us in the present generation, and consequently all estimates of value are purely hypothetical. Still the consensus of opinion varies but little, and there is general agreement that the value of all the agricultural and pastoral land in Argentina would be overvalued in 1880 at £80,000,000 and that it would be undervalued in the census of May, 1908, when it was put at £572,000,000.

Province of Buenos Aires.

Great as this increased value is, the prices of 1908 have been largely exceeded since that date, and if the work of railway construction is pressed on at the present furious pace for another half-decade a further £600,000,000 may well be added to the fortunes of the present Argentine landowners. They at any rate are urgent that the work of railway construction should be hurried on, if not with English capital, then with French, or with German, but not with their own, inasmuch as theirs is all invested in the land which the foreign capital is to appreciate in value.

It was thus naturally the land most accessible from the sea which was the first to be developed, and although the province of Buenos Aires is in extent but one-tenth part of the whole Republic, yet the value of its land is assessed at much more than the half of the total. In 1880 a great part

(Continued on Page 521.)

BRITISH COLUMBIA.

French Capital Interested in Victoria—Prominent Men Deny Connection with British Columbia Steel Corporation.

(Staff Correspondence).

Vancouver July 22nd.

Speaking at the annual meeting of the Victoria Board of Trade, Hon. Dr. Young, acting premier, made some significant points. Illustrative of the development of the province he stated that the government had estimated the revenue for this year at $7,026,000, but had confidence in the future enough to issue an overdraft to meet the large appropriations. It is now known that the revenue will be $10,481,419. Basing his remarks on this, Dr. Young expressed the opinion that British Columbians were not optimistic enough. He referred to the mineral output of the past year, which amounted to $26,377,066, the largest production in the history of the province. Of this amount, $6,077,380 is to be credited to gold; $11,108,335 to coal. and $4,871,512 to copper. The coal potentialities of British Columbia were very great, and mining was steadily advancing. He noted also an increase in the agricultural production, which totalled $14,399,090, as compared with $8,500,000 in 1909. With the settlement that is going on, both on the mainland and in the districts on Vancouver Island, now being opened up by railway extensions, these figures will be annually increased. That conditions are steadily bettering was indicated by the expansion of business in the capital city from what might be termed natural causes. He announced an important decision of the government which will be of interest to those who may take up land here. That is that an effort is being made to see if there is not some way the settler may make a livelihood while he is clearing his land. The provincial assayer is making experiments to ascertain if by-products cannot be secured from waste timber, and if tests are successful, the government will establish an experimental station to show settlers how an income may be secured.

May Establish Large Smelting Industry.

The Granby Company may have on the northern coast one of the largest mining industries of the province. It was found by diamond drilling that there is an immense body of rich copper ore at Hidden Creek on Observatory Inlet, and Mr. W. Y. Williams, consulting engineer of the company, is looking over Southeastern Alaska and the northern coast of British Columbia to ascertain the possibilities in view of the establishment of a large smelting industry. Good mineral claims are also being sought. This will mean the expenditure of a large amount of money, but will tend to develop the coast mineral areas. It has long been contended that on the coast will be found just as good properties as elsewhere in the province, and recent development bears this out.

Prominent local business men have denied connection as directors with the British Columbia Steel Corporation, Limited, capitalized at $10,000,000, and which is announced to proceed immediately with construction of its works at Port Mann. These included Mr. R. P. McLennan, president of the Bank of Vancouver and of the wholesale hardware firm of Messrs. McLennan, McFeely & Company; Mr. Robert Kelly, of the wholesale grocery firm of Messrs. Kelly, Douglas & Company; Mr. C. S. Douglas, a large broker; Mr. Clarence Marpole, of Messrs. Macdonald, Marpole & Company; and Mr. Frank J. McDougall, barrister. Mr. McDougall explained that the action of the promoters of the enterprise in sending out these pamphlets was premature. Some time ago, Mr. C. T. McAllister, an Eastern man well recommended, came to him with a proposition and asked him to get the co-operation of business men who would become members of the board of Pacific coast directors. Mr. McDougall went to Mr. Kelly, Mr. Marpole and Mr. John Stewart, but they would not become identified with the proposition until they got more definite information. No further word had been received. Messrs. McLennan, Kelly, Douglas and Marpole state that they have nothing invested in the company, neither had they consented to the use of their names as directors. Mr. A. P. Gillies, of Toronto, is the moving spirit in the proposed enterprise.

French Capital Interested in Victoria.

A million and a half dollars of French capital has been invested in a real estate proposition close to Victoria. Mr. George Barbey, of Paris, representing a French syndicate, has paid that price for 465 acres fronting on Cadboro Bay, one of the most delightful situations on the coast. Two years ago, this property was taken over by Messrs. Olmstead Bros., of Boston, and was subdivided into lots varying in size from a quarter acre to three acres. Purchasers are not to resubdivide, which insure conformity of plan in residential areas. Fifty thousand dollars are to be expended annually for five years in improvements, as per agreement with the Oak Bay council.

Mr. W. H. Barker, general manager of the British Columbia Packers' Association, who has returned from a trip north, reports that the pack of all kinds of salmon to date is not large, merely a good start. Spring salmon have run better than in any previous season, and Mr. Barker advances the theory that this is due to the large number of young fish that have been produced for years at hatcheries in Oregon. Sockeye fishing has been below the average, both on the Skeena and the Naas, as well as at points further south, though with warm weather it was becoming better. On the Fraser river, the salmon are very scarce and 35 cents each are being offered. Mr. Martin Monk reports that his cannery, with a capacity of 30,000 cases, will put up 2,000. The young salmon are being killed off in millions by predatory fish, such as trout, which are protected from being netted, and chubb suckers. These fish are to be found in large numbers about the hatcheries.

RESULTS OF THE CENSUS

Various nations have been busy recently taking the census. The completed figures for Great Britain are as follows:—

England and Wales	36,075,369	Inc.	3,547,426
Scotland	4,759,521	Inc.	287,418
Ireland	4,381,951	Dec.	76,824
Isle of Man	50,542	Dec.	4,210
Jersey	51,908	Dec.	673
Total	45,319,189	Inc.	3,753,137

The population of the United States last year according to the census was 91,972,266. The following table shows the growth of the neighboring Republic during recent years:—

Year	Population	Density sq. mile	*Rate of Inc
1910	91,972,266	30.39	21.0%
1900	75,994,575	25.11	20.7%
1890	62,947,714	20.79	25.5%
1880	50,155,783	16.57	30.1%
1870	38,558,000	12.74	22.6%
1860	31,443,000	10.39	35.6%

*Rate of increase. over prior decade.

Thus the increase of population of continental United States during fifty years is 192.5%. It is evident that the most rapid growth in population was during the decade from 1850 to 1860, which shows an increase of 35.6%. During the following decade, however, the Civil War naturally retarded the rate of advance in population, which declined to 22.6%, only slightly above the rate prevalent during the past score of years.

The new census of the Commonwealth of Australia gives a population of 4,449,495. The population of the Commonwealth of Australia, consisting of New South Wales, Victoria, Queensland, South Australia, West Australia, and Tasmania, in the census of 1901 was 3,773,801. The increase in ten years, therefore, would be 675,694.

The population of Canada in the following years was as follows:—

Year	Population.
1871	3,485,761
1881	4,324,810
1901	5,371,315
1891	4,833,239

The latest estimate of Canada's population is 7,901,000.

BRITISH CAPITALISTS TO TOUR THE WEST.

A party of British financiers, headed by the Duke of Sutherland, will make an extended tour of British Columbia during August with a view to adding to their already large investments in various land and realty companies.

The itinerary has been arranged. It includes a tour of the Okanagan and other agricultural and fruit-growing valleys of Southern British Columbia, as well as a trip through the Lillooet and Cariboo districts and north central portions of the interior and Vancouver Island. A special steamer has been chartered to convey the capitalists up the Fraser River from Soda Creek to Fort George. Their stay in the province will extend over a month. Northern headquarters will be established at Fort George, whence excursions will be made to many points in the district.

JUNE BANK STATEMENT

Deposits Maintain a Good Rate of Increase — Preparations Being Made for Coming Crop Movement

	June, 1910.	May, 1911.	June, 1911.	Year's Inc. or dec.	Month's Inc. or dec.
Deposits on demand	$263,417,539	$298,784,206	$309,804,854	+ 17.6	+ .3.6
Deposits after notice	534,432,054	.562,209,148	564,867,554	+ 5 6	+ 0.4
Current loans in Canada	649,145,920	708,093,677	717,869,386	+ 10.5	+. 1.2
Current loans elsewhere	38,171,443	33,918,314	33,557,617	— 12.08	— 1.06
Call loans in Canada	61,598,958	57,709,853	61,507,268	— 0.1	+ 6.5
Call loans elsewhere	130,173,902	88,745,080	97,865,400	— 22.2	+ 10.2
Circulation	79,781,631	81,862,218	88,618,699	+11.07	+ 8.2

The above are the principal items in the June bank statement. Only one decrease is shown, current loans elsewhere having declined 1.06 per cent. during the month and 12.08 per cent. during the year. The largest increase for the month is exhibited in call loans elsewhere, where an appreciation of approximately $11,000,000, or 10.2 per cent., is noted. An evidence of the trade activity of the Dominion is noticeable in the circulation account, which increased $6,756,481, or 8.2 per cent. In this connection it is interesting to note that the banks are nearing the legal limit for circulation, last month's figures being within thirteen million dollars of the authorized amount. The demand for money for the crop movement has commenced, and the recent increases of the capital of several of the banks may be attributed to the increased demand for circulation.

The following table shows the course of the loan accounts in Canada during the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1910—June	$649,145,920	$61,598,958
July	653,008,336	60,081,256
August	657,813,770	60,427,996
September	668,976,522	62,428,576
October	679,820,039	64,561,641
November	677,617,478	62,866,513
December	677,064,829	63,983,912
1911—January	682,506,695	60,200,781
February	689,234,781	59,132,692
March	710,604,072	58,369,712
April	712,032,758	57,832,690
May	708,093,677	57,709,853
June	717,869,386	61.507,268

Current loans in Canada increased $6,756,481 during the month, which shows that the banks have been loaning on a liberal basis and taking their share in the development of the country. The June figures are the largest for any one month during the past year. An approximate increase of $4,000,000 is noted in call loans in Canada.

The following table gives the position of the loan accounts during the past five years:—

	June, '07.	June, '08.	June, '09.	June, '10.	June, '11.
Current loans in Canada	$586,930,448	$534,523,592	$535,212,269	$649,145,920	$717,869,386
Current elsewhere	23,388,259	22,386,034	33,403,171	38,171,443	33,557,617
Call in Canada	49,481,179	41,650,478	52,617,696	61,598,958	61,507,268
Call elsewhere	55,298 873	52,256,320	115,254,868	130,173,902	97,865,400

These figures illustrate gratifying expansion in commercial credit. Since June, 1907, current loans in Canada have appreciated $130,938,938, which is a new record. During June current loans elsewhere depreciated nearly $5,000,000, which is evidence that the banks have been acting conservatively in regard to foreign loans. During the year both domestic and foreign call loans declined—the former $91,690, and the latter $32,308,502.

Four years ago current loans in Canada were $586,930,448, while the present figures are $717,869,386, an increase of $130,938,938. Domestic call loans during the same period increased $12,026,089. The total loans in Canada four years ago were $636,411,627, and last month $779,376,654, while foreign loans during the same period have increased $52,735,885.

The expansion in the deposits accounts is shown by the following table:—

	On demand.	After notice.
1910—June	$263,417,539	$534,432,054
July	251,638,522	538,384,371
August	256,613,172	545,357,452
September	273,529,461	545,630,667
October	280,838,612	549,016,725
November	289,759,025	551,113,835
December	280,910,695	544,220,710
1911—January	270,178,480	549,774,479
February	268,360,503	551,424,373
March	278,171,792	553,032,466
April	281,964,369	555,822,930
May	298,784,206	562,209,148
June	309,804,854	564,867,554

The deposits exhibit a satisfactory increase. Last month those on demand increased $11,020,648, or 3.6 per cent., and after notice $2,658,406, or 0.4 per cent. During the year the demand deposits appreciated $46,387,315, or 17.6 per cent., and those after notice $30,435,500, or 5.6 per cent.

The following table shows the increase in deposits during the past four years:—

June.	On demand.	After notice.	Total.
1907	$170,042,326	$419,417,563	$589,459,889
1908	161,218,037	399,285,738	560,503,775
1909	226,480,468	455,178,476	681,658,944
1910	263,417,539	534,432,054	797,849,593
1911	309,804,854	564,867,554	874,672,408

During the past four years demand deposits have increased $139,762,528, and after notice deposits $145,449,991. In June, 1907, the deposits totalled $589,459,889, and last month $874,672,408, an increase of approximately $285,000,000.

The June bank statement is a satisfactory one, and indicates that due preparation is being made to finance the harvest, which is expected to be a record one.

◆

MANUFACTURING FIRE RISKS.

Editor Monetary Times:—

Sir,—I would like to make a brief rejoinder to the reply of the manager of the Manufacturers' Insurance Department to my letter, which you so kindly published in your July 1st issue.

When I drew attention to the contradiction between the signed article headed "A Note of Warning to Those Who Sign Applications," and the leader, "The Fire Loss," both of which appeared in December issue of "Industrial Canada," I had no idea both were penned by the same hand. To learn that they were does not lead to a clearer understanding. How it is possible for the author of the latter to preach such false doctrine as is contained in the former is a psychological question capable only of being answered by the Jekyll and Hyde theory. Perhaps, though, in view of the explanation that the advice not to sign applications was intended (though not so expressed) "For manufacturers only," we should not be permitted to question it too closely. It is gratifying to learn that so high an authority agrees that—aside from the one excepted class—the application in fire insurance is not a bad thing.

There is just one other point I would like to touch upon. I am charged with never having evidenced any desire to look at the fire insurance situation from the standpoint of the manufacturers. That is one thing I have done; but I have taken a broad view. As I apprehend it, it should not be necessary to adopt the "get-all-and-give-nothing" attitude to be a friend of the manufacturer. That idea is subversive of the principle underlying protection. A manufacturer is not given protection simply to enable him to get rich at the expense of the rest of us; he is given protection because it is believed that the establishment of his industry in the community, through the various ramifications of business, benefits all classes. If it does not do that the reason for protection is gone. Hence, I say, he is no true friend of the manufacturers who advocate, or aid and abet, the placing of their fire insurance outside the country to the detriment of our own citizens.

In this whole protracted discussion I have said what I said because I believed it; but in nothing that I have said, however rough it may have appeared, was aught put down in malice.

Yours, etc.,
T. L. Morrisey.

Montreal, July 24th.

◆

Whaling off the west coast of Vancouver Island is improving each week, and the outlook is that this season will be better than all former ones.

Kamloops is to spend $200,000 in developing 5,000 horsepower on Barrier river. The power will be conveyed 40 miles to Kamloops, and will be available for civic and industrial purposes.

T. C. BOVILLE,

Deputy Minister of Finance.

HISTORY OF ONE THOUSAND POLICYHOLDERS

Who Each Take a Thousand Dollar Policy on the Twentieth Payment Life Plan at Age Thirty-two.

(By Colin C. Ferguson, Actuary Great West Life Assurance Company).

In his Vision of Mirza Addison has given us a description of the bridge of human life, and this so well represents the mortality table that I wish to read it to you.

"The bridge thou seest," said he, "is human life; consider it attentively." Upon a more leisurely survey of it I found that it consisted of three score and ten entire arches, with several broken arches, which, added to those that were entire, made up the number about an hundred. As I was counting the arches, the Genius told me that this bridge consisted at first of a thousand arches; but a great flood swept away the rest, and left the bridge in the ruinous condition I now beheld it. "But tell me further," said he, "what thou discoverest on it." "I see a multitude of people passing over it," said I, "and a black cloud hanging on each end of it." As I looked more attentively I saw several of the passengers dropping through the bridge into the great tide that flowed underneath it, and upon further examination perceived that there were innumerable trap-doors that lay concealed in the bridge, which the passengers no sooner trod upon, but fell through them into the tide, and immediately disappeared. These hidden pit-falls were set very thick at the entrance of the bridge, so that throngs of people no sooner break through the cloud but many of them fell into them. They grew thinner towards the middle, but multiplied and laid closer together towards the end of the arches that were entire. There were indeed some persons, but their number was very small, that continued a kind of hobbling march of the broken arches, but fell through one after another, being quite tired and spent with so long a walk.

First Spans of the Bridge.

Now let us watch our regiment of one thousand as they enter upon the visionary bridge. In this instance our bridge differs somewhat from the one which Mirza saw. In the vision the travellers entered upon the bridge at infancy and the passage consumed the whole of life. Our wayfarers are assumed to have journeyed on for thirty-two years, amidst various vicissitudes with which we are not concerned, and thus approach the bridge in the full vigor of early manhood. Further, just at the entrance of our bridge is stationed a guardian, who refuses admittance to those whose steps have begun to drag, and whom he fears will be unable to avoid the pitfalls which beset the path.

Consequently our travellers for the most part step bravely over the first few spans of the bridge, and very few fall victims to the dangers which may be overcome by physical strength and physical endurance. If you will look carefully, however, you will find that just here there is another set of pitfalls which are much more dangerous than the other. These are the temptations which beset the fickle, who must certainly when they started have had some desire to cross the bridge, but who lose that ambition after the portals have been opened to them and they have had a view of the long journey before them. Thus we have the early and sad history of Mirza's bridge reproduced, but due to a different cause. The physical strength of the travellers is now almost impregnable, but they seem to be sadly wanting in perseverance. However, as those who know not their own minds turn back or are dropped by the wayside, the others pass on more courageously, and soon the spans become fewer and the vista of the other side more alluring, until after about the seventh span has been passed the ranks are thinned only by those who fall in the pitfalls prepared by Death.

Fund for the Survivors.

Let us now leave allegory and return to figures. My object is to follow the history of one thousand cases, noting the number who die or withdraw from time to time, and building up a fund for the survivors, out of which at the end of twenty years we may be able to pay the excellent results to each persistent policyholder for which this company is noted.

We may thus divide our narrative into two parts—one dealing with the history of the policyholders and the other one dealing with the history of the fund formed by the contributions of the policyholders. First consider the policyholders.

TABLE A.

History of 1,000 Entrants.

Year.	No. of Persisting.	No. of Deaths.	No. of Withdrawals.
1	817.98	2.47	179.55
2	786.25	3.21	28.52
3	739.63	3.57	43.05
4	706.51	3.68	29.44
5	681.58	3.85	21.08
6	663.99	4.04	13.55
7	653.11	4.28	6.60
8	648.55	4.56	
9	643.65	4.90	
10	638.39	5.26	
1	632.83	5.56	
2	627.03	5.80	
3	620.96	6.07	
4	614.60	6.36	
15	607.94	6.66	
6	600.94	7.00	
7	593.58	7.36	
8	585.84	7.74	
9	577.69	8.15	
20	569.09	8.60	
		109.12	321.79

The above table shows for each of the twenty years the number of deaths and withdrawals. In the latter group are included those who surrender their policies as well as those who lapse, and it will be noted that by far the greater number of withdrawals take place during the first year. Also at the end of the third year there are more withdrawals than at the end of the second year, and this is due to the fact that surrender values then become available and some are tempted to surrender their policies. After the third year the withdrawals rapidly diminish until after the seventh year we are able to assume that they cease entirely. This is not strictly true; an occasional surrender takes place from time to time quite irrespective of the duration of the policy, but the cases are so very few that for our purposes they may properly be neglected.

Death and Withdrawal.

The final result is that out of the one thousand entrants only five hundred and sixty-nine survive at the end of twenty years. Of the four hundred and thirty-one exits, one hundred and nine occur by death and three hundred and twenty-two by withdrawal.

You may perhaps be inclined to check me on this, to see whether I have made any mistake. With respect to the withdrawals, I feel fairly safe, because you are not likely to find any statistics with which you can compare my result. With respect to the deaths, however, you have a mortality table in your rate-books (page 181) and you will find it stated there that 79½ per cent. of entrants at age thirty-two survive for twenty years. In other words there should be two hundred and five deaths. This does not take any count of the withdrawals, which diminish the number exposed to risk and consequently the number of deaths. Giving weight to the withdrawal feature, the number of deaths according to the rate-book mortality table would be one hundred and forty-four, as compared with one hundred and nine shown in our calculation. The difference is due to the fact that our actual mortality experience is more favorable than that indicated by the standard mortality tables.

Accumulation of the Fund.

Now let us take up the consideration of the fund. The factors which enter into the accumulation of the fund are:—

1. The premiums received (less expenses).
2. The claims paid.
3. The surrender values allowed.
4. The interest earned.

Each entrant pays the same premium, namely, $33.10, and an investigation of our expense experience shows that in this case about 98 per cent. of the first year's premium is chargeable to expenses and 10 per cent. of renewal premiums. Thus our net premiums are 64c for the first year and $29.79 for renewals.

As to Surrender Values.

In the next calculation the surrender values paid are based on the cash values contained in our present rate-book and interest is assumed at 6 per cent.

TABLE B. SIX PER CENT.

Year.	Net Prem's Received.	Claims Paid.	Surrender Values.	Interest Earned.	Total Fund.	Fund per caput.
1	$ 636	$2470		$ 36	$ 1870	$ 2.29
2	24368	3210		1254	20542	26.12
3	23422	3570	$2066	2531	40859	55.24
4	22034	3680	2061	3663	60815	86.08
5	21047	3850	1960	4796	80848	118.62
6	20304	4040	1585	5948	101475	152.83
7	19780	4280	944	7147	123178	188.60
8	19456	4560		8421	146495	225.88
9	19320	4900		9802	170717	265.23
10	19174	5260		11236	195867	306.81
11	19018	5560		12726	222051	350.89
12	18852	5800		14280	249383	397.72
13	18679	6070		15902	277894	447.52
14	18498	6360		17593	307625	500.53
15	18309	6660		19356	338630	557.01
16	18111	7000		21194	370935	617.26
17	17902	7360		23109	404586	681.60
18	17683	7740		25104	439633	750.43
19	17452	8150		27181	476116	824.17
20	17209	8600		29342	514067	903.31

Fund is a Negative Quantity.

Here we have net premium receipts for the first year of only $670, and claims of $2,470. Consequently the fund at the end of the first year is a negative quantity. This, however, is changed in the second year, after which the fund rapidly increases until at the end of twenty years it amounts to over half a million dollars, or about $900 for each of the five hundred and sixty-nine survivors. This amount includes reserve and profit; it is the total cash settlement available at maturity of the deferred dividend period. The fund per caput is known as the "asset share."

Let us compare this with the estimate contained in our last year's rate-book, so that we may see whether we were giving reasonable expectations to policyholders as to our profit results. As you will observe, the estimate was well within the amount obtained from the above calculation.

Perhaps the most interesting feature of Table B is the interest column. During the first few years, while the funds are small, the interest is, of course, also small, but it soon increases until in the fifteenth year the interest becomes greater than the premium receipts.

Interest is Important.

It follows, therefore, that interest plays a very important part in building up our funds. The effect of a high interest rate has been dwelt on so frequently by us in our literature that you must be nearly tired of hearing about it, but at the risk of being tedious I wish to place before you one other calculation showing the effect of substituting five per cent. for six per cent. in the last calculation. Table C is then the same as Table B, except for changes arising from using a rate of interest one point lower.

TABLE C. FIVE PER CENT.

Year	Net Prem's Received.	Claims Paid.	Surrender Values.	Interest Earned.	Total Fund.	Fund per caput.
1	$ 636	$2470		$ 30	$ 1864	$ 2.28
2	24368	3210		1045	20339	25.87
3	23422	3570	$2066	2099	40224	54.39
4	22034	3680	2061	3021	59538	84.27
5	21047	3850	1960	3933	78708	115.48
6	20304	4040	1585	4850	98237	147.95
7	19780	4280	944	5794	118587	181.58
8	19456	4560		6788	140271	216.28
9	19320	4900		7857	162548	252.54
10	19174	5260		8955	185417	290.44
11	19018	5560		10083	208958	330.20
12	18852	5800		11246	233256	372.00
13	18679	6070		12445	258310	415.98
14	18498	6360		13681	284129	462.30
15	18309	6660		14955	310733	511.12
16	18111	7000		16267	338111	562.63
17	17902	7360		17617	366270	617.05
18	17683	7740		19004	395217	674.62
19	17452	8150		20430	424949	735.60
20	17209	8600		21893	455451	800.30

The effect of using five per cent. instead of six per cent. is to reduce the result from $903 to $800. Now the total result consists of two parts—the guaranteed reserve, amounting to $588, and the profits, which are $315 at six per cent. and $212 at five per cent. From this we see that a difference of one point in the rate of interest adds 50 per cent. to the profits, and so it may be assumed that a difference of two points would double the profits. This reminds us of the quotation given in the rate-book from the paper of Mr. J. J. W. Deuchar, the distinguished British actuary and manager, whose death was reported a few days ago.

"It may serve to indicate the great importance of obtaining a good return on the investments if it is realized that one per cent. of increased interest on the funds of the company will, on an average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing five per cent. interest in place of three per cent., it might reduce its premiums some 30 per cent. or double its bonuses."

The above interesting paper was read by Mr. Ferguson to a convention of agents of the Great West Life Insurance Company.

◆

Mr. Alfred W. Smith, general agent of the Alliance Assurance Company, Phoenix Assurance Company of England and Home Insurance Company of New York, will move at an early date from 9 Toronto Street to the old Ontario Bank Building, 33 Scott Street, Toronto.

WINNIPEG AND TORONTO STREET RAILWAYS.

Mayor Evans, of Winnipeg, stated recently that the city had decided to purchase the entire plant of the Winnipeg Electric Railway Company for $15,000,000. The acquirement includes an electric railway with fourteen years of the franchise yet to run, a power plant sixty miles east of the city, and a gas and electric light works.

The Winnipeg Electric Street Railway Company was organized in 1904 under the statutes of Manitoba. It was formed by a consolidation with the General Power Company. At present it operates seventy-five miles of electric track in Winnipeg and St. Boniface, owns 204 motor cars and twenty-seven trailers. It controls the street railway, gas, power and commercial lighting franchise of both Winnipeg and St. Boniface.

The directors of the Toronto Street Railway recently decided to increase the capital from $8,000,000 to $12,000,000. Of the increased capital, $3,000,000 will be apportioned to the present shareholders. A million in shares of a par value of $100 will be distributed as a straight bonus, two millions will be apportioned to present holders at par, and the balance of $1,000,000 stock will remain in the treasury.

When the shareholders of the Toronto Railway Company meet on August 14th they will be called upon not only to increase the company's capital stock by $4,000,000, but also to sanction an increase in the capital stock of the Toronto Power Company from $1,000,000 to $5,000,000, and also to sanction the purchase of any or all shares of the latter company.

The Toronto Power Company has an authorized capital stock of $1,000,000, all issued and paid up, and a 4½ per cent. debenture stock issue of £500,000, less £50,180 redeemed. This stock is guaranteed unconditionally, both as to principal and interest by the Toronto Railway Company. The stock is secured by a trust deed constituting it a specific first mortgage on $2,000,000 of 5 per cent. gold bonds and over four-fifths of the common shares of the Electrical Development Company of Ontario.

◆

IMPLEMENT COMPANIES UNITE SALES DEPARTMENT.

The Cockshutt Plough Company, Limited, and the Frost & Wood Company have united their sales department. The former company take all the territory in Canada west of Peterboro', and will act as sole agents for the Frost & Wood Company. The latter company will take over all territory east of Peterboro' in Ontario, Quebec and the Maritime Provinces, and will act in that territory as sole agents for the Cockshutt Company. It is claimed this will build up a much stronger sales department at the minimum of expense, that it will secure for the companies the best local agents where full lines of implements and repairs will be carried for the benefit of local customers.

The two companies now operate very large manufacturing plants at Brantford and Smith's Falls, to both of which large additions are about to be made.

◆

The value of buildings in course of construction at Victoria is the largest on record for that city.

Staff and Agents of the Great West Life Assurance Company, Winnipeg.

This photograph was taken on the occasion of the company's recent convention at the Western metropolis. Mr. J. H. Brock, the managing director, is the sixth figure in the second row, reading from left to right (with white necktie). Mr. Colin C. Ferguson, the actuary, is the sixth figure in the front row (with white shoes). Mr. T. F. Conrod, superintendent of agencies, is the fifth figure in the back row. The group was taken in front of the company's new building at Winnipeg.

RECIPROCITY AND THE MOST FAVORED NATIONS.

Proposed Agreement Grants Its Benefits to Twelve Other Countries—Some Facts and Figures.

The proposed Canadian reciprocity agreement, as is known, automatically grants to twelve other countries the benefits of that agreement. This is in accordance with the so-called most-favored-nation treatment. The twelve countries are as follows: Argentina, Austria-Hungary, Bolivia, Colombia, Denmark, Japan, Norway, Russia, Spain, Sweden, Switzerland and Venezuela. Undoubtedly little attention has been paid during the present discussion regarding the merits of the agreement to the strong productive and export position of several of these most favored nations. Without reference to facts and figures, it has been taken for granted in many quarters that present importations and possible importations to Canada from these countries are, and can be, only a small factor in Canada's trade. A few figures, gathered from official sources, lead to the conclusion that by granting the privileges of the reciprocity agreement to twelve other nations, Canada is opening the door to immediate and considerable competition and to much keener rivalry in the future. The following table compiled from figures of the Department of Customs at Ottawa shows the imports into Canada for home consumption of the most favored nations for a six years' period.

Canada's Purchases from Favored Nations.

Imports into Canada for home consumption from the most favored nations, six years ended 1909:—

Article.		Quantity.	Value.
Butter	Lbs.	2,894,416	$ 685,306
Cheese	Lbs.	2,901,815	566,786
Eggs	Doz.	4,600,534	944,704
Poultry		....	276,648
Potatoes	Bush.	1,422,829	926,693
Beef (salted)	Lbs.	10,610,533	502,831
Bacon and hams	Lbs.	35,140,613	4,312,359
Mutton	Lbs.	6,317,785	440,317
Pork (in brine)	Lbs.	51,826,804	4,250,637
Other meat products	Lbs.	13,028,060	1,567,251
Cattle	Head	45,086	640,514
Horses	Head	57,565	2,920,117
Sheep	Head	359,447	1,151,022
Swine	Lbs.	184,779	12,696

Hay	Tons	49,374	853,059
Flax seed	Bush.	4,702,090	5,747,612
Apples	Bbls.	239,647	975,870
Vegetables (except potatoes)		....	4,755,908
			$33,356,102

Unfair Competition.

Thus in six years these twelve nations have sent into Canada articles which we are producing to the value of $33,356,102, an average of $5,559,350 a year. One of the largest items is flax seed, valued at $5,747,612. We imported in the six years 4,702,090 bushels of flax seed, considerably more than the yield of flax in Canada in 1910, which amounted to 3,802,000 bushels. Southern Saskatchewan is producing about nine-tenths of the flax seed grown in Canada. Last year its yield was 3,044,138 bushels on a sown acreage of 396,230. Saskatchewan is specializing on flax, and perhaps has not seriously considered the immediate possibility of strong competition in this direction from the favored nations.

These nations shipped to us in the six years vegetables (excluding potatoes) valued at $4,755,908.

Here we open the door by means of the reciprocity agreement to competition in market gardening, a development which should receive great impetus during the next few years. British capital has been placed in suitable land adjoining the city of Toronto, where it is intended to grow market garden produce. That is only one instance of activity along this line, which must be seriously checked by the importation of vegetables. While the Dominion Government's special commission on sheep raising is considering the fostering of that sadly neglected industry in Canada, the twelve favored nations shipped to us in the six-year period 359,447 head of sheep, valued at $1,151,022. The sheep and cattle ranches of Canada do not require keener competition to stimulate the owners to greater activity.

Canada Needs Protection.

They are raising horses in western Canada, where conditions are ideal, and yet we imported from the favored nations more than 11,000 horses a year, or to be exact, 57,565 in the six years, valued at $2,920,117. Because of the undue importance given by the farmer, especially in the West, to wheat raising, the remunerative industry of chicken raising is neglected, while the home markets are unable to get anything like the supplies desired. Among others, the twelve favored nations have recognized opportunity and sent us during the six years 4,600,534 dozens of eggs, valued at nearly $1,000,000, together with $276,648 worth of poultry. While our butter and cheese exports are decreasing because of the growing demands of a rapidly expanding home market with excellent purchasing power, the favored nations are sending us in the six years nearly 3,000,000 pounds of each commodity. A further examination of the above table will reveal the fact that without any special concessions as proposed in the reciprocity agreement, these twelve countries are already an important factor in Canada's import trade. Knowing this, one is interested to learn the export power of these countries, more especially in regard to farm products. The following table is compiled from official statistics at Ottawa. It shows the exports of farm products of the seven principal favored nations during 1909.

Export Strength of Would-be Competitors.

Exports of farm products of certain most favored nations, 1909:—

Country.	Wheat, Bushels.
Argentine	92,352,375
Austria-Hungary	71,255
Russia	53,881,627
Norway	3,328
Sweden	3,171
Denmark	213,292
Japan	734
Total	146,525,782

Barley, Bushels.	Oats, Bushels.	Hay, Tons.	Potatoes, Bushels.	Horses.

	512,816	127,680	8,048

Butter, Lbs.	Cheese, Lbs.	Meat, Lbs.	Eggs, Doz.
8,799,964	....	....	....
....	....	24,992,918	....
112,437,216	981,144	32,651,460	215,709,833
8,455,227	264,881	384,682	6,526
40,019,414	4,620	7,718,198	3,236,457
196,639,227	261,240	284,348,288	32,011,645
366,351,048	1,511,885	1,029,666,111	250,964,461

Seven Favored Nations.

The export strength of these seven favored nations is clearly shown in the following table, showing their total exports during 1909:—

Articles.	Bushels.
Wheat	146,525,782
Barley	98,475,420
Oats	59,837,818
Potatoes	3,952,734
Hay	68,738 (tons)
Number.	
Horses	171,021
Cattle	512,816
Sheep	127,680
Swine	8,048
Lbs.	
Butter	366,351,048
Cheese	1,511,885
Meat	1,029,666,111
Eggs	250,964,461 (dozen)

Wealth of Argentina.

These figures reveal formidable competitors to Canadian farm products. The granting to these countries of the reciprocity agreement's benefits will lead them to reconsider their export statistics when Canada's markets are opened more widely to their farmers. These twelve countries are entitled, as we know, to send into our markets anything they choose on the terms mentioned, but not into the United States markets.

The export position of many of these countries is yearly growing stronger.

Official figures indicate that Argentina this year will have about 225,000,000 bushels of grain to spare, and that the value of this, including flour, flax seed and some minor crops, will be equal to that of 1910, when the aggregate exceeded $180,000,000.

Below are values of the different exportable crops of Argentina:—

' Crop.	Value.
Wheat exports in 1910	$56,000,000
Wheat flour in 1910	6,000,000
Corn in 1910	56,000,000
Flaxseed in 1910	54,000,000
Oats in 1910	7,500,000
Minor exports in 1910	3,000,000
Total, 1910	$182,500,000

Argentina has three crops of about equal value, including wheat, corn and flaxseed.

Russia's Enormous Production.

The year 1909 was a record one in respect to exports from Russia. There was also an excellent harvest in that year, which was followed by a good one in the previous year. According to figures supplied to me by Mr. A. W. Woodhouse, the British consul at St. Petersburg, Russia's total exports in 1900 were valued at $365,794,250. This figure had increased in 1909 to $721,041,145. The average annual exports for the five years period, 1899-1903, were valued at $403,154,030. The average annual exports for the five year period, 1904-1908, was $515,481,920. During 1909 the exportation of grain of all kinds from Russia was unprecedentedly large, being in quantity 47.5 per cent. in excess of the preceding year and 26.4 per cent. of the average for the five years' period of 1904-1908. In value the exports of all cereals exceeded that of 1908 by 49.8 per cent. and the average for the previous five years by 37.5 per cent. The export of wheat in 1909 was far in excess of that of the preceding year, more than three times the quantity having been shipped abroad, viz., 5,068,198 tons as against only 1,444,467 tons in 1908.

The quantity of barley exported during the same period was 3,534,832 tons, which was also in excess of the previous year by 934,813 tons. Shipments of rye also showed an increase of 171,740 tons, though nearly 50 per cent. below the average. Oats were shipped to the extent of 1,204,061 tons, compared with only 473,281 tons in 1908. Buckwheat, millet, maize, peas, beans and lentils, groats, rice and wheaten and rye flour were also shipped in larger quantities in 1909 than in 1908. During the first six months of 1909 the prices for grain were considerably higher than those obtained during the corresponding period of 1908 and 1907. Exports of eggs, butter, poultry, hides and wool all showed increases in 1909 over the preceding year.

What Argentina Exports.

The following table shows where Argentina shipped its wheat and grain, dairy products, horses and cattle during 1908.

Argentina during 1908 shipped to	Wheat and Grain.	Dairy Products, Lbs.	No. of Horses and Cattle.	Value of Total Exports.
Germany (M. tons)	351,799	....	1,999	$ 12,304,563.49
Belgium	707,495	6,448	65,936	23,909,437.34
Brazil	235,112	481	5,204	9,170,332.27
France	142,947	29,652	13	4,634,152.91
Italy	144,643	....	1,814	4,386,079.40
Netherlands	133,300	....	......	4,580,949.57
Spanish Possessions for orders	265,351	....	62	10,152,926.16
Portuguese Possessions for orders	3,675,359	....	101	115,721,827.28
United Kingdom	619,245	7,085,059	285	19,943,087.58
United Kingdom for orders	384,949	1,759	......	14,408,073.39
Portugal	20,284	....	247	750,790.27
	6,680,484	7,123,399	75,661	$219,962,219.66

Great Prospects of Production.

The greatest amount of Argentine's wheat and grain is shipped to the Portuguese possessions for orders. In addition to the export of 619,245 tons to the United Kingdom, another 384,949 tons were sent to the same country for orders. Belgium was also a large buyer of Argentine grain, other European countries taking comparatively small quantities. The United Kingdom is the largest purchaser of dairy products from the Argentine, the total for 1908 being 7,085,060 pounds. The entire shipments consisted of butter. Belgium was also a good customer in another line, purchasing 65,936 horses, cattle and sheep, the latter accounting for 65,224 of the total. In considering Argentina's export position too much stress cannot be laid upon the enormous productive possibilities of the country, which means the subsequent widening of its export markets. There is little doubt that if the producers continue to persevere with the refinement and specialization of pastures and stock, the Republic will not only be able in a few years to export 50,000 tons of butter annually, but will also be in a position to export every year a large number of steers, either as live stock or otherwise.—F. W. F.

(To be concluded).

◆

BRITISH CAPITAL FOR PORCUPINE

One of the biggest deals in Porcupine claims yet put through was consummated this week with the purchase of the two Christ claims in Tisdale Township. These properties are situated south of the Hollinger and just west of the Vipond, and are considered to be among the most promising in the mining camp, being right in the known mineralized belt.

The Christ claims were purchased by Baron G. Von Polenz, of Berlin, Germany, who is acting for British capital, and the consideration paid was $235,000.

ARGENTINA IS ALSO A MAGNET

(Continued from Page 513.)

of the province was over-run with Indians, and it was only in 1883 that General Roca's expedition was finally successful in clearing the central pampas and opening them as breeding grounds for stock.

At that date some 50,000,000 acres in the province were devoted to the raising of stock and 2,000,000 were under tillage. The selling value of the land then could not amount to more than £50,000,000. In 1880 the railway mileage in the province did not exceed 700 miles, with a capital of £5,000,000. At the present moment Buenos Aires is served by four principal companies, who have expended within the limits of the province, £60,000,000 in the construction of 4,485 miles of line. Following this extension of the railways further areas have been opened up to pasture and agriculture, until the census of 1908 estimates the value of the land in the province at £326,000,000. With the additional railway mileage constructed since 1908 the land value may well be assessed at £350,000,000 as compared with the £50,000,000 of 1880.

Cultivation of Grain.

It is in the cultivation of grain in recent years that the Argentine agriculturist has reaped his most extensive profits. The most alluring prospect held out to the possible immigrant is the fortune to be immediately made in the growing of grain. In a few short years a laborer is to become a farmer, a farmer a proprietor, a proprietor a capitalist. The authors of the work referred to quote various more or less authentic statistics, and deduce from them the statement that an all-around profit of £1 per acre is to be made on the growing of cereals. In the absence of roads grain can hardly be grown at a distance of 20 miles from a station, and it is to facilitate the raising of wheat that the railway companies have been urged to duplicate or triplicate the lines which would have amply sufficed for the purposes of the pastoral industry. When this is done the land for which an Argentino originally paid £100 would bring in a yearly rent of £50, its selling value would be £700; a farmer can make a profit of £1 per acre without risking any capital at all.

SPELTER AND METALLIC ZINC.

Statistics compiled by the United States Geological Survey show that the production of spelter or metallic zinc from ore for the first six months of 1911 was 140,196 short tons, a gain of more than 5,000 tons over half the record output of 1910. Of this production, 5,135 tons was made from foreign ore. Spelter stocks were reduced from 23,232 tons to 17,788 tons. Imports remained about the same but exports were nearly double those of half the preceding year. The apparent consumption of spelter was 135,497 tons, an increase of more than 12,000 tons over the half of 1910 but about the same as in half of 1909. The average price of spelter at St. Louis for the period was 5.36 cents per pound, the London average being .2 cents less per pound. During the latter part of May and the first part of June the average London price was about .1 cent higher than the corresponding St. Louis prices. Under this stimulus the May exports of spelter, zinc ore, and dross were largely increased over those of the preceding months.

The Merchants Bank of Canada has increased its dividend from 9 to 10 per cent., the next payment being on September 1st.

Messrs. A. E. Ames & Company, the well-known bond brokers, have moved to their new offices in the Union Bank of Canada building, 53 King St. West, Toronto.

YUKON GOLD FIELDS.

Mr. S. R. Guggenheim Says Klondike Will Yield Much Wealth—Value of Gold Production in Canada.

Before leaving for Great Britain Mr. S. R. Guggenheim, being asked about the Yukon Gold Company, said: "We are pleased with the progress of the Yukon Gold Company. At the time we undertook to acquire and equip the properties now owned by the Yukon Gold Company there was a widespread belief that the Klondike district had seen its best days. The City of Dawson was becoming rapidly depopulated, the miners and prospectors looking to other fields. The especial reason was not because of the lack of pay gravel, but on account of its frozen condition, which many believed could not be successfully overcome. In fact, the prediction was freely made that our enterprise would prove a failure. However, our faith in the reports and opinions of our own engineers, coupled with the encouragement extended by the Canadian Government, made possible by its liberal laws, has resulted in the working out of the problem, and now we are told that the Canadian officials, as well as engineers who criticized our project, have come to a realization that the Yukon district is likely to produce within, say, the next 25 years or so, perhaps another 75 to 100 million dollars.

Season of About Five Months' Duration.

"Up to a year ago we had calculated upon a season of about five months, that is to say, from May 15 to October 15. Since then the installation of power plants by two independent power companies has afforded us facilities for dredging earlier and later, thereby lengthening our operating season. Last year we closed our dredges on November 5th, as compared with closing the previous year on October 1. This season the first of our dredges commenced on May 4, against May 22 in the previous season, so it will be readily seen that we can add, and in fact have added, another month to our operating period.

"We have not received our detailed costs for any of this season's operations as yet, but the gross product to July 8 was $815,000, as against $529,000 for last year up to the same date. These figures encouraged us to believe that the net profit for this year will show a substantial advance over the preceding seasons."

Value of Gold Production in Canada.

The following table shows the value of gold production in Canada for the past quarter of a century:—

Year.	Value.
1886	$1,365,496
1887	1,187,804
1888	1,098,610
1889	1,291,159
1890	1,149,776
1891	930,614
1892	907,601
1893	976,603
1894	1,128,688
1895	2,083,674
1896	2,754,774
1897	6,027,016
1898	13,775,420
1899	21,261,584
1900	27,908,153
1901	24,128,503
1902	21,336,667
1903	18,843,590
1904	16,462,517
1905	14,159,195
1906	11,502,120
1907	8,382,780
1908	9,842,105
1909	9,382,230
1910	10,224,910

Why the Figures Fluctuated.

The high production in 1899, 1900, 1901 and 1902 was due to the extraordinary output from the Klondyke. The British Columbia placers were also producing heavily. In 1899 Ontario had its maximum production, but as it only amounted to slightly over $400,000, it did not have much influence on the total. The gold production of Nova Scotia has declined somewhat, that of Ontario has almost ceased, though Porcupine should prove a favorable factor during the next few years. That of British Columbia lode mines has steadily increased, so that the Pacific Coast Province has now the greatest production in its history. The production of the Klondyke is again increasing.

◆

With a view of keeping their large clientele more directly in touch with market movements, Messrs. J. C. Mackintosh & Company, of Halifax, St. John, and Montreal, are issuing, in attractive form, a weekly circular. In addition to containing a general review of the Montreal Stock market as well as of Wall Street, it is the intention to give each week an analysis of the position of some particular company, the securities of which are listed on the Montreal Stock Exchange.

WORLD'S CROP PROGRESS.

Canadian Provinces Show Most Favorable Conditions—Europe Indicates Good Yield.

The agricultural department at Washington, commenting on foreign crops, says that conditions surrounding crops in Canada are, over most of the territory, pronounced flattering. Of the 10,500,000 acres under wheat this season, over 9,500,000 are in the spring wheat provinces, Saskatchewan, Manitoba and Alberta; the increment in area, though perhaps not so great as expected, amounted to 1,200,000 acres, as compared with an increase of 1,500,000 acres in 1910. Ever since the seed went into the ground the spring wheat lands have been saturated by opportune rains, and, with few exceptions, favored by forcing temperature. Present prospects, therefore, afford a refreshing contrast to those at the same period a year ago, when much of the country was suffering the withering effects of drought.

In Argentina the newly sown wheat, oats and flaxseed are said, under the influence of plentiful moisture, to have germinated well. Areas are believed to be heavily increased; popular opinion puts the surface under wheat five to 10 per cent. over the 15,500,000 acres sown last year. High prices are thought to have stimulated additional sowings of flaxseed. The 1910 wheat crop of Chile is reported insufficient for home needs, and imports are being made from Australia. The monsoon, the indispensable precursor of a favorable seed time on unirrigated soil in British India, broke in full force in mid-June, and heavy rains have already fallen over wide areas. Late reports, however, indicate partial cessation of rainfall. Cotton planting is progressing in some localities of the empire.

African Harvest Promises Well.

The harvest in progress on the north coast of Africa is said to promise well in Algeria, where the yield of wheat is usually upward of 35,000,000 bushels, and of barley over 45,000,000 bushels. In the much less important producers, Tunis and Morocco, only a moderate outcome is expected. According to the June official report the yield on the 1,250,000 acres of wheat in Egypt was likely to be "good" in upper Egypt, but in lower Egypt not quite up to the standard.

In Europe the wheat harvest is on in the southern latitude, beginning in Sicily in late May. Its progress northward through Italy, where better yields than last year are anticipated, has been preceded or attended by heavy rains, which may later show their effects on quality. In Spain an official puts the wheat crop 20,000,000 bushels above the excellent yield of last season. The territory comprising France, the United Kingdom, Belgium, Holland, Germany, and parts of northern and central Russia, suffered over extensive localities from lack of sufficient moisture during the first half of June.

Spain May Have Exceptional Crops.

Winter wheat and rye seem generally to have had effective power of resistance, but spring-sown crops, especially oats and barley, were in places severely tried, and the extent of their recuperating after the copious rains in the latter half of the month has not yet been determined. The hay crop over much of this area was seriously diminished, but the quality is generally excellent. In Austria-Hungary, Roumania, the Balkan States, and southern Russia, precipitation in June seems generally to have been ample, and the progress of vegetation, on the whole, more satisfactory than in northern Europe.

Wheat in the United Kingdom.

As harvest moves northward in Europe, winter wheat and rye may, on the whole, be said to have fully maintained their former promise. The wheat crop of the United Kingdom, on an increased area, is regarded likely to furnish an average yield. France, with diminished areas under both wheat and rye, promises a medium outturn of the former and a less satisfactory one of the latter.

Spain is reported to have exceptional crops, a recent official estimate putting wheat at 157,000,000 bushels, compared with 137,000,000 bushels last year. These figures constitute a new high record. The small wheat crop of Germany is probably not quite up to the usual standard and rye is expected to show a considerable shortage.

The Hungarian wheat crop, on the basis of appearances July 1, is officially estimated to promise 163,000,000 bushels as compared with 170,000,000 bushels actually harvested last year; rye 50,000,000 bushels, against 52,000,000 last year. In Roumania and the Balkan States the prospects are far better than in average years. In Russia, though there is much conflict of expression, the weight of opinion seems to be in medium results.

◆

The first annual meeting of the Canadian and Empire Investment Trust, Limited, held recently in London, England, showed that it had earned a net revenue of £7,539 after providing management expenses. There were written off a thousand pounds for preliminary expenses, and there was put to the reserve direct £2,607, being the net profit accruing from the sales of securities. Further, a reserve fund of £1,500 is provided by shares in various companies received as commissions. The report is considered satisfactory.

NEW BRUNSWICK.

Crop Outlook Good—Another Natural Gas Well Discovered—May Establish a Cement Plant at Green Head.

(Staff Correspondence).

St. John, N.B., July 17th.

The crop outlook in New Brunswick is excellent. Haying is in progress, and though the crop is light in some sections, it is good in others. Grain, potatoes and other vegetables promise well. Unusually warm weather in July ripened small fruits early, and there is a large yield. New potatoes are now offered and there will be a fairly good crop. The farmers are getting good prices for all kinds of produce.

The United States lumber trade market has lately declined sharply and is dull, but it has absorbed much more material this year than it did to the corresponding date last year. The sawmills are all busy, and cargoes going forward to the British market from all shipping ports. The northern part of the province is developing a market for lumber in Montreal and farther west, but is somewhat handicapped by freight rates.

Another Discovery of Natural Gas.

The Federal Public Works Department has prepared plans and specifications for 1,900 feet of sea wall and wharf at West St. John, and will shortly call for tenders. This is work to be done to enable the Canadian Pacific to fill in the shore lots which it is now acquiring from the city, on which tracks and other terminal facilities will be constructed. The railway company is at present rushing work night and day at the head of the harbor, and has nearly completed the filling in of a large area where hitherto the tide swept in and formed a large timber pond. On the new-made ground large warehouses and tracks will be constructed. Thus the Canadian Pacific Railway owns very valuable property at two important places on the water front at St. John.

The success of the Maritime Oil Fields Company, which has more than twenty natural gas and oil wells in Albert County, and which is now preparing to supply Moncton with natural gas, bids fair to be duplicated by the General Oil Shales Company of Canada, in which Senator Domville is interested, and which owns valuable property in Albert County. The company has been conducting boring operations, and last week struck a gas pressure so great that it was necessary to cap the well. The outlook is good and a company to be known as the Hillsboro Light, Heat and Power Company is being organized, to supply the village of Hillsboro with natural gas. The other company expects within eight weeks to have its main pipe laid to Moncton and the natural gas ready for distribution.

Proposed Establishment of Cement Plant.

Dominion Inspector Calder states that the small catch of lobsters is not due to scarcity, but to enforcement of the regulations against taking small lobsters. The catch of large lobsters was as good as usual, and under strict regulations of the fishery their number will increase in future seasons, as has been the case along the coast of Maine.

Another company is seeking an option on a property owned by the city at Green Head, on the river, for the avowed purpose of establishing a cement plant, the conditions there being especially favorable. The city offers to sell the property for $30,000.

The exports from St. John to the United States for the quarter ending June 30th were valued at $645,834.81, compared with $419,635.25 for the corresponding quarter last year. The increase was chiefly in lumber, pulp and pulpwood. Fish, hides and skins are the next largest items, and it is worth noting that the exports included tea to the value of $15,856.

Mr. C. Murphy, general superintendent of transportation on the Canadian Pacific Railway, intimated last week that the company had no present intention of taking over the operation of the Dominion Atlantic Railway system in Nova Scotia. He regards a car ferry over the Bay of Fundy as impracticable.

Direct Steamship Service to West Indies.

The St. John Board of Trade has assured Dr. Kirkpatrick, who is promoting the Canada West India Company with direct steamship service between St. John, Cuba and Jamaica, that it will do all it can to encourage the project. Dr. Kirkpatrick says that reciprocity would open up a large market in Porto Rico. He favors two steamer routes, one between St. John, Porto Rico and Nipa Bay, and another between St. John, Havana, Cienfuegos and Kingston, Jamaica.

A government experiment in tobacco culture is being made this year at Maugerville, in the St. John Valley, and it may prove satisfactory. If so a new industry will be developed.

R. Z. Walker has been appointed travelling freight agent of the Intercolonial Railway, with office in Moncton. This is a new office and indicates a desire on the part of the government railway to hustle for business.—W. E. A.

The Bank of Toronto has re-opened its branch at South Porcupine, and is again fully equipped to carry on a general banking business.

RECIPROCITY BILL PASSES UNITED STATES SENATE.

Mr. J. J. Hill Says Imperial Federation Has Been Prevented—President Taft Gratified.

The Canadian reciprocity bill passed the United States Senate at Washington last week, without amendment, by a vote of 53 to 7. Prior to a vote on the bill, twenty-five amendments were voted down by majorities ranging from 40 to 45.

Passage of the Canadian reciprocity bill brings to a close the principal work for which the extra session of Congress was called.

On April 5th President Taft sent a special message to Congress on the subject of Canadian reciprocity, and a week later the bill was introduced in the House of Representatives by Mr. Underwood of Alabama. After nine days' discussion the House passed the bill by a vote of 267 to 89. On April 24th the bill was sent to the Senate and has been constantly before that body ever since.

The effect of the agreement, which has now received the ratification of the Senate, will be to open American markets to Canadian wheat and other grains, dairy products, fish, sheep, cattle, and rough lumber.

Pulp and Paper Section Becomes Law at Once.

By the agreement Canada removes all restrictions on the importations of fruit, cottonseed oil, and a few other commodities, and grants reduced duties on agricultural implements and other manufactured articles.

The Canadian Parliament has not yet acted on the agreement, and with one exception the provisions of the bill as passed by Congress, will not become effective until President Taft issues a proclamation that Canada has ratified the pact. The exception to this procedure is in the paper and pulp section of the bill, which it is announced, will become immediately effective when the President signs the law.

"I am very much gratified and delighted that the bill has passed," said President Taft after the vote. "It indicates the increase of mutually beneficial relations between Canada and the United States."

Mr. J. J. Hill's Opinion of the Agreement.

Mr. James J. Hill says the country has profited more by what the agreement has prevented than by what it has gained. "In the comment on the treaty, when it was pending," said Mr. Hill, "nearly every argument spoke for the good it would bring; and it will bring good. But the good it will bring is only the smaller consideration of the question. What would have happened if we had not passed the treaty? That is the big queston. There would have been a revival of a move for imperial federation, and if we had refused to trade with our good neighbor, our second best customer, and for our manufacturers the best customer we have, we should have been sorry for it in years to come."

◆

INDUSTRIAL ACCIDENTS DURING JUNE.

Industrial accidents occurring to 192 individual workpeople in Canada during June were reported to the Department of Labor. Of these, eighty-two were fatal and 110 resulted in serious injuries. In addition, eleven fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before June, 1911.

In the preceding month there were fifty-two fatal and 121 non-fatal accidents reported, a total of 173, and in June, 1910, there were 168 fatal and 247 non-fatal accidents, a total of 415. The number of fatal accidents reported in June, 1911, was, therefore, thirty more than in the preceding month and eighty-six less than in June, 1910. The number of non-fatal accidents reported in June, 1911, was eleven less than in the preceding month, and 137 less than in June, 1910. Altogether, there were nineteen more industrial accidents reported in June, 1911, than in the preceding month, and 223 less than in the same month of the preceding year.

Of fifty-one returns received during the month, giving the ages of the victims of industrial accidents, nine referred to persons under twenty-one years of age, sixteen to persons between twenty-one and forty-five, and eleven to persons over forty-five. Fifteen persons were over twenty-one years of age, but their exact ages were not specified.

◆

Mr. William J. Lindsay, stock seller for the defunct Farmers bank, was committted for trial at Toronto last week by Magistrate Denison upon a charge of conspiracy with Mr. W. R. Travers, former general manager of the bank, to secure fradulently the certificate of the treasury board of Canada which enabled the bank to commence business. He will appear at the next sittings of the assizes.

Stanley Mineral Springs Company, Limited

(Incorporated under the Manitoba Joint Stock Companies Act), March, 1911.

HEAD OFFICE - - - WINNIPEG, MANITOBA

Authorized Capital: $200,000.00, divided into shares of $100 each.

Present Issue: ONE THOUSAND 7 per cent. Cumulative Preference Shares, plus 50 per cent. of Common Shares (fully paid up and non assessable), at the price of $100 per share of the Preference Stock, equivalent to $100,000.00; of which $63,114.86 is in payment of the purchase price for the properties and assets mentioned in the prospectus and the balance is for working capital.

PAYABLE 10 per cent. on application, 30 per cent. in 30 days, 30 per cent. in 60 days, 30 per cent. in 90 days. Dividends, when declared, will accrue on the amount of money paid in from the dates received.

OFFICERS AND DIRECTORS: Hugh Sutherland, Esq., President, Executive Agent Canadian Northern Ry.; John Galt, Esq., Vice-President, Director Union Bank; Hon. R. P. Roblin, Premier of Manitoba; Joseph G. Carroll, Esq., Director Wine and Spirit Vaults, Limited; D. E. Sprague, Esq., President Sprague Lumber Co., Ltd.; F. S. Wiley, Esq, Vessel Owner, Port Arthur, Ont.; James Whalen, Esq., Pres. Great Lakes Dredging Co., Port Arthur.

BANKERS: Northern Crown Bank. SOLICITORS: Munson, Allan, Laird & Davis, Winnipeg.

AUDITORS: Marwick, Mitchell & Co., Chartered Accountants of Scotland, 1211 McArthur Building, Winnipeg, Man.

LOCATION OF STANLEY SPRINGS

The Famous Stanley Springs are situated in the rocky hills of Western Ontario on the line of the Canadian Northern Railway, nineteen miles west of Port Arthur and Fort William. The water is forced bubbling through an immense natural filter bed of sand at an elevation fully 200 feet above the level of the Kaministiquia River, which flows past the base of the hill. By scientific analysis it has been proved to be a water of remarkable purity, and by the test of experience it is shown to possess all the delightful and healthful properties of the Ideal Table Water, and to blend perfectly with all Wines and Spirits. It is bottled only at the STANLEY SPRINGS, and with the greatest care under hygienic conditions, the Company's plant being equipped with the most modern bottling machinery, and being considered one of the finest mineral water plants on the continent.

PRODUCT

For five years this water has been tested by the public, and the demand for it and the other products of the Company has grown to such an extent that it has become necessary to increase the facilities for handling the business.

Stanley Ginger Ale.—In the autumn of 1910, after exhaustive experiments, Stanley Ginger Ale was offered to the public, and has been pronounced by connoisseurs to be the peer of any Ginger Ale in any country.

Stanley Water gives a unique quality to the Company's Ginger Ale, and the Company has secured a process in manufacturing which produces a perfect result. In Stanley Ginger Ale the Company has a product for which the demand is growing so rapidly that with present facilities it cannot be fully met, and the excellent quality of this article is certain to make it one of the most profitable products of the Company's works.

MARKET

The growing demand for table waters is one of the distinctive features of the age in which we live, and is being rapidly encouraged by doctors and other men of science. The search for a domestic water of the highest class lasted for years, and the finding of this spring in the rocky precincts of Western Ontario was an event of far-reaching importance. The geographical situation of the Spring is also an important feature from a commercial standpoint, as it enables the water to be profitably sold in Eastern as well as Western markets.

THE COMPANY TAKES OVER THE ESTABLISHED BUSINESS

Stanley Mineral Springs Company, Limited, has entered into an agreement to purchase all the assets of the old Company, including the Mineral Springs property, business and goodwill for the sum of $63,114.86 cash, which price is to be reduced as between the two Companies by the amount of stock subscribed in the new Company by shareholders of the old Company on the basis of the prospectus, equivalent to the cash invested by them in the old Company.

APPLICATION FOR SHARES

I hereby apply for..shares of one hundred dollars each, amounting to ....dollars of the capital stock of the STANLEY MINERAL SPRINGS COMPANY, LIMITED, Winnipeg, payable as follows: 10 per cent. with application, 30 per cent. in 30 days, 30 per cent. in 60 days and 30 per cent. in 90 days.

Cut this out, fill in the blanks and send to Room 410 Builders' Exchange Building, Winnipeg.

RECENT FIRES.

Monetary Times' Weekly Register of Canadian Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Lucknow, Ont.—Mr. P. McCharles' bakery destroyed; loss and origin unknown.

Squamish, B.C.—Damage from forest fires in vicinity is estimated at $500,000.

Bryson, Que.—Residence and grist mill destroyed; loss about $12,000; origin unknown.

Grand Forks, B.C.—Business section destroyed; loss about $100,000; origin unknown.

Quebec, P.Q.—Pfeiffer laundry on Mahone street destroyed; loss and origin unknown.

Winnipeg, Man.—Six houses on Young street damaged; loss about $1,200; origin unknown.

New Westminster, B.C.—Cannery and wharf at Queensborough, Lula Island, destroyed; loss and origin unknown.

Cole Harbor, N.S.—Barns of Mr. John Settle destroyed, also 18 cows and 3 horses; loss unknown; origin, lightning.

Granby, Que.—Sawmill of Mr. Thomas McDougall destroyed; loss about $4,000; insurance, $800; origin unknown.

Paris, Ont.—Grand Trunk Railway freight sheds and seven cars destroyed; loss unknown; origin, spark from engine.

Kingston, Ont.—Residence of Mr. A. Lalonde, 9 Catherine street destroyed; loss about $1,500; origin, supposed lightning.

Owen Sound, Ont.—Hardware store of Messrs. R. P. Birtcart Brothers badly damaged; loss unknown; origin, spontaneous combustion.

Barons, Alta.—Business section destroyed, the chief loser being Crown Lumber Company with damage of $35,000; total loss is estimated at $60,000; origin unknown.

Toronto, Ont.—Residences at 313 and 315 Pacific avenue badly damaged; loss about $3,000; loss unknown. English chop house, 30 King street west, damaged; loss about $2,000; origin unknown. Premises of Central Electrical and School Supply Company, 38 Adelaide street, badly damaged; loss about $10,000; origin unknown.

NORTHERN ONTARIO FIRE LOSSES.

The following is a list of fire insurance companies interested in the recent Northern Ontario fire. The list is subject to revision:—Acadia, $2,000; Aetna, $5,000; British Union & National of England, $17,000; Continental of New York, $7,500; Colonial of Winnipeg, $7,500; Crown of Toronto, $30,000; Caledonian, $4,000; Factories Insurance Association of Toronto, $22,000; Fidelity-Phenix, $37,500; Home, $75,000: Insurance Company of North America, $8,000; Law Union & Rock, $17,500; London & Lancashire, $56,000; London Mutual of Toronto, $8,000; Mercantile, $9,000; National of Calgary, $7,500; National Protectors of England, $5,000; National of Elizabeth, N.J., $3,000; North American of Mansfield, Ohio, $4,000; National British & Irish Millers of England, $7,500; Norwich Union, $20,000; Ontario of Toronto, $17,000; Proprietors Insurance Company of England, $7,500; Rimouski, $30,000; Sovereign of Toronto, $5,000; Union of England, $4,000; Western Union of Vancouver, $10,000; Western Canada of Calgary, $4,000; Western Empire of Spokane, $7,000; York, $30,000.

Porcupine.—The insurance carried by the Domes Mines was $431,750. The loss has been adjusted at 70 per cent. or $303,115. The lumber and cordwood was insured for about $23,000, the loss on which was $8,000. The insurance was carried in about twenty-five companies, principally American, and the loss to licensed companies forty-five per cent., and to non-licensed companies, fifty-five per cent. The Preston East Dome Mine carried $6,000 insurance with the London and Lancashire on camp buildings and machinery; total loss.

Cochrane.—Kuntz Brewery, $1,750, Mercantile. Carter Drug & Stationery Company, Law Union and Rock, $1,000; Northern, $1,000; London and Lancashire, $1,000. Mr. F. H. Child, hardware merchant, Rimouski, $2,200; London and Lancashire, $5,500. Mr. T. J. McManus, hardware merchant, General, $3,000; Sovereign, $2,000; Northern Empire, $1,000; London and Lancashire, $2,000.

South Porcupine.—Messrs. Bell & Rochester, hardware merchants, carried insurance of $4,000, $2,000 of which was with London & Lancashire. Northern Ontario Light & Power Company, $3,500, London & Lancashire. Messrs. Davis and Dunn, general store, Norwich Union, $1,000; Caledonian, $1,000; Fidelity-Phenix, $1,000; Union $1,000; Law Union & Rock, $1,500; Insurance Company of North America, $2,000; London Mutual, $1,000; Ontario, $1,000; York, $1,000; Factories, $2,000; London & Lancashire, $1,500. Temiskaming and Northern Ontario Railway camps 5½, 6 and 6½; the loss totalled $36,945, with insurance of $19,633, of which $13,733 is with London & Lancashire.

GERMAN MONETARY COMMISSION

Criticize the Banking Legislation of the United States —Bad Assets, Worthless Cheques and Loss of Credit Ruin Banks.

That banking legislation in the United States has been based upon the mistaken policy of putting security of assets in place of first importance at the expense of fluidity is one of the many interesting observations to be found in a new volume just published by the National Monetary Commission. It is an English translation of the stenographic notes of the proceedings of the German Monetary Commission.

In the discussion of resources it was pointed out that it was only necessary to secure that degree of fluidity demanded by a bank's position in a national system or by the character of the times. Herr Stroll, holding that the central bank was one of the most reliable means of averting all crises, declared:

"As far as I can make out, no bank has ever been ruined through lack of cash. It has always been the bad assets, the worthless debtors, and the loss of credit."

The German commission consisted of 25 members chosen because of their prominence as economists, practical bankers, or men of affairs. Herr Havenstein, president of the Reichsbank, was chairman; Prof. Adoph Wagner, of Berlin University, and W. Lexis, of the University of Gottingen, Arthur Fischel, of Mendelssohn & Company, and A. Schmidt, of the Krupp Company, were representative members of the commission. The discussions of the commission were general in nature and had reference to all classes of Germany banks and credit institutions from the land mortgage associations, agricultural improvement banks, and co-operative credit societies to the eight great joint-stock banks and the Reichsbank.

Of the suggestions made the one concerning the establishment of a Government bureau of supervision was debated at greatest length. The commission seemed to be strongly against Government interference of any other sort. A number of the commissioners (among them were Mommsen, Gontard, Weber, Schinckel, Lexis, and Reisser) appeared to be opposed to any governmental interference whatsoever until Herr Roland-Lucke, a landed proprietor, suggested the appointment of a permanent bank commission. This commission was to be made up of practical bankers, business men, and economists. Its functions were to be merely advisory. The commission was to keep informed of the current banking practice and the general financial condition of the country and to offer suggestions to the various financial institutions whenever a change of banking procedure was thought advisable. It was thought that suggestions offered to the president of the Reichsbank could be handed on to the other banking institutions, and that the suggestions would be carried out because of the nature of their source. The proposition that a permanent advisory commission be appointed by the government was received with favor by the majority of the Bank Inquiry Commission. Those members opposed to a bureau holding mandatory powers as well as those favoring such a bureau united in favor of the proposition.

That it is a fallacy to regard bank reserves as unproductive was clearly shown by Prof. Wagner. "Nothing could be more fallacious," he says, "than to regard them as unproductive. They do not yield interest directly, and from the standpoint of the individual owner they are not income-bearing; but they are essential to the conduct of his enterprise and are therefore theoretically productive."

Another point of substantial agreement by the commission was that of the "necessity of publicity, and that with much greater detail on the whole than has been given in the intermediate balance sheets hitherto published by the great banks, useful as these have been."

The discussions of the German commission revealed two very well-defined positions held by two groups. On the one hand, there was the group of which Prof. Wagner and Herr Singer, member of the Reichstag, were exponents, who urged legislation for the improvement of economic conditions. On the other hand, there was the group led by Prof. Reisser and Herr Mommsen, member of the Reichstag and director of the Mitteldeutsche Creditbank, who were opposed to legal enactments restricting bank action, and believed that it was sufficient to educate the propertied classes to the consciousness that they have social duties.

EIGHTY-ONE NEW COMPANIES,

With Total Capitalization of Nearly Twenty-seven Million Dollars—Several Large Land and Mining Concerns.

The total capitalization of the eighty-one companies incorporated during the past week is $26,949,000.

The Powell River Company, with head office in Vancouver, B.C., and capital of $4,000,000 is the largest company to be granted a charter. This company will conduct a pulp, paper and lumber business, and will purchase from the Powell River Paper Company, Limited, all its property, real and personal.

Other large incorporations are: Red Cliffe Phillip Gold Mining Company, Kenora, $2,500,000; Roche-Miette Collieries, Edmonton, $2,500,000; Western Canada Mortgage Company, Edmonton, $2,500,000; Canadian Northern Montreal Land Company, Toronto, $2,500,000; Montreal South Land and Improvement Company, Montreal, $2,000,000; Lapalme Porcupine Mines, Toronto, $2,000,000; and the Porcupine Aurum Mining Company, Toronto, $1,000,000.

The following is a list of charters granted during the past week. The head office of each company is situated in the town, city or province mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Raymond, Alta.—King Brothers, $50,000.

High River, Alta.—St. George Hotel, $15,000.

New Westminster, B.C.—T. L. Duncan, $10,000.

Camrose, Alta.—Stoney Creek Collieries, $50,000.

Valley View, B.C.—Valley View Company, $25,000.

Red Deer, Alta.—Universal Brokerage Company, $12,000.

Blairmore, Alta.—Alberta Fire Clay Company, $200,000.

Strathmore, Alta.—Le Bar Ranching Company, $10,000.

Twining, Alta.—Many Swan Townsite Company, $6,000.

Lethbridge, Alta.—Red Cross Drug & Book Company, $100,000.

Ottawa, Ont.—Ottawa Farm Development Company, $350,000. G. L. Orme, M. Orme, W. F. Gibson.

North Cobalt, Ont.—St. Joseph's College at North Cobalt. J. Depigny, M. Lagrevol, P. Courbon.

Brantford, Ont.—Brantford Motor Truck Company, $100,000. A. K. Bunnell, E. L. Goold, J. E. Hammond.

Sudbury, Ont.—King Edward Hotel Company of Sudbury, $40,000. G. J. Valin, A. J. Manley, H. R. Day.

Cobalt, Ont.—Philadelphia Mining & Developing Company, $40,000. G. Mitchell, H. McGinnis, W. Graham.

St. Hyacinthe, Que.—Compagnie le Credit Maskoutin, $49,000. H. A. Beauregard, D. T. Bouchard, E. Gamache.

Halifax, N.S.—Halifax Trading & Sealing Company, $85,000. J. A. Farquhar, J. G. Farquhar, C. W. Rowlings.

Cordova Mines, Ont.—Cordova Mines, $500,000. P. Kirkegaard, Toronto; W. G. MacKechnie, W. Hughes, Marmora.

Kenora, Ont.—Red Cliffe Phillip Gold Mining Company, $2,500,000. R. Beaudry, E. R. Dufresne, L. R. Beaudry, Montreal.

Three Rivers, Que.—Compagnie d'Imprimerie et d'Imeaubles, $125,000. F. X. Vanasse, G. Lefrancois, J. A. Tessier.

Hamilton, Ont.—Laidlaw Bale-Tie Company, $400,000. W. A. Laidlaw, E. Hodson, R. G. Laidlaw. Delta Park, $50,000. G. Gauld, W. T. Elliott, W. H. Daniels. Bowes, Jamieson, $100,000. J. Jamieson, J. R. Jamieson, J. W. Jamieson. Hamilton Bachelors Club, T. A. Brown, M. Cummings, F. J. Schenck.

Vancouver, B.C.—Bloedel Stewart & Welch, $500,000. Thompson & Carper, $50,000. Queen Charlotte Fishing Company, $100,000. National Timber Company, $250,000. Powell River Company, $4,000,000. Dominion Electric Appliance Company, $100,000. Caldwell & Carsonn, $25,000. Western Warehousing Company, $50,000. House & Price Wreckers, $20,000. British Columbia Hop Company, $50,000. Fidelity Securities, $100,000. Pacific Coast Brick & Tile Company, $500,000.

Edmonton, Alta.—Victoria Land Company, $100,000. McCarthy, Conroy & McLaughlin, $10,000. Great Northern Oil & Asphalt Company, $500,000. St. Elmo Hotel Company, $100,000. Roche-Miette Collieries, $2,500,000. Elk Cigar Company, $10,000. Western Canada Mortgage Company, $2,500,000. Western Homebuilders, $100,000. Edmonton Union Stockyards, $50,000. Imperial Foundry Machine Company, $15,000. Edmonton Market Gardens, $30,000 Great Northern Tannery, $100,000. Northern Hotel Company, $25,000.

Calgary, Alta.—Moxam Realty & Construction Company, $25,000. Vulcan Coal Company, $500,000. Calgary Bookbinding Company, $5,000. McCallum's, $50,000. Rosebud Farming & Development Company, $20,000. Frank Fehrenback & Company, $40,000. Gordon Nail Company, $100,000. Calgary Drug Company, $10,000. Globe Theatre Company, $10,000. Roselyn Coal Company, $100,000. Hotel Cecil Company of Calgary, $50,000. Nutana, $32,000. Northern Financial Company, $36,000. L. F. Wilson & Company, $100,000. Irricana Pressed Brick, $75,000. Sunalta, $50,000.

Toronto.—Canadian Northern Montreal Land Company, $2,500,000. G. G. Ruel, R. H. M. Temple, A. J. Reid. British Welcome League, B. Westwood, A. B. Morine, R. Bradshaw. Magneta Clock Company of Canada, $10,000. J. C. M. MacBeth, R. W. Menzie, C. R. Allison. Golden Age Mines, $100,000. J. Fairbrother, H. P. Bayley, F. Carnall. Dominion Bolt and Screw Company, $400,000. T. H. Wilson, J. T. Loftus, J. A. Milne. Porcupine Aurum Mining Company, $1,000,000. E. R. Lynch, R. W. R. Shearer, J. T. Body. Advertising Designers, $35,000. H. C. Macdonald, H. J. Macdonald, T. J. W. O'Connor. Lapalme Porcupine Mines, $2,000,000. R. McKay, D. I. Grant, M. Macdonald.

Montreal, Que.—Dominion Nut & Bolt Fastener Company, $15,000. C. G. Greenshields, A. C. Calder, R. E. Allan. Wentworth Realty Company, $200,000. N. Curry, J. W. McConnell, J. Findlay. Montreal South Land & Improvement Company, $2,000,000. H. S. Ross, T. Rinfret, R. Genest. Western Provinces Townships, $50,000. F. E. McKenna, W. H. Cox, H. Baby. St. Remi Kaelin Company, $140,000. G. P. Butters, E. W. Dawson, J. W. Blair. Land Subdivision, $20,000. B. Lefebvre, W. J. Moore, H. Mitchell. Joseph Bonhomme, $49,000. J. Bonhomme, A. Morin, J. A. Pilon. Compagnie du Parc Dorion, $40,000. R. E. Cote, Curran, Ont.; J. M. Dorion, Lachute; G. Dansereau, Thurso.

BRITISH AND COLONIAL LAND AND SECURITIES COMPANY.

Mr. H. H. Macrae, general manager of the Toronto Electric Light Company, has been appointed managing director of the British and Colonial Land and Securities Company, Limited, a company of which Sir Henry M. Pellatt is the president. The shareholders of the Toronto Electric Light Company have been asked to subscribe for stock in the new loan company. Its object is to interest British capital in Canadian investments and it will have a Canadian board of directors with an advisory board in Great Britain. There is to be no public issue of stock but $2,000,000 of capital has been subscribed privately.

The Canadian board is as follows:—President, Sir Henry M. Pellatt, C.V.O.; vice-president, The Hon. J. M. Gibson, K.C., LL.D., Lieutenant-Governor of Ontario; managing director, Mr. H. H. Macrae; directors, Colonel James Mason, Mr. H. S. Strathy, Mr. Stair Dick Lauder, Colonel H. J. Mackie, Mr. G. H. Smithers, (Burnett & Company, Montreal).

The British advisory board is constituted as follows:—Chairman, The Hon. Arthur Stanley, M.P., (brother of the Earl of Derby); The Duke of Sutherland, K.G., Mr. J. M. Henderson, M.P. for West Aberdeen, The Duke of Argyll, K.T., K.G., Lieut.-General J. W. Laurie, C.B.,

Mr. Macrae told The Monetary Times that nothing definite had been arranged regarding the management of the Toronto Electric Light Company and stated that the two two offices would not conflict having no connection with one another. An announcement will be made next week regarding the impending reorganization.

The Canadian railways have raised the freight charges on coal ten cents per ton.

The United States Congress will make inquiry to determine whether there is a great banking combination which has the power to control credit, exchanges and deposits and to bring on business depression and panics as charged by Representative Lindbergh, of Minnesota, recently.

Mr. Wesley McCurdy, for over five years manager of the advertising department of the Winnipeg Free Press, and latterly with the Grain Growers' Guide, has purchased an interest in Messrs. R. J. Macpherson & Company, Limited, Advertising Agents, and is now actively engaged in the work of this company. The agency will hereafter be known as Messrs. Macpherson-McCurdy Limited, with Mr. Macpherson as president and Mr. McCurdy as secretary-treasurer.

According to the annual report of the Queen Victoria Park Commission, the total receipts from all sources for the year 1910 amounted to $146,539.50, of which the power companies paid $62,847.18 and the fixed charges of $60,000, amounting in all to $122,847.18. This is $30,000 more than the preceding year. Of the expenditures, $43,380.71 was for improvements and maintenance in the park, and $60,613.73 was spent on the boulevard. The cost of the land and expropriation charges amount to $16,350.61.

The Government's Next Bond Issue

(By H. M. P. Eckardt.)

The last Dominion loan placed upon the London market made its appearance in May, 1910. More than a year has therefore elapsed since our Government has been obliged to seek accommodation at the hands of the money lenders. So far, 1911 stands out in sharp contrast with the three years immediately preceding it. As Mr. Field points out in his special article in The Monetary Times, June 24th, Canada had made two appearances in the money market in the first half of 1910. There was a loan of £5,000,000 in January and £4,000,000 in May. Two appearances also are recorded in the first seven months of 1909, and three in the first nine months of 1908. While it is conceded that Canada will continue to be a large borrower during the next ten or fifteen years there is no definite information available as to when the next loan will appear.

A study of the position of the Department of Finance serves to make it clear that the national finances in some respects are in satisfactory shape. As regards temporary loans, for example, the comparison between 1911 and the three preceding years is highly favorable to 1911. According to the monthly statements issued by the Department there has been no recourse to temporary loans since June 30th, 1910,

Loans Figured Conspicuously.

In the earlier part of 1910 these loans figured conspicuously. Thus at the end of January the amount outstanding was $21,899,999; it was reduced to $17,033,333 by the end of March and remained at that figure till June. Similarly at the beginning of 1909 a large amount in temporary loans was current. The record shows; January 31st, $20,606,333; February 28th, $13,739,666; March 31st and April 30th, $13,608,333. In July the amount dropped to $7,299,999 and remained at that level till the end of the year. The year 1908 began with temporary loans at £1,000,000 or $4,866,666. In February they rose to $9,299,991; in July to $18,039,666; and in September dropped to $15,606,333, remaining there till the incoming of the new year.

Pressure Not Heavy.

So it is clear that the pressure on the national finances is not now so heavy. This is in large part the result of the buoyancy of the revenue. In the following table the revenue month by month in 1910-11 is compared with the preceding years, as per the record in Canada Gazette:—

	1911	1910	1909	1908
Dec.	....	$9,790,387	$8,733,571	$7,183,355
Nov.	....	10,061,060	8,748,923	6,867,988
Oct.	....	9,666,192	8,553,766	7,519,716
Sept.	....	10,317,823	8,853,659	7,282,950
Aug.	....	10,174,930	8,469,848	7,942,272
July	....	9,320,586	8,437,438	6,663,460
June	....	9,612,677	7,978,898	6,939,457
Apr.	$2,210,220	1,731,287	1,954,901	1,198,087
Mar.	10,363,520	8,978,514	7,595,702	6,577,027
Feb.	9,491,997	8,173,937	6,567,186	7,268,313
Jan.	9,144,873	8,120,441	6,639,053	7,093,530

It is necessary in connection with the above record to consider the expenditure. For the year ended March 31st., 1908, the expenditure on capital account (unrevised figures) was $28,125,552; expenditure on account consolidated fund, $65,093,374. Taking them together the average is about $7,750,000 per month. For the year ended March, 1909, the figures are; Capital, $41,524,420; consolidated fund, $71,535,760, average per month, both combined, $9,400,000. For the year to March, 1910, capital, $31,461,686; consolidated fund, $68,857,745, average per month of both, $8,300,000. Finally in the year to March, 1911, capital expenditure appears at $30,447,470; expenditure on consolidated fund, $75,590,195, and the average of the total monthly outgo, $8,750,000. By comparing this average outgo with the revenue shown for the several months of the fiscal year it is seen that in all the months except April (which always suffers by reason of the fact that much of the revenue collected in it is applied to the account of March) the receipts were well above the average monthly outgo. The natural result of such a state of affairs during a protracted period would be a substantial reduction of debt.

Actually there is recorded, between April 30th, 1910, and May 31st, 1911, a reduction of the net debt amounting to over $5,000,000. As remarked above, this has taken the form of a repayment of the temporary loans in London. This amounted to $17,033,333. And in the meantime the funded debt in England has increased only $5,600,000

If the Canadian corporations—railroad, industrial and other—are able to borrow in London by means of issues of new securities, there seems to be no reason to anticipate a decline in the Dominion's current revenue during the remainder of the year. It is well understood in financial circles in Canada and in England that the placing in the overseas markets of large amounts of Canadian bonds and debentures means a continuously large importation of goods from abroad by Canada, and therefore it bears directly upon the matter of customs collections by the Dominion Treasury. Latterly there have been repeated warnings from London to the effect that the British market for our securities was becoming congested.

In the cases of a number of recent flotations the underwriters were left with an uncomfortably large percentage of the issues made. Some authorities are therefore predicting that Canadian flotations will have to proceed on a smaller scale, in other words that we shall have to be content with smaller supplies of outside capital for awhile.. On the other hand it can be said that the great international money markets are on the whole well supplied with cash resources and money rates are low.

That circumstance seems to indicate that Canada can supply her needs at a price.

In considering the question as to when Canada will again appear as a borrower in London it is also necessary to take account of the approaching general election. That will doubtless lead to the Government's embarking immediately on public works of importance, which have been in the embryonic stage. And so there is promise that the expenditures on capital account will be swollen. It is to be hoped that they, in conjunction with the ordinary expenditures, will not be suffered to greatly exceed the revenues.

RIO DE JANEIRO LIGHT AND POWER COMPANY

The Rio de Janeiro Light and Power Company has commenced the building up of a reserve fund, $300,000 of earnings having been set aside for that purpose in 1910; also of a sinking fund for the first mortgage bonds, $250,000 having been set aside out of 1910 earnings in this connection. In addition to these funds, the company had an accumulated profit and loss surplus last year of $2,032,640.

The net surplus for 1910 available for dividends was 5.55%. From a careful estimate it would appear that the net surplus for dividends for 1911 will be about 8% The present dividend rate is 5%, thus the margin between net surplus and dividend rate would appear somewhat narrow. Having just about completed in a successful manner a comprehensive system, which practically controls the tramway, light, power and telephone services of a rapidly growing community, whose present population exceeds 1,000,000, the net earnings from now forward will show important increases.

This Company operates under favorable concessions and franchises the tramway, power, lighting and telephone service in Rio de Janeiro, Brazil. It owns two water powers, capable of developing 40,000 and 100,000 horse power, respectively, in the driest season.

The tramway system whose electrical equipment was completed in 1910, consists of 213 miles of electric tramway. By the acquisition of 75 per cent. of the capital of the Jardim Botanico Company in 1910 and the consolidation of the two companies' interests and the substitution of hydraulic power for steam on the Jardim Botanico system, a material saving in the operating expenses took place. The old telephone service has been reconstructed, and at the close of 1910 there were 4,859 subscribers, an increase of 868 in the year. The electric light and power service is developing very rapidly, the net earnings from this branch for 1910 resulting in an increase of no less than 64%. The new gas plant, which will have a capacity of twice the present consumption and which is expected to be completed by the close of the present year—will effect many economies and have a favorable effect upon the gross and net earnings.

UNUSUAL OPPORTUNITY

Party owning ten thousand acres of land in Ontario, near Lake Superior, upon which there is wood and timber sufficient to net fifty thousand dollars and also valuable gold mines, desires a loan of thirty thousand dollars; secured by a first and only mortgage upon the entire property, and as a bonus will give a half interest in the equity above the mortgage; a sufficient quantity of wood for which there is a ready market can be taken off within two years to retire the whole loan. For further information inquire of Box 330, Monetary Times.

WESTERN CANADA.

Winnipeg Negotiating for Purchase of Street Railway—Crop Prospects Continue Bright—In the Wheat Markets.

Monetary Times Office,
Winnipeg, July 25th.

Encouraging reports continue to come from all over the West of the crops. There have never been such splendid prospects, and never has a crop shown so little signs of damage. Fifty per cent. of wheat, 40 per cent. of oats, and 50 per cent. of barley is headed, and 60 per cent. of flax is in blossom.

During the past week some apprehension was felt on account of rumors of frost in certain localities. In order to obtain reliable information one thousand correspondents in the three prairie provinces were wired, asking if the cool wave was having a detrimental effect on the crops. Replies were of the most reassuring character, showing that, while light frosts have been experienced in a few localities, they have not affected the crop in the slightest degree. Of the replies received, eighty-one per cent. reported no frost; and of the nineteen per cent. reporting frost, not one indicated any injury to wheat from this source. Injury from hail has also been inconsiderable.

Gathering the harvest this year will eclipse the magnitude of any previous year in the history of the West. The Dominion government, provincial government and the railways are utilizing every means and effort to meet the demand by advertising low railway fares and special immigration privileges.

Winnipeg Considering Purchase of Winnipeg Electric.

Winnipeg is considering the purchase of the Winnipeg Electric Street Railway on a basis offered by Sir William Mackenzie last winter of $250 per share. The arrangements under consideration will employ a sum of $15,000,000 in cash for the stock and the assuming of $7,000,000 indebtedness of the company. Mayor Evans, who spent two months in London recently, reports that Winnipeg will have no trouble in raising the required amount if the railway company can show that their present earnings will provide for the necessary current maintenance, interest on debentures and instalment for sinking fund that would retire the city's obligation in forty years. Winnipeg is the home of municipal ownership in North America. Its greatest enterprise at present has been the completion of the municipal power plant that is capable of providing 100,000 electrical horsepower. The city also owns and operates its water plant, street lighting system, stone quarry, asphalt plant, parks and boulevard system, fire alarm and high-pressure waterworks.

The big Winnipeg municipal power plant will be put in operation August 15th. This plant has been constructed at a cost of over $4,000,000, and will furnish an ample supply of power and light for industrial, commercial and domestic purposes. As the Electric Street Railway Company has given out its intention of making low prices for power and light, this city will be an extremely attractive place for users of power who desire to locate near to a market for their goods.

In the Wheat Markets.

Our Winnipeg market has been fairly steady all week, with fluctuations on a moderate scale in sympathy with the American markets. The result of the week's trading is that prices are practically on a level with a week ago. There was a good demand all along for the lower grades of wheat, and a considerable amount of export business was done. The movement of grain from the country has been maintained in steady volume, but is believed to be nearly over now.

The market is in a position to respond quickly to any unfavorable news, and is readily influenced by weather reports. The advance of the season is giving indications that the early crop expectations are not likely to be fulfilled. The chief factors in maintaining the firmness of markets during the past week were the reports of black rust and the absence of rains where most needed in the North Western States of America, both of which are causing deterioration and lowering the condition of the crop. The belief that the spring wheat crop of the States is showing very poorly, and may show even worse if there is a spread of black rust, is the most bullish feature in the situation. To this there has now to be added the fear of frost in the Canadian North-West.

A conservative view of wheat values is that present prices are justified by the reduction in the year's yield to date, and that if there is to be any further reduction there should naturally be a corresponding advance in values. The course of the market will depend greatly upon the weather prevailing over the growing and maturing spring wheat crops in America and Canada.

LIFE INSURANCE AND BANKING.

Something About Their Relations — Supervision Over Insurance Companies by State Authorities.

A notable address on the relation of life insurance to commercial banking was delivered in New York not long ago by Mr. Darwin P. Kingsley, president of the New York Life Insurance Company. He drew many parallels and contrasts between life insurance and banking, pointing out their fundamental similarities, although dealing with different phases of human requirements. Both banking and life insurance, he said, are evidences of a high civilization, and neither can prosper except where men believe in the fidelity and justness of their fellows.

"Banking deals with the products of labor, represented through accepted standards of value," added Mr. Kingley. "It is built into a commercial structure so wisely and strongly that a dollar thus combined with many others does the work of fifty dollars acting separately. Life insurance deals with a thing more valuable than created wealth; it deals with the industrial man who produces all wealth. It was a great achievement—after a man had a hard earned dollar in hand—for him to deposit that dollar with some one else and put it to work for other men, at some risk, as well as with some decided advantages to himself. This was the basis of commercial banking. It was a greater achievement to get the individual to use another dollar as a means of securing another sort of credit, representing what he could produce if he lived, but could not provide if he prematurely died. This was the basis of the great structure we call life insurance.

"The credit for which a man asks when he insures his life is of a different sort from the credit he gets at his bank. It is a real credit for the benefit of and in no way a burden on future generations. Life insurance constantly and successfully faces panic conditions. Death is panic—it comes swiftly, silently, just when and where it might least be expected. Life insurance meets its demands without delay and without loss. Life insurance does more than that. Death usually demands and life insurance pays not merely the sum deposited, but a sum largely in excess of that.

"Consider a few of the things that life insurance does: It answers the question whether or not a man will live long enough to provide for his family. To the extent that money can represent a man's productive power it doesn't matter when the properly insured man dies. It cultivates aggressively the principles of self-respect and individual responsibility, the very essence of our civilization. It prevents social defaults which premature death otherwise brings—defaults quite as disastrous to society and frequently as dishonorable as those which occur in banking and general business. It meets, as nothing else does or can, the demands for capital of a society rapidly developing and offering the faith and earning power of unborn generations as security for money which must be spent now. It is a banker for millions of people—a banker who cannot be ruined through panic, but who allows every depositor to draw on him at any time to the extent of his cash credit.

"Under the theory that interstate insurance is not interstate commerce the wonder is that American life insurance has grown to its present proportions. That a business which is interstate in its nature can succeed when really supervised by forty-eight sovereign masters is, of course, utterly improbable. That it has succeeded is attributable to the fact that the States have not supervised. Now they are beginning to do so. Life insurance is now face to face with the difficulties from which banking partially emerged in 1864. If the Supreme Court of the United States should change its mind and declare that interstate insurance is interstate commerce, it would not be the first time the court has changed its mind, and it would have stronger ground from which to argue than it had when it spelled out of the power in the Constitution which authorizes the Federal Government to borrow money, the right to establish national banks and a national currency."

◆

STERLING BANK INCREASES CAPITAL.

In order to meet the demand of its steadily growing business, the Sterling Bank of Canada announces an issue of $1,000,000 of additional capital, which will be offered to shareholders of record on August 7th, in the proportion of one share of new stock for every share of old held on that date.

The Sterling Bank has made steady and substantial progress during the past few years, and it has been evident that if it were to keep pace with the development of its business, it would find it advisable to secure additional capital. The Sterling is the third bank to announce an increase of capital during the past week. The Bank of Montreal and Bank of Toronto have already given similar notice to their shareholders.

"Capital Investments in Canada"

BY FRED. W. FIELD

(A new volume to be published in September, 1911)

$2.50 Per Copy.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn. The following are the chapters of the proposed volume:—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other Countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities & the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London, January 1905 to April 1911.

Canada has cultivated the investor abroad. To some extent, he has come of his own accord. Of recent years the invitation has been more emphatic. Demonstration has backed it. No longer should it be possible for the fakir to trade with spurious Canadian goods. When ignorance of Canadian conditions was common, the unscrupulous magnetized British money into dangerous, unremunerative and fraudulent channels. The legitimate Canadian investment is being shown now in its true colors. Canada's heavy borrowing is an important subject, and the maintenance of Canada's credit in London is one of the most vital factors in Canadian finance to-day.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the various offices of The Monetary Times as follows:—

Toronto, Ont.: 62 Church Street
Montreal, Que.: B. 33 Board of Trade Building
Winnipeg, Man.: Room 404, Builders Exchange Building
London, Eng.: Grand Trunk Building, Cockspur Street

BOND TENDERS INVITED.

◆

SOME BOND NOTES.

The British Columbia Electric Railway is offering to existing stockholders $3,000,000 worth of new capital. This is composed of $1,000,000 five per cent. cumulative perpetual preference at 25 cents premium, $1,000,000 preferred ordinary at 50 cents premium, and $1,000,000 deferred ordinary at $1 premium.

At a recent meeting at South Vancouver, it was found necessary to make a tax rate of 12½ mills on improved land and 22½ on wild lands for the current year. The existing debenture debt of the municipality is $2,896,881.50, with the exception of two-thirds of $85,000, which is assumed by the Corporation of Point Grey under the South Vancouver division act of 1907.

A special meeting of the Kingston city council was held recently. In putting through two sewer by-laws recently an error was made in designing one as being by petition instead of by order of the Board of Health. The city is selling debentures for local improvements, and when the by-laws were examined by the lawyers the error was discovered. To make things right the city had to pass another by-law.

Mr. Pelletier, city auditor, Montreal, has submitted a statement showing that the total value of property in Montreal, according to the assessment rolls for 1910, was $428,534,125, of which $109,192,499 was exempted on the ground of being government, religious and municipal property.

The total assessment of Ottawa, Ont., may amount to $95,000,000. The total assessment last year was $86,529,876, and the total taxable property was $63,287,125. The increase last year amounted to $9,225,977.

The London stock exchange has listed Bell Telephone of Canada $4,899,000 5's; British Columbia Electric £200,000 deferred ordinary; £200,000 preferred ordinary, and £200,000 5's. Also Port Arthur £110,700 4½'s and West Canadian Collieries £50,000 6's.

◆

NOTES OF BIDDING.

Six Toronto bond houses bid for the Chesley, Ont., $16,500 5 per cent. 20-year debentures. As previously noted, the offer of Messrs. Brent, Noxon & Company was accepted.

For the $30,000 5 per cent. 40-year Newcastle, N.B., debentures three bids were received from Montreal firms. The award was made to the Montreal Investment and Trust Company.

◆

THE TOBACCO COMPANY WILL REORGANIZE

Steps towards reorganizing the American Tobacco Company in harmony with the decision of the United States Supreme Court, were taken recently when announcement was made of the formation of protective committees by holders of the six per cent. bonds, the four per cent. bonds and the preferred stock. The committee's notice refers to the desire of the American Tobacco Company to comply with the order of the Supreme Court, and urges united action on the part of the bondholders.

Similar representations are made by the committee for the four per cent. bonds and the preferred stockholders' committee. The three committees join in requesting that certificates of bonds and stocks be deposited not later than August 28 next.

◆

The subscriptions to the Northern Ontario fire relief fund now total $51,727.

An unusual opportunity is presented this week in our advertising columns, where a loan of $30,000 is required on 10,000 acres of land in Ontario. The loan is secured by first and only mortgage upon the entire property.

A contract has been signed between the government and the Canadian Vickers, Limited, of Montreal, for the construction of a drydock at Montreal, and the payment of a subsidy by the government on December 31, 1913. It is to be of the first class, and the government undertakes to pay 3½ per cent. for thirty-five years on an investment up to $3,000,000. The dock is to be a floating one, and will be built by Messrs. Vickers' Sons & Maxim, of England, for the Canadian branch of the firm, of which Mr. F. O. Lewis is the head.

UNITED SHOE MACHINERY COMPANY.

Latest Report Shows Expansion—Number of Machines on Lease in United States Has Increased.

The business of the United Shoe Machinery Corporation, according to the annual report for the year ended March 1st, 1911, has shown steady expansion. Figures of this company are interesting in view of the fact that the Canadian Combines Investigation Act is being tested by an inquiry into the operations of the United Shoe Machinery Company of Canada, a branch of the United States corporation. The following are the chief figures of the report compared:—

	1910.	1911.
Assets.		
Cash	$ 1,379,280	$ 1,374,978
Stocks other companies	38,871,112	44,027,452
Total	$40,250,392	$45,402,430
Liabilities.		
Common stock	$24,635,586	$28,599,434
Preferred stock	9,490,050	9,515,400
Accounts payable	....	....
Reserve	1,500,000	....
Surplus	6,124,756	5,787,596
Total	$40,250,392	$45,402,430
Surplus Account—	1910.	1911.
Previous balance	$5,664,976	$6,124,754
Earnings for year ended February 28 and increase in value of stock of other companies	5,640,468	5,780,107
Total	$11,305,444	$11,904,861
Total dividends	*5,180,690	6,117,264
Balance March 1	$6,124,754	$5,787,597

---

*Includes $2,941,445 in cash and $2,239,245 in stock.

Machines on Lease.

The report says: "The past fiscal year has shown a continued improvement in the business of the company and of the foreign companies in which the company is interested. The factory at Beverly has turned out a greater number of machines than during any other period of equal length in the company's history. The number of machines on lease in the United States on March 1, 1911, was 90,276, an increase for the year of 11.82 per cent. During the year the company brought in from shoe factories over four thousand of its machines, which were broken up and thrown on the scrap heap in order that they might be replaced with machines embodying the latest improvements—an expense which the company assumes under its present system of doing business, but which would otherwise have to be borne by the shoe manufacturers.

"Since our last annual meeting contracts have been made for the construction of further additions to the factory. The Beverly plant, with the additions constructed during the year and those now under contract, will have a floor space of 21 acres, as against 17 acres a year ago. About 5,000 hands are now employed at the factory, and the average weekly payroll is over $75,000.

To Furnish Shoe Manufacturers.

"The company has continued its liberal expenditures for the improvement of existing machines and the development and purchase of new inventions, so that it is now in a better position than ever before to furnish shoe manufacturers with the very latest and most improved machines. In pursuance of this policy it has acquired inventions and patents formerly controlled by Thomas G. Plant, some of which were found on examination to cover improvements which might with advantage to the manufacturing industry be utilized in conjunction with inventions already in the company's possession and with improvements process of development so as to permit the construction of machines of a new type or of increased efficiency. In acquiring these patents it becomes necessary to purchase a majority of the stock of the Thomas G. Plant Company, manufacturers of shoes. The corporation has purchased this stock, which it intends to retain only until it can be disposed of advantageously.

Amounts Paid for Use of Machines.

"The amounts paid per pair of shoes for the use of all the principal royalty machines furnished by this company for the manufacture of different classes of shoes when accounts are paid within thirty days are substantially as follows:—

Goodyear welts, men's work	.05694
Goodyear welts, women's work	.04694
Goodyear turn shoes, women's and misses'	.01972
Children's Goodyear turn shoes	.005
Men's and women's McKay shoes	.01740
Children's McKay shoes	.01390

"From the royalties for 'Goodyear welts' and 'Goodyear turns' should be deducted 6-10c per pair for men's 'Goodyear welts'; for women's 'Goodyear welts,' 45-100c, and for women's and misses' 'Goodyear turns,' 70-1000c; which is to be invested in stock of the corporation and given to lessees under the terms of a circular letter of the corporation to its lessees, dated June 10, 1910."

The balance sheet of the United Shoe Machinery Company, of New Jersey, the operating company, on March 1, 1911, compares as follows:—

	1910.	1911.
Assets.		
Real estate	$ 1,901,667	$2,025,185
Machinery	1,812,132	2,032,416
Stock finished and in process	6,126,065	6,985,299
Cash and debts receivable	10,438,772	7,581,252
Patent rights	400,000	400,000
Leased machinery, stock and bonds of other companies	19,408,230	23,228,744
Miscellaneous	5,160	5,133
Total	$40,092,026	$42,258,029
Liabilities.		
Capital stock	$20,850,519	$20,850,519
Accounts payable	402,616	411,880
Machinery reserve	296,871	325,830
Surplus	18,542,020	20,669,800
Total	$40,092,026	$42,258,029
Surplus Account—		
Previous balance	$15,914,889	$18,542,022
Earnings for year	5,640,522	5,772,143
Total	$21,555,411	$24,314,165
Paid dividends	3,013,389	3,644,365
Balance March 1	$18,542,022	$20,669,800

The United Shoe Machinery Corporation now has 7,106 individual stockholders, of whom 2,789 are holders of common stock only, and 2,803 are holders of preferred stock only, while 1,514 are holders of both preferred and common stock. The par value of the average holding in common stock is $66.45. The par value of the average holding in preferred stock is $22.06.

carrying a bonus of stock. The Company's plant is situated at St. Timothee, Que., twenty-seven miles from the City of Montreal, and will be in operation early in 1911. Full particulars will be cheerfully furnished upon application.

INTERNATIONAL HARVESTER COMPANY

That charges were made to former Attorney-General Bonaparte during his term of office that the United States Steel Corporation gave refunds of $3 per ton to the harvester combine companies was revealed recently to the house steel trust investigating committee. Representative Stanley of Kentucky, introduced a copy of a report on the harvester trust made to Mr. Bonaparte in 1903 by Mr. Burdett C. Townsend, a special investigator of the department, now assistant district attorney of Oregon.

Mr. Stanley announced that a subpoena had been issued for Mr. Bonaparte, who is now in Canada, and that an effort will be made to ascertain from him and from other government officials why there never was any prosecution of the International Harvester Company upon Mr. Townsend's charges. Mr. Stanley also announced his intention of endeavoring to show a close connection between the United States Steel Corporation and the International Harvester Company and read in the record the names of the directors of both corporations, the same being identical in many instances.

◆

Calgary's municipal lighting plant shows a profit of $67,809 for the six months ended with last month. The total receipts have been $128,527; $80,846 of which comes from the metered light. During the first half of the present year the municipal street railway has taken in $153,446, and the net profit for this period has been $50,171.

Ontario Securities Company Limited

TORONTO - - ONT.

$589,000.00.

City of Ottawa, Ontario.

Debentures for Sale.

Tenders by registered letter only, addressed to "The Chairman Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa, until 3 p.m. on Thursday, 14th September, 1911, for the purchase of $85,000.00 forty-year debentures, $343,500.00 thirty-years and $160,500.00 twenty years.

They are all a liability of the City at large, and bear four per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $73,500.00 thirty year debentures, and the other for the remainder of the debentures, $515,500.00.

All tenders must be on the official form.

The tender for the $73,500.00 must be accompanied with a marked cheque for $1,000.00, and the tender for the $515,500.00 with a marked cheque for $5,000.00.

Accrued interest from 1st July, 1911, must be paid in addition to the price tendered.

The $73,500.00 debentures are in $1,000.00 denominations, principal and interest payable in Ottawa.

The remainder of the debentures will be made in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $73,500.00 can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,
Ottawa, 1st July, 1911. Mayor.

TENDERS.

The Council of the Rural Municipality of Enfield No. 194, are about to issue debentures for the sum of fifteen thousand dollars ($15,000) repayable in twenty (29) equal consecutive annual instalments, with interest at 5½ (five and one-half) per cent., and are prepared to receive tenders for same. Sealed tenders to be in the hands of Secretary-Treasurer not later than first day of August, 1911 (1st. August, 1911).

JOHN A. REID,
Secretary-Treasurer.

GOVERNMENT MAY REMOVE COAL DUTY

Following the request from representatives of the Southern Alberta and British Columbia coal districts, the Government is favorably considering the proposal to remove temporarily the duty of 53c. on bituminous coal. This action, which will probably require legislative sanction, will not be finally decided upon until the Government is sure that no settlement of the strike in the districts involved is possible.

DEBENTURES FOR SALE.

Sealed tenders for the purchase of the following debentures will be received by the undersigned up till 12 o'clock noon, Thursday, August 10th, 1911:

By-law No. 1230. amount $265.500.00, 30-year debentures at 4½ per cent., "To provide for the construction of sewers and sewage disposal plant for the Town of North Toronto."

Coupons attached for interest, payable half-yearly, and a portion of the principal yearly, at the Bank of Montreal, North Toronto.

These debentures are provided for by a general annual levy for 30 years upon the whole rateable property of the town.

Parties tendering must add accrued interest, from the date of the issue of debentures, August 1st, 1911, to the date of payment of purchase money.

The highest or any other tender not necessarily accepted.

H. E. STEVENSON,
Town of North Toronto, July 28, 1911. Treasurer.

Calgary's civic-owned street railway will show a profit of 100 per cent. this year. The revenue for the first six months of 1911 amounted to $149,437. After deducting expenses a net profit of $49,705 was left.

HINTS FOR THE LIFE INSURANCE FIELD MAN.

The following is some advice given to the agents of the Prudential Life Insurance Company of Winnipeg, in the company's monthly journal:—

Don't telephone. That helps a man to turn you down. Don't write letters. There is nothing like a short personal interview. Don't wait to see a man who is busy. There are prospects just as good next door. Don't waste your time with doubtful risks. Your time is valuable and rejections are painful both to yourself and to the applicant. Don't take notes from minors unless endorsed by a responsible party.

Don't quit work in the afternoon till you've seen one or two more. Get the idea that you can and will do business as well as any one else, and the business is yours. Think about being energetic and aggressive and you unconsciously add vim to every step. Let certain suggestions find lodgement in your mind, and you know that corresponding actions will follow. Learn to concentrate your mind upon one subject at a time. Do the thing; make yourself get down to business. It is not difficult if you try hard enough, but it isn't easy if you don't.

Everything that genius has produced or invented for the convenience of man has been put on the market largely through the salesman. Salesmanship makes great, splendid, practical men, and these men have made salesmanship a great profession; the two things go together. Go into the profession with the crude material and you come out a master. The crude material is always there. Every man has within him enough to make him rich if he can only find it, and can always find it if he becomes an active, energetic salesman. One of the sad things in the profession, and in every profession and calling, is the man who drops out by the way just before the turn in the road, just before the dawn, when success is within his grasp, when he is within hailing distance of the goal. A little more faith, a little more enthusiasm, a little more backbone, a little more headwork—real, genuine headwork—and the salesman finds himself and realizes that he is a salesman.

CAPITALIZATION OF UNITED STATES RAILWAY PROPERTY.

The par value of the United States railway capital outstanding on June 30th, was $18,417,132,238. Of this amount, $14,338,575,940 was outstanding in the hands of the public. Of the total capital outstanding, there existed as stock $8,113,657,380, of which $6,710,168,538 was common and $1,403,488,842 was preferred; the remaining part, $10,303,474,858, represented funded debt, consisting of mortgage bonds, $7,408,183,482; collateral trust bonds, $1,153,499,846; plain bonds, debentures, and notes, $933,966,704; income bonds, $290,951,276; miscellaneous funded obligations, $163,531,972; and equipment trust obligations, $353,341,578.

Of the total capital stock outstanding, $2,701,078,923, or 33.29 per cent., paid no dividends. The amount of dividends declared during the year (by both operating and lessor companies) was $405,771,416, being equivalent to 7.50 per cent. on dividend-paying stock. No interest was paid on $790,499,252, or 7.94 per cent. of the total amount of funded debt (other than equipment trust obligations) outstanding.

◆

The Union Bank of Canada has opened a branch at Brampton, Ont.

On Aug. 7th the Quebec Bank will open a branch at Vancouver with Mr. G. S. F. Robitaille as manager.

The amount of gold held by the Finance Department at Ottawa on June 30, 1911, was: British sovereigns, $5,867,913; United States gold coin, $77,642,009; bullion (mint bars) $222,934; total, $83,732,856.

Owing to an informality in the organization of the Banque Internationale of Montreal, the proceedings will have to be all gone over again, which will delay the opening of the bank for nearly a month. One of the Paris financiers who was elected a director could not qualify because he was not personally a shareholder—though the subscription for a large number of shares was made in the name of his firm. The minister of finance has given this ruling.

ACCIDENTS IN THE UNITED STATES.

For the first three months of this year there were 146 persons killed and 3,228 injured in train accidents. Accidents of other kinds bring the total number of casualties, not including "industrial accidents," up to 18,554 (2,124 killed and 16,430 injured). Of this number, there was a total of 706 employees killed and 10,974 injured, being a decrease of 229 in the number killed, and also a decrease of 2,908 in the number injured. Accidents resulting in slight injuries are not included in the figures given.

Comparing the figures with those of a year ago, there is a considerable decrease in the number of passengers killed in train accidents, being from 110 to 28; the explanation is the records in 1910 show there were 51 passengers killed by an avalanche and 45 killed as a result of a derailment.

◆

CROP PRELIMINARY ESTIMATE.

A cablegram received from the International Agricultural Institute at Rome gives preliminary estimates of 1911 wheat harvest as follows: Belgium, 14,054,000 bushels, compared with 12,449,000 last year; Hungary, 173,886,000, compared with 198,484,000; Italy, 196,579,000, compared with 153,339,000; Spain, 154,437,000, compared with 137,449,000; Roumania, 121,710,000, compared with 110,828,000; Great Britain, 61,351,000, compared with 58,235,000 in Great Britain and Ireland. Conditions in Russia satisfactory. —

Mr. A. C. Flumerfelt, of Victoria, has become a director of the Miner Rubber Company, which has planned to take advantage of the growing trade in Western Canada. He is also a member of the board of Cassidy's, Limited, and is securing options on desirable sites for a large warehouse to accommodate a branch which this company will establish in Vancouver.

Professor T. R. Robinson, of the South Eastern Agricultural College, in Kent, England, recently stated in Saint John, N.B., after a tour of Canada, that he would prefer the Annapolis or Saint John River Valley for fruit farming rather than farther west. The land is as good, and cheaper, the climate is as favorable and the British market nearer.

RAILWAY MILEAGE IN UNITED STATES

On June 30 there was a total single-track mileage of 240,438.84 miles in the United States, indicating an increase of 3,604.77 miles over the corresponding mileage at the close of the previous year. An increase in mileage exceeding 100 miles appears for the States of California, Florida, Georgia, Minnesota, Mississippi, Nevada, Oklahoma, Oregon, Texas, Washington, and West Virginia, and the Territory of Arizona.

Returns were rendered to the Commission for 240,830.75 miles of line operated, including 10,357.19 miles used under trackage rights. The aggregate mileage of railway tracks of all kinds covered by operating returns was 351,766.59 miles. This mileage was thus classified: Single track, 240,830.75 miles; second track, 21,658.74; third track, 2,206.39; fourth track, 1,488.78; yard track and sidings, 85,581.93 These figures indicate an increase of 9,415.35 miles over corresponding returns for 1909 in the aggregate length of all tracks, of which increase 3,205.30 miles, or 34.04 per cent., represent yard track and sidings.

The number of railways for which mileage will be included in the report is 2,196. In addition, 301 switching and terminal companies reporting to the Commission show a total mileage owned on June 30, 1910, of 3,884.62 miles, of which 1,614.21 miles were assigned as main track and 2,270.41 as yard track and sidings. During the year railway companies owning 8,614 miles of line were reorganized, merged, or consolidated.

The Prudential Investment Co., Ltd.

Head Office - VANCOUVER, B.C.

Authorized Capital	$2,000,000.
Subscribed Capital	$1,000,000.
Assets of over a Million Dollars.	
Paid-up Capital	$670,000.00.
Reserve	$250,000.00.

Owing to the fact that the ordinary stock of the company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchanges, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C.; or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

THE GREAT-WEST PERMANENT LOAN COMPANY

Head Office - WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. D. Martin, Esq., Wholesale Druggist, ex-President Winnipeg Board of Trade, Director The Canada National Fire Insurance Company; James Stuart, Esq., President James-Stuart Electric Company; E. L. Taylor, Esq., Barrister-at-Law, Second Vice-President Monarch Life Assurance Company, Director the Canada National Fire Insurance Company; F. H. Alexander, Director The Canada National Fire Insurance Company, Secretary.

CEDAR RAPIDS POWER COMPANY

Mr. Henry Holgate, C.E., has become president of the Cedar Rapids Power Company, and has severed his connection in the firm with which he has been so long connected, namely, Messrs. Ross & Holgate. Mr. Ross continues the business.

The Cedar Rapids are located about thirty miles up the St. Lawrence River from Montreal. The site which has been secured by the company is on the north bank of the river, a short distance above the present development at the Soulanges and Beauharnois canals which belong respectively to the Montreal Light, Heat & Power Company and the Canadian Light & Power Company. The critics of the Cedar Rapids proposition point out that it has for years been available and that just previous to Mr. Lorne McGibbon's acquisition of it, the Montreal Light, Heat & Power Company had it under option.

Mr. Holgate was the chief of the Commission appointed by the government to inquire into the Quebec Bridge disaster. He has paid considerable attention to power and navigation and more especially to the St. Lawrence river itself, having been interested in the Longue Sault dam project. He has constructed some of the largest and most effective water-power plants in Canada, and is an engineer of repute and high standing.

In drawing plans for the Cedar Rapids development he is paying particular attention to the interests of navigation and not only will the new works not interfere with navigation, but by throwing a greater quantity of water into the river channel, will have a beneficial influence upon it. As to frazil ice, the enemy of water-power plants in low temperatures, he thinks that in this development the danger will be reduced to a minimum, if not entirely eliminated. Plans are now being prepared as rapidly as possible. It is expected that 50,000 H. P. will be available out of the first development.

The Nelson board of trade will oppose the request of the Vancouver board of trade for lower freight rates, unless Nelson is given a similar concession.

Mr. W. P. Reid, secretary of the National Finance Company, Limited, Vancouver, B.C., has gone to Banff, Alta., for a vacation, after which he will proceed to Regina to inspect the company's office there.

At a recent meeting of directors of the Bank of Toronto, Colonel Frank S. Meighen, of Montreal, the new president of the Lake of the Woods Milling Company, Limited, was elected to fill the vacancy on the board caused by the death of his father, the late Mr. Robert Meighen.

According to Mr. W. W. Ashald, superintendent of Grand Trunk telegraphs, Montreal, the company will adopt in the near future the despatching of trains by telephone over its entire system, displacing the telegraph for this purpose.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of June, 1911, incorporating, James Stelier Lovell, accountant, William Bain, book-keeper, Robert Gowans, Henry Chambers, William George Flood and Robert Musgrave Coates, solicitor's clerks, Samuel Goodman Crowell and George Hamilton Cassells, solicitors, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of a packing house in all its branches, and to pack, smoke, preserve, can, bottle and prepare for consumption and use, and to buy, sell and deal in all and any products of cattle, sheep, hos, and other animals, and all the by-products thereof; (b) To buy, sell, import, export, improve, prepare, deal and trade in cattle, pigs, poultry, fish, game and live and dead stock of every description, milk, cream, butter, cheese, eggs, sausages, table delicacies, vegetables, fruits, canned and preserved goods and any other commodities, goods or things; (c) To kill cattle, sheep, hogs and other animals, and generally to carry on the business of an abattoir company; (d) To carry on rendering establishments, tallow chandleries and sausage manufactories; (e) To carry on the business of cheese, butter, provision, vegetable, fruit, meat and general supply merchants, butchers, grocers and general provision merchants and dealers; (f) To establish, operate and conduct shops for the sale of all the articles manufactured and dealt in by the company, and any other goods, wares, or merchandise which may be advantageously dealt in, in connection therewith; (g) To carry on the trade or business of wholesale warehousemen, including the furnishing to others of both cold and dry storage facilities; (h) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights an interests therein, and to build upon, develop, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell o otherwise deal with or dispose of the same; (i) To purchase o otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (j) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations, and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on or any business similar thereto, or possessed of property suitable for the purposes of this company' business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company' capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (l) To raise and assist in raising money for and to aid by way of bonus promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (o) To amalgamate with any other company having objects similar to those of this company; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any companies; (q) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking (r) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The William Davies Company, Limited," with a capital stock of two million dollars, divided into 20,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 28th day of June, 1911.

THOMAS MULVEY,
Under-Secretary of State.

VOLUME OF WORLD'S TRADE

Some interesting statistics of the growth in trade during the past forty years are given by M. Levasseur in an article in a recent issue of "L'Economiste Francaise," from which we take the following table:—

	Commerce in 1869 and 1909, given in million Francs.		Increase per cent between 1869 and 1909.	Amount of foreign trade per head. Francs.	
	1869.	1909		1869	1909
United Kingdom	12,229	25,078	105	397	545
German Empire	6,967	18,890	...	...	..
United States	4,100	16,614	303	106	196
France	6,277	11,964	90	164	304
Holland	1,743	11,111	537	471	1,898
Russia	2,415	4,968	105	35	31
Italy	1,742	4,978	128	65	144
Brazil	980	4,623	371	16	225
Austria-Hungary	2,100	4,653	115	59	90
India and Ceylon	2,120	5,292	149	10	17
Argentina	324	3,500	980	186	573
Switzerland	....	2,699	...	...	...
Canada	742	2,941	269	179	423
Australia	1,606	2,852	77	823	599
Japan	109	2,602	2,287	3	40
China	483	2,550	430	1	7
Mexico	174	2,456	1,311	19	180
Spain	607	1,856	205	57	92
Sweden	396	1,627	310	96	297
Denmark	386	1,414	266	214	543
Norway	239	911	281	140	406

In 1869 France came second in the rank of commercial nations with about half the figures of England. Germany's commerce (the figures given in the table refer to 1872) was probably about the same level as that of France. The United States commerce in 1869 was about two-thirds that of France. A great change has come in the 40 years' interval. France has fallen to the fourth place, coming after England, Germany and the United States. Although French commerce almost doubled, it is still about half that of England. Germany, however, has gone ahead 7 milliards and the United States nearly 5 milliards. The great increase of Holland is only in figures, because it consists principally of goods in transit, and it has been impossible to separate these from trading proper.

◆

A CORRECTION

In our issue of July 15th, under the heading of Winnipeg Stock Exchange, it is stated that a feature of the trading was the advance of Northern Trust shares to 160. This should read Standard Trust Company's shares, and we regret the error. The Northern Trust shares have never reached a higher plane than 130 although 135 has been asked but not bid.

◆

COBALT ORE STATEMENT.

The following are the Cobalt ore shipments, in pounds, for the week ended July 21st: La Rose, 247,510; McKinley-Darragh, 125,620; Chambers-Ferland, 64,000; Cobalt Prov., 61,160; Coniagas, 63,680; O'Brien, 64,210; Nipissing, 65,870; Buffalo, 58,300; Trethewey, 66,440; Kerr Lake, 60,270; Crown Reserve, 62,000; total, 939,060 pounds, or 469 tons. The total shipments since January 1st are now 27,248,664 pounds, or 13,624 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

UNITED STATES STEEL CORPORATION.

The quarterly statement of the United States Steel Corporation for the three months ending June 30th, gives earnings for that period of $28,108,520, and net earnings of $21,839,840. These figures compare with $23,591,203 and $20,001,817 net for the previous quarter, and $40,170,960 and $33,880,755 net for the corresponding quarter of 1910. Earnings for the corporation for the first six months of the year were $51,627,723, as against $77,787,836 for the same period last year.

The surplus net income for the last quarter amounts to $13,869,177, which compares with $31,155 for the previous quarter, while that same item at the end of June last year amounted to $13,910,093.

THE CHIEF DIFFICULTY
that confronts the new man entering the Life Insurance Field is the securing of GOOD PROSPECTS. This difficulty is eliminated when you write for an INDUSTRIAL COMPANY, the debits of which are an inexhaustible mine for both ordinary and industrial business.

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to Intending Investors, large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

STANLEY MINERAL SPRINGS COMPANY, LIMITED.

The Stanley Mineral Springs Company, Limited has been organized to take over the assets of the old company including the mineral springs property, business and good will, for the sum of $63,114 cash, which price is to be reduced as between the two companies by the amount of stock subscribed in the new company by shareholders of the old company, on the basis of the prospectus equivalent to the cash invested by them in the old company.

The Company is making a present issue of one thousand 7 per cent. cumulative preference shares plus 50 per cent. of common shares at $100 per share of the preference stock. There is a growing demand for table waters, and the geographical situation of the spring enables the water to be sold profitably in Eastern as well as in Western Canada. The water at Stanley Springs has been proved to be a water of remarkable purity and to possess all the delightful and healthful properties of the ideal table water. It is bottled only at the Stanley Springs, the company's plant being equipped with the most modern bottling machinery, and is considered one of the finest mineral water plants on the continent.

The head office of the Company is in Winnipeg, Man., and a branch office will be opened in Toronto, Ont., in January.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.
